EU-049. Just a reminder that Fred, PA1FJ, will once again be active as SV8/PA1FJ/p, but this time from the Chios Island (GIOTA NAS-002, MIA MG-025, WLOTA 4103) between August 29th and September 9th. Activity will be on 40-6 meters using CW and SSB and CW. Fred will operate QRP using a FT-817 with a Buddi-Stick/HighEndfed antenna. QSL is preferred via the Dutch QSL Bureau (Box 330, NL-6800 AH Arnhem, The Netherlands).

EU-078. Operators Manel/EA3EGB and Gabriel/EA3AKA will be active as EF3EGB from Medas Island (WFF EAFF-189, DIE E-001, FEA E-0472, WLOL SPA-161 and WLOTA-0793) between August 30th and September 2nd. Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are listed on QRZ.com. QSL via EA3EGB direct only; by the Bureau "ONE YEAR LATER".

EU-106. Operators Derek/G3KHZ and Steve/G4EDG will once again activate St. Tudwal's West Island (EU-106) sometime in September around the 6th, for 3-4 days. It was last activated in May of 2006. This is a privately own island, and the owner has not allowed anyone to visit. The expected callsign will be GW3KHZ/p, and this will be a CW operation only. QSL via G3KHZ.

NA-119. Operators Mike/AB5EB, Dragan/K0AP and Hector/XE2K/AD6D will be active as K5T from Timbalier Island, in the Louisiana State Centre (Terrebonne Parish) Group, between October 11-13th. Activity will be on the HF bands using CW and SSB. QSL via AB5EB, direct or by the Bureau.

OC-108. It has now be confirmed that a DXpedition to Anambas Island will take place between September 15-20th, after the YE5S/YE5T activity (see OPDX.1121). No other details have been provided.

OC-197. The plans of YB3MM/P from Bawean Island on August 24-25th has been CANCELLED due to weather problem (no ship).

OC-275. (New IOTA) Operators Budi/YF1AR, Fan/YB0AI, Bimbo/YB3MM and Joppy/YB8XM will be active as homecall/9, while operators YC9XOZ, Joni/YB9WZJ and Lucky/YD9RQX will be signing homecall/p from Kimaan Island (ARLHS IDO-148) in the South Papua Coastal IOTA group between September 10-16th. This island has never been activated before. Activity will be on 40-10 meters using mainly SSB, but with some CW and the Digital modes. A special QSL card will be designed. QSL YF1AR/9 via N2OO. QSL all others via their

home callsign. For more details and updates, see:
http://www.yf1ar.com/2013/08/oc-275-south-papua-coastal-new-iota.html

IOTA PACIFIC TOUR CONTINUES (Update). Ralph, H44RK, continues to be active as H40IOTA from Temotu Province on Swallow Islands (OC-065). Activity has be on 40/20/15 meters SSB. Reports indicate that he hopes to be active from the "Vanikolo and Utupua Islands Group" (OC-163) during or within the next week once a suitable QTH is found. His length of stay is not known, but after his OC-163 operation, Ralph will head to Vanuatu (YJ) and operate as YJ0RK as well as activate a few more IOTAs. The "DX-World.net" reports that he will activate Torres (OC-110) and Banks (OC-104). No set dates on the YJ-IOTA activations, but the "SV Hafskip" will be sailing Vanuatu waters for the next 2 months, then heading to New Caledonia. QSL H40IOTA and YJ0RK via NR6M.

J3, GRENADA (Update). Operators Clarence/WX7E, Ron/WJ7R, Mike/W7RIS, Mike/W7MJJ, Terence/KS5Z and possibly two more operators are planning to be active from Grenada (NA-024, WLOTA 0718) during the CQWW DX SSB Contest (October 26-27th) as a Multi-2 entry. They are still working on the callsigns and licensing. Clarence, WX7E, informs OPDX that they will be arriving on Wednesday evening, October 23rd, which gives them two days to get everything ready. They will be staying for three days after the contest to look around the island. The team will work 160-10 meters during the contest. Activity before the contest on Thursday and Friday will probably be on CW - most likely on 40, 20, 15 and 10 meters. QSL via LoTW.

J3, GRENADA. Operators Takayuki/JA1MZL (Team Leader), Yutaka/JJ1LIB, Nao/JN1RVS, Masayuki/JN3NFQ and Isao/JH1ROJ will be active from Grenada (NA-024, WLOTA 0718) between November 21-29th. The callsign for the contest and non-contest activity to be determined. Activity will include the CQWW DX CW Contest (November 23-24th) as a Multi-? entry. Activity outside of the contest will be on 160-10 meters using CW, SSB and the Digital modes. QSL via JA1HGY. Log will be uploaded to ClubLog and a OQRS will be available after their DXpedition. Log will be uploaded at a later day for LoTW. Also, Web page is in the works and will be soon announced.

JY, JORDAN. Jovica, E78A (ex-6W1SJ, 9K2/T94FC, ST0RM, ST2A, T94FC, T98A, TT8JT) is now active as JY9FC from Amman. Jovica has been working in Amman for the UNHCR (United Nations High Commissioner for Refugees) for almost two years but just received his license. Most likely he will stay there for another three years. As during his previous activities, activity will be during his free time mostly on CW with some SSB and Digital operations. QSL via E73Y: Boris Knezovic, P.O. Box 59, 71000 - Sarajevo, Bosnia and Herzegovina, or via E7 bureau. Clublog OQRS will be activated after first logs are received from Jovica.

PJ2, CURACAO. Sivano, IW1FC, is now active as PJ2/IW1FC from Curacao Island (SA-099) until August 30th. Activity so far has been on 20 and 10 meter SSB. QSL via IZ1MLQ.

LoTW SOFTWARE UPGRADE. It was announced on August 21st, that the
"Trusted QSL 1.14.3" is now publicly released and available at:
http://www.arrl.org/trusted-qsl-download
Also announced, "Trusted QSL 2.0" is now in Beta test and available
at: http://www.arrl.org/trustedqsl-beta-release
The "TQSL 2.0" release notes are available at:
http://www.arrl.org/files/file/TrustedQSL-Beta/TrustedQSL-2-0-release.pdf

QSL RECEIVED VIA LoTW: 5W1SA, CO7WT, DJ8QP, DS2XUM, EA7IPP, HS0ZEE,
HV0A, JD1BHA, P29NO, SA6G/7, TA2/DL7BC, ZK3N and ZL6LH

QSLS RECEIVED VIA MAIL: FO/UT6UD

QSLS RECEIVED VIA THE BUREAU: RN3DN, R7AA and Z81X

S2, BANGLADESH. Rana, S21R, is once again operating from Dhaka, but this
time for one month. Activity so far has been on 20 meters SSB, but his
QSL Manager will be encouraging him to operate on other bands as well.

Rana will operate with 100 watts and an Inverted V. QSL via his manager Larry, N4VA.

T32, EAST KIRIBATI. Tim, NL8F, will be active as T32TM from East Kiribati between November 27th and December 11th. However, during his second week there he may possibly join up with the T32RRC team. More details on this is forthcoming. QSL via K8NA.

TX5, AUSTRAL ISLANDS (Update). Operators Grant/KZ1W and Rob/N7QT will be operating as TX5D from Raivavae Island (OC-114) on an Elecraft/SteppIR/WWDXC sponsored DXpedition between October 2-14th. They will be using the new CrankIR portable antenna system from SteppIR, as well as Elecraft K3 transceivers and KPA500 amplifiers. Their operational base will be two bungalows located on the north side of Raivavae Island, and less than 20 feet from the Pacific Ocean. Activity will be on 80-10 meters using CW, SSB, RTTY and PSK. Log will be updated daily to Clublog <www.clublog.org> with QSOs data/history; internet bandwidth permitting. QSL available via LoTW, eQSL, by the Bureau, or direct (SASE + IRC).

V6, MICRONESIA. Operators Hiroo/JA2VWG and Seihachi/JA7LU will be active as V63DDD and V63LU, respectively, from Pohnpei Island (OC-010) between September 4-16th. Activity will be on 40-6 meters using SSB and RTTY. QSL direct only to their home callsigns (see QRZ.com for details). No Bureau QSLs.

VP9, BERMUDA. Operators George/K3GP, Ray/ND8L and Jamie/WW3S will be active as VP9/homecall from Ed/VP9GE's QTH between September 26-30th. QSL via their home callsigns, direct or LoTW. Their activity will include an entry in the CQWW RTTY DX Contest (September 28-29th) as VP9I. QSL VP9I via WW3S only. Outside of the contest and conditions permitting, look for them on all bands, but with an emphasis on the 30/17/12 meter bands.

XZ, MYANMAR. It was reported by a few sources that Zorro, JH1AJT, who was active as XZ1X from Nay Pyi Taw last week and was expected to return in September, has now postponed his return until October/November.

XZ, MYANMAR. "DX-World.net" reports/indicates that "a 'multi-national DXpedition' to Myanmar is being planned. No firm word on dates yet, but an announcement will be made very soon."

YJ, VANUATU. Tug, JA2ZS, will lead a team of four JA operators and will be active as YJ0ZS from the Iririki Island Resort, Port Villa, between November 1-11th. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via JA2ZS. No other details were provided.

YN, NICARAGUA. Mike, AJ9C, will once again be active as YN2CC from Granada, Nicaragua, between November 19-27th. Activity will be on 160-6 meters using CW, SSB and RTTY. Also, Mike will be in the CQWW DX CW Contest (November 23-24th) as a Sinlge-Op/All-Band/Low-Power entry. QSL via LoTW or direct to his home callsign.

ZD8, ASCENSION ISLAND (Update). Operators Oliver/W6NV, Olof/G0CKV and Jorma/OK2KI will be active as ZD8W, ZD8M and ZD8X, respectively, from Ascension Island (AF-003) between November 19-21st. Activity will include the CQWW DX CW Contest (November 24-25th) with each operator as a Single-Op/Single-Band entry: ZD8M on 40m, ZD8W on 15m and ZD8X on 10m. Look for activity outside of the contest on the HF bands and 6 meters. QSL via their home callsigns.

I think you are still OK. E44PM was just spotted on 14.275 MHz. I worked him a few days ago on 20 CW and he confirmed it that evening on LoTW.

Good luck, Dale!

I don't know how anyone else feels, but I am not at all comfortable with business advertising going out on this list on a regular basis. It strikes me as inappropriate.

That is an observation, not a complaint.

Yahoo's web interface seems to be down now. I was going to check the group description, which specifies the policy for this group. I know we eschew political or religious statements, and I believe we ask members to avoid selling personal items (i.e. this is not a Swap Shop.) Not sure if we mentioned commercial items.

Regardless of what the policy is, I generally agree. We don't really need business advertising here. What we do need is participation in DX discussions. When VE1AL was alive he was always starting threads, etc. Seems like since he went SK this spring, the list has lost its spark. There are a lot of lurkers and we get requests for new member approval fairly often, but there seems to be little DX discussion. Take out the automated DX and propagation bulletins and there isn't much left. Al could always be counted on to point out a controversial topic . . .

I attribute the decline to 2 things. (1) After its existence since ~1997, original members have expressed their views 18 times on every DX related topic, and there is little more to say. (2) There are many, many specialized lists dedicated to every rig, amp, logging package, etc., made. Every DXpedition has a web site and usually a blog. Hence users can be very specific and subscribe to lists that target their interests.

What more are we going to discuss here? Is full QSK better than semi break-in? (Beat that to death!) Why do 3s keep calling when the DX is asking for 5s? (Beat that to death!) Why can't the VK0 hear the East coast on 160m? (Beat that to death!) Are DXpedition Leader Boards useful (Beat that to death!)

So yeah, we could ban commercial ads. I'd rather find DX topics to discuss, but perhaps we've discussed them all. Maybe there simply is nothing left to say.

Did anyone notice the current solar cycle is the worst since the invention of radio? It is, and my holes on 12/10 are not getting filled as I had hoped. I'd liked to have worked some 6M F2 DX. :-(

21540. New DXCC entity status

Yahoo group: DX-IS (2013)
Date: 2013-08-28 13:39:19 UTC
From: Brian Alsop
Topic: 21540 Message: 21540

Here's a suggestion that would make newer DXCC chasers happy.

It would help level the playing field again by acknowledging among other thing, they couldn't work an entity if they were not born yet.

How about creating rule change.

This would allow deleted entity credit if one could show the station worked was geographically in the deleted entity area.

While that would inflate someone's actual totals... since the Deleted Entities do not count for Honor Roll, this change would not help those seeking HR at all.

I could also see an administrative nightmare. If a new DX'er works, for example, an OK station, does he count it (under this proposed rules change) as Czech Republic or Czechoslovakia (Deleted)?

No, I don't think this is a good idea.

Hi Ron,

Deleted countries are included in the DXCC standings listings. The top right now for mixed is 394.

If you read the book on W6AM you will see that this is precisely what the ARRL did in the old days. You'd submit a card with sufficient geographical info and ARRL would try to figure what DXCC country it was in. So many of the "delete" credits of today may in fact have been subject those administrative procedures.

I agree in theory it could be administrative nightmare.

I'm not sure in this day and age it would be too difficult to set up tables of delete country boundaries (about 55) and confirm a particular city on a paper QSL was within those boundaries. Four character grid square may not be unambiguous enough. Six digit grid square may be sufficiently precise. So LOTW could potentially also grant such credits. Deleted countries already are present in LOTW.

I think it does get back to the original question, though. I work a station in Berlin, does it count for FRG (present Germany) or DDR (deleted East Germany), or both? If not both, then I could work 2 stations next door to each other and count them for separate countries.

It is also interesting that both Palestine and South Sudan are on the deleted countries list AND the current countries list.

From: Ron Notarius W3WN
Topic: 21540 Message: 21549

And that is the problem in a nutshell.

Certain geographic areas of the world have counted as more than one entity for any of a variety of reasons.

And we take DXCC much more "seriously" than was often done in the old days, for a large variety of reasons (many of which have to do with two names of infamy -- amongst many -- ie, Dr Don Miller and Romeo). That doesn't mean that the "old days" were wrong... just that the times were different.

I'm all for constructive discussion on how to activate some of the rarer entities, or increase activity on some of the semi-rare ones. I'm not all that thrilled with (what appears to me, at least) artificial ways to increase counts. This may be a "game" to some, but the ultimate goal is who you've worked & how you worked them... not neccesarily a high number.

Oh, and to respond also to something mentioned in a different thread... There are current entities that have names similar to or the same as deleted ones (Germany & Palestine being the two most obvious ones) but that doesn't mean that they are the same entities. Let's not confuse things even more by mashing things up.

I'd also like to point out that the Diamond DXCC Challenge Award already had identified some current stations in what are now classified as "deleted" countries.

Some examples: Goa, Ifni, Newfoundland, British Somaliland, Italian Somaliland.

It's the instant gratification thing. I'd like to add my CW P5 QSO because although the op wasn't actually in North Korea he might have been able to see it from a tall tree where he actually was (well, they do this with lighthouses - you only have to be able to see one, not be in it).

If you want to collect lots of stuff you can always play IOTA -

Well, the Romeo thing was WRONG period. He didn't operate from the country. The time had nothing to do with it. Germany was once Germany split then became the same Germany as before. I believe ST0 was then was taken over then got independence again. IMHO these amongst others were done to keep people from the large numbers of totals.

That being said, If we are to start giving away deleted countries then what is there to compete for? Country A is being taken over by country B and even though I need it I don't have to worry. I can get it later. REALLY?

This world has been dumbed down enough and continues to be dumbed down. I don't have this give it to me. No I don't want to work for it just give it to me. Yes, no code. Tests too hard, make them easier. Heck let's do away with tests. Don't need them and while we are at it since later someone will cry about having to send in an application electronically, we all know how hard that is, do away with licensing altogether.

Subject: Re: Re: [DX-IS] New DXCC entity status

And that is the problem in a nutshell.

Certain geographic areas of the world have counted as more than one entity for any of a variety of reasons.

And we take DXCC much more "seriously" than was often done in the old days, for a large variety of reasons (many of which have to do with two names of infamy -- amongst many -- ie, Dr Don Miller and Romeo). That doesn't mean that the "old days" were wrong... just that the times were different.

I'm all for constructive discussion on how to activate some of the rarer entities, or increase activity on some of the semi-rare ones. I'm not all that thrilled with (what appears to me, at least) artificial ways to increase counts. This may be a "game" to some, but the ultimate goal is who you've worked & how you worked them... not neccesarily a high

number.

Oh, and to respond also to something mentioned in a different thread... There are current entities that have names similar to or the same as deleted ones (Germany & Palestine being the two most obvious ones) but that doesn't mean that they are the same entities. Let's not confuse things even more by mashing things up.

I don't see how this "levels" anything.

The entities on the Deleted list are there because they WERE valid entities AT THE TIME the station worked them... but for any of a number of reasons, no longer qualify or no longer exist.

How does this help anyone working towards DXCC or related awards? The award is earned by working 100 entities... that were entities at the time you worked them.

Working a deleted entity after it's been removed from the active list? Just doesn't make sense.

Sorry, I'm not buying it. An confirmation qualifies if the entity in question was a valid, active entity at the time you worked it -- not before, not after.

One may argue that it's not "fair" -- but what is? And more importantly, who ever said that it had to be "fair"? The rules need to be consistent, not changed on a whim.

“Back in the day” I dimly recall that it was possible to work a single station for 2 countries. I think one was on SM/OH border maybe, and one on a “shared” island in Pacific, maybe VR1/KB6.

Funny, I was just involved in a thread over on the QRZ.COM DX forums on this very subject.

I'm all for adding Kosovo to the list.

Fine me a logical way to do it within the rules, and I'll back you up to the hilt.

Or come up with a logical way of adding it, via a modified rule or new rule, that
(a) passes muster with the DXCC Desk and the DX Advisory Council, and possibly the IARU member societies, and
(b) Doesn't open up more loopholes for the artificial creation of entities that don't really exist (in other words, no more "soverign nations" that are nothing more than an office building or headquarters for a long-lived society)

Lots of people want to see Kosovo count. But no one seems to be able to come up with a way to do it that doesn't break the system.

And the system isn't broken (just needs a tweak here or there), so let's not start there.

Ron,

Maybe you don't buy it. That's OK.

I don't buy the argument that deleted countries should be counted or tracked in any way. If they are deleted, delete them.

What I am proposing would certainly have the effect of increasing activity.

There are few DXer's around who have worked all deleted entities.

It proposal has already had an effect. It has generated some discussion on DX-IS.

BTW, it is a little known fact that deleted countries can count towards DXCC. My 6M DXCC application squeaked by due to some PJ deleted entity.

Here is the text from the ARRL website.

Deleted Entities

This is a list of all 61 Deleted DXCC entities on the ARRL DXCC Entities List. The ARRL DXCC List publication is available from the ARRL Publication Department for $5.95 plus shipping. To order this publication please visit the ARRL Store.

Effective April 2, 2012 DXCC card checkers are authorized to check all current and deleted entities. Verification of cards for 160 Meters is restricted to card checkers who have a current 160 Meter DXCC award.

Note: While no longer current, the entities on this list can still be used towards the DXCC awards noted in Section I rule 1 (a-q). Deleted entities do not count towards the Honor Roll, 5 Band DXCC and the DXCC Challenge.

This also brings up the issue of KP1, among other entities. Navassa hasn't been actived since 1993. Used to be fairly active and a chip shot from the US. I know because I worked the last KP1 activation when I was using a Heathkit SB102 and an indoor dipole. They must have been running simplex since I didn't have an external VFO for the 102.

Anyone who became active after 1993 has no chance of making it to top of the honor roll. How could we level that playing field?

Deleted countries count towards total numbers, yes. They do NOT count towards honor roll. Big difference. DXCC has always been a longevity award. It is more impressive that one has DXCC #1 Honor roll.

Having 390 confirmed just says you have been at it for many many many years.

21562. Re: [DX-IS] New DXCC entity status

Yahoo group: DX-IS (2013)
Date: 2013-08-28 17:28:27 UTC
From: Zack Widup
Topic: 21540 Message: 21562

That's just the way it is. I wasn't around to work people using spark gap transmitters. I missed out on that. I wasn't around to work Maria Theresa Reef. I missed out on that. I didn't get to go to Woodstock (even though I was old enough to have done so). I missed out on that.

Some people were around when the deleted countries were active and got to work them. All that says is that they were active DXers then. I got to work Canal Zone, Swan Island, Penguin Island, Walvis Bay. Those don't count toward my Honor Roll total. They do show up in my grand total, which just lets someone know I was probably DXing in the late 60's and early 70's.

The proposed rule would certainly create a flurry of activity, trying to activate Swan Island, Roncador Cay, Baja Nuevo, Maria Theresa Reef (if it existed), etc. I don't know if that is a good thing. Carl N4AA has been discussing more activity from the countries in the 50 to 100 slots of his Most Needed Countries list. I think it is a good idea to concentrate a little more on those entities, myself. I don't have Bouvet but I don't see that one happening really soon. But I'm missing 80 meters and other bands for a lot of those 50 to 100 in the needed countries list.

21563. Re: [DX-IS] New DXCC entity status

Yahoo group: DX-IS (2013)
Date: 2013-08-28 17:31:46 UTC
From: Zack Widup
Topic: 21540 Message: 21563

I worked Navassa in 1993. I only worked them on a couple bands, on CW. I've been told by people who have scouted the island that the platform used to access the island and haul up equipment in 1993 is now gone. That makes it a much more expensive proposition. Access will have to be by helicopter instead of by boat. So even if permission is given, someone is going to have to amass the funds to get to go there.

I find it interesting that 7 of the top 25 (2013) needed countries have
a K prefix. Who do we blame for that?

21565. Re: Re: [DX-IS] New DXCC entity status

Yahoo group: DX-IS (2013)
Date: 2013-08-28 18:04:53 UTC
From: Ron Notarius W3WN
Topic: 21540 Message: 21565

Brian,

I think you're still missing the point that Deleted Entities only count if they were active at the time they were worked.

In other words, if it was an Entity (or Country) at the time of the QSO, it counts THEN.

Otherwise, if it took a few months or even years for the confirmation to arrive (as it often did in the days before computers & LotW), it still counts.

But activating TODAY an entity that was deleted years ago? No, sorry, that makes no sense.

I still think we should concentrate our efforts on activating existing ones, not trying to resurrect the ghosts of old ones.

On 08/28/13, Brian Alsop wrote:

Ron,

Maybe you don't buy it. That's OK.

I don't buy the argument that deleted countries should be counted or

tracked in any way. If they are deleted, delete them.

From: Ron Notarius W3WN
Topic: 21540 Message: 21566

Who says we should?

I'm sorry I missed KP1 during it's last activation (who expected it to be so long, after all?) but I did. Them's the breaks.

Let's not play games with what "Honor Roll" or "Top of the Honor Roll" means. Otherwise, it means NOTHING.

To quote a movie line: "Once EVERYONE is a Super... no one is!"

On 08/28/13, John Geiger wrote:

This also brings up the issue of KP1, among other entities. Navassa hasn't been actived since 1993. Used to be fairly active and a chip shot from the US. I know because I worked the last KP1 activation when I was using a Heathkit SB102 and an indoor dipole. They must have been running simplex since I didn't have an external VFO for the 102.

Anyone who became active after 1993 has no chance of making it to top of the honor roll. How could we level that playing field?

I wouldn't use the perjorative "Blame"

But the responsibility for access to the bulk of those locations falls on the US Fish & Wildlife Service. Which doesn't seem to be all that interested in allowing Amateurs to operate from many of these places for a variety of reasons.

On 08/28/13, Brian Alsop wrote:

I find it interesting that 7 of the top 25 (2013) needed countries have
a K prefix. Who do we blame for that?

From: iain macdonnell - N6ML
Topic: 21540 Message: 21568

I think the issue that Brian is trying to address is that for someone starting out today, no matter how great a station they build / how skilled an operator they become, they can never equal the "scores" of those who claim credit for deleted entities. That seems inherently unfair.

I don't think that activating deleted entities makes any sense as a solution, though. The only solution that seems to make sense is to stop counting deleted entities completely. I can't see that happening, though... there'd be a huge outcry from the OFs....

"Blame"?

I suppose we'll have to "blame" who-ever wrote/ratified the treaty that made them US possessions. My guess is that they'd be equally wanted if they had F, VK, or BY prefixes.

Maybe ... or maybe those authorities would less restrictive about access -
except the French, perhaps (I suspect that they own quite a few of the
others in the top-25).

From: Bob
Topic: 21540 Message: 21571

And exactly what is wrong with that benefit?

The top number guys are dying off. But no matter how you want to slice and dice it you will never have worked the deleted country or entity.

There are those that also believe if an "entity" has not been activated for a period of time it should be deleted or moved to a "Inactive status" I'd lump this proposal into the same trash bin. DXCC and the variations are long term goals and sustain interest in Ham Radio over that period. I myself am troubled by the need for instant gratification. Yes, DXCC is a game but if you need that instant gratification go play a video game so you can move quickly to the next level.

I sit here waiting and hoping for a P5 but may be in the box in the ground before it occurs. I do not want those before me to have their efforts cheapened. with an easy solution. Some respect and acknowledgement is still due those who did this before the internet age. I did not accomplish my goal but so what. How many passed without the ZA?

I guess I'm an "Old School", "Old Phart".

Going to the closest to look for my Nomex suit now
.

From: Ron Notarius W3WN
Topic: 21540 Message: 21572

Ian, I think you're exactly right.

Considering that the Deleted Entities do NOT count for Honor Roll... except for bragging rights when you're hoisting a couple of cold 807's... then what's the problem?

There are entities that W6AM worked that I never will. So what?

I think if someone's goal is simply to amass the largest number of unique entities possible... no, no one from the last 2 decades, maybe the last 4 decades, will ever have "worked them all" including the deleted ones. But if getting a high number is your only goal, well, with all due respect, I think it's an empty one.

Sorry Brian. I strongly disagree with you on this one.

21573. Re: Re: [DX-IS] New DXCC entity status

Yahoo group: DX-IS (2013)
Date: 2013-08-28 18:26:14 UTC
From: dale cole
Topic: 21540 Message: 21573

WOW! Would this make for an interesting conversation down at the local pub, with a couple of grape nehi's in hand hi hi
On that note, if there are no people, just birds, and you have to build a platform to op from.....hoow can?
Just my 2 cents ....Now I will kill the bandwith

Dale K8TS

These are the ramblings of an old lonesome phart and should not be taken seriously by any sane person

Subject: Re: Re: [DX-IS] New DXCC entity status

I think the issue that Brian is trying to address is that for someone
starting out today, no matter how great a station they build / how
skilled an operator they become, they can never equal the "scores" of
those who claim credit for deleted entities. That seems inherently
unfair.

I don't think that activating deleted entities makes any sense as a
solution, though. The only solution that seems to make sense is to
stop counting deleted entities completely. I can't see that happening,
though... there'd be a huge outcry from the OFs....

73,

    ~iain / N6ML (only two deleted entities - the old PJ's)

21574. Re: [DX-IS] New DXCC entity status

Yahoo group: DX-IS (2013)
Date: 2013-08-28 18:27:43 UTC
From: iain macdonnell - N6ML
Topic: 21540 Message: 21574

Hi Ron,

Deleted entities ARE actually counted in the official ARRL DXCC standings -
http://www.arrl.org/dxcc-standings

That's a bit more than "bragging rights"....

73,

~iain / N6ML

21575. Re: [DX-IS] New DXCC entity status

Yahoo group: DX-IS (2013)
Date: 2013-08-28 18:51:17 UTC
From: Zack Widup
Topic: 21540 Message: 21575

I don't think I want to get into that. But each of these places has its own unique problems. A couple people I know who were on KH5 and KH5K DXpeditions said they would most likely never go back to those places. The environments were not friendly.

Probably any isolated, uninhabited place so far from civilization has its risks and dangers. Remember when one of the operators at 3Y0PI almost went into a crevasse?

21576. Re: [DX-IS] New DXCC entity status

Yahoo group: DX-IS (2013)
Date: 2013-08-28 19:06:55 UTC
From: donhall161
Topic: 21540 Message: 21576

If any of you are frustrated about your inability to catch us OT's in country totals because of the deleted ones, why not try WAZ or if you are abtitious or a masochist 5B WAZ, or even more serious masochism CW 5B WAZ.

The zones don't move or aren't deleted so everyone has an equal chance. Besides, all the zones have several countries to catch for them.

It is also a more serious test of station capability, in my thinking.

Only my personal opinion, but backed by my 65+ years of DX chasing.

73 Don K5AQ

21577. Re: Re: [DX-IS] New DXCC entity status

Yahoo group: DX-IS (2013)
Date: 2013-08-28 19:31:48 UTC
From: Zack Widup
Topic: 21540 Message: 21577

I don't see what's unfair about it. The only thing that really counts is number of current entities worked that count toward HR. All the rest is just numbers that don't mean anything except that the person has been DXing for a longer time.

I'm not comparing my numbers to anyone else's, anyway. I'm just chasing the DX and having fun. I fell off HR a few years ago when the new PJ entities were declared and haven't even gotten around to getting cards for some of them yet. So I still have Honor Roll, just not "officially." Some people even work them all and don't even bother to send in a DXCC application.

If the problem you're trying to solve is boredom from lack of stations to work or lack of new ones to work, you can always take up VHF+++ and chasing VUCC like I did.

21578. Re: Re: [DX-IS] New DXCC entity status

Yahoo group: DX-IS (2013)
Date: 2013-08-28 19:31:59 UTC
From: Ron Notarius W3WN
Topic: 21540 Message: 21578

Not on Honor Roll, though. Deleted Entities aren't part of the "official" HR number. You have #1 HR regardless of whether you have 20, 10, 5, or 0 Deleted entities, so long as you have all the currently active ones worked... right?

So let's be honest. Once you've worked & confirmed DXCC... be it the basic award, the individual bands, or modes, or 5 Band, or Challenge... what are all these additional entities over 100 anyway?

Bragging rights.

And... not that there's anything wrong with that. Especially when you're all getting together as friends (and the ham with the lowest number of confirmed entities buys the next round!!). But ultimately, it is what it is, and as a practical matter, that's what it is. IMHO.

73

On 08/28/13, iain macdonnell - N6ML wrote:

Hi Ron,

Deleted entities ARE actually counted in the official ARRL DXCC standings - http://www.arrl.org/dxcc-standings

That's a bit more than "bragging rights"....

73,

~iain / N6ML

On Wed, Aug 28, 2013 at 11:23 AM, Ron Notarius W3WN <wn3vaw@...> wrote:

Ian, I think you're exactly right.

Considering that the Deleted Entities do NOT count for Honor Roll... except for bragging rights when you're hoisting a couple of cold 807's... then what's the problem?

There are entities that W6AM worked that I never will. So what?

I think if someone's goal is simply to amass the largest number of unique entities possible... no, no one from the last 2 decades, maybe the last 4 decades, will ever have "worked them all" including the deleted ones. But if getting a high number is your only goal, well, with all due respect, I think it's an empty one.

Sorry Brian. I strongly disagree with you on this one.

On 08/28/13, iain macdonnell - N6ML wrote:

I think the issue that Brian is trying to address is that for someone

starting out today, no matter how great a station they build / how

skilled an operator they become, they can never equal the "scores" of

those who claim credit for deleted entities. That seems inherently

unfair.

I don't think that activating deleted entities makes any sense as a

solution, though. The only solution that seems to make sense is to

stop counting deleted entities completely. I can't see that happening,

though... there'd be a huge outcry from the OFs....

73,

~iain / N6ML (only two deleted entities - the old PJ's)

> It is also a more serious test of station capability, in my thinking.

Yes - it proves that you can put RF anywhere in the world, and
that's what it's about.

The ARRL is supposed to be revisiting the DXCC rules very soon,
so we can expect more fireworks at that level.

Personally I'm OK with the current rules - they have some logic,
and we know where we stand. Bending them to include Kosovo with
its current international status would just make everything messy
again.

As I said, if you want to work something 'new' every time you turn
on the radio, chase the IOTA awards, or lighthouses, or US counties,
or members of the UN or something - there's plenty to keep us busy.

"all the zones have several countries to catch for them"

Zone 2, 18, and 19 don't. Luckily 18 and 19 are pretty well represented on the bands, and zone 2 isn't tough from the US.

John,

You are correct about only one country for each of the three zones and activity levels for 18 and 19. However, Zone1 includes Labrador, part of Quebec and two territories in VE8. Its land area is much larger than many of the countries on the list and has activity pretty regularly. I think Zone 2 hasn't been unrepresented for many years at a time like some of the entities.

I still believe 5BWAZ is a bigger challenge than "top of the Honor Roll".

I will agree about 5BWAZ being above honor roll, and that is the general feeling of most people on the DX forum on eham.net. Zone one is Alaska and part of VY1/VE8. Zone two is VO2, part of VE8 and VE2 north of 50 degrees. I would guess that it is the least populated on any of the zones, but there are some pretty active VO2 stations, and a couple of VEs usually go to zone 2 for the CQWW contest.

You really want a challenge, try to work every ITU zone.

FWIW, after about 5 years of somewhat-serious DXing from W6, I have worked all zones (on CW!) on 10/15/20/40m, and I just need to work one more (zone 39) on 80m. A few of them are not confirmed, because I haven't been bothering with paper cards much lately (if I could count LotW, I'd only be 4 away!). For DXCC, I have 308 current / 310 total worked, of which all but two (XZ and EP) are confirmed. I doubt I'll ever make hono[u]r roll, never mind #1, but finishing 5BWAZ seems quite achievable.

I guess it depends on your situation - if you're stuck on a city lot, with a single tower / tri-bander, lower-bands may be more of a challenge than HR....

I don't think it would count for East Germany now because East Germany does not exist as a DXCC country today. If you worked a station in what was East Berlin in 1988, and then worked the same station in 1998, the first QSO would count for East Germany, and the later QSO for Germany (two different DXCC countries, but the station didn't co-exist in both countries at the same time.)

What makes them deleted is date. Newfoundland became part of
Canada in 1949. It didn't move. It was a political change.

If the same VO1 station existed in St John's in 1948, and was still
there in 1950, if you worked him in 1948, you got credit for
Newfoundland. Once they joined Canada in 1949, even if the guy kept the
same call, and even if you worked him again in 1950, you would only get
credit for Canada.

I can never work the deleted country Newfoundland. If Newfoundland
were to separate from Canada and become its own country again, the DXCC
Desk would likely add it to the list as a NEW one . . . it would not be
a re-incarnation of the old deleted Newfoundland.

There always was a "KP1" holding people up. Ask any of the Old Timers about China and Albania. 20+ years wait for both of them. There always is an "impossible" one and then it gets activated magically. I don't know how long KP1 will be inactive, but I can guarantee you it will be reactivated and make a lot of Hams licensed since 1993 very happy! I just can't tell you when. :-)

Agree 100%. I only know two avid DXers (with 50-60 years
experience) who have 5BWAZ, but I probably know 25 or more who have #1
HR and no 5BWAZ. 5BWAZ is the pinnacle of DX achievement, in my view.

Paul,

How many do you know that are over 3000 on the ARRL Challenge Award?

I'd say that beats 5BWAZ by a lot.

Well, VE1YX for one. Also VE1AST if he sent in all his band countries. I'd have to look to see if there are any more. I'm at 2799 and I don't think I'll ever see 3000 because it requires a lot of 160m and 6m countries. While I have DXCC on both of those bands, they are not going to deliver me 200 more in this lifetime! I had hoped to get 50-60 more on 12/10 this cycle, but it was a dud and likely is past its peak.

5BWAZ requires all the bands on 28 MHz, which is solar peak dependant. I'd wager anyone who doesn't have all of their 10m zones right now is in for a long wait. Remember, cycles 20, 21, 22 and 23 were dandies with 2-3 years of stellar propagation during the years around their peaks. This did not happen with 24 and the know-it-all prognosticators are saying 25 will be as bad or worse than 24.

The ability to get 5BWAZ (and 3000 in the DXCC Challenge) has greatly diminished since cycle 23 dropped off. Iain, N6ML, is in great shape because he only needs 1 zone on 80m, and that band is not solar cycle dependant. He's lucky, because if he needed that zone on 10m, it likely will be a long wait.

I have more DXCC Countries on 40m than I do 10m. Yet I have a far better antenna for 10m. Propagation and solar flux are the great equalizer. :-)

ARLD035 DX news

ZCZC AE35
QST de W1AW
DX Bulletin 35 ARLD035
>From ARRL Headquarters
Newington CT August 29, 2013
To all radio amateurs

SB DX ARL ARLD035
ARLD035 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

RODRIGUEZ ISLAND, 3B9. Members of the Verona DX Team plan to be QRV as 3B9EME from September 2 to 13 from Rodriguez Island, IOTA AF-017, Grid Square MH10. Their main objective is EME operation on 6 and 2 meters and 70 cm. In addition, they will also be active on the HF bands, mainly on the newer bands, with two stations. QSL direct to I3LDP.

WEST MALAYSIA, 9M2. Members of the Malaysian Special Expedition Team will be QRV as 9M2SE from Pulau Indah, IOTA AS-074, from August 31 to September 1 during a celebration of the 56th anniversary of Malaysia's Independence Day. Activity will be on 40 to 10 meters using CW and SSB. QSL via operators' instructions.

NEPAL, 9N. Satish, 9N1AA has been active on 15 meters using CW between 1120 and 1215z. QSL via N4AA.

CAPE VERDE, D4. Barry, M0DGQ is QRV as D44TXP from Sal Island, IOTA AF-006, until September 11. Activity is on 40 and 20 meters using CW. QSL via M0URX.

CANARY ISLANDS, EA8. Ivan, EA8YG will be QRV as EE8YG from Isla de la Graciosa, IOTA AF-004, from September 1 to 15. Activity will be on 160 to 6 meters using SSB. QSL to home call.

FRENCH POLYNESIA, FO. Yoshi, JJ8DEN plans to be QRV as FO/KH0PR from Ahe Atoll, King George Islands, IOTA OC-131, from September 3 to 8. Activity will be on 80 to 10 meters using CW, RTTY, PSK31 and JT65A. QSL to home call.

ITALY, I. Members of the Calabria DX Team plan to be QRV as II8LH from the Lighthouse on Scilla, ARLHS ITA-050, on August 31. QSL via HB9FHZ.

MINAMI TORISHIMA, JD1. Take, JG8NQJ/JD1 has been active on 15 meters using CW between 0900 and 1100z. QSL via JA8CJY.

JORDAN, JY. Jovica, E78A is on work assignment with the UNHCR and now holds the call sign JY9FC. He is active from Amman during his free time on the HF bands using mainly CW with some SSB and various digital modes. QSL via E73Y.

LITHUANIA, LY. Special event station LY777A is QRV until September 30 to celebrate 777 years of the city of Siauliai. QSL via LY5A.

BULGARIA, LZ. Special event station LZ1406SK commemorates the orthodox St. Cyprian during the month of September. QSL via LZ1KCP.

BANGLADESH, S2. Rana, S21R is active from Dhaka until mid September. QSL via N4VA.

POLAND, SP. Special event stations HF330VW and SN330VW are QRV until September 22 to commemorate the victory of the Polish King Jan Sobieski against the Turkish army near Vienna in 1683. QSL HF330VW via SP9PRR and SN330VW via SP9KJU.

MOUNT ATHOS, SV/A. Monk Apollo has been active on 17 meters using SSB around 1425 to 1530z. QSL direct.

CORSICA, TK. Sebastian, IK2WZM plans to be QRV as TK9ZM from September 2 to 8. Activity will be holiday style on the HF bands. QSL to home call.

MALI, TZ. Fernando, TZ6BB has been active on 15 meters using CW around 1900z. QSL via W3HNK.

MICRONESIA, V6. Operators Hiroo, JA2VWG and Seihachi, JA7LU will be QRV as V63DDD and V63LU, respectively, from Pohnpei Island, IOTA OC-010, from September 4 to 16. Activity will be on 40 to 6 meters using SSB and RTTY. QSL direct to home calls.

INDONESIA, YB. Bert, PD1SA plans to be QRV as YB1/PD1SA from West Java, IOTA OC-021, until September 28. Activity is mostly on 20 meters and possibly on 80 and 40 meters as well. QSL to home call.

OPERATION APPROVED FOR DXCC CREDIT. The following operation has been approved for DXCC credit: Clipperton Island, TX5K, 2013 operation. If you've had this rejected in a prior application, send a note to bmoore@... to be placed on this list for an update to your record.

THIS WEEKEND ON THE RADIO. QRP CW Fox Hunt, NCCC Sprint CW Ladder, Feld Hell Sprint, CWOps CW Open, Colorado QSO Party, Tennessee QSO Party and the MI QRP Labor Day CW Sprint are all on tap for this

weekend. The ARS Spartan CW Sprint is scheduled for September 3.
Please see August QST, page 73, September QST, page 79, and the ARRL
and WA7BNM contest web sites for details.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30830
SIDC SOLAR BULLETIN 30 Aug 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 30 Aug 2013 until 01 Sep 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 30 Aug 2013 10CM FLUX: 110 / AP: 018
PREDICTIONS FOR 31 Aug 2013 10CM FLUX: 111 / AP: 016
PREDICTIONS FOR 01 Sep 2013 10CM FLUX: 112 / AP: 017
COMMENT: Solar activity was eruptive featuring 1 C-class flare (C8.3) originating
from AR NOAA 11836. A partial halo CME was associated with this flare as
seen in LASCO C2 on August 30th around 02:48 UT. It has an angular width
of around 150 degrees and an estimated speed of about 1000 km/s. With this
speed, the estimated time of arrival at Earth is on August 31th around
21:00. A second partial halo CME was detected by LASCO C2 on August 29th
around 06:00 UT. Most material of this CME is southbound, but a shockwave
might arrive on Earth. With an estimated speed of around 430 km/s this
shockwave is expected to arrive on September 2d around 20:00 UT. The
current solar wind speed is around 380 km/s but rising. The interplanetary
magnetic field Bz component is turbulent and between -5 nT and -10 nT. Phi
is going from 270-360 degrees to 90-180 degrees indicating the arrival of
the coronal hole and a current sheet crossing. Geomagnetic conditions where
quiet in the past 24 hours, but are expected to reach active (K=4) to minor
storm (K=5) levels in the next few hours. During the night of August 31st
and September 1st, (with the arrival of the CME as seen by LASCO C2 on
August 30th 02:48 UT), geomagnetic conditions can reach active (K=4) to
minor storm (K=5) levels.

>From Tad Cook, K7RA
Seattle, WA August 30, 2013
To all radio amateurs

SB PROP ARL ARLP035
ARLP035 Propagation de K7RA

Solar activity slipped this week, with the average daily sunspot number declining nearly 50 points to 77, and average daily solar flux down nearly 10 points to 116.4. In fact, those nearly numbers were 49.9 and 9.9.

The latest prediction from NOAA/USAF (Thursday, August 29, 2013) has solar flux at 108, 105 and 108 on August 30 through September 1, 110 on September 2-3, 112 on September 4-5, then 115 and 120 on September 6-7, 125 on September 8-14, 120 on September 15, 115 on September 16-17, 110 on September 18, 105 on September 19-21, then 110 and 105 on September 22-23, and 100 on September 24-25.

Until August 27-28, the forecast had solar flux dropping below 100 on August 30 through September 2, but the outlook was upgraded for this period. But note that flux values are predicted to drop below 100 on September 26-28.

Predicted planetary A index is 20 on August 30-31, 12 on September 1, 5 on September 2-3, 8 on September 4, 5 on September 5-9, then 10, 15 and 18 on September 10-12, 8 on September 13-14, 5 on September 15-16, then 12, 18 and 15 on September 17-19, 5 on September 20-21, 12 and 8 on September 22-23, and 5 on September 24-26.

Every day (usually between 2100-2200 UTC) you can see an update of all the above data at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html. Today I notice that the August 29 prediction (this bulletin is written every Friday long before 2100 UTC) was revised and re-released at 0839 UTC today, about 11 hours after the earlier version. I need to re-check those numbers!

Much talk lately has centered around a possible dual peak in the current solar cycle. This would follow a patter established in

recent solar cycles. If this is so, the first peak probably occurred in the Fall of 2011. Now it appears that perhaps the second peak was in Spring 2013.

We are just a day away from the end of the month, so we won't see the actual averages until next week, but we can get a pretty close reading knowing the actual numbers for 29 of the 31 days in August.

The average daily sunspot number for the first 29 days of August was 92.2. This is above the levels for June and July, 80.2 and 86.2, but lower than April and May. This also pegs the 3-month average of daily sunspot numbers (centered on July) around 86.1, based on data from 90 of the 92 days in that period. This is above all of the 3-month moving averages centered on September 2012 through March 2013, but lower than the previous three periods centered on April and May (106.4) and 97.5 for June.

The two stand-out periods were both when the 3-month moving average was above 100. Those were centered on October through December 2011 (118.8, 118.6 and 110) and April and May of this year, when averages were both 106.4.

We began tracking a three month moving average in early 2007, in the February 9 bulletin (see http://www.arrl.org/w1aw-bulletins-archive/ARLP006/2007) and have continued in each or the 78 months since then.

For those unfamiliar with this concept, a moving average is used to smooth out the day-to-day variations in noisy data to make it easier to spot trends. If you wanted to create a 30-day moving average of any data, such as stock prices, temperature or sunspot numbers, you would add all the numbers for the previous 29 days to today's value, then divide by 30. Tomorrow you would drop off the first number in the series and include tomorrow's number. This continues, day after day, and what emerges is a graph that smooths out day-to-day variations, making it easier to spot trends.

Because this bulletin was always text-based - 47 years ago as a child, I copied my predecessor's weekly propagation bulletins in Morse code from W1AW - I needed a simple way to present a moving average without the aid of graphics, in order to spot trends in the upcoming cycle.

In this simple method, I would do an arithmetic average (adding all the daily sunspot numbers, then dividing by the number of days) for a three-month period.

On the first day of April I would add all the numbers from January 1 through March 31, then divide by 91 in a leap year, and 90 in all other years. This reveals an average either described as centered on February, or the period ending in March.

On May 1 I could average all the data for February through April, so every month, one old month drops off, and a new month is added. Wikipedia has a page explaining this at http://en.wikipedia.org/wiki/Moving_average, and you can see there are many ways to slice and dice the data.

Next week we will present the data described above, we will see the two peaks and decline since then.

For some reason (it's Summer?) there were no reports from readers this week.

I haven't looked at this site in a long time, and I see it has added many attractive and useful features:

http://www.solen.info/solar/

Note the fantastic images under the "Active Solar Regions" heading. Note if you click on the image, it will take you to a more detailed picture, such as http://www.solen.info/solar/images/AR_CH_20130829_hres.jpg.

You can then hack that URL to see a series of images of successive days. Note the date in this URL is for 8-29-2013, expressed here as /AR_CH_20130829_hres.jpg. You can change it to 20130828, 20130827, etc, then use the back-forward button on your web browser to see the images from successive days, along with the solar rotation.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for August 22 through 28 were 125, 127, 101, 46, 35, 61, and 44, with a mean of 77. 10.7 cm flux was 131.6, 124.1, 117.4, 112.6, 111.2, 109.7, and 108.1, with a mean of 116.4. Estimated planetary A indices were 13, 15, 7, 7, 5, 15, and 9, with a mean of 10.1. Estimated mid-latitude A indices were 11, 14, 8, 7, 4, 12, and 8, with a mean of 9.1.

31 August 2013 A.R.I. DX Bulletin
No 1165
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

A2 - WB6OJB as A25JK and K5LBU as A25CF will be active with two
stations from Botswana on 5-12 September. Look for A25JK to
operate SSB on 20-10 metres (possibly with some 40 and 80m), while
A25CF "will be doing some PSK on what ever bands might be open and
A25JK is not on". QSL via home calls. [TNX NG3K]
D4 - Barry, M0DGQ will be active as D44TXP from Ilha do Sal (AF-086),
Cape Verde until 11 September. He operates CW only on 40 and 20
metres. QSL via M0URX (OQRS preferred).
FO - Yoshi, JJ8DEN will be active as FO/KH0PR from three IOTA groups in
French Polynesia as follows:
3-8 September Ahe Atoll OC-131
9-16 September Napuka Atoll OC-094
18-25 September Reao Atoll OC-238
He will operate CW and digital modes on 80-10m. QSL via JJ8DEN.
[TNX DX World]
HB0 - Look for HB0/DL4AAE and HB0/DL3TU (www.mydarc.de/dl3tu/)to
(http://www.mydarc.de/dl3tu/%29to) be
active from Liechtenstein "on the second or third full weekend of
September". Weather permitting, they will try to operate from the
summit of Augstenberg (2359 metres a.s.l.) using CW only on the
higher bands with an emphasis on working Asia. All of the QSOs
will be confirmed automatically via the bureau. Direct cards via
home calls.
HP - Invoker Team members Christian EA3NT, Raul EA5KA, Vincent F4BKV
and Col MM0NDX will be active from the six IOTA groups allocated
to Panama as follows:
5 September HP0INT/1 Naos NA-072
6-8 September HP0INT/3 Boca Brava NA-071
8 Septemper (evening) HP0INT/1 Naos NA-072
9-11 September HP0INT/2 Ogobsibu (San Blas) NA-170
11-13 September HP0INT/2 Grande NA-202
13-15 September HP0INT/9 Iguana NA-203
16-18 September HP0INT/4 Colon (Bocas del Toro) NA-088
They will operate CW and SSB on 40-10m. QSL via F4BKV (direct) or
F5CWU (bureau), OQRS preferred for both options. Logsearch at
www.invokerteam.com/hp0int/ (http://www.invokerteam.com/hp0int/) [TNX DX World]

I - The Calabria DX Team will be active as II8LH from the lighthouse
at Scilla on 31 August. QSL via HB9FHZ (bureau) or IK8YFU
(direct), LoTW and eQSL.
I - Riccardo, IZ5JMX reports that he will be active as TK/IZ5JMX from
Corsica (EU-014) on 1-13 September. He will operate SSB on 40-10
metres. All of the QSOs will be confirmed automatically via bureau.
JA - Makoto, JI5RPT will be active as JI5RPT/6 from the Koshikijima
Islands (AS-037) on 7 and 8 September. He will operate CW and
digital modes. QSL via home call, direct or bureau. [TNX JN6RZM]
KH9 - The tentative dates for the K9W DXpedition to Wake Island are 5-19
October, with 7-18 October as QRV days (schedule based on Wake
time, which is UTC +12 hours). The expedition's operating plan,
QSL routes, propagation charts and other information can be found
at www.wake2013.org (http://www.wake2013.org)
SV8 - A team of eight operators from Germany (Rich DK8YY, Hansi DL1AOB,
Dieter DL1AWD, Ralf DL3JJ, Dan DL5SE, Felix DL6JF, Lu DL8ALU and
Eddy DM5JBN) will be active as SW8YY from the island of Zakynthos
(EU-052) on 17-29 October, including entries in the Worked All
Germany (WAG, 19-20 October) and CQ WW SSB contests. They will
operate CW, SSB and digital modes on 160-10 metres. QSL via DH7WW,
direct or bureau (OQRS on Club Log), and LoTW. Further information
can be found at http://sw8yy.weebly.com/ [TNX DX World]
T8 - Will be active as T88TV from Palau on 10-16 September. He will
operate CW only on all bands, with an emphasis on 160 and 80
metres. QSL via W5MJ. [TNX NG3K]
UA - R7AM, R7LP, RA6DE, RU5D, RU6AX, UA6MF and UA6YW will be active as
R20RRC/6 from Eyskaya Kosa Island in the Sea of Azov (RRA
RR-17-02, not IOTA) from 30 August to 1 September. They will
operate CW and SSB on 80-10 metres. QSL via RZ3EC. [TNX RU5D]
V6 - Look for Hiroo, JA2VWG (V63DDD) and Seihachi, JA7LU (V63LU) to be
active from Pohnpei (OC-010), Micronesia on 4-16 September. They
will be QRV on 40-6 metres SSB and RTTY. QSL both calls via JA7LU.
[TNX DX World]
W - Scott, NE1RD will be active as NE1RD/1 from Lovells Island
(NA-148) from 30 August to 1 September. This will be a LP, solar
powered operation, as there is no electricity on the island. He
will be QRV on 40-10 metres. QSL via home call. Logsearch and OQRS
(for bureau cards only) at www.bsandersen.com (http://www.bsandersen.com) [TNX
rsgbiota.org (http://rsgbiota.org)]
W - A team from the Kennehoochee Amateur Radio Club (AK4I, K4JTT,
K4MTX, KD4SEV, KI4LAV, N4DU, N4VDL, NV4U, WD4FGB, WF4W and WK4U)
will be active as K4S from Sapelo Island (NA-058) on 10-14
September. They will operate CW, SSB and RTTY on 80-6 metres. QSL
via W4BTI (direct only), LoTW and eQSL. [TNX K4JTT]
W - Randy, AJ7G will be active as AJ7G/4 from Cedar Keys (NA-076) on
18-19 September. Plans are to be QRV on 20, 17 and 15 metres SSB
and digital modes. QSL direct to home call. [TNX rsgbiota.org (http://rsgbiota.org)]
W - Mike AB5EB, Hector AD6D (XE2K) and Dragan K0AP will be active as
K5T from Timbalier Island (NA-119) on 11-13 October. QSL via
AB5EB. [TNX AB5EB]

YB - Adhi, YB3MM is active as YB3MM/p from the Kangean Islands (OC-217)
until 31 August. He is QRV on 20 and 15 metres SSB and CW. QSLling
instructions on qrz.com (http://qrz.com) [TNX W2FB]
YB - YB8S is the callsign that YB9BU, YB8RW, YC8TM and others will be
using during their operation from Gangga Island (OC-236) [425DXN
1164]. They will be QRV from 30 August to 1 September. QSL direct
to YB9BU.
YB - The YE5T (OC-122) and YE5S (OC-109) operations [425DXN 1164] have
been postponed until further notice owing to a serious family
problem of one of the team members. The YE5R activity from Anambas
(OC-108) will likely continue since it is organized by a different
team. Announced dates for YE5R are 15-20 September. [TNX W2FB]
YB - Four more operators will be joining the 10-16 September DXpedition
to Kimaam Island (aka Pulau Yos Sudarso and Pulau Dolok) (OC-275,
new one for IOTA) [425DXN 1164]. The team now includes YB0AI/9,
YB3MM/9, YB8XM/9, YB9WZJ/p, YC9XOZ/p, YD9RQX/p and YF1AR/9. They
will operate SSB, CW and digital modes on 40-10 metres. QSL
YF1AR/9 via N2OO, QSL YB3MM/9 see qrz.com (http://qrz.com), others via operator's
instructions. Further information at www.yf1ar.com (http://www.yf1ar.com)
YJ - Ralph, H40IOTA was supposed to be active from Vanikolo (OC-163)
for a couple of days towards the end of this week. However, this
activity is not going to happen and "will be placed on hold for a
future trip". His H44/H40 IOTA tour is finished, and Ralph is now
heading "under motorsail and poor weather conditions" to Vanuatu.
He will be sailing those waters for a couple of months, with
tentative plans to be active as YJ0RK from the Torres Islands
(OC-110) and the Banks Islands (OC-104). QSL via NR6M. [TNX NR6M]
YN - EA1ACP, EA1DVY, EA5FX, EA5HPX, EA5KM and EA7FTR will be active as
H7H from Nicaragua on 1-16 October. They will operate SSB, CW and
RTTY on 160-6 metres. QSL via EB7DX and LoTW. An OQRS will be
available for direct and bureau cards. Further information can be
found at http://nicaragua2013.com/

CENTRAL AMERICA TRIP ---> Rick, AI5P will be visiting Panama, El Salvador
and Nicaragua between 31 August and 23 September. Plans are to operate
holiday style as HP1/AI5P (31 August-6 September),YS1/AI5P (6-12 September)
and YN2PX (12-23 September). QSL via home call. [TNX The Daily DX]

HIMALAYAN TRIP ---> Pekka, OH2YY will be active as 9N2YY (requested
call, to be confirmed upon arrival) from Nepal on 2-5 October, and as A52YY
from Bhutan on 6-10 October. He expects to be QRV on 20-10 metres SSB mostly
during his evenings and night hours, running 100 wats into dipoles. QSL
via home call, direct or bureau, and LoTW. [TNX OH2YY]

*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

AFRICAN STATES ---> "As part of the on-going research and documentation of callsign history since 1945 for Club Log, and to aid the fine-tuning of Club Log's DXCC entity mapping, I have spent some considerable time researching and documenting the history of prefix changes in Africa", Alan 5B4AHJ says. Go to http://clublog.freshdesk.com/ support/solutions (http://clublog.freshdesk.com/support/solutions) and search for 'African states - independence dates and prefix changes'. "This is quite a substantial document, pulling together information from a wide variety of sources. Although I have checked the document as carefully as I can, it is possible that it contains some errors. Please advise if you find any".

DXCC NEWS ---> TX5K (Clipperton Island, 2013 operation) has been approved for DXCC credit. If you've had this rejected in a prior application, send a note to bmoore[@]arrl.org (http://arrl.org) to be placed on the list for an update to your record. Please note the submission date and/or reference number where the rejection was noted to expedite the search for any rejected QSOs. [TNX NC1L]

QSCOPE ---> Yan, XV4Y is working on a new project called QScope. It is an online application that provides statistics and charts from amateur radio logs (ADIF and Cabrillo).While designed with contesting in mind, most of the statistics will be useful for DXpeditions and DXers alike. Registration and access to the website (www.qscope.org (http://www.qscope.org)) are free.

QSL VIA HA3JB ---> Gabor is the new QSL manager for A41PB and HC8/G8OFQ. QSL direct only (Kutasi Gabor, Siofok, Koch R. u. 10/A I/4, 8600, Hungary). An OQRS can be found at www.ha3jb.com/oqrs.html (http://www.ha3jb.com/oqrs.html)

QSL VIA PG5M ---> Gerben, PG5M has enabled an Online QSL Request Service for direct and bureau cards on his website (http://www.dx.to/oqrs/). The OQRS can be used for 3D2GM, 9M2/PG5M, 9M2/PG5M/6, 9Q5MA, C56M, PA0GAM/9L, PA0GAM/OH0, PA0GAM/OH0/OJ0, PG5M/BA4RF, PJ2/PG5M, ST2X, SV9/PG5M, T2G, T30GM, V8FGM and VK9GA, as well as for Gerben's upcoming operations as T8GM and V6G [425DXN 1157].

QSL VIA W5UE ---> Randy, W5UE now has an online log search and OQRS web Application (http://w5ue.net/qsl-w5ue- logsrch.html (http://w5ue.net/qsl-w5ue-logsrch.html)) for many of the stations he manages. Logs currently online include 9V1YC, 9V9HQ, AK6W, EY3M, EY8ZE, HC8GR, HC8N, NA5NN and ZP5YW. 9V1YC's upcoming DXpedtion to Laos (XW1YC) will also be supported, with daily updates.

YC9MLL ---> Leo, YC9MLL will be leaving Flores Island (OC-151) in 2-3 months' time. "I will try to keep Flores on the air as long as I can", he says. Island chasers who need OC-151 might want to contact Leo (email address on qrz.com (http://qrz.com)) and arrange a sked with him. QSL via M0OXO. [TNX K3EST]

---------- ---------- ----------

QSLs received direct or through managers: 3C0E, 3C6A, 3DA0TM, 4O/UA3RF/p (EU-163), 5W0NM, 5X8C, 6O3A, 6Y5/G3SWH, 8Q7DV, 8Q7KP,9M2FB (AS-074), 9X0ZM, BP0A (AS-103), D2QR, D64K, EA9UG, ER7HQ, EX8MLE, F5VHY, FO/UT6UD (OC-027 and OC-050), H40T, H44AJ (OC-285), H44G, HC3/DL5YWM (SA-034), HD8A,

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30831
SIDC SOLAR BULLETIN 31 Aug 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 31 Aug 2013 until 02 Sep 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 31 Aug 2013 10CM FLUX: 108 / AP: 011
PREDICTIONS FOR 01 Sep 2013 10CM FLUX: 109 / AP: 017
PREDICTIONS FOR 02 Sep 2013 10CM FLUX: 110 / AP: 011
COMMENT: Solar activity was quiet the last 24 hours, but eruptive conditions are
expected especially from AR NOAA 11835 has a possibility in producing an
M-class flare. Current Solar Wind speed is around 420 km/s and the
interplanetary magnetic filed Bz component is around -5 nT. Geomagnetic
conditions where quiet in the past 24 hours, but are expected to reach up
to minor storm (K=5) levels in the evening of August 31st.
TODAY'S ESTIMATED ISN : 049, BASED ON 15 STATIONS.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30901
SIDC SOLAR BULLETIN 01 Sep 2013, 1209UT
SIDC FORECAST (valid from 1230UT, 01 Sep 2013 until 03 Sep 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 01 Sep 2013 10CM FLUX: 109 / AP: 022
PREDICTIONS FOR 02 Sep 2013 10CM FLUX: 110 / AP: 013
PREDICTIONS FOR 03 Sep 2013 10CM FLUX: 111 / AP: 008
COMMENT: Solar activity was eruptive featuring 1 C-class flare (C2.6) originating
from AR NOAA 11836. Both AR NOAA 11835 and NOAA 11836 have a possibility
in producing M-class flares. A partial halo CME was detected by LASCO C2
on August 31st around 20:48 UT which could be assiociated with the C2.6
flare. This CME is mainly westward directed (possibly only a glancing
blow) and due to the relative slow speed of 400 km/s will probably not have
any influence on geomagnetic conditions. Current solar wind speed is
around 550 km/s and the interplanetary magnetic field Bz component is
around 0 nT. Geomagnetic conditions where quiet in the past 24 hours, but
the CME of August 30th 2:48 UT might still arrive and potentially result in
minor storm levels (K=5). The CME of of August 29th 06:00 UT is expected
to arrive with a shock on September 2d in the evening resulting in active
conditions (K=4).
TODAY'S ESTIMATED ISN : 049, BASED ON 07 STATIONS.

September 2, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, W5UE, K8GI, K8YSE, NL8F, W8GEX & 60m News, W9ILY, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, E21EIC, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, H44RK, HA0HW , I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, JA1TRC, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF), VK4WR, XV4Y and YB5NOF for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 25th-August, through Sunday, 1st-September there were 229 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4W, 4X, 5A, 5B, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9X, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZD9, ZF, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B9, RODRIGUEZ ISLAND (Just A Reminder). By the time you read this, members of the Verona DX Team will be active as 3B9EME from Rodriguez Island (AF-017) until September 13th. They will have 2 stations on at the same time on the HF bands, with an emphasis on 160/80/40/30/17/12

meters, using CW, SSB, RTTY, JT65hf and PSK31. Also, some EME activity on 144 and 432 MHz. See OPDX.1122 for suggested frequencies. For more details and the QSL route, visit the 3B9EME Web site at: http://www.ari.verona.it/veronadxteam/3b9_2013.htm

8Q, MALDIVES. Operators Christian/DL2MDU and his XYL Heike/DO3HDA will be active as 8Q7CF from Biyadhoo Island Resort between September 15-27th. Activity will be holiday style on 80-10 meters, possibly 160 meters if they can use a long wire, and they will use an Elecraft K3. Christian will operate mainly CW, while Heike will operate on SSB and the Digital modes. QSL via DL2MDU.

A2, BOTSWANA. Operators Arnold/WB6OJB and Frosty/K5LBU will be active as A25JK and A25CF, respectively, from the Lotsane Gameand Safari Lodge in the extreme eastern part of Botswana between September 5-12th. They plan on having two stations set up and running, but the A25JK will be the main station. Look for A25JK to operate SSB on 20/17/15/12/10 meters and possibly 40 and 75 meters. K5LBU will be operating some PSK on whatever bands might be open and A25JK is not on. QSL via their home callsigns.

A3, TONGA. Masato "Masa", JA0RQV, will once again be active from Tonga, but this time as A35JP/N and from Niuatoputapu Island (OC-191) between September 19-24th. This operation will be depending on weather and flight to the island, and on the air will be limited because of limited supply of electric power. Operations will be on 80-6 meters using CW and SSB. His rig is an IC-7000 (100w) and GP Full-size. In case his flight is cancelled, Masa might be active from Tongatapu Island (OC-049) or Haapai Island (OC-169) or Vavau Island (OC-064) instead. QSL via his home callsign, by the Bureau, direct or LoTW. For more info, visit Masa's Web page from his last trip at: http://www.sato3.com/a35jp/index.html

ASIAN TOUR. Pekka, OH2YY, will activate Nepal (9N) between October 2-5th. He has applied for the callsign 9N2YY, but the final confirmation will take place upon arrival in Nepal. After Nepal, between October 6-10th, Pekka will be visiting the Kingdom of Bhutan (A5). He has been assigned a Bhutanese license with a callsign A52YY. Both in Nepal and Bhutan, Pekka will be traveling mainly during the daytime hours, but during his evenings and nights, he will be active on 20-10 meters using SSB. He cannot take any amplifier or yagis with him, so the operations will be basically with a 100w transceiver and dipoles. QSL via OH2YY, by the SRAL Bureau or direct to: Pekka Ahlqvist, Vapaalanpolku 8B, 01650 Vantaa, Finland. or via SRAL QSL bureau. Also, he will use LoTW.

CE0Y, EASTER ISLAND. Operators Jose/CE0HYO, Gustavo/CX2AM, Humberto/CX3AN, Gustavo/CX3CE, Mario/CX4CR, Gen/EA5HPX and Francisco/EA7FTR will be active from Hanga Roa, Easter Island, between November 1-7th. Callsign has not yet been announced. Activity will be on 160-6 meters using CW, SSB and the Digital modes. They will have 3 stations operating simultaneously. QSL via EB7DX. They have a Web site available at: http://easterisland2013.com

D4, CAPE VERDE. Operators Babs/DL7AFS and Lot/DJ7ZG will be active as D44TXT from Santiago Island (AF-005) between October 19th and November 7th. Activity will be on 80-6 meters using SSB, RTTY and PSK31. QSL via DL7AFS.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
TX5K ☐ Clipperton Island; 2013 Operation
XZ1Z ☐ Myanmar; 2013 Operation

NOTE: If you've had this rejected in a prior application, send a note to <bmoore@...> to be placed on the list for an update to your record. Also, please note the submission date and/or reference number where the rejection was noted to help expedite the search for any rejected QSOs.

E6, NIUE. Operators Alan/VK4WR and Graeme/VK4FI will once again be active as E6RQ and E6SG, respectively, from the Coral Gardens Motel, Alofi, Niue (OC-040), between December 7-17th. Activity will be on the HF bands. Alan informs OPDX [edited], "Our operation is primarily for 6 meters as we are going in the middle of the southern hemisphere sporadic E season. Hopefully, there will also be TEP into Asia and who knows what else on the magic band. We will have some HF, am taking an OCF dipole for 40 through 10 meters and plan to have a play in the ARRL 10meter Contest. 100 Watts only." QSL both callsigns via VK4FI.

FO, FRENCH POLYNESIA (IOTA Tour). Yoshi, JJ8DEN, will once again be active as FO/KH0PR between September 3-25th. He will activate the following French Polynesian Tuamotu Islands as follows:
September 3-8th - Ahe Atoll (OC-131)
September 9-16th - Napuka Atoll (OC-094)
September 18-25th - Reao Atoll (OC-238)
Activity will be on 80-10 meters using CW and the Digital modes. QSL via JJ8DEN, direct or by the Bureau.

HP0, PANAMA (IOTA Tour). Operators Christian/EA3NT, Raul/EA5KA, Vincent/F4BKV and Col/MM0NDX, from the Invoker Team, will activate six Panamanian island groups as HP0INT(/1,2,3,4 or 9) between September 5-19th. Activity will be on 40-10 meters using CW and SSB. The team tentative schedule is as follows:
September 5-8th - Naos Island (NA-072); callsign HP0INT/1; evening only
September 6-8th - Boca Brava Island (NA-071); callsign HP0INT/3
September 9-11th - Ogobsibu (San Blas) Island (NA-170); callsign HP0INT/2
September 11-13th - Grande Island (NA-202); callsign HP0INT/2
September 13-15th - Iguana Island (NA-203); callsign HP0INT/9
September 16-18th - Colon [Bocas del Toro] (NA-088); callsign HP0INT/4

Please be careful with HP0INT/2 as it will be used from two different IOTA groups. Listen carefully to the operator to know the exact location/IOTA. Direct QSLs are via F4BKV (OQRS preferred) [if you use IRC, he only accepts the new model valid until 2017]. Bureau QSLs are via F5CWU (OQRS preferred). More details and the OQRS are available at: http://www.invokerteam.com/hp0int

IOTA NEWS.............
NA-124. Operators Manuel/XE2HUQ, Saul/XE2HQI, Craig/XE2HWJ and Jose/
XE2I will be active as XF1P from Partida Island between December
7-14th. More details to be forthcoming.

OC-109/ (POSTPONED) Operators John/YB5NOF, Anton/YB5QZ, Joni/YB9WZJ
OC-122. and YE5WM planned to activate Tambelan (OC-122) as YE5T between
August 28th and September 1st, and Natuna Selatan (OC-109) as
YE5S between September 4-9th. John, YB5NOF, informs OPDX that
this has been postponed. They hope to do all they can to try
to activate the IOTAs at the end of September or early October,
but is depends on the weather, transport and the renewal of
their licences.

IOTA PACIFIC TOUR CONTINUES (Update). By the time you read this, Ralph,
H44RK, is expected to be active as H40IOTA from Vanikolo Island (OC-163)
for only 2-3 days. Activity will probably be on 40/20/15 meters SSB.
Ralph informs OPDX that he will head to Vanuatu (YJ) and operate as YJ0RK
as well as activate a few more IOTAs. He states that he will activate
Torres Island (OC-110) first and then Banks Island (OC-104). No set dates
are known at this time. Ralph states, "We will be cruising Vanuatu waters
(on the "SV Hafskip") for about 2 months before we continue via New
Caledonia back to VK4-land. QSL H40IOTA and YJ0RK via NR6M.

ISWL CALLSIGNS (For September). The following ISWL club callsigns will be
used throughout the month of September 2013:

GX4BJC/A - Operated from Ivybridge, in Devon, by Peter, G4VFG (ISWL
Honorary Secretary). (WAB Square SX65, England; IOTA
EU-005 and WLOTA LH-1841).

MX1SWL/A - Operated from Hove, in Sussex, by George, G3VBE. (WAB
Square TQ20, England; IOTA EU-005 and WLOTA LH-1841).

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual
operator. The I.S.W.L. is a member of the European PSK Club. All QSL
info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>.
NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see
<www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for
their awards.

KH9, WAKE ISLAND (Update). Tentative dates (Wake Time-Zone Dates) have
been posted on the K9W Web page <www.wake2013.org>. The team expects to
arrive on October 5th, set up on October 6th, operate on October 7th,
stop/teardown on October 18th and depart on October 19th. Also suggested
frequencies are:
CW - 1826.5, 3523, 5405, 7023, 10103, 14023, 18079, 21023, 24894 and 28023
SSB - 3790, 5403.5, 7082, 14185, 18140, 21285, 24955 and 28485
RTTY - 3580, 7035, 10142, 14080,18099, 21080, 24912 and 28080 kHz
6M - 50107/CW and 50107/SSB

OJ0, MARKET REEF (Update/Change). Pasi, OH3WS, will be on Market Reef
(EU-053) as a voluntary worker between September 7-13th, and will be

active as OJ0W during his spare time. Activity will be on 40-10 meters mostly CW. QSL via OH3WS, by the Bureau or direct to: Pasi Bergman, Tuulipolku 4, 13500 Finland. ADDED NOTE. A YL Mirja (not Pasi's YL) will be there on the Reef with him and was very interested in HAM radio in Sept. 2012. When they were there last time, she made some QSOs. Pasi states, "I will give her a possibility to make QSOs as a second operator on SSB. It has been a long time since OJ0 was QRV by any YL-operator. We'll see what happens."

ONLINE HAM RADIO LOG STATISTICS WEB SITE. Yan, XV4Y, runs as Web page called "QScope" <http://www.qscope.org/>. QScope.org is an online application that provides statistics and charts from HAM Radio logs. While some features are designed with contesting in mind, most of the statistics will be useful for DXers and DXpeditions. You just import your ADIF 2 or Cabrillo logs into QScope database and then browse the statistic and charts pages. The application allows for exporting your results in PDF and to share the web links to the charts you produced with your friends. QScope permits you to create as many containers as you want and import as many logs as you need into them, so you can classify or aggregate the data the way you want. QScope offers informations like:
- Number of QSOs, Operating Time
- Unique callsigns worked, unique DXCCs entities, CQ and ITU Zones
- Average and Maximum QSO Rates over periods of 10, 30 and 60 minutes
- Activity Map showing which band, mode, operating position was more productive during a contest
- Charts with number of QSOs per unique callsign, band, mode or operator
- Charts with number of Points per unique callsign, band, mode or operator
- Charts with number of QSOs per CQ and ITU Zones
- Charts showing hour by hour, the Number of QSOs and Points, Number of new CQ and new ITU Zones worked, Number of new DXCC entities and new Prefixes worked
- Charts with Operating Time per band, mode or operator with parameter for pause duration
- Charts showing minute by minute how much was your QSO Rate for your whole log, per operator or per band, with parameter for the sample duration from 5 minutes to 60 minutes
- Charts with Maximum QSO Rates per band, mode or operator with parameter for the sample duration from 5 minutes to 60 minutes

* Note that the informations you can display depends on the data available in your logfile. ADIF logs containing more details than Cabrillo.

More features and statistics are planned to be included in future versions. Suggestions are welcome. Registration and access to the website are free.

PACIFIC TOUR (EME Op). Hermann, DL2NUD, will once again be active from the Pacific, this time as H44HP from Solomon Islands and YJ9HP from Vanuatu sometime in October and November (dates and specific islands not provided). Activity will be focused on VHF Bands for EME QSOs. QSL via his home callsign, direct or by the Bureau.

QSL INFO AND NEWS.....
HS4AK via E20YLM
HS5AM via HS5IGY

Randy, W5UE, reports [edited], "I now have an online log search and OQRS Web application for many of the stations I manage. Logs currently online: 9V1YC, 9V9HQ, AK6W, EY3M, EY8ZE, HC8GR, HC8N, NA5NN and ZP5YW. 9V1YC's upcoming DXpedition to Laos (XW1YC) will also be supported. Daily updates from James is anticipated while he is QRV from XW. The Web link is <http://w5ue.net/qsl-w5ue-logsrch.html>.

QSL RECEIVED VIA LoTW: None reported this week!

QSLS RECEIVED VIA MAIL: 6O3A, FH5EJ, J28AA and UT1FG/MM

QSLS RECEIVED VIA THE BUREAU: 4O8A, 5B/DG6MFA, 9K2/SP4R, 9M6/N6MUF, 9N7CB, A65BB, CT7/DL5MFW, H40FN, H44MS, LX0RL, HS0ZGQ, MJ/DL2SBY, PJ2/DB5IJ, VP2MXF, SU/DJ5IW, TA4/DL2DXA, Z21LS and ZD8XF

SATELLITE ACHIEVEMENT. Congratulations to John, K8YSE, for working and confirming all 488 USA lower 48 States grids. John states, "Satellite operators come and go and grids come and go with them. A grid might have a very active operator in it and then it is off the air when that person goes away for whatever reason. Interestingly, about half of the 488 grids that were worked were from those operating portable, not in the sense of using a radio with batteries, but in the traditional sense of operating away from their home station location. Once you have experienced being on the other end of a small pileup, you will want to do it again." He also states, "I started with satellites in June 2006 and only had 47 USA grids by August 2008. From August 2008 till Jan 2009 I worked another 109. In 2009 199 were worked. 2010 was 76 and 2011 was 44. Only 4 new grids were worked in 2012 and 9 were snagged in 2013." John is possibly the first person to ever work all 488 USA lower 48 States grids (at least

in the past 10 years) on the satellites. HOWEVER, the sad part about this is there is NOT an award for this wonderful accomplishment.

SOUTHEAST TOUR. The "DX-World.net" reports that operators Fusa/JR3CNQ and Take/JS6RRR will be active from Singapore (9V1 - IOTA AS-019) and West Malaysia (9M2) on the following dates:
September 20-21st and 23rd - Callsigns 9V1/JR3CNQ and 9V1/JS6RRR
September 21-23rd - Callsigns 9M2/JR3CNA & 9M2/JS6RRR
Activity will be on 40-10 meters using CW, SSB and the Digital modes. In case of heavy rain or other conditions, the operation conditions may vary. QSL via their home callsigns (see QRZ.com).

T10, TRANSNISTRIA. Vladimir, UA4WHX, is now active as T10VB from the breakaway territory between the River Dniester and the eastern Moldovan border with Ukraine called "Transnistria". They declare independence in 1990 from the Republic of Moldova. You can read more about Transnistria at: http://en.wikipedia.org/wiki/Transnistria
http://www.transnistria.info
Currently, Transnistria is NOT a DXCC entity because it does not meet the current DXCC Criteria. Vladimir started his activity on Friday, August 30th, and has been on 80/40/30/20/17/15 meters mainly on CW but some SSB. QSL via UA4WHX.

T32, EAST KIRIBATI (Update). Tim, NL8F, will be active as T32TM from East Kiribati between November 26th and December 11th. He states that he is bringing an IC-7000 with an ALS600, and is working on getting a CrankIR vertical (if this does not work, it will be Butternut HFV9 vertical on the beach). Activity during the first week Tim will be using T32TM. QSL via K8NA. During the second week, he will join up with the T32RRC team (4-5 guys) on Kiritimati Island (OC-024), and they will be bringing more radios and antennas. A Web site is still under construction.

T8, PALAU. Madison, W5MJ, will be "on another sole DX adventure" to Palau as T88TV between September 10-16th. Activity will be CW only on all bands with an emphasis on 80 and 160 meters. He will use an inverted L, with 500 watts and a tuner. He mentions, "Palau is nine hours ahead of GMT". QSL via W5MJ.

V5, NAMIBIA. David, BA4DW, is now active as V5/BA4DW from Windhoek until September 6th. Reports indicate that his activity will be holiday style with a focus on Asia on 20 meters using CW and SSB. However, QSNs show that he has been mainly on 15 meters CW. QSL via his home callsign.

VQ9, CHAGOS ISLAND. By the time you read this, Kazeno, JO1GWT/KJ6ZHM, will be active as VQ9KA near Diego Garcia until September 8th. Look for his activity to be on the following specific days: September 1st, 2nd, 7th and 8th, starting at 0300z. He states that if it rains there will be no operation. Operations will be on 40-10 meters using CW and SSB. QSL via JO1GWT, direct or by the Bureau.

YO, ROMANIA (WFF Op). A Hungarian group along with YO5AJR, will operate from the Muntii Maramuresului (Maramarosi NP.) [YOFF-023] between September

6-8th. The members of the group are: Istvan/HA0KA (team leader), Pista/
HA0DI, Mate/HA0MT and Miki/YO5AJR (and possibly laci/HA0HW Laci). Activity
will be on 160-10 meters using CW, SSB and the Digital modes. QSL via
their home callsigns, by the Bureau or direct.

XW, LAOS. Just a reminder that operators Steve/9M6DXX and James/9V1YC
will operate as XW8XZ and XW1YC, respectively, from Vientiane between
September 5-10th. They plan to have two stations on the air. XW8XZ
activity will be on SSB and XW1YC will mainly be CW with some SSB. QSL
XW8XZ via M0URX and XW1YC via W5UE. ADDED NOTE: It has been reported
that operators George/EA2TA, Christian/EA3NT, Raul/EA5KA, Vincent/F4BKV,
Don/G3XTT and Col/MM0NDX are joining Steve and James and now plan to
operate five stations on 160-6 meters using CW, SSB and RTTY. OPDX has
not verified this yet.

XW, LAOS (And JARL Ham Fair Wrap-Up!!). Champ, E21EIC, informs OPDX
[edited], "I had very great time at the JARL Ham Fair 2013, and it was
very nice to attend the Japan DX meeting 2013 which had many famous hams
attending: OH2BH, NN1N, W6VNR/ZF2AH, KK6EK, DS4EOI, DF2OO and JAs hams.
All Story and pictures will show up on RAST website <http://www.qsl.net/rast>
and I operated as JH1TEQ from the best station in the world from JH1AJT
Zorro's station. I made about 400 QSOs, and QSL will be sent automatically
via the Bureau." He also states to look for XW0YJY in the All Asian DX
SSB Contest (September 7-8th) as a Single-Op/All-Band/Low-Power entry.
QSL via E21EIC.

XZ, MYANMAR (Update). Zorro, JH1AJT, will be in Nay Pyi Taw, Myanmar,
between September 18-23rd, signing XZ1Z again. He has spotted a better
location on top of a 1557 ft. hill, and expects to have better signals.
He will bring a 10-15-20m tri-band Yagi in addition to the GPs used
last month. The operation will be mainly CW this time and focus on NA/SA.
In mid November, the Foundation for Global Children (FGC) will have a
multi-national team DXpedition to Myanmar for about 10 days with three to
four stations, 24 hours, 160□10 meters using CW, SSB and the Digital
modes. Stay tuned! QSL via ClubLog OQRS (preferred) or JH1AJT.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30902
SIDC SOLAR BULLETIN 02 Sep 2013, 1209UT
SIDC FORECAST (valid from 1230UT, 02 Sep 2013 until 04 Sep 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 02 Sep 2013 10CM FLUX: 104 / AP: 011
PREDICTIONS FOR 03 Sep 2013 10CM FLUX: 104 / AP: 012
PREDICTIONS FOR 04 Sep 2013 10CM FLUX: 104 / AP: 015
COMMENT: Solar activity has been eruptive during the past 24 hours, featuring one
C1.7 flare from NOAA AR 11834 peaking at 14:20 UT. More C flares from NOAA
AR 11834 and 11836 are likely within the next 48 hours, with a slight
chance for an M flare. Solar wind speed rose from about 460 to 580 km/s
around 6h UT on September 1, possibly due to the effects of the CME of
August 30. Solar wind speeds later decreased to about 430 km/s and climbed
to a peak of 520 km/s around 3h UT on September 2. Current wind speed lies
around 420 km/s. Meanwhile, the Interplanetary Magnetic Field varied
between 2 and 6 nT. Solar wind may experience the influence of a small
Coronal Hole on September 4. The geomagnetic activity was at quiet levels
(K Dourbes between 1 and 3; NOAA Kp between 2 and 3) during the past 24
hours. Quiet conditions (K Dourbes < 4) are expected for September 2 and 3.
Quiet to active conditions are possible on September 4, due to the effects
of a Coronal Hole high speed stream.
TODAY'S ESTIMATED ISN : 058, BASED ON 11 STATIONS.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30903
SIDC SOLAR BULLETIN 03 Sep 2013, 1209UT
SIDC FORECAST (valid from 1230UT, 03 Sep 2013 until 05 Sep 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 03 Sep 2013 10CM FLUX: 104 / AP: 006
PREDICTIONS FOR 04 Sep 2013 10CM FLUX: 104 / AP: 019
PREDICTIONS FOR 05 Sep 2013 10CM FLUX: 104 / AP: 008
COMMENT: Solar activity has been quiet during the past 24 hours, featuring no C
flares. There is a chance for C flares within the next 48 hours. The solar
wind speed decreased from 420 to 380 km/s in the past 24 hours. In the same
period, the Interplanetary Magnetic Field rose from 5 to 9 nT. The
geomagnetic activity was at quiet levels (K Dourbes between 0 and 2; NOAA
Kp between 1 and 3) during the past 24 hours. Quiet conditions (K Dourbes <
4) are expected for September 3 and 4, with a chance for active periods
from the second half of September 4 onwards, due to the effects of a
Coronal Hole high speed stream.
TODAY'S ESTIMATED ISN : 051, BASED ON 14 STATIONS.

PREDICTIONS FOR 06 Sep 2013 10CM FLUX: 112 / AP: 007
COMMENT: Solar activity has been eruptive during the past 24 hours, featuring nine C
flares. The brightest flare (C3.6) peaked at 04:28 UT on September 4 and
was produced by NOAA AR 11837 like most C flares in this period. More C
flares are likely within the next 48 hours, with a slight chance for an M
flare, especially from NOAA AR 11837. The solar wind speed ranged between
380 and 480 km/s in the past 24 hours. In the same period, the
Interplanetary Magnetic Field decreased from around 8 to 4 nT. The
geomagnetic activity was at quiet levels (K Dourbes between 1 and 3; NOAA
Kp between 1 and 3) during the past 24 hours. Quiet conditions (K Dourbes <
4) are expected for September 4 to 6, with a chance for active periods on
September 5, due to the effects of a Coronal Hole high speed stream.

DX Bulletin 36 ARLD036
>From ARRL Headquarters
Newington CT September 5, 2013
To all radio amateurs

SB DX ARL ARLD036
ARLD036 DX news

This week's bulletin was made possible with information provided by NC1L, SV4FFL, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

CROATIA, 9A. Dave, K1ZZ is QRV as 9A/K1ZZ until September 7. QSL to home call.

BOTSWANA, A2. Arnold, WB6OJB and Frosty, K5LBU are QRV as A25JK and A25CF, respectively, from the Lotsane Game and Safari Lodge until September 12. Activity is on 80 to 10 meters using SSB and PSK with two stations. QSL A25JK direct via WB6OJB and A25CF via K5LBU.

ANDORRA, C3. Members of the new association Associacio Radioaficionats Divulgant Andorra al Mon will be QRV using special event call C37AC on September 7 and 8 during the festivities in Meritxell. QSL direct.

ST. PIERRE ET MIQUELON, FP. Peter, DJ4TC and Hermann, DL2NUD will be QRV as FP/home calls from Miquelon Island, IOTA NA-032, from September 10 to 21. Activity will be primarily on 2 meters, 70 and 23 cm using JT65B and JT65C. QSL to home calls

MARKET REEF, OJ0. Pasi, OH3WS will be QRV as OJ0W from September 7 to 13 while doing volunteer work. Activity will be on 40 to 10 meters using CW and SSB in his spare time. QSL to home call.

PAPUA NEW GUINEA, P2. Akira, JA1NLX will be QRV as P29NVX from Lissneung Island, IOTA OC-008, from September 8 to 13. Activity will be on 30 to 10 meters using CW, SSB, RTTY and PSK31. QSL direct to home call.

BANGLADESH, S2. Rana, S21R is active from Dhaka until mid September. Lately he has been active on 20 meters using SSB around

1400z. In addition, Sohel, S21S has been QRV on 20 meters also around 1400z. QSL S21R via N4VA and S21S via operator's instructions.

GREECE, SV. A group of operators are QRV as J44LH from the Trikeri Lighthouse on Point Kavoulia on the Pagasitikos Gulf until September 15. Activity is on 160 to 6 meters using CW, SSB, RTTY and PSK. QSL via SV4FFL.

PALAU, T8. Gerben, PG5M is QRV as T8GM from Koror, IOTA OC-009, until September 7. He will again be active from September 15 to 19. Activity is on 40 to 10 meters using CW. QSL to home call.

NAMIBIA, V5. Operators Hardy, DF3GY, and Hans, DF2UU will be QRV as V5/home calls from Omaruru from September 7 to 15. Activity will be on 160 to 6 meters using CW and SSB. They will be QRV as V55V in the IARU Region 1 SSB Field Day and the upcoming Worked All Europe SSB contests. QSL via DJ8VC.

MICRONESIA, V6. After his Palau activity, Gerben, PG5M will be QRV as V6G from Yap Island, IOTA OC-012, from September 8 to 15. Activity will be on 40 to 10 meters using CW. QSL to home call.

LAOS, XW. Operators 9M6DXX and 9V1YC are QRV as XW8XZ and XW1YC, respectively, from Vientiane until September 10. Activity is on 160 to 6 meters using CW, SSB and RTTY. QSL XW8XZ via M0URX and XW1YC via W5UE. In addition, look for Champ, E21EIC to be QRV as XW0YJY in the All Asian DX Phone contest as a Single Op/All Band/Low Power entry. QSL to home call.

INDONESIA, YB. Operators Budi, YF1AR, Fan, YB0AI and Adhi, YB3MM will be QRV as home calls/9 from Pulaus Kimaam Island, IOTA OC-275, and the Kimaam Lighthouse, ARLHS IDO-148, from September 10 to 16. Activity will be on 40 to 10 meters using CW, SSB and digital modes with three stations active. QSL YF1AR/9 via N2OO, YB0AI/9 direct to home call and YB3MM/9 to home call.

ROMANIA, YO. Operators Istvan, HA0KA, Pista, HA0DI, Mate, HA0MT and Miki, YO5AJR are QRV as YO/home calls/p and YO5AJR/p from Munti Maramuresului until September 8. Activity is on 160 to 10 meters using CW, SSB and digital modes. QSL to home calls.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations have been approved for DXCC credit: Jordan, JY9FC, current operation beginning August 2013; Myanmar, XZ1Z, 2013 operation. If you've had XZ1Z rejected in a prior application, send a note to bmoore@... to be placed on this list for an update to your record.

THIS WEEKEND ON THE RADIO. The QRP CW Fox Hunt, NCCC RTTY Sprint Ladder, NCCC Sprint, PODXS 070 Club Jay Hudak Memorial 80-Meter Sprint, G3ZQS Memorial Straight Key CW Contest, All Asian DX Phone Contest, Russian World Wide RTTY Contest, Wake-Up. QRP CW Sprint,

SKCC Weekend CW Sprintathon, AGCW Straight Key CW Party, RSGB SSB Field Day, IARU Region 1 SSB Field Day, Ohio State Parks on the Air, QCWA Fall QSO Party, North American CW Sprint and the DARC 10-Meter Digital Contest will certainly keep contesters busy this upcoming weekend.

The CWops Mini-CWT CW Test, NAQCC-EU Monthly CW Sprint and RSGB 80-meter Club SSB Sprint are scheduled for September 11. Please see September QST, page 79, and the ARRL and WA7BNM contest web sites for details.

21606. Historical DX List question

Yahoo group: DX-IS (2013)
Date: 2013-09-06 02:47:14 UTC
From: John Geiger
Topic: 21606 Message: 21606

This question comes from a discussion we are having on the DX forum on eham.net. Does anyone on this list know the history of why Asiatic Russia (UA9-0) is counted as a separate DXCC entity from European Russia? What criteria were in place when it was added to the list that made it qualify as a separate entity? It doesn't have a separate political administration, and it isn't geographically far enough away from European Russia, nor is it separated by an intervening DXCC country.

73 John AF5CC

21607. Report SIDC Ursigram

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30906
SIDC SOLAR BULLETIN 06 Sep 2013, 1209UT
SIDC FORECAST (valid from 1230UT, 06 Sep 2013 until 08 Sep 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 06 Sep 2013 10CM FLUX: 110 / AP: 006
PREDICTIONS FOR 07 Sep 2013 10CM FLUX: 110 / AP: 007
PREDICTIONS FOR 08 Sep 2013 10CM FLUX: 110 / AP: 007
COMMENT: Solar activity has been eruptive during the past 24 hours, featuring two
low C flares from NOAA AR 11836 and 11837. More C flares are likely within
the next 48 hours, with a slight chance for an M flare. The solar wind
speed ranged between 380 and 470 km/s in the past 24 hours. In the same
period, the Interplanetary Magnetic Field was low around 3 to 5 nT. The
geomagnetic activity was at quiet levels (K Dourbes between 1 and 3; NOAA
Kp between 1 and 2) during the past 24 hours. Quiet geomagnetic conditions
(K Dourbes < 4) are expected for September 6 to 8.

ARLP036 Propagation de K7RA

ZCZC AP36
QST de W1AW
Propagation Forecast Bulletin 36 ARLP036
>From Tad Cook, K7RA
Seattle, WA September 6, 2013
To all radio amateurs

SB PROP ARL ARLP036
ARLP036 Propagation de K7RA

Conditions were quieter again this week. Average daily sunspot numbers declined from 77 to 69, and average daily solar flux was off by 9.5 points to 106.9, when compared to the previous seven days, August 22-28.

Predicted solar flux for the near term is 105 on September 6-10, 100 on September 11-12, 110 on September 13, 120 on September 14-15, 115 on September 16-17, 110 on September 18, 105 on September 19-20, 110 on September 21-22, 105 on September 23-24, and 100 on September 25-28. It then is expected to reach a minor peak of 115 on October 4-5, then 120 on October 9-12.

These predictions come from a 45-day forecast. Yesterday, September 5, the solar flux was 110.1. The first prediction for that date in this series pegged it at 135, which maintained from July 22-28, then 105 on July 29 through August 4, 115 on August 5-11, 105 on August 12-18, 110 on August 19-28, 112 on August 29, 115 on August 30, 118 on August 31, 112 on September 1-2, and then they nailed it at 110 again on September 3-4. Note that these aren't the flux readings on those dates. They are the predicted values for September 5, as they varied from day to day in the daily forecast for the previous 45 days.

You can see those daily forecasts here:

http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html

The planetary A index is in the same forecast. The latest has predicted planetary A index at 5 on September 6-8, 10 on September 9-10, 12 on September 11, 8 on September 12-14, 5 on September 15-16, then 12, 18 and 15 on September 17-19, 5 on September 20-22, and 8 on September 23-24.

The Autumnal Equinox (September 22 at 2044 UTC) is a little over two weeks away. Fall is always a great time for HF DX, when the sun casts an even glow over our northern and southern hemispheres. Although solar activity is weak, if this is Cycle 24's peak, now may be the best time for enjoying HF propagation for some years to come. Or the Sun could fool us again. Remember that day-to-day variations in solar activity can swing wildly above and below any predicted smoothed or averaged sunspot or solar flux number. But we haven't seen much of that lately.

F.K. Janda, OK1HH offers his geomagnetic forecast. Mostly quiet conditions September 6-7, quiet to unsettled September 8, quiet to active September 9, quiet to unsettled September 10, quiet to active September 11, active to disturbed September 12, quiet September 13, mostly quiet September 14, quiet September 15-16, quiet to active September 17, active to disturbed September 18, quiet to unsettled September 19-21, mostly quiet September 22, quiet to active September 23, quiet September 24-25, mostly quiet September 26, active to disturbed September 27, quiet to active September 28, mostly quiet September 29, quiet September 30, quiet to active October 1, and quiet on October 2.

Last week's Propagation Forecast Bulletin ARLP035 mentioned average sunspot numbers, but we were missing two days of data (from August 30-31) to get the complete average. As it turns out, those two days had low enough sunspot numbers that it actually dragged the 3-month moving average and the monthly average for August lower.

So the three month moving averages of sunspot numbers for periods ending in January through August 2013 were 82.8, 73.6, 80.7, 85.2, 106.4, 106.4, 97.5 and 85.6. The average daily sunspot number for the month of August was 90.2, up from 80.2 and 86.2 in June and July.

Thanks so much to Scott Bidstrup, TI3/W7RI in Costa Rica who sent a link to a fascinating article in Phys.Org News and Astronomy and Astrophysics about yet another failure to replicate earlier studies claiming a correlation between planetary positions and solar activity. In this case, the authors found several serious statistical errors in the earlier analysis. Read the article and abstract at,
http://phys.org/news/2013-09-evidence-planetary-solar.html and
http://www.aanda.org/index.php?option=com_content&task=view&id=966&Itemid=277.
Note that for a limited time, the full text of the paper is available for free by clicking on the "Register Now" button on that last page.

NASA has an updated prediction for sunspot Cycle 24, and like last month, they predict the peak for Summer 2013 (that's now!) but they have downgraded the expected smoothed sunspot number from 67 to 66. Read it and weep at,
http://solarscience.msfc.nasa.gov/predict.shtml. They do not have

any archive of past predictions, but never fear, I have been keeping careful track.

A year ago, they sounded an optimistic note, when the September 2012 update changed from a peak of 60 in Spring 2013 to a peak of 76 in Fall 2013.

A month later in October it changed to a peak of 75 in Fall 2013, then in November it dropped to 73 in Fall 2013. In December the number was revised to 72, and in January 2013 the predicted peak was changed to 69. February's prediction was unchanged, then March 2013 revised the peak down again to 66. April and May were unchanged, and in June the prediction was revised upward from a peak of 66 in Fall 2013 to a peak of 67 in Summer 2013. July and August were unchanged, and now we have the number back down a point in again to 66 in September.

Lawrence, GJ3RAX sent us more nice VHF reports from the British Isles. The first, in an email on August 30:

"Sporadic-E openings on 6 m are starting to become quite rare at this time of year. I thought that the one on August 12 was going to be the last one. I had some nice QSOs that day with IS0, OE1, F4, HA5, OK2 and EA6. After that I did not catch any more until last Wednesday August 28 when 6 m opened again. I then had 8 QSOs into Germany, 3 into OK, one each with OE and SP. Those were between 1430-1545 GMT. A friend of mine told me afterwards that he was also getting some good ones on 4 m which I did not bother to check. I would probably have missed the opening if I was not using my IC-756 Pro 2 which I had left on 6 m with the panoramic display visible when I glanced at it. Any signals that are strong enough to work with SSB show up well. I do not use any of the other modes.

"The next two days also showed propagation at times. On August 29 I had one QSO with CT1EUB at 1200 GMT. On August 30 I was in QSO with EA7/G0WHX at 1030 GMT. The band opened again later after a QSO with F6HRP, who is relatively local, at 1720 GMT followed by CT1FJC.

"I have not had any QSOs on the HF bands recently. I listen at times but rarely hear anything on the bands from 17 m to 10 m which seems very strange considering that we are at about the peak of this solar cycle. I used to keep skeds on 17 m with friends in the USA and Canada. My antenna on those bands is an old Cushcraft R5 at only 10 feet above the ground. On 20 m I usually hear some European activity but often without hearing anyone speaking English. Even 40 m seems quieter that it used to be as I used to use it as a chat band during daytime with those in other parts of the British Isles. I have not been on 80 m recently, even at night, and it seems to be years since I used Top Band.

"Thanks for mentioning our VHF and Microwave groups on Yahoo. After that both gained new members from the USA. The VHFandUHF group is

now up to 125 members."

And on September 6, another report:

"Every Tuesday evening there is a short VHF contest, organized by the RSGB, on a different band each week. They run from 8 pm to 10:30 pm local time, now still BST. This week, on September 3, it was on 2 m and conditions were interesting. I only come on for part of the contest each week as I never take them seriously from the competitive point of view. This time I started shortly after 9 pm and started with a QSO with an EI station, then G, GW and GD. My QSO with GD8EXI was my best DX that evening at about 356 miles, according to QRZ. After that it was all G stations apart from exchanging notes with some of the others here in GJ. One of them had worked up to GM but that might have been on CW. I only use SSB.

"I had heard reports of some of the more northern stations working down to EA8. I did hear weak signal from the north of England, towards the end of the contest, working an EA8 so I turned my beam south but did not hear anything.

"The contest next Tuesday evening will be on 70 cm: http://www.rsgbcc.org/vhf/.

"Wednesday morning, September 4, it was still good on 2 m and I worked 4 stations in the south of EI where it was mostly a sea path between us apart from a bit of Cornwall to get over. They were between 320 and 370 miles away. I also worked into the south of GW and a French station at about 200 miles near Paris. One of the EI stations wanted to try 70 cm as well although he knew that he had an antenna problem. We made it although it was rather marginal. Later he was able to fix the problem with his antenna so we tried again in the evening but nothing was heard. The region of high pressure had moved and it was raining at his end.

"I have heard nothing on 6 m since the QSOs on August 30 so it looks as if the Sporadic-E season is over and we are getting into the tropo season.

"There is the 144 MHz Trophy Contest this weekend on Saturday and Sunday. I am not expecting conditions to be good for that one but I will be on for some of the time but not while I am watching the F1 motor racing from Monza."

Thank you Lawrence.

Not hearing anything on 10 meters? Check out "Tony's 10 Metre Band Report" from G4CJC:

http://www.southgatearc.org/bands/10metres/september2013/september_05.htm#.UimEfD_VV9M.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for August 29 through September 4 were 55, 62, 60, 71, 84, 74, and 77, with a mean of 69. 10.7 cm flux was 108.8, 107.5, 107.5, 103.8, 105.6, 106, and 109.3, with a mean of 106.9. Estimated planetary A indices were 3, 8, 11, 9, 10, 7, and 6, with a mean of 7.7. Estimated mid-latitude A indices were 4, 7, 11, 10, 11, 8, and 9, with a mean of 8.6.

07 September 2013 A.R.I. DX Bulletin
No 1166
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3D2_rot- Andy, LZ2HM will join the 27 September-11 October expedition to Rotuma [425DXN 1157]. He will be active as 3D2RA on CW, SSB and digital modes (including participation in the CQ WW RTTY Contest), with "special activity" on 6m JT65A via EME. QSL via LZ2HM. Further information can be found at www.3d2gc.com
4O - Gab, HA3JB will operate CW, RTTY and SSB as 4O/HG3IPA from Budva, Montenegro on 23-30 September. He will be active during the CQ WW RTTY Contest, and he also plans a side trip to Sveti Nikola Island (EU-163) during that time frame. QSL via HA3JB (direct). [TNX HA3JB]
8Q - Chris, DL2MDU and his wife Heike, DO3HDA will be active as 8Q7CF from Biyadhoo, Maldives (AS-013) on 15-27 September. They will operate CW, SSB and digital modes on 80-10 metres. QSL via DL2MDU and LoTW. [TNX NG3K]
A3 - Masa, JA0RQV hopes to be active as A35JP from Niuatoputapu Island (OC-191) on 19-24 September. He will operate CW and SSB on 80-6 metres, running 100 watts into a full size GP, but he expects his activity to be affected by the limited supply of electric power on the island. This operation will also depend on weather and flight availability. If he cannot go to Niuatoputapu, he might be QRV from Tongatapu (OC-049), or Haapai (OC-169) or Vavau (OC-064) instead. QSL via JA0RQV, direct or bureau, and LoTW. [TNX JA0RQV]
C3 - The newly formed Associacio Radioaficionats Divulgant Andorra al Mon (ARDAM) will be active for the first time as C37AC on 7-8 September. QSL direct (see qrz.com) or LoTW.
CT9 - Matt, DJ8OG will be active from Madeira Island (AF-014) on 10-17 September. He will participate in the WAE DX SSB Contest (14-15 September) as CR3L (QSL via DJ6QT); outside the contest he will be signing CT9/DJ8OG, with activity on the HF bands and 6 metres. QSL CT9/DJ8OG via home call, direct or bureau, and LoTW.
EA6 - Piotr, SP2QCW will be active as EA6/SP2QCW from Mallorca Island (EU-004) from 15 September to 6 October. He will operate holiday style on the HF bands. QSL via home call. [TNX SP2QCW]
HB0 - Johannes, DF5AU will be active as HB0/DF5AU from Liechtenstein on 14-19 September. He will operate CW and SSB on the HF bands, with

a focus on the higher bands. QSL via DF5AU, direct or bureau, and LoTW. [TNX NG3K]
I - Look for Francesco IL7/IZ7KHR, Michele IL7/IZ7ECT, Umberto IL7/IK7SUO and Sabino IL7/IZ7XFC to be active from the Tremiti Islands (EU-050) on 7-8 September. QSL via home calls, direct or bureau. [TNX DX Coffee]
I - Franco, IK4YCQ will be active as IL7/IK4YCQ from San Domino Island (EU-050) on 14-19 September. He will operate holiday style on 40-6 metres SSB. QSL via home call, bureau or direct. [TNX IK4YCQ]
JA - Taka, JA8COE will be active as JA8COE/8 from Yagishiri Island (AS-147) on 14-16 September. QSL via home call, bureau preferred. [TNX rsgbiota.org]
JW - DL2JIM, DL2JRM and DL5SE will be active as JW5E from Longyearbyen (EU-026), Svalbard on 13-16 September, including an entry in the WAE SSB Contest (14-15 September). QSL direct to Svalbardgruppen Av NRRL, P.O. Box 498, 9171 Longyearbyen, Norway. [TNX rsgbiota.org]
OJ0 - Pasi, OH3WS will on Market Reef (EU-053) as a voluntary worker on 7-13 September, and will be QRV in his spare time as OJ0W. He expects to operate CW and some SSB on 40-10 metres. QSL via OH3WS, direct or bureau. [TNX NG3K]
PJ4 - Frank, PH2M will be active as PJ4M from Bonaire (SA-006) on 13-26 September. QSL via PH2M.
PJ7 - Dave, AH6HY will be active holiday style as PJ7/AH6HY from Sint Maarten (NA-105) on 13-18 September. He will operate SSB on 15, 17 and 20 metres, primarily during his evening hours. QSL via home call. [TNX NG3K]
SV - SV4AAQ, SV4AFY, SV4FFK, SV4FFL, SV4FFO, SV4FFX and SV4/SV8GGI will be active as J44LH from the Trikeri Lighthouse on 7-10 September. They plan to be QRV on all bands and modes. QSL via SV4FFL (direct only). QSLling policy and other information can be found at http://j44lh.blogspot.com/
SV - Marek, SP5ISZ will be active holiday style as SV8/SP5ISZ from Milos Island (EU-067) on 12-24 September. QSL via home call, direct or bureau, plus LoTW and eQSL. [TNX rsgbiota.org]
UA - Dmitry UA0L QSL via IK2DUW), Yuri UA0LTE and Igor UB0LFM to operate from the Lazovsky Nature Reserve on 6-9 September. They will operate on the HF bands as homecall/p as well as RK0LXX/p. [TNX UA0L]
UA - UA9OBA, UA0LCZ, RU0LL, RU0LW and others will be active as R20RRC/0 from Russkiy Island (AS-066) on 6-10 September. They will operate CW and SSB on all bands, and will participate in the All Asian DX SSB Contest (7-8 September). QSL via RZ3EC. [TNX UA9OBA]
W - The Citrus Belt ARC presents the 14th annual Route 66 On The Air special event, celebrating the historic US Highway 66 (the 'Mother Road'). Amateur radio clubs using 1x1 callsigns (from W6B through W6T) will operate from cities along the highway on 7-15 September. Full information is available on http://www.w6jbt.org/2013site/
XZ - Zorro, JH1AJT will be active again as XZ1Z from Nay Pyi Taw, the

capital city of Myanmar, on 18-23 September. "He has spotted a
better location on top of a 1557 feet hill", JA1TRC says, "and
expect to have better signals. He will bring a 10-15-20m tri-band
Yagi, in addition to the GPs used last month". This time he will
operate mainly CW with a focus on North and South America. QSL via
Club Log OQRS (preferred) or JH1AJT.
In mid November, the Foundation for Global Children (FGC) will
conduct a multi-national team DXpedition to Myanmar for about ten
days. Plans are to have 3-4 stations QRV 24/7 on 160-10 metres CW,
SSB and digital modes. Further information is expected in due
course. [TNX JA1TRC]
YB - Adi YB9GV, Tris YB9IUS, Kardi YB9KA and Jan YC9JIN will be active
as homecall/p from Bungin Island (OC-150) on 6-8 September. They
will be QRV on 15 and 20 metres only. QSL via operator's
instructions. [TNX W2FB]
YB - The team for the YB9Y expedition to Bras Island (OC-276, new one)
[425DXN 1160] now includes 27 members (YB0AZ, YB0ECT, YB0JS,
YB0KVN, YB0TSU, YB1CCF, YB1GJS, YB1KAR, YB1MH, YB1PR, YB9SB,
YB9WR, YB9YZ, YC0KVM, YC0LLY, YC0RAN, YC1CDV, YC1CWK, YC1KAF,
YD1GCL, YD1JZ, YD1LUX, YD1MRI, YD1ORZ, YD1XUH, JA1PBV/WK1S and
PD9DX). Plans are to be QRV on 20-27 October, with several
stations on the HF bands and one station for 6 metres. The logs
will be uploaded to Club Log, hopefully during the expedition. QSL
via YB1GJS, direct or bureau (OQRS on Club Log). Further
information, including detail on how to contribute to
this
expensive project, can be found at www.yb9y.com [TNX PD9DX]
YO - A group from Hungary (HA0KA, HA0DI, HA0MT and possibly HA0HW)
along with Miki, YO5AJR will be active from the Maramures
Mountains Natural Park on 6-8 September. They will operate CW, SSB
and digital modes on all bands. QSL via home calls, direct or
bureau. [TNX HA0HW]
Z8 - Adding to the Z81X operation of last spring, Robert S53R will be
in Juba for a work assignment and will be involved with a
preparatory phase of Project Goodwill South Sudan. He will be
active in his spare time as Z81R on 10-14 September. QSL via
OH2BH. "The announcement of a much anticipated low-band operation
is only a few weeks away", Martti OH2BH says. "The multinational
team is busy getting the equipment and other material into South
Sudan".

DXCC NEWS ---> JY9FC (Jordan, current operation beginning August 2013) and XZ1Z (Myanmar, 2013 operation) have been approved for DXCC credit. [TNX NC1L]

QSL GALLERY ---> The large collection of QSL cards on Les Nouvelles DX's web site has been updated. Fifteen different galleries include 11,368 cards for the ten Most Wanted DXCC Entities (2004-12), the 61 deleted DXCC Entities, obsolete prefixes, stations from Maghreb from 1945 to 1962, Allied Forces stations in Germany (1946-69), special stations commemorating ITU and IARU, Antarctic bases & TAAF (Terres Australes and Antarctiques Francaises), the various French DXCC island Entities in the Pacific Ocean, the Indian Ocean and the Americas (from 1945 to 1969), pre-1945 countries, French Departments and CONUS, plus a gallery for cards not accepted by DXCC. Your participation is encouraged - please visit www.LesNouvellesdx.fr [TNX F6AJA]

TRANSNISTRIA ---> Vladimir, UA4WHX has been active as T10VB since 30 August from Transnistria (http://en.wikipedia.org/wiki/Transnistria). Located between the River Dniester and the eastern Moldovan border with Ukraine, this breakaway territory has been governed as the Pridnestrovian Moldavian Republic since its declaration of independence from the Republic of Moldova in 1990. DXCC wise, it is not a separate Entity as it does not meet the current DXCC Criteria. QSL via UA4WHX.

+ SILENT KEYS + The contest and DX community at large mourns the loss of Steve Hodgson (ZC4LI), who passed away on 31 August. He was 69 and had been ill for some time.
Other recently reported Silent Keys include Emilio Salvador Cugnini (LU7MAL), Vitaly V. Davydov (RU9WR, ex UW9WR), Aleksandr M. Shiryaev (UA9XCM) and Anatolij G. Udod (UT0TT).

21611. Mosley mini tribanders

Yahoo group: DX-IS (2013)
Date: 2013-09-06 17:42:49 UTC
From: John Geiger
Topic: 21611 Message: 21611

Has anyone on the list used a Mosley Mini32A or Mini33A tribander antenna?
If so, could you email me off the list, I have a couple of questions I
would like to ask about these antennas.

73 John AF5CC

21612. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-09-07 14:01:00 UTC
From: Paul Dunphy
Topic: 19749 Message: 21612

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30907
SIDC SOLAR BULLETIN 07 Sep 2013, 1209UT
SIDC FORECAST (valid from 1230UT, 07 Sep 2013 until 09 Sep 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 07 Sep 2013 10CM FLUX: 100 / AP: 007
PREDICTIONS FOR 08 Sep 2013 10CM FLUX: 102 / AP: 007
PREDICTIONS FOR 09 Sep 2013 10CM FLUX: 104 / AP: 007
COMMENT: Solar activity has been eruptive during the past 24 hours, featuring a C1.0
flare from returning NOAA AR 11831 near the East limb, peaking at 22:50 UT
on September 6. There is a chance for more C flares within the next 48
hours. The solar wind decreased from 420 to 360 km/s in the past 24 hours.
In the same period, the Interplanetary Magnetic Field was low with values
between 4 and 5 nT. The geomagnetic activity was at quiet levels (K
Dourbes between 0 and 3; NOAA Kp between 1 and 2) during the past 24 hours.
Quiet geomagnetic conditions (K Dourbes < 4) are expected for September 7
to 9.

SIDC SOLAR BULLETIN 08 Sep 2013, 1209UT
SIDC FORECAST (valid from 1230UT, 08 Sep 2013 until 10 Sep 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 08 Sep 2013 10CM FLUX: 096 / AP: 008
PREDICTIONS FOR 09 Sep 2013 10CM FLUX: 098 / AP: 008
PREDICTIONS FOR 10 Sep 2013 10CM FLUX: 100 / AP: 007
COMMENT: Solar activity has been quiet during the past 24 hours, featuring only B
flares. There is a chance for C flares within the next 48 hours. The solar
wind ranged between 360 km/s and 400 km/s in the past 24 hours. In the same
period, the Interplanetary Magnetic Field fluctuated between 1 and 6.5 nT.
The geomagnetic activity was at quiet levels (K Dourbes between 0 and 3;
NOAA Kp between 1 and 3) during the past 24 hours. Quiet geomagnetic
conditions (K Dourbes < 4) are expected for September 8 to 10.

From: Ron Notarius W3WN
Topic: 21606 Message: 21614

John,

I don't see that anyone's sent you an answer yet, at least via the reflector. So here's what little I know; I'm sure there's someone out there who has a better answer.

You can't use any of the current criteria in trying to figure out what Russia is divided. As far as I know, that division goes all the way back to the restart of the DXCC after WW II, and even possibly (probably?) further back to the original pre-war DXCC list.

So the answer may be as simple as: Someone decided to do it this way, so they did.

The reasoning might be as simple as using the continental divide itself as a justification.

Now, if we were creating the equivalent of the DXCC from scratch today, using today's rules and qualification criteria, would Russia be divided? I doubt it. But we're not doing that.

Suffice to say, this is one of those distinctions that was grandfathered in from rules & qualifications long retired and forgotten. Simply accept it as an entity anomaly and don't worry about it.

Subject: [DX-IS] Historical DX List question

This question comes from a discussion we are having on the DX forum on eham.net. Does anyone on this list know the history of why Asiatic Russia (UA9-0) is counted as a separate DXCC entity from European Russia? What criteria were in place when it was added to the list that made it qualify as a separate entity? It doesn't have a separate political administration, and it isn't geographically far enough away from European Russia, nor is it separated by an intervening DXCC country.

Turkey is in both EU and Asia. CQ recognizes them as separate entities.
ARRL does not.

One thing is consistent, there will always be inconsistencies.

In the past, I've had questions on inconsistencies in both the DXCC and WAZ programs. The
usual answer is some sort of doublespeak blather. If pushed, the answer is, "Piss off! It's our
program and we'll run it any way we want."

It's a radio club that offers a point for contacting every "thing"
on their list. In the days of Hugh Cassidy and the West Coast DX
Bulletin (late 60s/early 70s), the Local QRPers were always asking what
kind of a system it was. To which the Old Timers' inevitably responded,
"System? Who said it's a system? It's the DXCC!"

That's the way I've always approached it . . . I work what the DXCC
Desk says I need to work for DXCC points, and I don't question their
rationale. Recall the war over BS7H between 1995-2000 when it was added
to the list? People are still mad about that one. I didn't get mad . .
. I worked it and got a point. If they delete it, I'll lose a point.
It ain't a system . . . it's the DXCC! :-)

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2 & 3D2/R, FIJI AND ROTUMA ISLANDS (Update to OPDX.1118). Andy, LZ2HM, has joined the team of Stan/LZ1GC and Rocky/3D2DD to be active from Fiji and Rotuma between September 20th and October 15th. Their schedule is as follows:

September 20-26th - Stan will be active as 3D2GC from the "Club Fiji Resort", Nadi, Fiji Republic, Viti Levu Island (OC-016, WW. Loc. RH82QF). Activity will be on 160-6 meters using CW and SSB, with the following equipment: Kenwood TS-480 SAT + linear amplifier ACOM 1010/ACOM 1000. The antennas: EXP. GP 40-10m, 80/160 meters INV-L and GP.
September 27th-October 11th - Callsigns 3D2RA (Andy), 3D2GC/P and 3D2DD/P; from Rotuma Island (OC-060). Activity will be on all HF bands. Stan 3D2GC/P will active on all HF bands, CW/SSB together with Andy, 3D2RA and Rocky, 3D2DD. Rocky will also be active, but only on SSB with the callsign 3D2DD/P. Andy, 3D2RA, will be active on all HF bands, 160-2 meters CW/SSB/DIGITAL (PSK & SSTV) and special attention will be made to work by EME on 50 MHz on JT65A.
October 12-15th - Callsign 3D2GC again from Fiji Republic. On October 16th, Stan, LZ1GC, will go back to Bulgaria.

Suggested frequencies are as follows:
CW - 1822, 3510, 7007, 10104, 14010, 18070, 21010, 24892 and 28010 kHz
SSB - 1838, 3788, 7088, 14188, 18148, 21288, 24948 and 28488 kHz
RTTY - 1838, 3588, 7038, 10138, 14088, 18108, 21088, 24918 and 28088 kHz
SSTV - 3728, 7038, 14238, 21338 and 28688 kHz
PSK31- 1838, 3578, 7038, 10138, 14078, 18108, 21078, 21918 and 28078 kHz
6m - 50100/CW. 50118/SSB and 50200/RTTY kHz

QSL 3D2GC and 3D2GC/P via LZ1GC, direct or by the Bureau (see details on QRZ.com or the Web page below). QSL 3D2RA, 3D2DD and 3D2DD/P via info on QRZ.com. For more details and updates, see: http://3d2gc.com

3DA0, SWAZILAND (Update to OPDX.1120/1122). Roger/ZS6RJ and a Multi-International team of operators will be active as 3DA0ET from Piggs Peak, Swaziland, between November 18-27th. Some of the operators also took part in the 2012 7P8D DXpedition. Currently, the 12 operators mentioned are Emil/DL8JJ, Chris/G8APB , John/GW4SKA (RTTY Team Leader), Frosty/K5LBU (Co-Leader), George/KL7GS, Neil/VA7DX, Don/VE7DS, Keith/VE7MID (Low-Band Leader), Bob/W5UQ, Victor/WB0TEV, Sam/ZS6BRZ and Roger/ZS6RJ (Co-leader). They plan to have 4 stations on the air, covering all the HF bands (160-10 meters) and 6 meters (secondary) using CW, SSB and RTTY. There will be a focus on RTTY, and they plan to have a dedicated full-time RTTY station on the air from start to finish. Roger, ZS6RJ, informs OPDX readers, "We're also running an up-front survey (link on the home page) asking DXers what bands/modes etc. they need the most for Swaziland." Activity will also include the CQWW DX CW Contest (November 23-24th) as a Multi-two entry. Dick, N7RO, will be the QSL Manager for 3DA0ET. Tony, LZ1JZ, will be printing and supplying the QSL cards. QSOs will be uploading daily to LoTW and ClubLog. They will not be using eQSL. More specific details about direct and Bureau QSLs will follow in due course, closer toward the end of the DXpedition. Watch the 3DA0ET Web page for updates at: http://www.swazidx.org

4O, MONTENEGRO. Gab, HA3JB, will be active as 4O/HG3IPA from Budva between September 23-30th. This activity will be valid for the HA-IPARC Award (International Police Association) <http://www.ha3jb.com/iparc-award.html>. Operations will be on CW, RTTY and SSB. Look for Gab to be active during the CQWW RTTY DX Contest (September 28-29th). He also mentions that he will make a side trip to Sveti Nikola Island (EU-163) during his stay in 4O-land. QSL via HA3JB direct. He does have a OQRS now (see QRZ.com).

9L, SIERRA LEONE. Operators David/N4WDT and Jerry/K4ZIN are planning to be active from here between October 16-21st, and are currently waiting for a license approval. Activity will be on 160-10 meters with a focus on the 30/17/12 meters and lower bands. They will have two stations on the air at less 12 or more hours a day. QSL via LoTW or via their home callsigns.

CR2/CT8, AZORES. Kim, OH6KZP, will be active as CR2X from Ribeira Grande during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via OH2BH. Before the contest, look for him to sign CT8/OH6KZP.

CR5150, PORTUGAL (Special Event). Members of the Portuguese Navy Hamradio Club (NRA) will activate the special event station CR5150NM between September 8-14th. Activity is to celebrate the 150th anniversary of the Portuguese Navy Museum since it was founded by the King D. Luis I. Activity will be on all HF bands except 10 MHz using CW, SSB and eventualy PSK. A special QSL card is being produced, and it will be issued and sent to all contacted stations. Stations should send their QSL card by the Bureau or direct to CS5NRA.

DXAC NEWS. ARRL Great Lakes Director Jim, Weaver, K8JE, reports that he is "pleased to announce the appointment of Stan Arnett, AC8W, of Marysville, MI, as representative of the Great Lakes Division on the ARRL DX Advisory Committee (DXAC). Stan is a well-known in DX circles. He replaces Kirk Swallow, W8QID of Cincinnati who resigned after several years of service on the Committee." He also mentioned, "The DXAC reviews topics referred to it by the the ARRL Board of Directors and recommends action on these topics to the Board. DXAC was tasked at the July Board meeting to conduct a review of existing rules that govern DXCC and recommend possible changes to these rules. DXAC is just one of several advisory committees that provide input from members to the Board."

DXCC 2012 YEARBOOK. The DXCC Blog Web Page reports: "The 2012 DXCC Year-book is now available online to ARRL members worldwide via the August 2013 Digital QST. To access this publication visit the Digital QST page at: http://www.arrl.org/qst
http://www.arrl.org/img/170x130/DXCC_Items/2012YB.jpg
Look down to 'QST Digital Archives'. Click Go Now on this link. The various Digital QST covers will appear and the DXCC yearbook will always be in the August edition. When you open August 2013 QST on the cover is a yellow icon in the lower portion of the cover labeled 'Includes the 2012 DXCC Yearbook'. Click this to open the yearbook. You can read it directly online or print it out for future reference. Again, access to

this is by ARRL Members, worldwide."

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
JY9FC - Jordan; Current operation beginning August 2013

DX MARATHON 2014. John, K9EL, reports, "We are asking all interested parties for any ideas, suggestions or changes that would be helpful to the 2014 DX Marathon. The 2014 Rules will be finalized soon, so now is the time to express your thoughts and opinions. Please send all comments to: john@dxmarathon.com
Thank you!.... K9EL - DX Marathon Manager"
DX Marathon Web page is at: http://www.dxmarathon.com
Also, join the "DXMarathon" group on Yahoo Groups!

E5, SOUTH COOK ISLANDS. Alan, K7AR, will be active as E51AAR from Rarotonga Island (OC-013), South Cook Islands, between October 21-26th. Activity will mainly be RTTY, and he will also participate in the CQWW DX SSB Contest (October 26-27th). His equipment is a Elecraft K3 and KPA500. QSL via K7AR, direct or by the Bureau. Log will be uploaded to LoTW upon his return home. However, he will try to upload log on a daily basis to ClubLog.

FR, REUNION ISLAND. Willi, DJ7RJ, will be active as FR/DJ7RJ from Reunion Island (AF-016) between September 28th and November 2nd. Activity will be on 160-10 meters using CW and SSB. He prefers lowbands. Willi will use a K2 with a SS-Amp 500w into a INV-L 15m (49 ft) vertical and 12m (39ft) horizontal with 2-4 elevated radials each 20m (66ft) long. QSL via DJ7RJ, direct or by the Bureau.

HB0, LIECHTENSTEIN. Johannes, DF5AU, will be active as HB0/DF5AU between September 14-19th. Activity will be on the HF bands with a focus on the higher bands using a beam antenna and amp, operating CW and SSB. QSL via DF5AU, by the DARC Bureau, direct or LoTW.

HB0, LIECHTENSTEIN. Operators Uwe/DL4AAE and Roman/DL3TU will be active as HB0/homecall either the second or third full weekend in September. Their operation is "weather permitting" as they attempt to operate from the summit of Augstenberg (2359 meters A.S.L.) [SOTA HB0/LI-004] using CW only with an emphasis on Asia. Equipment consists of two K3's running 100 watts into a Delta Loops for 20, 15 and possibly 12 meters. QSLs via their home callsign, by the Bureau or direct (see QRZ.com). They will confirm all QSOs by default with a nice paper QSL via the German Bureau. For more details and updates, see: http://www.mydarc.de/dl3tu
http://www.mydarc.de/dl4aae

HP0, PANAMA (IOTA Tour Reminder). By the time read this, operators Christian/EA3NT, Raul/EA5KA, Vincent/F4BKV and Col/MM0NDX, from the Invoker Team, have started their activation of six Panamanian island groups as HP0INT(/1,2,3,4 or 9) between September 5-19th. Activity will be on 40-10 meters using CW and SSB. The team tentative schedule is as follows:

September 5-8th - Naos Island (NA-072); callsign HP0INT/1; evening only
September 6-8th - Boca Brava Island (NA-071); callsign HP0INT/3
September 9-11th - Ogobsibu (San Blas) Island (NA-170); callsign HP0INT/2
September 11-13th - Grande Island (NA-202); callsign HP0INT/2
September 13-15th - Iguana Island (NA-203); callsign HP0INT/9
September 16-18th - Colon [Bocas del Toro] (NA-088); callsign HP0INT/4

Please be careful with HP0INT/2 as it will be used from two different IOTA groups. Listen carefully to the operator to know the exact location/IOTA. Direct QSLs are via F4BKV (OQRS preferred) [if you use IRC, he only accepts the new model valid until 2017]. Bureau QSLs are via F5CWU (OQRS preferred). More details and the OQRS are available at: http://www.invokerteam.com/hp0int

IOTA NEWS.....
AS-074. Members of the Malaysian Special Expedition Team, who were active as 9M2SE from Pulau Indah, and were celebrating 56th anniversary of Malaysia's Independence Day last weekend, now have pictures and videos of their activity at: http://9m2pju.blogspot.com/2013/09/9m2se-pulai-indah-iota-as-074-activation.html

EU-038. Tonnie, PA9CW, is now active as PA9CW/P from Texel Island (WLOTA 0043) until September 21st. Activity will be on 30 meters CW (his preferred mode) and sometimes PSK or RTTY. QSL via PA9CW, by the Bureau or direct.

EU-067. Marek, SP5ISZ, will be active as SV8/SP5ISZ from Milos Island (GIOTA SAS-089, MIA MG-072, WLOTA 4149) September 12-24th. Activity will be holiday style on the HF bands, depending on the propagation. QSL via his home callsign, by the Bureau, direct, eQSL or LoTW.

NA-058. Members of the Kennehoochee Amateur Radio Club (W4BTI) will be active as K4S from Sapelo Island (USI GA-007 [to be qualified], McIntosh County, GA) between September 12-14th. They also plan to activate the Sapelo Island Lighthouse (ARLHS USA-738, TWLHD WLH K-146, WW Loc. EM91IJ) and the Sapelo Island Range Front Lighthouse (ARLHS USA-1014). Operators mentioned are Ricky/K4JTT, Jim/N4DU, Joe/WD4FGB, Tim/WK4U, Jim/AK4I, Rich/KD4SEV, Ron/NV4U, David/N4VDL, Walter/KI4LAV, Tad/WF4W and Monty/K4MTX. Activity will be on 160-10 meters using CW, SSB, RTTY and PSK. QSL direct to W4BTI: Kennehoochee Amateur Radio Club, PO Box 1245, Marietta, GA 30061-1245 USA. Also via LoTW and eQSL. For more details and updates, visit the Web site at: http://www.w4bti.org/special_events.html

NA-130. Mike, VE2XB, will be active as VY0BRR from Qikiqtarjuaq or Broughton Island, in the Nunavut (Baffin Island) East IOTA Group between Sept 23-27th. Activity will be concentrated on 80/75/40 meters using CW and SSB. QSL via VE2XB. For more details and updates, see: http://www.vy0brr.jimdo.com

OC-108/ (Postponed/Update) John, YB5NOF, informs OPDX that the reason
OC-109/ for the postponement is that his wife had a stroke on August
OC-122. 23rd, and was in the hospital. He did mention that they will
try to activate Tambelan (OC-122, as YE5T) sometime in October.
Exact days and time will depend on transport and weather. He
states that the weather between October and February is bad in
that area, but they hope to do an operation. While waiting for
the ferry express coming from Pontianak - Serasan - Tambelan
- Midai and stopping on Siantan Island (OC-108), they will be
on the air as YE5R for 5 days. Activity for Natuna Selatan
(OC-109) will not take place until April or May of 2014.

J4, GREECE (LH Op!). Operators Costas/SV4FFL, Thanasis/SV4FFK, XYL Katerina/
SV4AFY, Jim/SV4AAQ, Nikos/SV4FFO, Tassos/SV4FFX and Kostas/SV4/SV8GGI
will activate the Trikeri Lighthouse (GLHA GRE-128, ARLHS GRE-128,
Admiralty E4442) for the second time in 5 years as J44LH between September
7-10th. Activity will be on 160-6 meters using CW, SSB, PSK and RTTY. QSL
via SV4FFL.

JD1, MINAMI TORISHIMA (Update). Take, JG8NQJ, is once again be active
as JG8NQJ/JD1 from Marcus Island in the Minami Torishima (OC-073, JCG
10007) group until September 14th or 15th. He is there to work on the
island's weather station. Activity will be limited to his spare time.
He will be mainly on 17 meters but also on 15/12/10 meters CW. QSL via
his home callsign, by the Bureau or direct to JA8CJY: Susumu 'Sin' Sanada,
5-17, 5-4, Shin-Ei, Toyohira, Sapporo 004, Japan. Online log is available
at: http://dx.qsl.net/cgi-bin/logform.cgi?jd1-jg8nqj

P29, PAPUA NEW GUINEA (Cancelled). Akira, JA1NLX, was expected to be
active as P29VNX from Lissenung Island (New Britain Island), in the
Bismarck Archipelago IOTA Group (OC-008) this week, but it was cancelled
due to flight problem.

PACIFIC DXPEDITION TOUR (Update/Reminder). By the time you read this,
Gerben, PG5M, should have started his Pacific tour starting from Palau
Island (OC-009) as T8GM for two days (September 6-7th), and is now active
as V6G from Yap Island (OC-012), in the Fed. States of Micronesia, until
September 15th. He will return to Palau Island and operate between September
15-19th. This is a solo DXpedition and CW only. Station will be Elecraft
K3 and ECO R7+ vertical for 40-10 meters. QSL via his home callsign, by
the Bureau or direct. Important: Don't use IRCs as they can't be exchanged
at his post office. For updates, watch his Web page and Twitter account at:
http://www.dx.to
http://twitter.com/@PG5M

PJ7, ST. MAARTEN. Dave, AH6HY, will once again be active as PJ7/AH6HY
from St. Martin Island (NA-105) between September 13-18th. Activity will
be holiday style primarily during his evenings and on 20/17/15 meters
but SSB ony. QSL via AH6HY, direct or by the Bureau.

QSLS RECEIVED VIA THE BUREAU: 1A0KM, 3A2LF, 3A2MW, 4W6A, 5B75FOC, 5U9AMO, 7P8US, 7Q7PRO, 8Q7SO, 9L5MS, 9M2MRS, 9U4U, A25NW, C21HA, CY0X, DL1BUG, DL5YYM, DU1IST, E30HA, FR/DJ7RJ, FR5DZ, FS/K9EL, HA7LW, HB9STEVE, IY4FGM, JW8HGA, KH2/G3ZEM, LZ1737SSS, MU/PA9M, NH0J, NH2T, OE11M, OE3DIA, OE4VIE, ON4AXU, OX3XR, OX3YY, OX6YL, OY3AA, OZ1CTK, PJ2/N5HZ, PJ4/K4BAI, PJ4J, PJ4M, PJ4NX, PY0FO, RI0FM, S21YZ, SQ0MORSE, SQ9UM, T88MR, TA2MW/0, TX3A, V63ZM, V73NS, VK6HD, VO1XX, VP5DX, YL6W, Z60K, ZK2C and ZK2X

SILENT KEY. It has been reported that Steve Hodgson, ZC4LI (aka 5B4AHA, C4C, G0LII, G6G and ZD8LII) became a Silent Key (SK) on August 31st. He was a DXer and Contester who will be missed. OPDX and its readers would like to send out our deepest sympathy to the family and friends of ZC4LI.

SPECIAL EVENT (Highway to a DX Party!). The Citrus Belt Amateur Radio Club of San Bernardino, California, will host (probably one of the most fun special event activities) the 14th annual "Route 66 On The Air" special event between September 7-15th. The purpose of this event is to offer amateur radio operators a fun way to "Relive the Ride" of their own memories of Route 66, and to celebrate the highway's 84th anniversary. The U.S. Highway 66 established in 1926, was the first major improved highway to link the west coast with the nations heartland. Through stories, songs, and TV shows, the highway came to symbolize the spirit of the freedom of the open road, inspiring many to see America. Look for the following 20 stations (three are rovers) operating in or around the major cities along the old "Route 66" from Santa Monica, California, to Chicago, Illinois:
Stations City Club

ROVER STATIONS

W6S ROVER 1 Northern Arizona DX Association
W6T ROVER 2 Northern Arizona DX Association

Special event stations are expected to be found in the vicinity of the
following frequencies. (Look for digital modes in the standard band segments
for such mode) All frequencies +/- QRM:
CW - 3533, 7033, 10110, 14033, 18080, 21033, 24900, 28033 and 50033 kHz
SSB - 3866, 7266, 14266, 18164, 21366, 24966, 28466 and 50166 kHz
Digi - 3580, 7070, 10140, 14070, 18100, 21070, 24920 and 28120 kHz
R66 MOBILE Operations - Any amateurs operating while actually driving
along Route 66 during the special event period are encouraged to
take part in "Route 66 On The Air", by using the designation
"mobile 66" for SSB or "/m66" for CW after their callsigns. All
other amateur radio operators are welcome to contact these mobile
operators.
REPEATERS - Some of the participating clubs will also be operating this
event from their local VHF/UHF repeaters. Check the ARRL repeater
guide for possible repeater frequencies, if your in the local area.

Each participating club will issue their own QSL card commemorating
this event. QSL information is available on the Web at:
http://www.w6jbt.org/2013site/qsl-card-request-guidelines
http://www.w6jbt.org/2013site/qsl-card-routing-and-station-website-addresses
For more details about the event and the certificate that is available,
please visit the "Route 66 OTA Site" at:
http://www.w6jbt.org/2013site/route-66-on-the-air

T30, WEST KIRIBATI. Operators Ted/JF1CCH and Kazu/JA1FUF will be active
from West Kiribati between November 28th and December 4th. Activity will

be on the HF bands (all mostly 40-10m) using CW, SSB, RTTY and PSK. Ted will operate mainly on CW and SSB, while Kazu will operate mainly RTTY and PSK. They will use 100 watts into a dipole. Their callsigns and QSL info will be forthcoming.

T32, EAST KIRIBATI (Update). A team of operators (TBA) will activate T32RRC to commemorate the 20th anniversary of the Russian Robinson Radio Club between December 3-11th. Tentatively, several USA members of the RRC are planning to be a part of the operating team and expressed a desire to celebrate the RRC anniversary with the T32RRC callsign. On November 27th, Tim, NL8F, will arrive on Kiritimati Island and set-up one station at Captain Cook Hotel. If there are no unforeseen issues, Tim will be on the air using the T32TM callsign. There is no set plan at this time for Tim's operating hours. Tim will be active as on SSB or RTTY until December 4th. Tim plans to operate part of the day and spend the rest of his time seeing the island or trying out the world class Bone fishing in between active periods. On December 4th, the balance of the T32 team will arrive and begin set-up of a second station and additional antennas. Once the balance of the team is on-site the T32RRC callsign will be the callsign used for the remainder of days the team is active on the island. Please take note: This is a small DXpedition with limited resources. They will do their best to activate T32 with as much time devoted to the bands as possible. Currently, the plan is to have at least one station operating 24/7. They hope to have two stations operating during peak activity times. Unfortunately, there may be times when they are not on the air. Please understand that although this is not a "vacation style" expedition their manpower is limited and coverage day and night may strain resources. They will begin station dismantling on December 10th, with exception of Station 1 and certain band antennas. At 0500z, T32RRC will be QRT. Finish dismantling of stations and antennas. Suggested frequencies are:
CW - 1825, 3525, 7025, 10110, 14025, 18072, 21025, 24892 and 28025 kHz
SSB - 1840, 3790, 7085, 14190, 18140, 21295, 24945 and 28440 kHz
RTTY - 1828, 3588, 7040, 10140, 14080, 18102, 21092, 24920 and 28082 kHz

The 60m band is yet to be determined. More details and updates will be forthcoming. Stay tuned! Also, watch: http://www.t32-2013.com

V5, NAMIBIA. Operator Hans/DF2UU and Hardy/DF3GY are now active as V55V from Omaruru, the QTH of Martin, V51W. They participated in the SSB Field Day (September 7-8th) this past weekend, and are expected to be in the Worked All Europe DX SSB Contest (September 14-15th). QSL via DJ8VC, by the Bureau or direct. Activity outside of the contest will be on 160-6 meters using CW and SSB.

VE, CANADA (Zone 2). Members of the Association de Radio Amateurs Sept-Iles Inc. will be active as VE2CSI during the CQWW DX RTTY Contest (September 28-29th) as a Multi-2 entry. Operators mentioned are Dany/VE2EBK, Stéphane/VE2SG and possibly others. QSL via M0URX.

VP9, BERMUDA. Christoph, DL1YAF, is now active as VP9/DL1YAF from Ed, VP9GE's, Hamilton QTH <http://vp9ge.com> on Bermuda (NA-005) until

September 25th. Activity will be holiday style on CW, SSB and PSK31.
QSL via home callsign, by the Bureau or direct.

WAP NEWS.....
* The 11th WAP meeting will be held in Mondovì, Italy, on September 22nd, to talk about Antarctica. The event is a joint effort between the Italian Castle Award DCI <www.dcia.it>, the Italian Flora & Fauna IFF <http://www.dcia.it/iffa> and the Worldwide Antarctic Program [WAP] <www.waponline.it>. See: http://www.youtube.com/watch?v=Tx9BDhqbI2Q All is organized by the ARI Mondovì at a nice site near the French Border at the foot of the Alps. Topic of discussion this year will be: Antarctica in the twenty-first century. There are several new bases, huge scientific programs with only researchers, personnel and staff at the new bases, but little Ham Radio activity. Will it become difficult to make a DX contact with the "White Continent" in the future?

* Operators Oleg/ZS1ANF (UA1PBA), Alex/UA1PAW and Slava UA1PAI (RD3MX) are almost ready to fly south where they expect to be active from the Antarctica. This time the goal is to activate Novo Runway (WAP MNB-06) with the callsign RI1ANR and to be active on the Low Bands from the Antarctic continent starting November 2013 through March 2014. Oleg, ZS1ANF, did verify to the WAP group that they will be on Novo Runway during this coming Antarctic season. He states, "I expect busy time down there, I want to concentrate on Low Bands, especially 160m band." They plan to install a 18 meters vertical by RA6LBS for TX, the same they used at Bellingshausen, a Beverage or a K9AY for RX; one XL-222 with RY-63 rotator from a Russian-Yagi for the High Bands. Also, they will have an ACOM1000 and some FT transceivers for the whole activity. Perhaps there will be a chance to visit other places during their stay. More details and updates will be available at the WAP Web site at: http://www.waponline.it

* The WAP Antarctic Bulletin 259 (issued 3rd Sept. 2013) is online and downloadable at WAP website.

YN, NICARAGUA. Scott, K7ZO, will once again be active from here, but this time during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/ All-Band entry. He will again use his smaller callsign YN5Z for the contest instead of his usual YN5ZO callsign. He usually operates "Field Day Style" using a 5 band Spiderbeam and 40m dipole on a push up mast. The radio is a TS-590 driving a KPA-500 amp. QSL via LoTW and K7ZO, direct or by the Bureau. Look for Scott to be active before/after the contest as well.

Z8, REPUBLIC OF SOUTH SUDAN (Z81R by Robert, S53R). Martti, OH2BH, sent out the following on September 5th: "Under the auspices of Project Goodwill South Sudan, shared with the International Amateur Radio Union Region 1 and the Yasme Foundation and supported by Yaesu Musen Co. Ltd, the announcement of a much anticipated low-band operation is only a few weeks away. The multinational team is busy getting the equipment and other material into South Sudan.

Adding to the Z81X operation of last spring, Robert, S53R, will be in Juba, for a work assignment and will be involved with a preparatory phase of Project Goodwill South Sudan.
He is going to sign Z81R from September 10 to September 14, while the activity will be sporadic because of his professional duties.
QSLs for this operation will be handled by Martti, OH2BH."

ZD7, ST. HELENA ISLAND. David, ZD7DC, is a 16 year old operator on St. Helena Island (AF-022). He states, "enjoy running a pile up - taking calls from any DX around the world. I rarely rag-chew but at times I do engage in longer QSO's. My working conditions include a Yaesu FT 450, powered by PSW 30, and a G5RV antenna tuned by MFJ 945E. I look forward to meeting you on air, and will reply to any QSL cards." Activity since August 18th shows David operates mainly SSB on 20/17/15/12/10 meters between 1430-0000z. QSL via his home callsign (direct only) listed on QRZ.com.

It has about as much chance of counting as those "African
Homelands" that showed up in the early 90s did -- ZERO! However, work
him anyhow. Stranger things have happened.

Although when I worked DL4MBE/H5 the ARRL did count it as South Africa.

I am guessing this WON"T count as Moldova as the ARRL will say he wasn't properly licensed, since the Moldovan version of the FCC probably didn't issue this license.

Talking about zone 2.
I have very few contacts with zone 2, in fact 3 QSOs I think, all CW on 40/20/15m.
I guess it's not the propagation as I can hear that VY2 station quite often when it's activated (well on 40m).

Anyway, will keep looking in the contests.

Subject: Re: [DX-IS] New DXCC entity status

I will agree about 5BWAZ being above honor roll, and that is the general feeling of most people on the DX forum on eham.net<http://eham.net>. Zone one is Alaska and part of VY1/VE8. Zone two is VO2, part of VE8 and VE2 north of 50 degrees. I would guess that it is the least populated on any of the zones, but there are some pretty active VO2 stations, and a couple of VEs usually go to zone 2 for the CQWW contest.

You really want a challenge, try to work every ITU zone.

John,

You are correct about only one country for each of the three zones and activity levels for 18 and 19. However, Zone1 includes Labrador, part of Quebec and two territories in VE8. Its land area is much larger than many of the countries on the list and has activity pretty regularly. I think Zone 2 hasn't been unrepresented for many years at a time like some of the entities.

I still believe 5BWAZ is a bigger challenge than "top of the Honor Roll".

PREDICTIONS FOR 12 Sep 2013 10CM FLUX: 092 / AP: 005
COMMENT: No C-class flares were observed during the last days. Two sunspot groups
are currently visible on the Sun according to the SDO/HMI data. Their small
size makes a C-class flare in them unlikely. A filament eruption in the
south-eastern quadrant of the solar disk was detected by SDO/AIA starting
around 01:30 UT today. It was associated with the B4.1 flare peaking at
05:25 UT. The corresponding CME seems to be weak and narrow, so it is not
expected to arrive at the Earth. A low-latitude coronal hole in the
northern hemisphere reached the solar central meridian yesterday. It is,
however, small, so the Earth will most probably only skim the edge of the
corresponding fast flow on September 13. The Earth is currently inside a
slow (around 340 km/s) solar wind flow with average (4-5 nT) interplanetary
magnetic field magnitude. We expect quiet geomagnetic conditions in the
coming hours.

21630. Dennis Rodman as P5?

Yahoo group: DX-IS (2013)
Date: 2013-09-10 15:01:43 UTC
From: Gary Wilburn
Topic: 21540 Message: 21630

I had a dream last night that Dennis Rodman while visiting North Korea was able to convince Kim Jong Un to let him operate a Radio Sport competition (Dx Pedition). All was going well, Rodman got properly licensed and a prominent DX Group followed him in to set up and get on the air - then I woke up and the bands were dead - again.

Maybe someone should introduce Martti to Rodman and go along with him on his next "Good Will" visit.

21636. ZM90DX Special Event Station

Yahoo group: DX-IS (2013)
Date: 2013-09-11 06:14:02 UTC
From: Rick Kiessig
Topic: 21636 Message: 21636

Thought this might be of interest.

73, Rick ZL2HAM

After World War 1 and with the banishment of radio amateurs to the supposedly "useless shorter wavelengths" an amazing period of radio exploration took place. Amateurs all over the globe soon learnt that far from being useless these wavelengths seemed to allow communication over long distances. Amateurs in ZL were at the forefront of this activity with the first ZL to VK QSO in April 1923, and then world record distance QSOs between ZL and Argentina in May 1924, ZL and California in September 1924, ZL and Connecticut on the US east coast just weeks later, and the ultimate Z4AA Frank Bell's QSO with Cecil Goyder G2SZ in London on 18 October 1924.

To commemorate the 90th anniversary of the record breaking activities of these early pioneers of Amateur Radio, ZM90DX will be on the air between 1 October 2013 and 31 October 2014 on all bands 1.8 MHz to 1.2 GHz and beyond in all modes. Activated by the Kiwi DX Group, an informal group of DXers and contest enthusiasts, ZM90DX will be used around New Zealand and a special commemorative QSL card will be available as well as an award program for contacts with ZL during this period.

Not only will ZM90DX be active at expected times and on expected bands, but in the spirit of those early pioneers the ZM90DX operators will also be calling CQ on bands and in directions one may not necessarily expect with the intention of exploring the boundaries of radio propagation.

This will be an unparalleled opportunity for Amateurs all over the world to work ZL while celebrating the exploits of those early trail blazers whose work paved the way for radio communications as we know it today.

Further details can be found on http://www.zm90dx.com/.

Note: "Please remember this is a ZL based activity NOT ZL9 Campbell & Auckland Islands".

ENSURE your logging software logs ZM90DX correctly as ZL and NOT ZL9, Auckland / Campbell Islands

To update the Country File for your logging software please visit: http://www.country-files.com/

SB DX ARL ARLD037
ARLD037 DX news

This week's bulletin was made possible with information provided by NC1L, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MADAGASCAR, 5R. Daniel, DF8UO is QRV as 5R8UO until September 20 while on work assignment. He is active on 40 to 10 meters using CW and digital modes in his spare time. This includes being an entry in the Worked All Europe SSB DX contest. QSL to home call.

MALDIVES, 8Q. Christian, DL2MDU and Heike, DO3HDA will be QRV as 8Q7CF from the Biyadhoo Island Resort from September 15 to 27. Activity will be on 80 to 10 meters and possibly 160 meters using CW, SSB and various digital modes. QSL via DL2MDU.

MADEIRA ISLANDS, CT3. Station DJ8OG is QRV as CT9/DJ8OG until September 17. He will be active as CR3L in the Worked All Europe SSB DX contest. QSL CR3L via DJ6QT and CT9/DJ8OG to home call.

PANAMA, HP. A group of operators will be QRV as HP0INT/9 from Iguana Island, IOTA NA-203, from September 13 to 15, and then as HP0INT/4 from Colon Island, IOTA NA-088, from September 16 to 18. Activity will be on 40 to 10 meters using CW and SSB. QSL via F5CWU.

MINAMI TORISHIMA, JD1. Take, JG8NQJ is QRV as JG8NQJ/JD1 from Marcus Island, IOTA OC-073, until mid September while on work assignment. Activity is in his spare time on 17, 15, 12 and 10 meters using CW. QSL to home call.

SVALBARD, JW. A group of operators are QRV as JW5E from Longyearbyen, Spitsbergen Island, IOTA EU-026, until September 16. Activity is on all bands and modes. This includes being an entry in the WAE SSB contest. QSL direct.

BONAIRE, PJ4. Frank, PH2M is QRV as PJ4M until September 26. Activity is holiday style on the HF bands. QSL this activity via PH2M.

ST. MAARTEN, PJ7. David, AH6HY is QRV as PJ7/AH6HY until September 18. Activity is holiday style during his evening hours on 20, 17 and 15 meters using SSB. QSL to home call.

POLAND, SP. Special event stations 3Z1JESIEN, 3Z3JESIEN, HF1JESIEN, HF3JESIEN, SN1JESIEN and SN3JESIEN will be QRV from September 16 to 26 during a welcome to the Autumn Season known as Witamy Jesien. QSL via bureau.

GREECE, SV. Special event station SV130PAP is QRV until September 21 from several locations in commemoration of the 130th birthday of scientist George N. Papanicolaou. Activity is on 160 to 2 meters using CW, SSB, RTTY, PSK, JT65, FSK441 and Meteor Scatter. QSL via operators' instructions.

MICRONESIA, V6. Gerben, PG5M is QRV as V6G from Yap Island, IOTA OC-012, until September 15. Activity is on 40 to 10 meters using CW. QSL to home call.

PALAU, T8. After his Micronesia operation, Gerben, PG5M will be QRV as T8GM from September 15 to 19. Activity will be on 40 to 10 meters using CW. QSL to home call.

NAMIBIA, V5. Hans, DF2UU and Hardy, DF3GY are QRV as V55V from Omaruru. Activity is on 160 to 6 meters using CW and SSB. This also includes being an entry in the Worked All Europe SSB DX contest. QSL via DJ8VC.

BERMUDA, VP9. Christoph, DL1YAF is QRV as VP9/DL1YAF until September 25. Activity is holiday style on the HF bands using CW, SSB and PSK31. QSL to home call.

MYANMAR, XZ. Zorro, JH1AJT will be QRV as XZ1Z from Nay Pyi Taw from September 18 to 23. Activity will be on 160 to 10 meters using CW, SSB and various digital modes. QSL to home call.

THIS WEEKEND ON THE RADIO. The ARRL September VHF Contest, North American SSB Sprint, Worked All Europe SSB DX Contest, FISTS Get Your Feet Wet CW Weekend, QRP CW Fox Hunt, NCCC RTTY Sprint Ladder, NCCC Sprint, FOC CW QSO Party, Kulikovo Polye CW Contest, CIS DX QPSK63 Contest, Arkansas QSO Party and the WAB 144 MHz QRO Phone are all on tap for this weekend. The Run for the Bacon QRP CW Contest is scheduled for September 16. Please see September QST, page 79, and the ARRL and WA7BNM contest web sites for details.

14 September 2013 A.R.I. DX Bulletin
No 1167
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5R - Daniel, DF8UO is active as 5R8UO from Madagascar (AF-013) until 20 September. He is QRV in his spare time on 40-10 metres CW and digital modes, and will participate in the WAE SSB DX contest. QSL via home call and LoTW. [TNX DXNL]
7X - Celebrating the 50th anniversary of Algeria's IARU member society ARA (Amateurs Radio Algeriens), special callsign 7T9A will be used from Sridjina Island (AF-104) on 19-21 September. QSL via 7X2ARA.
C2 - Yuki, JH1NBN will operate SSB as C21BN from Nauru (OC-031) on 16-26 September. He will be QRV in his spare time, probably during his evenings, running 100 watts into a wire antenna. QSL via JH1NBN (direct). [TNX The Daily DX]
F - The Radio Club du Bassin d'Arcachon (F5KAY) will be active as TM49PB from the lighthouse at Cap Ferret on 14-15 September. They will operate SSB, CW and digital modes on 160, 80, 40, 20, 15 and 10 metres with two stations. QSL via F5KAY. [TNX F8REF]
F - Special callsign TM90KOB will be in use on 14-27 September to celebrate the 90th anniversary of the Radio Club de l'Aube (F5KOB). Activity on the HF bands CW, SSB and digital modes, as well as on the VHF bands SSB and FM. QSL via F5KOB. [TNX F8REF]
F - The Association des Radioamateurs des Cotes d'Armor will be active as TM6BRE from Brehat Island (EU-074) on 28-29 September. They expect to be QRV with three stations on 40, 80, 20, 15, 10, 6 and 2 metres CW, SSB and digital modes. QSL via F4EUG. [TNX F8REF]
FR - Willi, DJ7RJ will be active as FR/DJ7RJ from Reunion Island (AF-016) from 28 September to 2 November. He will operate CW and SSB on 160-10 metres, with a focus on the low bands. QSL via home call. [TNX AA1M]
G - October 2014 will mark the 90th anniversary of the first radio transmissions from Great Britain to New Zealand (see ZM90DX below). In preparation for these celebrations, the special call GB2NZ (http://gb2nz.com/) will be operational on 5-25 October this year. Activity will be predominantly on 80 metres. QSL via M0OXO (preferably through the OQRS at www.m0oxo.com (http://www.m0oxo.com)). [TNX G3SJJ]
H4 - Bernard, DL2GAC will be active again as H44MS from Honiara (OC-047), Solomon Islands from 3 October to 26 November. Hermann, DL2NUD will be along operating EME as H44HP until mid-November

(possibly with a side trip to Vanuatu with activity as YJ9HP). QSL via home calls, direct or bureau. [TNX DL2GAC]
HP - Special event station HP500OP will be active on 20-30 September from Panama to celebrate the 500th anniversary of the discovery of the Pacific Ocean by Vasco Nunez de Balboa. QSL via HP1RCP (direct with SAE: "no IRCs, no Green Stamps, no eQSL, no bureau").
I - Look for IQ7IA to be active from Isola Traversa, Pedagne Islands (EU-091) on 14-15 September. QSL direct only. [TNX DX Coffee]
I - ARI La Spezia will be active again as IP1T from Tino Island (EU-083) from around 8 UTC on 21 September until around 14 UTC on the 22nd. They will be QRV on the HF bands, as well as on 70 and 144 MHz. QSL via IZ5JLF. Nice photo galleries of this year's previous two operations (27-28 July and 17-18 August) can be found at http://www.arilaspezia.it/pages/eventi.php [TNX IZ5JLF]
JD1_oga- Koji, JI1LET will be active as JD1BOI from Chichijima (AS-031), Ogasawara from 25 October to 3 November. He will operate SSB, CW and RTTY on 160-6 metres. QSL via home call, direct only. [TNX JI1LET]
JW - Rene, DL2JRM and Netti, DO6XX will be active as JW/homecalls from Longyearbyen (EU-026), Svalbard on 20-23 September. Expect JW/DL2JRM to focus on the SAC CW Contest (21-22 September), while JW/DO6XX will operate SSB and RTTY. QSL via home calls, direct or by the bureau. [TNX rsgbiota.org]
ON - Between 1873 and 1934 more than two million European emigrants left via Antwerp for the US on board the Red Star Line's ocean liners. Special callsign ON70REDSTAR will be activated from 21 September to 21 October to celebrate the opening of the Red Star Line Museum in Antwerp. QSL via ON4OSA.
OZ - Bernd, DL8AAV will be active as OZ0AV from Laeso Island (EU-088) on 16-28 September. QSL via DL8AAV, direct or bureau. [TNX rsgbiota.org]
SM - Fred, SM7DAY will be active again as SM7DAY/p from Senoren Island (EU-138) on 14-21 September. He plans to operate CW, SSB, PSK and maybe SSTV on the HF bands. QSL via home call, direct or bureau. [TNX SM7DAY]
SV - Martin, DB4BJ will be active as SV8/DB4BJ from Kerkyra/Corfu (EU-052) on 18-29 September. He will operate PSK and SSB on 20-10 metres. QSL via home call. [TNX The Daily DX]
SV - Eugene, RD8X will be travelling to Greece on a business trip between late September and early October. He plans to be QRV in his spare time as SV8/RD8X from Santorini Island (EU-067) on 25-28 September and from Paros Island (EU-067) on 28-30 September, and as SV9/RD8X from Crete (EU-015) from 30 September to 2 October. He will operate CW on 40 metres and up. [TNX RD8X]
SV9 - Uli, DJ9XB will be active holiday style as SW9XB from Crete (EU-015) from 21 September to 5 October. He will participate in the CQ WW RTTY Contest on 15 metres. QSL via home call and LoTW. [TNX NG3K]
T8 - Masashi, JL1FUQ will be active as T88GJ from Koror (OC-009), Palau on 20-24 September. He plans to be QRV on 6 metres (50130 kHz) and

on the high bands (20-10 metres) SSB, and possibly AM, PSK31 and RTTY. QSL via JL1FUQ, direct or bureau.
VE - Mike, VY0BRR aka VE2XB (www.vy0brr.jimdo.com (http://www.vy0brr.jimdo.com)), who is based on
Dorset Island (NA-156), will be active from Qikiqtarjuaq (Broughton Island, NA-130) on 23-27 September. Mike says he will concentrate his efforts on 40 and 80 metres CW and SSB "in the evenings as work permits". QSL via VE2XB, direct or bureau. [TNX VY0BRR]
VK9L - Tomas, VK2CCC will be active in his spare time as VK9LL from Lord Howe (OC-004) on 22-29 September. He will focus on 160 and 80 metres. QSL via VK2CCC, direct or bureau.
W - Once again Joe, K5KUA will be active as K5KUA/5 from Galveston Island (NA-143) on 13-15 September. He usually operates CW only on 40-10 metres. QSL via home call, direct or bureau. [TNX rsgbiota.org]
W - Allen KB3WEY, along with his father Mike KA6DLN and twin sister Lizzie KB3WIA, will be active as KB3WEY/p from Assateague Island (NA-139) on 18-22 September. They will operate SSB and digital modes on 40-6 metres. QSL via KB3WEY (direct, LoTW and eQSL). [TNX rsgbiota.org]
W - Celebrating the 80th Anniversary of the Collins Radio Company, the Collins Radio Club stations will be conducting a special event operation on 21-23 and 28-30 September. Planned to be active are W0CXX and N0CXX (Cedar Rapids, IA), W5ROK (Richardson, TX), W4CRC (Melbourne, FL) and W6CXX (Tustin, CA). For all stations QSL via N3SL. Further information at www.w0cxx.org (http://www.w0cxx.org). [TNX OPDX Bulletin]
XE - Special event station XE3IARU will be active on 19-29 September during the IARU Region II General Assembly to be held in Cancun, Quintana Roo, Mexico. All QSOs will be confirmed via the bureau, direct QSL via DL6KAC. [TNX The Daily DX]
XU - Alex, M6CFW will be active "semi-holiday style" as XU7AEU from Cambodia on 24-28 September. He will operate mainly PSK31 PSK63 on 10 and 20 metres, but will try other modes and bands if time and equipment permit. QSL via M6CFW (direct), eQSL and LoTW. He will upload his log to Club Log at the end of the trip.
YB - The YE5R activity from Anambas (OC-108), originally scheduled for 15-20 September, has been postponed to 18-22 October. According to the entry on qrz.com, the operators will be YB4IR and a team from the Riau Islands Province's regional branch of ORARI.
YB - Ina, YD1NAA will be in Tanjung Balai Karimun on Karimun Besar Island (OC-075) for two months during a work assignment starting on 14 September. She will bring her rig and antenna and plans to operate mostly CW as YD1NAA/5. Her license class allows her to operate CW and SSB on 40 and 80 metres, and CW only on 15 and 10 metres. QSL for both YD1NAA and YD1NAA/5 via W2FB. [TNX W2FB]
ZL - 1923 and 1924 marked the zenith of long distance communication records culminating on 18 October 1924 on 80 metres with the first trans-world contact between Frank Bell (Z4AA) in Shag Valley, New Zealand and 18-year-old Cecil Goyder (G2SZ) in London. The Kiwi DX

Group will commemorate this event (and the many other ZL firsts
that occurred ninety years ago) with the special callsign ZM90DX,
which will be in use between 1 October 2013 to 31 October 2014 on
all bands (1.8 MHz to 1.2 GHz and beyond) and modes. All
operations will take place from New Zeland, NOT from ZL9! QSL via
M0OXO. Further details can be found at www.zm90dx.com (http://www.zm90dx.com) [TNX ZL3NB]

SOUTHEAST ASIA TOUR ---> Fusao, JR3CNQ and Takeshi, JS6RRR (JI3DST) will be
active as 9V1/JR3CNQ and 9V1/JS6RRR from Singapore (AS-019) on 20-21
September and again for a few hours on the 23rd. On 21-23 September they
will operate as 9M2/JR3CNQ and 9M2/JS6RRR from West Malaysia. They will be
QRV on 40-10 metres CW and SSB. QSL via home calls. [TNX JI3DST]

==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

425 DX NEWS MAGAZINE ---> The August 2013 issue is now available for
download at www.425dxn.org/monthly/index.html (http://www.425dxn.org/monthly/index.html).
[TNX IZ3EBA]

AMSTERDAM 2014 ---> "Essentially all the FT5ZM team's equipment is now in
hand and at the Atlanta staging area or undergoing final testing in
preparation for shipment to Atlanta", K0IR reported on 10 September. While
"the Amsterdam Island DXpedition team's progress continues unabated", a
major milestone occurred when the team made their initial payment (NZD
175,000) for the charter of the ship. "Our next payment is due in December,
so like all major DXpeditions of this magnitude, we will feel the cash flow
crunch shortly. We are hoping you can support us up front when we need the
money and help us make Amsterdam a memorable DXpedition. If you've
supported us, we greatly appreciate it. If you have not yet done so, please
consider helping us now". More information on the DXpedition budget can be
found at http://www.amsterdamdx.org/why-does-this-dxpedition-cost-so-much/
"Let's assume we are on the air for 14 days", K4UEE says. "That equates to
20,160 minutes on the air. If our budget is $400,000 (not including
operator travel costs to Perth and back), then our time on the air costs
$19.84 per minute. Assume we make 100,000 QSOs, (a worthy goal for a #4
'most-needed'). The cost per QSO works out to $4.00". The DXpedition
operators will pay about half of that, but "our sponsors including DX
Foundations, DX Clubs and individual DXers worldwide need to pay the
remainder. So, when deciding not if, but how much support you will offer
FT5ZM, ask yourself: How many QSOs am I going to make? How important are
those QSOs to me?"

GREEK TELEGRAPHY CLUB CUP ---> The 3rd Greek Telegraphy Club CW Cup will
take place from 12 UTC on 5 October until 12 UTC on the 6th. Full details
can be found at http://www.raag.org/displayITM1.asp?ITMID=630&LANG=EN [TNX
SV5DKL]

P29VNX ---> The 8-13 September operation from Lissenung Island (OC-008) [425DXN 1161] by Akira, JA1NLX (P29VNX) has been cancelled due to flight problems.

QSL 5A1AL ---> Abubaker Alzway, 5A1AL (DL1AL) says that his stay in Libya has been extended. All of the QSL cards that have already been sent to his address in Germany will be forwarded to him via air mail "until 15 September 2013". His current address for QSLling is P.O. Box 6279, Tripoli, Libya: send only your card and a SAE, return postage to be paid via PayPal (please email elzo71[@]yahoo.com for PayPal account details).

QSL 9M2PJU ---> Effective immediately, the new QSL route for 9M2PJU is via K2AU (direct). "I will not reply any QSL cards received from MARTS bureau", Piju says, "but I will confirm QSOs on LoTW".

QSL YD9RQX/P ---> Steve, W2FB reports that he will be the QSL manager for YD9RQX/p (OC-275). Steve will not use any OQRS for this operation: YD9RQX "needs QSL cards to upgrade to the next license class", and so Steve would like "to get as many cards as possible from as many countries as possible".

QSL VIA NR6M ---> Rex is the new QSL manager for contacts made with either VK4SWE and VK4EI (Lyn on Sweers Island, OC-227). "I am starting the process of converting all the logs from paper to computer", he says. "There are a lot so this will take a little time". Direct cards should be sent to Rex Turvin, 18040 W Banning Street, Casa Grande AZ 85193, USA.

+ SILENT KEYS + The Amateur Radio Society of Kenya reports the tragic news of the untimely passing of Jagjeet Singh Virdee (5Z4GB/5H3JS), who was killed on 30 August in an attack by an armed gang at his home in Kericho.

QSLs received direct or through managers: 4A8DMR, 5W0M, 6O3A, 7O6T, 8R1AK, 9J2QQV, 9L1X, 9M2FB (AS-074), A41MX, BP0A (AS-103), CR5OIT, DL0IL, DU1/JA1PBV (OC-175), E51JD, EG3INT/7 (EU-152), EI0LHL, F4BKV/P (EU-148, EU-058 and EU-070), FG5FR, FH5EJ, FO5RH (OC-066), FS/K9EL, HC2AO, HC2IWM/8 (SA-004), HC3/DL5YWM (SA-034), HD8A, HI3B, HS0ZGQ, HV0A, J28AA, K6VVA/KL7 (NA-050 and NA-152), K6VVA/VE7 (NA-091), KG4RX, LA5O (EU-076), LU5FF, N4OW (NA-141), OD5ARMY, OJ0V, OM3SEM, PY0F/PP1CZ, RI1ANP, T2YY, T6T, TG1B, TK5MH, TM0SI (EU-068), TU2T, TX5K, V5/DK1CE, V5/DK9IP, VK0JJJ, VK0TH, VP8LP, VR2KF, WP4NFL, XZ1Z, YB0D (OC-177), YB8XM/p (OC-271), YE6N (OC-161), YN2N, YV5AM, Z61AA, ZL9HR.

Propagation Forecast Bulletin 37 ARLP037
>From Tad Cook, K7RA
Seattle, WA September 13, 2013
To all radio amateurs

SB PROP ARL ARLP037
ARLP037 Propagation de K7RA

Solar activity was very, very quiet over the past week. For the reporting period September 5-11, the average daily sunspot number was only 37.7. Average daily sunspot numbers as reported in this bulletin have not been nearly this low since Propagation Forecast Bulletin ARLP024, reporting for June 6-12 of this year, when it was 39.6. The last time it was lower was June 21-27 of last year, when it was 26.3, as reported in Propagation Forecast Bulletin ARLP026 in 2012.

Australia's IPS Radio and Space Services issued a geomagnetic disturbance warning at 2330 UTC on September 11. They expect increased geomagnetic activity due to a high speed solar wind stream spewing forth from a coronal hole. Coronal holes are magnetic gaps in our Sun's corona which allow some of the Sun's tremendous energy to blast out into space. Occasionally some of it reaches our planet, depending on which way the hole points.

Australia's IPS expects unsettled to active conditions on September 12, with a chance of isolated minor storm levels, unsettled to active conditions again on September 13, and quiet to unsettled conditions on September 14.

Predicted planetary A index from NOAA/USAF is 15 and 8 on September 13-14, 5 on September 15-16, 15 and 10 on September 17-18, 15 and 8 on September 19-20, 5 on September 21-25, 10 and 15 on September 26-27, 10 on September 28-29, and 5 on September 30 through October 5.

Predicted solar flux is 95 on September 13, 100 on September 14-17, 105 on September 18-20, 120 on September 21-22, 115 on September 23-30, then 110, 105 and 100 on October 1-3. It then goes to a minimum of 95 on October 4-5, and rises to a maximum of 120 on October 18-19.

F.K. Janda, OK1HH of the Czech Propagation Interest Group predicts geomagnetic conditions will be quiet today on September 13, mostly quiet September 14, quiet again on September 15-16, quiet to active September 17, active to disturbed September 18, quiet to unsettled September 19-21, mostly quiet again on September 22, quiet to active September 23, quiet again on September 24-25, mostly quiet September 26, active to disturbed September 27, quiet to active September 28, mostly quiet September 29, quiet again on September 30, quiet to active October 1, and quiet again on October 2.

A fascinating article appears this weekend concerning reconciliation of various sunspot records, on the http://HispanicBusiness.com web site, which might seem a little odd, but of course we welcome good verifiable information wherever we can find it. Read it at http://www.hispanicbusiness.com/2013/9/12/spot_of_bother.htm but note that you may have to click on the URL twice. First time for me, I saw it redirect to another page on the site, but a second click goes to the article, "Spot of Bother," by Brian Owens, dated September 14, 2013.

Another interesting article, this time (yet again) concerning our Sun's shifting polarity:

http://www.mlive.com/weather/index.ssf/2013/09/the_suns_poles_are_switching_p.html.

Jeff Hartley, N8II wrote on September 11 from West Virginia (FM19cj): "Back on August 30 there was some Es excitement with unusual openings into Bear Island, JW9JKA (Svalbard, see http://dx-world.net/2013/jw9jka-bear-island-svalbard/) on 12 meter phone at 1823 UTC, then around 2100 UTC S5 (Slovenia) and F (France) were worked on 12 meter phone as well as EI6JK (59) and DL5RBW (2212 UTC) on 10 meter phone with good signals as well as DL5AXX on scatter over the South Atlantic and IZ3NYG direct path on 10 CW. Also logged on 10 meters was EA8YB S9+ on SSB.

"15 meters in the past 10 days has been open well to EU between about 1300-2000 UTC, sometimes much later and to Asia well after sunset on good days as well as to Indonesia in our mornings along with SE Asia.

"12 meters has been in and out to EU with 10 meters mostly only open to SA and the south Pacific in the evening and late afternoon. On Sept 5, 12 meters opened well to all of EU except Russia logging YL, 4Z, 9A, S5, EG9 (Ceuta),and DL between 1528-1834 UTC. XW8XZ was worked on 15 phone earlier at 1336 UTC with an S5 signal.

"HS0 and XW0YJY were loud on 15 phone around 0050 UTC on the September 8.

"On the September 10, I had a nice run of stations on 12 CW from 1427-1452 UTC including many fairly weak Russians south of Moscow in the third call area.

"FO/KH0PR has been worked several times on 10 CW making a rare IOTA tour including today, September 11 at 1846 UTC.

"12 meters seems to open well to EU some days and poorly others when the SFI is around 100 and K index is low, very difficult to predict. If the flux jumps up to around 120, 10 meters should come to life."

Note we are only nine days away from the Autumnal Equinox, on September 22, 2013, at 2044 UTC. As we move from Summer toward Fall, HF propagation generally improves. For example, if we run a projection using W6ELprop for two months earlier on August 22 using a smoothed sunspot number of 100 from Central California to Japan, 10 meters looks marginal from 2130-0130 UTC. But with the same sunspot number on September 22, conditions look excellent at 2100-0100 UTC and very good from 0100-0300 UTC.

Similarly, on the same dates, from Atlanta, Georgia to Spain on 12 meters on August 22, conditions on 12 meters look fairly good at 1430-2300 UTC. But two months later, signals should be excellent from 1230-2200 UTC on 12 meters over the same path.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for September 5 through 11 were 75, 41, 35, 24, 13, 23, and 53, with a mean of 37.7. 10.7 cm flux was 110.1, 101.3, 98.5, 95.7, 94.3, 94.9, and 92.8, with a mean of 98.2. Estimated planetary A indices were 4, 5, 4, 6, 4, 7, and 6, with a mean of 5.1. Estimated mid-latitude A indices were 3, 5, 4, 6, 4, 6, and 6, with a mean of 4.9.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30914
SIDC SOLAR BULLETIN 14 Sep 2013, 1209UT
SIDC FORECAST (valid from 1230UT, 14 Sep 2013 until 16 Sep 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 14 Sep 2013 10CM FLUX: 092 / AP: 007
PREDICTIONS FOR 15 Sep 2013 10CM FLUX: 093 / AP: 007
PREDICTIONS FOR 16 Sep 2013 10CM FLUX: 094 / AP: 007
COMMENT: Solar activity is very low, no C-class flares in past 8 days. Geomagnetic
conditions were quiet to unsettled in Dourbes, while there was one period
of active conditions at planetary levels (Kp=4) from 15:00 UT to 18:00 UT
on September 13, due to the influence of the coronal hole related fast
solar wind. The Earth is still under the influence of this fast stream, but
quiet to unsettled conditions are expected for the next 48h.
TODAY'S ESTIMATED ISN : 013, BASED ON 07 STATIONS.

***** SPECIAL NOTE FROM EDITOR: "I have been experiencing some E-mail problems over the last few weeks, especially with <kb8nw@...> address. The <arrl.net> address has been very erratic (bounces and delays), so only use as a last resort. I have added a new E-mail address <kb8nw@...> to be used before the <arrl.net> address, if the <kb8nw@...> address does not work. I hope this will help the problem of mail getting to me.... 73 de Tedd KB8NW"

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th-September, through Sunday, 15th-September there were 220 countries active. Countries available: 3A, 3B8, 3B9, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5N, 5R, 5T, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9X, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4S, SRI LANKA. Jürgen, DL3JH, is expected to be now active as 4S7JG from Sri Lanka (AS-003) until September 29th. Activity should be on all HF bands using CW and SSB. No QSNs have been reported. QSL via DL3JH, by the Bureau or direct. Please NO IRCs!

5R, MADAGASCAR. Daniel, DF8UO, is once again active as 5R8UO from Madagascar Island (AF-013) until September 20th. Activity will be mainly CW, with some SSB and the Digital modes on 40-10 meters. QSL via his home callsign, direct, by the Bureau or eQSL. He is expected to upload his log to LoTW.

DXPEDITIONS TOUR (Update OPDX.1116). Yuki, JH1NBN, who is currently on a business trip Bangkok, Thailand, and is now heading to Nauru Island (C2). He is expected to be active as C21BN between September 16-26th. Activity will be limited to his spare time during his night hours on 80-6 meters SSB using 100 watts into a wire antenna. QSL via JH1NBN.
ADDED NOTE from his Web page at: http://www.1nbn.net
He will have other business trips planned:
Micronesia (V63AQ/V6T on OC-132) late in 2013
Nauru Island (C21BN) early next year 2014

EA6, BALEARIC ISLANDS. Terry, G4MKP, will be active as EA6/G4MKP from Mallorca Island (EU-004) during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band entry. Activity will be holiday style. QSL via M0URX.

FRENCH AFRICAN ISLAND TOUR. Armin, DK9PY, will activate two African island in November. His scheduled activations with callsigns are as follows:
November 4-11th - Mayotte Island (AF-027); callsign FH/DK9PY
November 11-22nd - Reunion Island (AF-016); callsign FR/DK9PY

Activity will be mainly CW on 40-10 meters about 12 kHz from the lower edge of each band. There will be a focus on the 30/17/12 meter bands. If his location permits, Armin will also try 160 and 80 meters. QSL via his home callsign.

FT5ZM AMSTERDAM ISLAND DXPEDITION PRESS RELEASE (From Ralph, K0IR, dated September 10th): "The Amsterdam Island DXpedition team's progress continues unabated. Essentially all the team's equipment is now in hand and at the Atlanta staging area or undergoing final testing in preparation for shipment to Atlanta. Gear will soon be sorted into contents bound for the Mataf operating location and the Antonelli operating location (see our website page <http://www.amsterdamdx.org/ft5zm-operating-sites>. There will be no guess work about what piece of equipment goes to which site when we land. Efficiency means more time on the air and more QSO's. Bob, N2OO, has been working on our maritime mobile operation to provide QSO's with some rare grids between Australia and Amsterdam Island. Arnie, N6HC, is our team doctor and has finalized his medical resources. Jerry,

WB9Z, has been hard at work with his team cutting radials and coax, thousands of feet of each, but the job is now done. Bob, K4UEE, our chief financial officer has been watching our income and expenses and trying to be as frugal as possible without compromising our ability to generate lots of QSO's. Craig, K9CT, has been putting our K3's and bandpass filters through extensive testing and has worked with Neil/VA7DX, Gregg/W6IZT, and George/N4GRN on our network and logging protocol. Erling/LA6VM and Andy/UA3AB have been working hard to inform Europeans of our progress and peak their interest, while VE7CT beats the drum in Canada. Michel, FM5CD, has worked closely with the French authorities, answering their questions and Nodir, EY8MM, has focused on our low band capabilities. Jorge, HK1R, has worked hard to generate interest in South America.
The berth and fuel for our ship has been reserved in Fremantle, Australia, and our New Zealand customs agent has been retained. We've submitted a 'shopping list' to our friends in New Zealand and Australia; they will purchase items for us that will come aboard in either Tauranga or Fremantle. Finally, a major milestone occurred recently ☐ something that says, 'There is no turning back now'. We made our initial payment for the charter of our ship, the 'MV Braveheart'. This amounted to $175,000 (NZD). Our team members are now fully vested (all in) financially. Our next payment is due in December, so like all major DXpeditions of this magnitude, we will feel the cash flow crunch shortly. We are hoping you can support us up front when we need the money and help us make Amsterdam a memorable DXpedition. If you've supported us, we greatly appreciate it. If you have not yet done so, please consider helping us now. All the team members will sleep a little better knowing you have our back..... Ralph ☐ K0IR"

HP0, PANAMA (IOTA Tour Reminder). By the time you read this, operators Christian/EA3NT, Raul/EA5KA, Vincent/F4BKV and Col/MM0NDX, from the Invoker Team, should be finishing their activation of six Panamanian islands. Their last island is Colon [Bocas del Toro] (NA-088) as HP0INT/4 until September 18th. Activity will be on 40-10 meters using CW and SSB. Direct QSLs are via F4BKV (OQRS preferred) [if you use IRC, he only accepts the new model valid until 2017]. Bureau QSLs are via F5CWU (OQRS preferred). More details and the OQRS are available at: http://www.invokerteam.com/hp0int

IOTA NEWS.....
AF-104. Members of the Amateur Radio Algerian (ARA) club will be active as 7T9A from Srigina Island (ARLHS ALG-023, WLOTA 3104) to celebrate their 50th anniversary between September 19-21st. Activity will be on all bands and modes. QSL via info on QRZ.com.

EU-121. Members of the Mayo Radio Experimenters Network will be active as EJ0M from Aran Islands between September 28th and October 5th. Operators mentioned are Brendan/EI6IZ, Steve/G0MTD, Ian/G0VGS, Norman/G7MRL, Mike/M0PRL, Mark/M0WCR, Glyn/M0XUH and Paul/M1PAF. QSL via G0MTD, direct or by the Bureau.

EU-170. Members of the ARI Verona Club will be active as 9A/IQ3VO
from Dugi Otok between September 28th and October 1st. Activity
will be on all bands using all modes. QSL via IV3VO.

IS0, SARDINIA. Yuris, YL7A, will be active as IS0/YL7A from Sardinia
Island (EU-024) during the CQWW DX RTTY Contest (September 28-29th) as
a Single-Op/Single-Band (15m) entry. QSL via YL2GM.

JD1, OGASAWARA. Koji, JI1LET, will once again be active, but this time
as JD1BOI from Komagari, Chichijima Island (AS-031) between October 25th
and November 3rd. QSL via JI1LET direct only to: Koji Iijima, 7-12 Tenma,
Gyoda, SAITAMA 361-0076, JAPAN.

PROPAGATION FORECAST/REPORT (September 16-22nd)....
Sep/16th AN Sep/19th HN Sep/21st AN
Sep/17th HN Sep/20th AN Sep/22nd AN

VRY DIS - Very Disturbed Severe Storm K=6-9 100-400

*** ADDED NOTE: Has anyone heard or seen from Lee, KH6BZF? Your
editor has been sending him E-mails for 5 weeks and has not
received an answer......

OA, PERU. Operators Jim/K6ZH and Bud/N7CW will be joining Jack/N6XQ at
Jack's, OA4TT, Almosta Superstation for the CQWW DX CW Contest (November
23-24th) as a Multi-Op/Single-TX/High-Power entry. Jim and Bud will use
OA4/homecall on 160-6 meters for about 1 week prior to the contest and
they hope to have a special callsign for the contest. An OQRS will be
available, and all logs will be uploaded to LoTW very quickly after they
return home.

OD5, LEBANON. Adrian, EA1CYK, will be active as OD5/EA1CYK (pending)
from Lebanon between November 2013 until May 2014. Activity will be on
all HF bands on SSB. QSL via his manager "Quillo", EA7LS, by the Bureau
or direct.

SILENT KEY. It has been reported that Wayne Green, W2NSD, became a Silent Key (SK) on September 13th. An eternal optimist, ham radio publications pioneer, visionary, and one who loved to share his neverending zest for life, he was a friend to many and will be missed greatly. OPDX and its reader would like to send out our deepest sympathy to the family and friends of W2NSD.

SV8 & SV9, GREECE AND CRETE (IOTA Op). Eugene, RD8X (ex-RN9XA), will be on a business trip in the Greece area between September 25th and October 2nd. His tentative schedule and callsigns are as follows:
September 25-28th - Santorini Island (EU-067); callsign SV8/RD8X
September 28-30th - Paros Island (EU-067); callsign SV8/RD8X
September 30th-October 2nd - Crete Island (EU-015); callsign SV9/RD8X

His equipment will be an Elecraft K-2/100 transceiver, and his antenna is a Buddipole Deluxe. Activity will be during his free time on the HF bands 40 meters and above using CW. Listen for QSL info.

T6, AFGHANISTAN. Reports indicate that Marvin, KL0ET, is currently operating as T6MC until January 1st, 2014. We have not seen any QSNs yet on the DXClusters, but activity is expected to be on 20/17/15/12/10 meters (propagation permitting) using SSB, the Digital modes and possibly some CW. QSL only via LoTW.

VK9C, LORD HOWE ISLAND (Reminder). Tomas, VK2CCC (aka LY1F), will once again be active as VK9LL between September 22-29th. Activity will be limited to his spare time with a focus on 160/80 meters. QSL via LoTW, and by the Bureau or direct via VK2CCC. For updates and possibly more details, watch the following Web pages: http://www.qrz.com/db/VK9LL (Web page from his 2010 operation) http://www.qrz.lt/ly1df/vk9clh.htm

VP9, BERMUDA. "The Daily DX" reports that Steve, AG2AA, will be active as VP9/AG2AA from Bermuda (NA-005) between October 21st and November 3rd. Operations will be from two different locations. The first location from a resort on the west end of the island starting between October 21-27th, operating QRP on 40 and 20 meters using CW and SSB. The second location from Ed, VP9GE's, Hamilton QTH <http://vp9ge.com> between October 28th and November 3rd, operating on several bands with 100 watts on CW and SSB. QSL via AG2AA, direct, by the Bureau or eQSL.

XU7, CAMBODIA. Alex, M6CFW, will once again be in Cambodia, but will be active with a new callsign as XU7AEU between September 24-28th. He states that his activity will be "working semi-holiday style". Operations will be mainly PSK31/63 on 10 and 20 meters, but he will try other modes and bands if time and equipment permit. Logs will be posted to eQSL immediately,

Clublog at the end of the trip and LoTW as soon as the ARRL accepts that the license is in Cambodian and they are not going to get a copy in English. QSL cards are available direct via his home callsign of M6CFW in England, along with a self addressed envelope and 2 euro or 2 USDs or a valid IRC. If you are in the UK you can just send an SASE. CARDS WILL NOT BE SENT VIA THE BUREAU.

YN, NICARAGUA. Jeff, N6GQ, will once again be active as YN2AA from Grenada, Nicaragua, starting October 22nd. Activity will be on 160-6 meters, and he will participate in the CQWW DX SSB Contest (October 26-27th) as a Single-OP/All-Band/High-Power entry. Jeff will probably use a K3 radio and 1 KW amp into the following antennas: a Tribander, 2 element 40m beam, wires and beverages for 80/160m. Jeff has added a second 40m yagi this year which should increase his signal from previous operations. QSL via NN3W, by the Bureau or direct. U.S. stations, please send SASE; DX stations, please send SAE with GS or IRC. Bureau service will take time. Logs will also be uploaded to LoTW.

Z38, MACEDONIA. By the time you read this, Predrag, YU1JF, will be active as Z38/YU1JF near Struga on Ohrid Lake until September 17th. Activity will be holiday style on 30-10 meters using mainly CW. QSL via his home callsign.

ZM90, NEW ZEALAND (Special Event Press Release #1) [edited]. "After World War I and with the banishment of radio amateurs to the supposedly 'useless shorter wavelengths' an amazing period of radio exploration took place. Amateurs all over the globe soon learnt that far from being useless these wavelengths seem to allow communication over long distances. Amateurs in ZL were at the forefront of this activity with the first ZL to VK QSO in April 1923, and then world record distance QSOs between ZL and Argentina in May 1924, ZL and California in September 1924, ZL and Connecticut on the U.S. east coast just weeks later, and the ultimate Z4AA, Frank Bell's, QSO with Cecil Goyder, G2SZ, in London on October 18, 1924.
To commemorate the 90th anniversary of the record breaking activities of these early pioneers of Amateur Radio, ZM90DX will be on the air between 1st October 2013 and 31st October 2014 on all bands 1.8 MHz to 1.2 GHz and beyond in all modes. Activated by the Kiwi DX Group, an informal group of DXers and contest enthusiasts, ZM90DX will be used around New Zealand and a special commemorative QSL card will be available as well as an award program for contacts with ZL during this period.
Not only will ZM90DX be active at expected times and on expected bands, but in the spirit of those early pioneers the ZM90DX operators will also be calling CQ on bands and in directions one may not necessarily expect with the intention of exploring the boundaries of radio propagation.
This will be an unparalleled opportunity for Amateurs all over the world to work ZL while celebrating the exploits of those early trail blazers whose work paved the way for radio communications as we know it today.
Further details can be found on: http://www.zm90dx.com
Note: 'Please remember this is a ZL based activity NOT ZL9 Campbell and Auckland Islands.' ENSURE your logging software logs ZM90DX correctly as ZL and NOT ZL9, Auckland and Campbell Islands. To update the Country File

for your logging software please visit <http://www.country-files.com/>."

SIDC SOLAR BULLETIN 16 Sep 2013, 1209UT
SIDC FORECAST (valid from 1230UT, 16 Sep 2013 until 18 Sep 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 16 Sep 2013 10CM FLUX: 091 / AP: 006
PREDICTIONS FOR 17 Sep 2013 10CM FLUX: 090 / AP: 015
PREDICTIONS FOR 18 Sep 2013 10CM FLUX: 090 / AP: 007
COMMENT: There are currently three numbered sunspot groups on the solar disc. Solar
activity is very low, with no C-class flares reported since September 06.
The Earth is currently inside a slow solar wind flow with the speed of
about 350 km/s. The interplanetary magnetic field is stable with the
magnitude of about 4 nT. The geomagnetic conditions are quiet and expected
to remain so until the arrival of the fast speed stream in the following 24
hours.

FT5Z, AMSTERDAM ISLAND (FT5ZM - $20.00 per minute on the air!). Posted on September 16th, by Stan, SQ8X, on the FT5ZM Web page [edited]:
"As Chief Financial Officer and fundraiser for the upcoming FT5ZM DXpedition, I am deeply involved in the subject of DXpedition costs and financing. I have served in the same role for numerous high-profile and expensive DXpeditions to very rare DX entities. Examples are 3Y0X, K5D, and HK0NA.
However, the article written by Don Greenbaum, N1DG, and published in several publications is the definitive work on the subject of DXpedition costs and financing. If you have not seen it, it□s available on the NCDXF website at: http://www.ncdxf.org/pages/dxresources.html
Don points out that DXpeditions to the Southern Oceans are the most expensive mainly because they involve a vessel charter. In his study, those charters averaged $260,000. However, three of the six DXpeditions included in that study took place 13-15 years ago and costs have risen significantly since then. See Ralph □ K0IR□s article on this website entitled 'Why Does This DXpedition Cost So Much?' It was posted in the 'News' section on 21 June 2013 at <www.amsterdamdx.org>. It details our current, up to date vessel charter costs. They represent 75% of our $400,000 DXpedition budget.
Now, to really put DXpedition costs in perspective, let me share some simple math with you. At FT5ZM, Let□s assume we are on the air for 14 days. That allows two days for set-up and two days for take down. That equates to 20,160 minutes on the air. If our budget is $400,000 (not including operator travel costs to Perth and back), then our time on the air costs $19.84 per minute. Yes, $19.84 per minute on the air !!!!!
Let□s take this a bit further. Assume we make 100,000 QSOs, (a worthy goal for a #4 'most-needed'). The cost per QSO works out to $4.00. Yes, $4.00 per QSO !!!!!
Now, for some good news, the DXpedition operators will pay about half of that. This means however, our sponsors including DX Foundations, DX

Clubs and individual DXers worldwide need to pay the remainder. So, when deciding not if, but how much support you will offer FT5ZM, ask yourself: How many QSOs am I going to make? How important are those QSOs to me? Am I paying my fair share of the costs? Our DXpedition leader K0IR has often joked that if every DXer would give up a cup of coffee for each QSO with FT5ZM and send that money to support the DXpedition, we would not have to worry about our expenses. You know, he is right.
73 and CU in the pileups! ..... Bob-K4UEE"

XZ, MYANMAR (XZ1Z Update). Jay, JA1TRC, reports (dated Sept. 16th):
"Zorro arrived Yangon last night and heading to Nay Pyi Taw this morning (XZ local time) while waiting the customs clearance of the additional equipment shipped this time. He will renew his operating permission at the Posts and Telecommunications Department (PTD) of the Ministry of Communications and Information Technology (MICT) when he arrive Nay Pyi Taw.
Then he will start get on the air as soon as the antennas (GPs for 20 and 17m that he used in August) are set up. We hopefully receive the equipment by the evening of 17th and put up tri-band Yagi beam. The operation will be mainly on CW and focused to North and South Americas. I expect to receive the logs if the hotel Internet connections are stable, and hope to update ClubLog.
In the meantime, QSO data for all those who have requested via OQRS for August operation are being uploaded to LoTW, and planning to do the same for the September operation. Your generous donation to the children in Myanmar can be sent to our PayPal account <xz@fgc.or.jp>.
FYI: XZ local time is UTC + 6:30"

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30917
SIDC SOLAR BULLETIN 17 Sep 2013, 1209UT
SIDC FORECAST (valid from 1230UT, 17 Sep 2013 until 19 Sep 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 17 Sep 2013 10CM FLUX: 093 / AP: 011
PREDICTIONS FOR 18 Sep 2013 10CM FLUX: 093 / AP: 008
PREDICTIONS FOR 19 Sep 2013 10CM FLUX: 093 / AP: 007
COMMENT: Solar activity is very low, with the background X-ray flux of a low B-class
level. No changes of solar activity are foreseen in the following 48 hours.
The Earth is still inside a slow solar wind flow with the speed of about
350 km/s. The interplanetary magnetic field magnitude is 6 nT. The
geomagnetic conditions are quiet to moderate and expected to remain so.
The possible arrival of the fast speed stream from the small equatorial
coronal hole, during the following hours, is not expected to result in the
change of the current geomagnetic conditions.

PREDICTIONS FOR 20 Sep 2013 10CM FLUX: 109 / AP: 007
COMMENT: There are currently seven numbered sunspot groups on the solar disc. Solar
activity is still low, with only one C-class flare reported during last 24
hours. The C3.9 flare (peaked at 03:15 UT, on September 18) originated from
the NOAA AR 1846 which just turned from behind the east solar limb. The
C-class flares are possible, in particular from the NOAA ARs 1846 and 1847.
The solar wind speed slightly increased and it is now about 400 km/s. The
interplanetary magnetic field magnitude is currently 5 nT. The occasional
short intervals of negative Bz component of the interplanetary magnetic
field resulted in K=3, as reported by local stations Dourbes and Izmiran.
The geomagnetic conditions are quiet to unsettled and expected to remain so
in the following 48 hours.

SIDC URSIGRAM 30919
SIDC SOLAR BULLETIN 19 Sep 2013, 1309UT
SIDC FORECAST (valid from 1230UT, 19 Sep 2013 until 21 Sep 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 19 Sep 2013 10CM FLUX: 103 / AP: 016
PREDICTIONS FOR 20 Sep 2013 10CM FLUX: 109 / AP: 010
PREDICTIONS FOR 21 Sep 2013 10CM FLUX: 110 / AP: 008
COMMENT: Solar activity remains low. The only C-class flare reported during last 24
hours is C1.8 flare which peaked at 08:17 UT on September 19. From the
currently available data it seems that flare originated from the Catania
sunspot group 80 (NOAA AR 1836), situated just behind the east solar limb.
The eruption from the Catania sunspot group 76 (NOAA AR 1845) at about
03:44 UT on September 19, has no reported flare. From the currently
available data it seems that the CME is associated with coronal dimming,
EIT wave, and it is possibly Earth-oriented. We expect flaring activity on
the C-level. The Earth is currently inside a fast solar wind flow with the
speed of about 600 km/s. The fast flow associated with the small equatorial
coronal hole arrived in the afternoon of September 18. The low-latitude
coronal hole in the northern hemisphere has reached the central meridian
today. We expect arrival of the associated fast flow in the morning of
September 22. The interplanetary magnetic field magnitude is currently
stable having value of about 5 nT. The occasional intervals of negative Bz
component of the interplanetary magnetic field, due to the arrival of a
fast flow, resulted in unsettled to active geomagnetic conditions (up to
K=4, as reported by local station Dourbe). The geomagnetic conditions are
at the moment quiet to unsettled and expected to remain so in the following
48 hours.
TODAY'S ESTIMATED ISN : 044, BASED ON 14 STATIONS.

DX Bulletin 38 ARLD038
>From ARRL Headquarters
Newington CT September 19, 2013
To all radio amateurs

SB DX ARL ARLD038
ARLD038 DX news

This week's bulletin was made possible with information provided by HA3JB, IZ1JLF, NC1L, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MONTENEGRO, 4O. Gab, HG3IPA will be QRV as 4O/HG3IPA from Budva from September 23 to 30. Activity will be on the HF bands using CW, SSB and RTTY. He will also be active from Sveti Nikola Island, IOTA EU-163. This includes being an entry in the upcoming CQ WW RTTY contest. QSL via HA3JB.

SRI LANKA, 4S. Juergen, DL3JH is QRV as 4S7JG until September 29. He is active on all HF bands using CW and SSB. QSL direct to home call.

UGANDA, 5X. Nick, G3RWF, will be QRV as 5X1NH from September 24 to November 16. Activity will be on the HF bands. QSL to home call.

ALGERIA, 7X. Members of the Mediterranean Sea Coast East group are QRV as 7T9A/p from Srigina Island, IOTA AF-104, until September 21. They will also be active from its Lighthouse, ARLHS ALG-023. Activity is on all bands and modes. QSL via bureau.

TONGA, A3. Masa, JA0RQV is QRV as A35JP/H from Haapa, IOTA OC-169. His length of stay is unknown. Activity is on 80 to 6 meters using CW and SSB. QSL to home call.

OMAN, A4. A group of operators from the Omani Amateur Radio Society are QRV as A43MI from Masirah Island, IOTA AS-014, until September 24. Activity is on the HF bands using CW, SSB and various digital modes. QSL via A47RS.

NAURU, C2. Yuki, JH1NBN is QRV as C21BN until September 26. Activity is on the HF bands using SSB during his free time. QSL

direct to home call.

REPUBLIC OF KOREA, HL. Station HL05GDB is QRV during the 5th Gwangju Design Biennale until November 3. Activity is on 80 to 6 meters using all modes. QSL via HL4CEL.

PANAMA, HP. Special event station HP500OP is QRV until September 30 to commemorates the year 1513 when the Spaniard Vasco Nunez de Balboa and others became the first Europeans to cross Panama and discover the Pacific coast. QSL direct via HP1RCP.

ITALY, I. Members of the ARI's La Spezia section will be QRV as IP1T from Tino Island, IOTA EU-083, on September 21 and 22. Activity will be on the HF bands, including 70 MHz and 2 meters conditions permitting. QSL via IZ5JLF.

SVALBARD, JW. Rene, DL2JRM and Netti, DO6XX are QRV as JW/home calls until September 23. Activity is on the HF bands using CW, SSB and RTTY. This includes being active in the Scandinavian Activity CW contest. QSL to home calls.

BULGARIA, LZ. Special event station LZ2013HST will be QRV from September 22 to 26 as part of the World High Speed Telegraphy Championship in Borovets. QSL via LZ1BJ.

MARKET REEF, OJ0. Pasi, OH3WS will be QRV as OJ0W from September 21 to 29 while on work assignment. Activity will be in his spare time on 40 to 10 meters using CW. This includes being an entry in the Scandinavian Activity CW contest. QSL to home call.

CONGO (REPUBLIC OF), TN. Operators PA3A, PD1AEG, PA8AD and PA8AN will be QRV as TN2MS from September 22 to 27 while part of the 4th DAGOE Mercy Ships Radio DX-Pedition. QSL via PA3AWW.

LORD HOWE ISLAND, VK9L. Tomas, VK2CCC will be QRV as VK9LL from September 22 to 29. Activity will be holiday style primarily on 160 and 80 meters and possibly on the higher bands as well. QSL to home call.

CAMBODIA, XU. Alex, M6CFW plans to be QRV as XU7AEU with his new call from September 24 to 28. Activity will be on 20 and 10 meters, and possibly other bands as well, using PSK31/63 and other modes, depending on available time. QSL to home call.

THIS WEEKEND ON THE RADIO. The ARRL 10 GHz and Up Contest, NCCC RTTY Sprint Ladder, NCCC Sprint, AGB NEMIGA Contest, SARL VHF/UHF Analogue/Digital Contest, Scandinavian Activity CW Contest, South Carolina QSO Party, QRP Afield, Feld Hell Sprint, Washington State Salmon Run, UBA ON 6-Meter Contest and the BARTG Sprint 75 will certainly keep contesters busy this upcoming weekend. The 144 MHz Fall Sprint is scheduled for September 23. The SKCC CW Sprint and CWops Mini-CWT Test are scheduled for September 25. Please see September QST, page 79, and the ARRL and WA7BNM contest web sites

for details.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30920
SIDC SOLAR BULLETIN 20 Sep 2013, 1209UT
SIDC FORECAST (valid from 1230UT, 20 Sep 2013 until 22 Sep 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 20 Sep 2013 10CM FLUX: 109 / AP: 010
PREDICTIONS FOR 21 Sep 2013 10CM FLUX: 113 / AP: 007
PREDICTIONS FOR 22 Sep 2013 10CM FLUX: 115 / AP: 014
COMMENT: There are currently nine numbered sunspot groups on the solar disc, and
three of them have beta configuration of the photospheric magnetic field.
Three low C-class level flares were reported during last 24 hours and all
originated from the same NOAA AR 1850, which just turned from behind the
east solar limb. We expect more flaring activity at the C-class level. The
M-class flares are possible but not very probable. The solar wind speed is
about 480 km/s and slowly decreasing, and the interplanetary magnetic field
magnitude is stable amounting about 3 nT. The geomagnetic conditions are at
the moment quiet. We expect quiet to active geomagnetic conditions in the
following 48 hours due to the arrival of a fast flow (in the morning of
September 22), associated with the low-latitude coronal hole in the
northern hemisphere.

Date: 2013-09-20 19:08:46 UTC
From: jjreisert@...
Topic: 6246 Message: 21654

SB PROP @ ARL $ARLP038
ARLP038 Propagation de K7RA

ZCZC AP38
QST de W1AW
Propagation Forecast Bulletin 38 ARLP038
>From Tad Cook, K7RA
Seattle, WA September 20, 2013
To all radio amateurs

SB PROP ARL ARLP038
ARLP038 Propagation de K7RA

Solar activity continues to be weak, although there was an uptick on September 18-19 when solar flux rose to 104.1, then 107.9. September 18 was the first day with solar flux above 100 since September 6. Average daily sunspot number for the reporting week (September 12-18) rose to 42.3, up from 37.7 for the previous seven days. The daily sunspot number on September 18-19 rose from 59 to 85.

Average daily solar flux dipped slightly, from 98.2 to 95.3 over the same seven day period. Average daily planetary A index and mid-latitude A index were both 6.3.

For the near term, solar flux is predicted at 110 on September 20-22, 105 on September 23-24, 100 on September 25-30, 95 on October 1-13, and 100 on October 14-27. Over the past few days all of the short term predictions for solar flux have been adjusted downward.

Predicted planetary A index is 8 on September 20, 5 on September 21-22, 8 on September 23-24, 5 on September 25-26, 8 on September 27, 12 on September 28, 5 on September 29 through October 9, then 10, 8, 5, 15, 10 and 8 on October 10-15, followed by 5 on October 16-18.

OK1HH sent us another geomagnetic forecast, and he thinks the geomagnetic field will be quiet to unsettled on September 20-21, mostly quiet September 22, quiet to unsettled on September 23, quiet on September 24-25, mostly quiet September 26, active to disturbed September 27, quiet to active September 28, mostly quiet September 29, quiet on September 30, quiet to active October 1, quiet on October 2-5, quiet to unsettled October 6-7, mostly quiet October 8, and active to disturbed October 9.

OK1HH also says a growing solar wind may cause "remarkable changes" in the magnetosphere and ionosphere on September 20-21, and on September 24.

The Autumnal Equinox is just a couple of days away. Fall officially begins in the Northern Hemisphere on Sunday, September 22 at 2044 UTC.

Check out this science blog, with observation about the current weak cycle at, http://www.science20.com/news_articles/solar_activity_smallest_sunspot_cycle_1906-120785.

The following interesting article has a lot of good information, surprising (to me) for an article from a financial and markets analyst who is not a science reporter.

The only minor quibble I have is with his apparent confusion between number of sunspots and sunspot number, which are very different, but otherwise this article is quite a good effort:

http://www.trust.org/item/20130918115439-cn7ub/?source=hpbreaking

Howard Lester, N7SO sent this article from Sky & Telescope.

http://www.skyandtelescope.com/community/skyblog/newsblog/Glimpse-of-Suns-Interior-Befuddles-Theorists-223291961.html.

Jon Jones, N0JK commented on N8II's recent report, and says that 10 meters has been good in Kansas as well, with F0/KH0PR on Disappointment Island worked on September 11 at 1955 UTC from his mobile using a modified CB mag mount on the roof.

Roland Anders, K3RA also commented on N8II's experience, "Jeff's excellent report about 12 meters prompts me to pass along that there was some 12 meter excitement in Maryland on Sept 10 around noon. I worked 9M6XRO at 1538Z on CW, and E20WKA on SSB at 1603Z. VOACAP modeling shows that possibility. European stations were coming through at the same time."

Larry Godek, W0OGH sent these links for checking sunrise/sunset times around the world: http://www.gaisma.com/en/ and http://www.gaisma.com/en/dir/us-country.html .

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for September 12 through 18 were 58, 40, 24, 12, 23, 80, and 59, with a mean of 42.3. 10.7 cm flux was 92.9, 91.6, 92.5, 92.8, 94.5, 98.7, and 104.1, with a mean of 95.3. Estimated planetary A indices were 7, 9, 6, 2, 5, 8, and 7, with a mean of 6.3. Estimated mid-latitude A indices were 5, 10, 6, 3, 6, 8, and 6, with a mean of 6.3.

3D2_rot- Target frequencies for the upcoming expedition to Rotuma
(http://3d2gc.com) by 3D2RA, 3D2GC/p and 3D2DD/p (27 September to
11 October) are:
CW 1822 3510 7007 10104 14010 18070 21010 24892 28010 50100
SSB 1838 3788 7088 - 14188 18148 21288 24948 28488 50118
RTTY 1838 3588 7038 10138 14088 18108 21088 24918 28088 50200
PSK31 1838 3578 7038 10138 14078 18108 21078 24918 28078
SSTV - 3728 7038 - 14238 - 21338 - 28688
QSL 3D2RA via LZ2HM, QSL 3D2GC/p via LZ1GC, QSL 3D2DD/p direct to
home call.
9A - I3JRF, I3VJW, IK3ESB, IK3JBP, IW3ICK and IW3ILP will be active as
9A/IQ3VO from Veli Rat lighthouse on Dugi Otok (EU-170) from 28
September to 1 October. They will be QRV on the HF bands and 6
metres on sked. QSL via IQ3VO.
5X - Once again Nick, G3RWF will be active in his spare time as 5X1NH
from Uganda from 24 September until 16 November. He prefers CW,
with some activity on SSB and digital modes. QSL via home call,
direct and bureau, and LoTW. [TNX G3RWF]
9X - Nick, G3RWF will be active again as 9X0NH from Rwanda from 19
November for about ten days. Joining Nick will be Alan, G3XAQ, who
will be active as 9X0XA. They will participate in the CQ World
Wide DX CW Contest as SOSB entrants. QSL 9X0NH via G3RWF, QSL
9X0XA via G3SWH. [TNX G3RWF and NG3K]
DL - Look for DB5BZ, DJ4RU, DK7LV, DL2VFR, DL4BBH and DL7UXG to be
active as DM50IOTA from Hiddensee Island (EU-057) from 28
September to 4 October. They will operate CW, SSB and RTTY on all
bands. QSL via bureau or direct via DL2VFR. [TNX rsgbiota.org (http://rsgbiota.org)]
EI - A large team from England and Ireland will be active as EJ0M from
Aran Island (EU-121) from 28 September to 5 October. QSL via Club
Logs' OQRS, LoTW or via the Irish QSL bureau to EJ0M. [TNX
rsgbiota.org (http://rsgbiota.org)]
FO/A - Grant, KZ1W and Rob, N7QT will be active as TX5D from Raivavae
Island (OC-114), Austral Islands on 2-14 October. They will be QRV
on 80-10 metres CW, SSB, RTTY or PSK. They hope to be able to
upload their log to Club Log on a daily basis. QSL via operator's
instructions. [TNX KD7H]

FO/A - A second operation from Raivavae Island (OC-114), Austral Islands is planned to take place from 30 October to 6 November. The operators will be Dave, K3EL and Don, VE7DS and they will use TX5RV on 80-10 metres CW, with some SSB and RTTY "from time to time". They will run "two medium-power stations with vertical antennas on the beach". QSL via M0URX, direct or bureau (OQRS preferred), and LoTW. Further information, including target frequencies chosen to minimize interference with concurrent operations, at http://k3el.wordpress.com/dx/ raivavae-austral-islands/ (http://k3el.wordpress.com/dx/raivavae-austral-islands/)
[TNX NG3K]
HK - Once again Lothar, DK8LRF will be active as HK3JCL from Colombia between 21 September to 23 November. He will operate SSB mainly on 40 and 20 metres. QSL via home call, bureau preferred. [TNX DXNL]
I - Aldo, IK2ANI will be active holiday style as IH9/IK2ANI from Pantelleria (AF-018) from 27 September to 1 October. He will operate CW, SSB and RTTY on 30-6 metres with 100 watts to a vertical antenna. [TNX IK2ANI]
JW - Karl, LA8DW will again be active as JW8DW from Longyearbyen, Spitsbergen (EU-026) from 25 September to 2 October. Activity will probably be on 80-10 metres CW and SSB. QSL via home call, direct or bureau, and LoTW; logsearch on http://la8dw.com/
OZ - Mike, DG5LAC will be active as OU1RAEM from Romo Island (EU-125) from 28 September to 5 October. He will be QRV on 80-10 metres SSB. QSL via DF5LW, direct or bureau. [TNX rsgbiota.org (http://rsgbiota.org)]
OZ - Tom, DL4VM will be active as OZ/DL4VM from Vendsyssel-Thy (EU-171) from 29 September to 19 October. QSL via home call, direct or bureau. [TNX rsgbiota.org (http://rsgbiota.org)]
PJ2 - Look for PJ2/K5JP, PJ2/NT5V and PJ2/W5BOS to be active from the Curacao PJ2T super station on 8-15 October. They will operate CW and SSB on all bands, with a focus on 30, 17 and 12 metres. [TNX K5JP]
PJ4 - Nigel, G3TXF will be active as PJ4/G3TXF from Bonaire (SA-006) on 21-29 September, for the Scandinavia Activity Contest CW (21-22 September) and the CQ WW RTTY Contest (28-29 September). During the intervening week there will also be some CW activity across the HF bands. QSL via home call. Logsearch and OQRS on Club Log.
S7 - Andrea, IZ1MHY will be active holiday style as S79MHY from Praslin Island (AF-024), Seychelles on 9-16 October. He will operate SSB, digital modes and CW. QSL via home call. [TNX IZ1MHY]
VP9 - George K3GP, Jamie WW3S and Ray ND8L will be active as VP9/K3GP, VP9/WW3S and VP9/ND8L from Bermuda (NA-005) on 26-30 September. QSL via home calls. They will participate in the CQ WW RTTY Contest as VP9I (QSL via WW3S). [TNX DX World]
W - The West Chester Amateur Radio Association will be active as WC8VOA on 21 September to commerate the initialization of the Bethany Voice of America transmission site (23 September 1944). Two stations will operate SSB and CW from 16 UTC for eight hours. QSL direct or bureau.

HIMALAYAN TRIP ---> Pekka, OH2YY will operate SSB as 9N2YY (requested call, to be confirmed upon arrival) from Nepal on 2-5 October, and as A52YY from Bhutan on 6-10 October. His Nepalese license covers 17, 15, 12 and 10 metres while his Bhutanese is for all bands. He plans to have antennas for 40-10m, with "a better antenna on 21 MHz in order to serve North American stations during the short openings that are predicted around midnight for West Coast and noon time for East". Operating bands will also depend on local conditions, as he will be travelling and visiting different places in both countries. QSL via home call, direct or bureau, and LoTW. [TNX OH2YY]

WF5E DX QSL SERVICE ---> The DX QSL Service (www.qsl.net/wf5e/ (http://www.qsl.net/wf5e/)), started by W3KT and continued by N7RO, has been run by Les Bannon, WF5E since August 1994. Owing to health problems, time has now come for Les to retire: "I will accept QSLs to forward until the end of October", he says, "Any that come in after that for requests I made, will be forwarded OK to my customers". [TNX QRZ-DX]

IMW 2014 ---> The International Museums Weekend (IMW) has been a very popular annual special event for well over a decade now. The majority of those taking part in the event have been in the United Kingdom, but for the 2014 IMW, the members of the IMW administration team are hoping to make the event a truly in international one, with great deal more participation from beyond the UK's borders. The 2014 IMW will take place on the two weekends of the 14-15 and 21-22 June. Details about the event and how to register to take part can be found at http://www.ukradioamateur.co. uk/imw/ (http://www.ukradioamateur.co.uk/imw/) or from Nigel Auckland, M0NAF (nigel[@]oldfartsonbikes.com (http://oldfartsonbikes.com)) [TNX M0HEM]

INDEXA ---> The International DX Association's (www.indexa.org (http://www.indexa.org)) newly elected/confirmed Officers & Directors are: Gary Dixon K4MQG (President), John Scott K8YC (Vice President) and Dick Williams W3OA (Secretary-Treasurer); Bob Allphin K4UEE, Ralph Fedor K0IR, Mary Hobart K1MMH, Bill Jennings W4UNP, Franz Langner DJ9ZB, Gregg Marco W6IZT, Jerry Rosalius WB9Z and Bob Schenck N2OO (Directors). [TNX W3OA]

QSL 3B8/HB9ARY ---> The new QSL route (for either past and future operations) is via NI5DX. Cards sent to HB9ARY via the Swiss bureau will be accepted until the end of 2013.

QSL TA4/UA9CDC ---> Phil, G3SWH has been appointed as QSL manager for TA4/UA9CDC with immediate effect. QSl cards are only available direct (OQRS on www.g3swh.org.uk (http://www.g3swh.org.uk)), as Igor is not an RSGB member. Phil says he will try to upload the log to LoTW in due course. [TNX G3SWH]

QSL XR5L ---> IOTA group SA-070 was activated for the last time by XR5L back in 2009. Those who still need a QSL card may now send their request to XQ7UP (team member of that expedition). QSL direct or through the OQRS provided by Club Log.

ROTA ---> Coordinated by the Bishop Auckland Radio Amateurs Club, this year the Railways On The Air (ROTA) weekend will take place on 21-22 September. Quite a number of GB special event stations are expected to participate. Details can be found at http://rota.barac.org.uk/

UCI ROAD WORLD CHAMPIONSHIPS ---> The cities of Firenze, Lucca, Pistoia, Montecatini Terme and Fiesole will host the UCI Road Cycling World Championships on 22-29 September. The Tuscany Regional Committee of ARI sponsors an award for contacting amateur radio stations in Tuscany (I5, IK5, IZ5, IQ5, IA5) during that time frame. Details can be found at www.ari-crt.it (http://www.ari-crt.it) [TNX IZ5JLW]

SILENT KEYS ---> Wayne Green, W2NSD passed away on 13 September at 91 years of age. He was the founder of "73 Amateur Radio Today" and several other magazines. "A well-known and often outspoken figure", he "often was ahead of the curve in promoting such technologies as single-sideband phone, solid-state, FM, and the marriage of computers and ham radio" (ARRL). The entire collection of "73" (from 1960 to 2003) can be found at http://archive.org (search for 73-magazine).
Other recently reported Silent Keys include James Stewart (5Z4FM/G3GLE), Claudio Granja Karam (PY5PDC) and Aleksandr Savelyev, 5B8AD (C4N, ex RA6LUX), who died of a stroke on 17 September. He was only 45 years old.

21657. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-09-21 14:01:02 UTC
From: Paul Dunphy
Topic: 19749 Message: 21657

```
:Issued: 2013 Sep 21 1358 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30921
SIDC SOLAR BULLETIN 21 Sep 2013, 1309UT
SIDC FORECAST (valid from 1230UT, 21 Sep 2013 until 23 Sep 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 21 Sep 2013 10CM FLUX: 108 / AP: 008
PREDICTIONS FOR 22 Sep 2013 10CM FLUX: 110 / AP: 015
PREDICTIONS FOR 23 Sep 2013 10CM FLUX: 115 / AP: 011
COMMENT: Solar activity is still low with the flaring at the C-class level. The
strongest flare reported was C3.8 flare, peaking at 12:03 UT on September
20. All the C-class flares, in last 48 hours originated from the same NOAA
AR 1850 which still has potential to produce C-class, and possibly M-class
flares. Earth is inside the slow solar wind with the speed of about 410
km/s.The interplanetary magnetic field magnitude is stable having value of
about 5 nT. The geomagnetic conditions are at the moment quiet. We expect
quiet to active geomagnetic conditions in the following 48 hours due to the
arrival of a fast flow (in the morning of September 22), associated with
the low-latitude coronal hole in the northern hemisphere. The CME
associated with the prominence eruption from September 19 is expected to
arrive at the Earth on September 23.
TODAY'S ESTIMATED ISN : 053, BASED ON 08 STATIONS.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30922
SIDC SOLAR BULLETIN 22 Sep 2013, 1309UT
SIDC FORECAST (valid from 1230UT, 22 Sep 2013 until 24 Sep 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 22 Sep 2013 10CM FLUX: 107 / AP: 011
PREDICTIONS FOR 23 Sep 2013 10CM FLUX: 107 / AP: 014
PREDICTIONS FOR 24 Sep 2013 10CM FLUX: 105 / AP: 007
COMMENT: Solar activity decreased even more, there was not C-class flares reported
during last 24 hours. For out of nine numbered sunspot groups on the solar
disc have beta configuration of its photospehric magnetic field, therefore
the C-class flares are still possible. The solar wind speed is about 420
km/s, and the interplanetary magnetic field magnitude is about 3 nT. The
geomagnetic conditions are at the moment quiet. We expect quiet to possibly
active geomagnetic conditions in the following 48 hours due to the arrival
of a fast flow (associated with the low-latitude coronal hole in the
northern hemisphere) and the CME associated with the prominence eruption
from September 19.

21659. XZ 10M

Yahoo group: DX-IS (2013)
Date: 2013-09-22 14:23:40 UTC
From: Brian Alsop
Topic: 21659 Message: 21659

XZ1Z was on 10M yesterday about 1300Z.

Was it a pirate?

Anybody show up in ClubLog for this? Logs for yesterday appear to have
been uploaded there.

21660. A35JP/H - How do I log it?

Yahoo group: DX-IS (2013)
Date: 2013-09-22 15:29:35 UTC
From: Rick W
Topic: 21660 Message: 21660

Masa, JA0RQV, is in Tonga signing as A35JP/H. The "/H" designation is for the island he's on - it starts with an "H". He also gives the IOTA number. My logging software, understandably, has no idea what the "/H" is all about. So I've logged it as A35JP.

My problem is what happens when Masa uploads his logs to LoTW as A35JP/H. I would anticipate that the "/H" is not a normal callsign (it probably contravenes several ADIF rules) but will the "/H" be accepted, stripped or rejected by LoTW? If the op successfully loads as A35JY/H then my QSOs will not match. Should I change my logged calls to include the "/H" or just ignore it.

Of course to be really safe, I could duplicate the call in my logbook and add the "/H" and enter a time 2 minutes later. But that seems like a little overkill.

Thoughts appreciated. Thanks.

73,
Rick

Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, K2AU, NG3K & ADXO, W3UR & The Daily DX, AJ4FM, N4AA & QRZ DX, N4JF, W4DN, K5JP, KL2HD, K8GI, K8YSE, W8GEX & 60m News, W9ILY, N0ODK, 5Z4EE, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, G0IAS, HP1AC, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK8YFU, JA1TRC, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RA3AUU, RSGB IOTA Web Site, Sixitalia Weekly, TA1HZ , TF3AO, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF) and YT3W for the following DX information.

***** SPECIAL NOTE FROM EDITOR (Just A Reminder/Update): "Things seem to be back to normal. I was experiencing some E-mail problems over the last few weeks, especially with <kb8nw@arrl.net> address. The <arrl.net> address has been very erratic (bounces and delays), so only use as a last resort. I have added a new E-mail address <kb8nw@...> to be used before the <arrl.net> address, if the <kb8nw@...> address does not work. I hope this will help the problem of mail getting to me.... 73 de Tedd KB8NW"

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 15th-September, through Sunday, 22nd-September there were 222 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5R, 5T, 5W, 5Z, 6W, 6Y, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ4, PJ7, PY, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TN, TR, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XW, XX9, XZ, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z3, Z8, ZA, ZB, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3W2/XV4, VIETNAM (IOTA Op). Mike, N0ODK, states that he will once again be active from Ho Chi Minh City, but this time as 3W2DK (not 3W6DK - Vietnam has changed their districts) between October 17-24th. He will then travel to Phu Quoc Island (AS-128) and be active as XV4MN between October 24-29th. His activity will be on 20/17/15/10 meters from both locations. Also, look for him to be in the CQWW DX SSB Contest (October 26-27th) as a Single-Op/Low-Power entry. After his Phu Quoc Island operation, he will return to Ho Chi Minh City and will be active until November 2nd. Mike mentions that during his operations he will be asking for stand-bys for NA Zeros often to get into the midwest. QSL via N0ODK, direct, by the Bureau or LoTW. He states on QRZ.com, "If you have different contacts with me as 3W6DK, 3W2DK, XV4MN, or N0ODK, please QSL in one package to save you time and money and I can QSL all in one time. I collect QSL cards so if we QSL, please QSL even if you do not need my QSL card. I will QSL if in logbook."

5P14, DENMARK (Special Event). Members of the Danish Radio Amateurs will activate the special event callsign 5P14EHC between January 1-31st, 2014. Activity is to celebrate Denmark hosting the "European Handball Championship for Men" event between January 12-26th. Look for activity to be on all bands including the 30/17/12 meter bands, with operations possibly on all modes, except cross-mode, cross-band contacts and contacts via repeater and echo-link. All QSOs will be verified via LoTW and eQSL.cc. Paper-QSL may be requested via <www.clublog.org/logsearch/5p14ehc>. Please click on "Request QSL card" after you have searched their log. PLEASE DO NOT SEND YOUR QSL CARD TO THEM VIA THE BUREAU. Wrong/missing QSOs can be reported to OZ0J at <qsl@5p14ehc.dk>. For direct QSLs, please send them to OZ0J with a S.A.E. with 1 IRC or 3 USDs to cover return postage. Also, you may instead save your envelope by using PayPal. For more details, see <www.5p14ehc.dk>. When using IRCs, they must be the new type with the "Water of Life" on it and valid until December 31st, 2017. QSL cards with insufficient payment will be returned via BUREAU. All direct QSL cards will be sent approx. March 1st, 2014. Please expect up to 14 days for delivery with the postal service. There are special awards available (Gold/Silver/Bronze). For details, see:
http://www.oz5md.dk/5p14ehc/viewpage.php?page_id=2
The current list of operators of 5P14ENC are Joergen/OZ0J, Henning/OZ1BII, Kjeld/OZ1CCM, Preben/OZ1HHH, Palle/OZ2PBS, Poul/OZ2PJ, Jesper/OZ3AEV, Carsten/OZ4CG, Karsten/OZ4FF and Gorm/OZ6GH.

A5, BHUTAN. Guenter, DK4YB, will be active as A52YB from Bhutan between October 5-20th. Activity will be on 20 and 15 meters using CW, SSB and PSK31. He will operate mobile on the 9th, 13th and 16th. Suggested frequencies are: CW - 14060 and 21055 kHz, SSB - 14195-14285 and 21285 kHz and PSK31 - 14070 kHz. Equipment will be a KX3 with 5 watts, HCT, HF-P1 Vertical and Longwire. QSL via his home callsign, by the Bureau or direct.

A7, QATAR. Members of the Qatar Amateur Radio Society (A71A) calling themselves the "A73A Contest Team" will be active during the CQWW DX SSB Contest (October 26-27th) as a Multi-Op/Multi-Transmitter entry. QSL via A71A.

AFRICAN TOUR (Reminder). Nick, G3RWF, will once again be active as 5X1NH from the University of the Mountains of the Moon (MMU) in Fort Portal, Western Uganda and (occasionally) the capital, Kampala, between September 24th and November 16th. He is expected to join/meet with Alan, G3XAQ/5X1XA, later and both operators will travel to Rwanda to be active as 9X0NH between November 19-29th. The duo plan to participate in the CQ WW DX CW Contest (November 23-24th) from Rwanda. QSL 5X1NH and 9X0NH via G3RWF. QSL 5X1XA via G3SWH.

AH2, GUAM. Yuji, JF2WGN, will be active as AH2EA from Guam (OC-026) between October 17-21st. Activity will be on the HF bands. QSL via his home callsign only (not Guam). All QSLs will be sent via the Bureau, if you want a QSL direct do not send your card until after January 2014.

ASIAN TOUR (Update). Pekka, OH2YY, will activate Nepal (9N) between October 2-5th. He has applied for the callsign 9N2YY, but the final confirmation will take place upon arrival in Kathmandu. After Nepal, between October 6-10th, Pekka will be visiting the Kingdom of Bhutan (A5). He has been assigned a Bhutanese license with a callsign A52YY. Both in Nepal and Bhutan, Pekka will be traveling mainly during the daytime hours, but during his evenings and nights, he will be active on 40-10 meters using SSB. He cannot take any amplifier or yagis with him, so the operations will be basically with a 100w transceiver and dipoles. His license in Nepal will cover bands 17-10 meters, but his Bhutanese license allows all HF bands. Pekka's plan is to have antennas for 40-10 meters, and he will try to have two or three antennas up simultaneously. He states, "The propagation forecasts are not very good for North and Central America, and therefore, he will try to have a bit better antenna on 10 meters. Pekka will do his best to utilize the short openings that are predicted around midnight UTC for the West Coast and noon time for East. QSL via OH2YY, by the SRAL Bureau or direct to: Pekka Ahlqvist, Vapaalanpolku 8B, 01650 Vantaa, Finland. Also, he will use LoTW.

BY0, CHINA. Operators Terry/BA7NQ, Vange/BA7IO, Rumei/BD7LMD, Yang/BD7IXG, Xu/BD0AS, BD0APD, Lin/BI7IOB and Wong/VR2KW will be active as BY0AA during the CQWW DX SSB Contest (October 26-27th) as a Multi-2 entry. QSL via BA4EG. Activity will begin on October 24th, with a focus on the low band only before contest.

C6, BAHAMAS. George, KQ8Z/GM0IIO, will once again be active as C6AZZ from Grand Bahama Island (NA-080, WLOTA 0527, WW Loc. FL06UO). This time it will be during the CQWW DX SSB Contest (October 26-27th) and the CQWW DX CW Contest (November 23-24th) as a Single-Op/Single-Band(15m) [May switch to 20m depending on band conditions]/Low-Power/Unassisted entries. He usually will be on other bands for a few days before and after the contests. If like last time, activity will be focused on 6 meters (CW, SSB, FM) if there are any band openings, otherwise on 80-10 meters,

mainly CW with some SSB using his Icom 756 Pro3. George will use a 80m OCFD antenna at 40 feet. The 20m antenna will be a full sized 20m delta loop right on the beach vertically polarized with the apex at 40 feet. QSL via KQ8Z.

ED8, CANARY ISLANDS. Jaime, WP3A, will be active as ED8P from Santa Cruz de Tenerife (AF-004, DIE S-012, WLOTA 1276, EAA TF) during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/Single-Band (15m)/Low-Power/ Assisted entry. QSL via NP3O.

HI, DOMINICAN REPUBLIC. Hiro, JA6WFM, will once again be active from here this time as HI3/NP3J during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/Single-Band (10m)/Low-Power entry. QSL via EA5GL, LoTW or eQSL.

HK, COLUMBIA. Lothar, DK8LRF, will once again return to Columbia and be active as HK3JCL between September 21st and November 23rd. Activity will mostly be on 20 and 40 meters using SSB. To see pictures from his last trip, see QRZ.com. QSL via his home callsign by the Bureau.

IOTA NEWS.....
EU-017. Members of the Calabria DX Team will be active as ID9Y from Salina Island (ARLHS ITA-020 and ITA-250, IIA ME-015, MIA MI-083) between October 3-6th. Operators mentioned are Alex/ IK8YFU, Domenico/IW8RAO, Sal/IZ8CZR, Maurizio/IZ8JSJA and Nicola/IZ8SKO. QSL via IK8YFI direct. QSL via the Bureau to HB9FHZ. Also, QSL via LoTW or eQSL. Visit their Web page at: http://www.calabriadxteam.it/salina

EU-129. By the time you read this, Mike, DO4ABA, will be active as DO4ABA/p from Usedom Island (DID O-013, WLOTA 1640) until September 26th. Activity will be on 20/15/10 meters, possibly on 80 meters using SSB, PSK31/63 and RTTY. Suggested operating times are during the evenings between 0400z and 1100z. Mike mentions to look at his Web site for updates on frequencies and times. He also states that this is his first IOTA operation. QSL by the DARC Bureau or eQSL. His Web site is: http://www.do4aba.de

OC-016. Jeff, K0UU, will be active as 3D2FJ from Beqa Island between March 23-31st, 2014. Activity will be holiday style on 80-10 meters CW only. QSL via K0UU, by LoTW (preferred) or direct.

JD1, MINAMI TORISHIMA (Update). If you missed Take, JG8NQJ, as as JG8NQJ/JD1 from Marcus Island in the Minami Torishima (OC-073, JCG 10007) group, you will have another chance sometime in the middle of December. He is usually there to work on the island's weather station. Activity will be limited to his spare time. He will be mainly on 17 meters but also on 15/12/10 meters CW. QSL via his home callsign, by the Bureau or direct to JA8CJY: Susumu 'Sin' Sanada, 5-17, 5-4, Shin-Ei, Toyohira, Sapporo 004, Japan. Online log is available at: http://dx.qsl.net/cgi-bin/logform.cgi?jd1-jg8nqj

KG4, GUANTANAMO BAY. Operators Bill/W4WV and Al/W6HGF will be active as KG4WV and KG4HF, respectively, from Guantanamo Bay (NA-015) between October 11-25th. Activity will be on all bands, 160-6 meters using SSB, RTTY, PSK, and some CW. They will be on the air for the JOTA to put the local Boy Scouts on the radio. They will complete the antenna repairs from damage by hurricane Sandy and a few minor repair items to the shack. QSL via their home callsigns.

KH2/NH2, GUAM. Dave, N2NL, will once again be active as NH2T from Guam (OC-026) this time during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band/High-Power entry. In mid August, Dave moved from his former QTH in Dededo and is now living at a hilltop QTH in Asan in central Guam. He states, "I am still working on installing antennas, but am currently QRV on 40-10m." Dave is usually active (outside of contests) as KH2/N2NL and during all contests as NH2T. QSL via LoTW, by the Bureau or via W2YC for both callsigns direct. Visit his Blog at: http://www.n2nl.net

KL7, ALASKA. Operators from the "KL7 NWR Amateur Radio Club" and "Moosehorn ARC" will celebrate "National Wildlife Refuge Week" and will be active as KL7NWR on October 5th. Activity will be on 15 and 20 meters using SSB with some CW. QSL via KL2HD to: Jeff Williams KL2HD, PO Box 1268, Homer, AK 99603.

LX, LUXEMBOURG. Members of the Radio Club Leuven (RCL) will be active as LX/OR5M during the CQWW DX RTTY Contest (September 28-29th) as a Multi-Single/High-Power entry. Twelve operators will be active from a log cabin near the village of Wiltz. QSL via ON4CP. Visit the RCL Web page at: http://www.radioclubleuven.be

NH0, MARIANA ISLANDS. Operators Yutaka/JQ2GYU/WS2Y and his wife Miho/ JJ2VLY/WS2M will be active as NH0J from Tinian Island (OC-086), Northern Mariana Islands, the special commemorative Tinian station of the "J-Tinian Radio Space Club, between October 17-21st. Activity will be on 80-10 meters including the 30/17/12 meter bands, using CW, SSB and RTTY. Miho will participate in the "JARTS WW RTTY Contest" between October 19-20th. See <http://jarts.jp/rules2013.html>. QSL via JJ2VLY, direct (SAE + 2 USDs) or by the JARL Bureau. Please don't send your QSL request to Tinian Island. For more details and updates, see: http://jq2gyu.blogspot.jp

OJ0, MARKET REEF (Cancelled). Pasi, OH3WS, was expected to be on Market Reef (EU-053) as a voluntary worker and be active as OJ0W during some time during September, but had to cancel his activity. Reason was not given.

P4, ARUBA. Valery, R5GA, will once again be active as P4/R5GA from Aruba (SA-036, WLOTA 0033). Activity will be on CW mainly on 160-10 meters, especially on the 30/17/12 meters. His activity will also include the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band entry using the contest callsign P40F. QSL via UA3DX. QSL P4/R5GA via R5GA, direct, by the Bureau or LoTW.

PACIFIC TOUR 2013 (By YT1AD and part of the "WW DX team"). Operators Hrane/YT1AD, David/WD5COV, Wasiliy/RW4NW, Sergey/ RZ3FW and Dragos/YU1AKV will activate the following Pacific island in November this year. Their tentative schedule, activations and callsign are as follows:

November 13-15th - Hawaii (KH6); YT1AD (KH6/N9YU), WD5COV (KH6/WD5COV) and RZ3FW (KH6/N7AFW); QSL via their home callsigns.
November 16-17th - Samoa (5W); YT1AD (5W7A or 5W6A); WD5COV (5W0OV), RZ3FW (5W0FW) and RW4NW (5W0NW); QSL via their home callsigns.
November 18-19th - American Samoa (KH8); YT1AD (KH8/N9YU); WD5COV (KH8/WD5COV) and RZ3FW (KH8/N7AFW); QSL via their home callsigns.
November 20-22th and
November 29-December 4th - Fiji (3D2); YT1AD (3D2AD), WD5COV (3D2OV), RZ3FW (3D2FW) and RW4NW (3D2NW); QSL via their home callsigns.
November 22-29th - Rotuma Island (3D2/R); Callsign will be 3D2R. QSL via YT1AD. The team will be active in the CQWW DX CW Contest (November 23-24th) as a Multi-Single or Multi-2 with the 3D2R callsign.

Activity will be mainly CW, SSB and RTTY, on all islands, probably on all bands. ADDED NOTE: During this trip, the team will be preparing for their next DXpedition for the periods of November 2014/April 2015. Their goal and wish is Palmyra Island (KH5/P) with Kingman Reef (KH5K) or Baker & Howland Islands (KH1). More news will be forthcoming in December 2013.

PJ2, CURACAO. Operators Jeff/K5JP, Jim/NT5V and Lanny/W5BOS will activate the Caribbean Contesting Consortium's (CCC) Signal Point PJ2T Station on Curacao (SA-099, WLOTA LH-0942) between October 8-15thth. Each operator will sign PJ2/homecall. Activity will be on all bands with an emphasis on 30/17/12 meters using CW and SSB. QSL direct via their home callsigns or by the Bureau. Logs will be uploaded to LoTW when they return home.

PJ4, BONAIRE. Nigel, G3TXF, will be active as PJ4/G3TXF from Bonaire (SA-006, WLOTA 1279, WWFF PAFF-024) between September 21-29th. He plans to be in both for the Scandinavian SAC-CW Contest (September 21-22nd) and for the CQWW DX RTTY Contest (September 28-29th). For activity outside of the contest, there will be some CW operations across the HF bands. QSL via G3TXF. Logs and an OQRS QSLing will be available on ClubLog. For more details and updates, visit:
http://www.g3txf.com/dxtrip/PJ4-Sep-13/PJ4.html

NEW QSL MANAGER. Mark, K2AU, is now the QSL Manager for Piju, 9M2PJU.
NO BUREAU QSLs, ONLY LOTW OR DIRECT TO K2AU.

NEW QSL MANAGER. Phil, G3SWH, reports that effective immediately he
is now the QSL Manager for Igor, TA4/UA9CDC. He also mentions, "Please
note that as Igor is not an RSGB member, proper QSLs are only available
direct. I will try to upload the log to LoTW in due course."

QSL RECEIVED VIA LoTW: 2E0GBK, 8P6NW, 9A4WY, BA4TB, BG2AUE, CT1EGF,
DL4MN, DL8FCL, EI8JX/P, F4EPR, F6BQX, HB9DNF, LU2IP, MM3LLU, RY7A,

MU/PA9M, P40X, PJ2/K9QVB and V63MP

RTTY CONTEST. Just a reminder that the CQWW DX RTTY Contest is this
coming weekend (September 28-29th). Complete details on the rules can
be found at: http://www.cqwwrtty.com/rules.htm
Important notice: All entries must be sent WITHIN FIVE (5) DAYS after

the end of the contest: no later than 2359 UTC October 4, 2013.

S7, SEYCHELLES. Andrea, IZ1MHY, will be active as S79MHY from Praslin Island (AF-024) between October 7-17th. Activity will be on 160-10 meters. His radio is a Yaesu FT857 into a multi-band vertical, dipoles for 10/15/20m and half-wave sloper for 160m. QSL via his home callsign, direct, by the Bureau or LoTW.

SILENT KEYS.....
5Z4FM - Allan, G0IAS, reports that Jim Stewart, 5Z4FM, from Nairobi, became a Silent Key (SK) on September 16th. Jim was probably the most active of the 5Z's and will be missed on the bands. His XYL is Anne, 5Z4FM. Ted, 5Z4NU, tells Allan, G0IAS, there will soon be very few operators from 5Z... it doesn't look as if there are enough operators for anybody now to get the "BIG FIVE AWARD".....

5B8AD - Harry, RA3AUU/P33W, informed the contesting community on September 17th, that Alex Saveliev, 5B8AD (aka C4N, RA6LUX), became a Silent Key after a heart attack. He was just 45.

OPDX and its readers would like to send out our deepest sympathy to the family and friends of the above mentioned......

TC90, TURKEY (Special Event). The members of the TCSWAT (Special Wireless Activity Team) have been active with the special event TC suffix callsigns for some years now to celebrate the anniversary of Republic of Turkey. In 2013, Turkey will celebrate their 90th anniversary, and between October 14-31st, the TCSWAT group will be active once more on the air as TC90TC. More details will be available on QRZ.com in the coming days. Activity will be on all HF bands and all modes. Plans are ongoing for a Multi-Multi entry at CQWW DX SSB Contest (October 26-27th). QSL via TA1HZ. Please be aware that QSL cards will be printed in 2014, so DO NOT hurry to send direct requests. TCSWAT sends QSL cards 100% via the Bureaus every year.

TF, ICELAND. Members of the Icelandic radio amateurs called "Radíó Refir" (English: Radio Foxes) will be using their new contest callsign TF2R (ex-TF2RR) for the first time during the CQWW DX RTTY Contest (September 28-29th) from the QTH of TF2LL <http://www.qrz.com/db/tf2ll> as a Multi-Single entry. Operators will be the majority of Icelandic RTTYers. For more information see QRZ.com.

TI8, COSTA RICA. Operators Carlos/TI2KAC, Juan/TI3JCY, Mauricio/TI4ZM, Eddie/K4UN, Bob/W4BW, Keith/W4KTR and Lex/W4XO will be active as TI8M from Costa De Pajaros during the CQWW DX SSB Contest (October 26-27th) as a Multi-2 entry. The group will be active before and during the contest on 160-10 meters. QSL via TI2KAC, direct or by the Bureau.

TX5, AUSTRAL ISLAND. Operators Dave/K3EL and Don/VE7DS will be active as TX5RV Raivavae Island (OC-114) between October 30th and November 6th. Activity will be on 80-10 meters using mostly CW, maybe some SSB and

RTTY. The Austral Islands are currently 44th on the ClubLog "most wanted" list, very high for a fly-in destination, with a particularly low percentage of ClubLog users having contacts on 10 or 12 meters. Suggested frequencies are:
CW - 3531, 7031, 10119, 14031, 18081, 21031, 24914 and 28031 kHz
SSB - 7065/7165, 14220, 18115, 21315, 24970 and 28475 kHz
RTTY - 7037, 10144, 14082, 18102, 21090, 24927 and 28090 kHz

This is not intended to be a full-on DXpedition (they are travelling with their XYLs, hence they□ll be spending some time away from the radios), but there will be significant on-the-air time for approximately one week, running two medium-power stations with vertical antennas on the beach. QSL via M0URX (OQRS preferred). Logs will be uploaded to LoTW quickly after their return. The OQRS will be available for direct and bureau card requests, and direct requests can also be sent by snail-mail. Full information on QSLing via M0URX is available at Tim's Web site at:
http://www.m0urx.com
For more details, visit:
http://k3el.wordpress.com/dx/raivavae-austral-islands

VI6WA100, AUSTRALIA. Members of the Hills Amateur Radio Group will be active as VI6WA100, a special event callsign to celebrate the centenary of amateur radio in Western Australia (VK6 prefix), between October 1st and December 31st. QSL Manager is VK6IR, via direct, by the Bureau or his OQRS on his Web page <http://www.vk6ir.com>.

VK9M, MELLISH REEF (Press Release #1). Members of the "The Perseverance DX Group" posted the following press release about plans to activate Mellish Reef as VK9MT in 2014 [edited]: "After their successful operation from Campbell Island in December 2012, six members of the ZL9HR team, and additional operators, are today announcing their intention to activate Mellish Reef in early 2014.
Mellish Reef is located in the Coral Sea, approximately 1100km north-east of Brisbane, Australia. Currently number 24 on ClubLog's Most Wanted List, Mellish Reef was last activated in 2009. An international team will operate for 12 days, using 6 stations with linear amplifiers and vertical antennas.
Discussions are underway with the appropriate authorities and potential transport suppliers. Additional information will be available on the team's soon to be activated web site after the documentation is finalized. Currently signed up for the project are: Pista/HA5AO, Dave/K3EL, Glenn/KE4KY, Jacky/ZL3CW, George/HA5UK, Gene/K5GS and Les/W2LK. As the project progresses we will announce additional operators and details.
Please direct questions to: Mellish2014@... "

XZ, MYANMAR. By the time you read this, Zorro, JH1AJT, should be going QRT as XZ1Z (September 23rs). Jay, JA1TRC, states that QSO data for all those who have requested via OQRS for the August operation are being uploaded to LoTW, and is planning to do the same for the September operation. Your generous donation to the children in Myanmar can be sent to their PayPal account at <xz@...>.

21662. RE: [DX-IS] A35JP/H - How do I log it?

Yahoo group: DX-IS (2013)
Date: 2013-09-22 22:28:34 UTC
From: Ron Notarius W3WN
Topic: 21660 Message: 21662

Two suggestions:

(1) Log it in your log however you're comfortable. If you choose not to include the /H, I'd make a note in the comments field (or equivalent) so that you know the island distinction.

(2) When you do your upload to LotW, put in two entries - one with the /H, one without. That way, your covered regardless of how Masa uploads it.

That's what I'd do, at least. YMMV, of course.

73, ron w3wn

From: DX-IS@yahoogroups.com [mailto:DX-IS@yahoogroups.com] On Behalf Of Rick W
Sent: Sunday, September 22, 2013 11:30 AM
To: DX-IS@yahoogroups.com
Subject: [DX-IS] A35JP/H - How do I log it?

Masa, JA0RQV, is in Tonga signing as A35JP/H. The "/H" designation is for the island he's on - it starts with an "H". He also gives the IOTA number. My logging software, understandably, has no idea what the "/H" is all about. So I've logged it as A35JP.

My problem is what happens when Masa uploads his logs to LoTW as A35JP/H. I would anticipate that the "/H" is not a normal callsign (it probably contravenes several ADIF rules) but will the "/H" be accepted, stripped or rejected by LoTW? If the op successfully loads as A35JY/H then my QSOs will not match. Should I change my logged calls to include the "/H" or just ignore it.

Of course to be really safe, I could duplicate the call in my logbook and add the "/H" and enter a time 2 minutes later. But that seems like a little overkill.

Thoughts appreciated. Thanks.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30924
SIDC SOLAR BULLETIN 24 Sep 2013, 1209UT
SIDC FORECAST (valid from 1230UT, 24 Sep 2013 until 26 Sep 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 24 Sep 2013 10CM FLUX: 109 / AP: 017
PREDICTIONS FOR 25 Sep 2013 10CM FLUX: 109 / AP: 007
PREDICTIONS FOR 26 Sep 2013 10CM FLUX: 109 / AP: 006
COMMENT: NOAA Active Region 1850 - Catania sunspot region nr 83 was the source of 4
B-flares yesterday and today. The X-ray background radiation is near the
bottom of the B-level. We can conclude that flaring activity was low. We
don't expect it to rise dramatically. The magnetic field changed
direction on September 23. ACE data show today, September 24 an interaction
region between a slow and fast solar wind. The total interplanetary
magnetic field (IMF) and the density increased. Since the Bz component of
the IMF has values below -5nT, the geomagnetic field can slightly be
disturbed resulting in possible active conditions: K=4.

21670. RE: [DX-IS] XZ 10M

Yahoo group: DX-IS (2013)
Date: 2013-09-25 04:16:30 UTC
From: Lance Martin
Topic: 21659 Message: 21670

Hi Brian,

Congratulations on your 17m CW XZ1Z QSO!

Zorro was very active up till a couple of days ago.
He seemed to have two stations running at times, I don't know how he did that.

Great to see Burma back on air after so many years.

73, Lance - VK6DU

Subject: [DX-IS] XZ 10M

XZ1Z was on 10M yesterday about 1300Z.

Was it a pirate?

Anybody show up in ClubLog for this? Logs for yesterday appear to have been uploaded there.

Hi Lance:

They had 3 ops JH1AJT E21EIC and JJ1LIB and 2 stns to be used so
they could put 2 signals on 2 different bands ...

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30925
SIDC SOLAR BULLETIN 25 Sep 2013, 1209UT
SIDC FORECAST (valid from 1230UT, 25 Sep 2013 until 27 Sep 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 25 Sep 2013 10CM FLUX: 110 / AP: 006
PREDICTIONS FOR 26 Sep 2013 10CM FLUX: 110 / AP: 005
PREDICTIONS FOR 27 Sep 2013 10CM FLUX: 110 / AP: 006
COMMENT: NOAA active region 1846/ Catania 79 produced a C1.1 flare on September 24.
Although the chances for more C-flares are small, we end the all-quiet-
alert. ACE data show now a clear coronal hole signature. The solar
wind plasma has a speed just below 450 km/s. It took this plasma around 4
days to bridge the distance Sun-Earth. On September 20, a northern coronal
hole passed the central meridian. The co-rotating interaction region (CIR)
followed by a fast wind measured by ACE, is probably linked to this hole.
The CIR was responsible for 1 interval of Kp=4 on September 24. We expect
quiet geomagnetic conditions, with Kp below 3.

21673. FS: World atlas-great for DXers and County Hunters

Yahoo group: DX-IS (2013)
Date: 2013-09-25 18:51:18 UTC
From: John Geiger
Topic: 21673 Message: 21673

I have for sale a Time magazine Hammond World Atlas from 1980. Now this does contain some countries that no longer exist (East Germany, Czechoslovakia, Yugoslavia) and doesn't have some that now exist (Eriteria) but overall it is a very nice atlas for DXing. It has many individual country maps, with different colors for each of the country's internal divisions (like states, regions, etc). It also has a map of each US state, with different colors for each county, which makes it very easy to distinguish between the different counties in that state-great for county hunters. It even contains the counties for the provinces in Canada that have counties. It also contains different facts about each country, like languages, population, area, and a picture of the flag. It is hard cover with 176 pages in all. Some damage to the bottom of the spine, but overall a very nice atlas.

I am asking $15 shipped by media mail for it and can take paypal/check/MO.

73 John AF5CC

21674. Report SIDC Ursigram

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30926
SIDC SOLAR BULLETIN 26 Sep 2013, 1209UT
SIDC FORECAST (valid from 1230UT, 26 Sep 2013 until 28 Sep 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 26 Sep 2013 10CM FLUX: 111 / AP: 004
PREDICTIONS FOR 27 Sep 2013 10CM FLUX: 109 / AP: 005
PREDICTIONS FOR 28 Sep 2013 10CM FLUX: 109 / AP: 007
COMMENT: The Sun is quiet when it comes to flaring activity. NOAA AR 1850=
/Catania 83
produced a few B-flares. We expect that the X-ray radiation stays at a lo=
w
level. The solar wind speed peaked on September 25 around 450 km/s and
decreased slowly to a speed of 350 km/s today, September 26. Late
September 25, the Earth crossed a sector boundary (SB). The interplanetar=
y
magnetic field changed from an inward to an outward direction, the densit=
y
of the solar wind plasma has changed slightly. The SB crossing did not ha=
ve
geomagnetic consequences. A small northern coronal hole (between 35=B0
and 50=B0 latitude) will pass the central meridian today, September 26.
We expect the geomagnetic conditions to stay quiet for the next 48 hours.

DX Bulletin 39 ARLD039
>From ARRL Headquarters
Newington CT September 26, 2013
To all radio amateurs

SB DX ARL ARLD039
ARLD039 DX news

This week's bulletin was made possible with information provided by I3VJW, N7QT, NC1L, W2GEZ, W3UR, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

ROTUMA ISLAND, 3D2. Operators 3D2RA, 3D2GC/p and 3D2DD/p are QRV until October 11. Activity is on 160 to 6 meters using CW, SSB, RTTY, SSTV and PSK31. QSL 3D2RA via LZ2HM, 3D2GC/p via LZ1GC and 3D2DD/p direct to home call.

SENEGAL, 6V. Luc, F5RAV will be QRV as 6V7T/p from N'gor Island, IOTA AF-045, during October. Activity will be on 40 to 10 meters using SSB and PSK. QSL direct to home call.

CROATIA, 9A. Members of the Verona DX Team will be QRV as 9A/IQ3VO from Dugi Otok, IOTA EU-170, from September 28 to October 1. This includes being active from the Veli Rat Lighthouse, ARLHS CRO-183. Activity will be on all HF bands and 6 meters, except 160 meters, using CW, SSB, RTTY and PSK31. QSL via IQ3VO.

UGANDA, 9X. Nick, G3RWF is QRV as 5X1NH from the University of the Mountains of the Moon in Fort Portal, Western Uganda and occasionally from Kampala until November 16. QSL to home call.

TAIWAN, BV. A group of operators will be QRV as BV60V until the end of 2013 in celebration of the 60th anniversary of the Victory Broadcasting Company. This includes being a Multi/Multi entry in the CQ World Wide RTTY DX contest. QSL via operators' instructions.

BOLIVIA, CP. Peter, DF7NX is QRV as CP9/DF7NX until October 15. Activity is on the HF bands using only CW. QSL to home call.

MADEIRA ISLANDS, CT3. A group of operators will be QRV as CR3A in the CQ World Wide RTTY DX contest as a Multi Op entry. QSL via

operators' instructions.

SABLE ISLAND, CY0. Operators VE1RGB, AI5P and WA4DAN will be QRV as CY0P from October 1 to 11. QSL direct via VE1RGB.

ESTONIA, ES. Station ES9C will be QRV as a Multi/Multi entry in the CQ World Wide RTTY DX contest. QSL via operator's instructions.

AUSTRAL ISLAND, FO. Grant, KZ1W and Rob, N7QT will be QRV as TX5D from Raivavae Island, IOTA OC-114, from October 2 to 14. Activity will be on 80 to 10 meters using CW, SSB, RTTY and PSK. QSL via bureau.

JAPAN, JA. Special event station 8J9ECZEN is QRV during October to celebrate the 10th anniversary of Echizen's Railway. QSL via bureau.

MARIANA ISLANDS, KH0. Kazuo, JH8PHT plans to be QRV as AH0KT from Saipan from October 3 to 7. Activity will be on the HF bands and 6 meters using CW, SSB, various digital modes, along with AM and FM on 10 meters. QSL to home call.

LUXEMBOURG, LX. Members of the Radio Club Leuven will be QRV as LX/OR5M in the CQ World Wide RTTY DX contest. QSL via ON4CP.

FINLAND, OH. Members of the Reila Beachboys will be QRV as OH2ET and celebrating their 10th anniversary by participating in the CQ World Wide DX RTTY Contest as a Multi-2 entry. QSL via operator's instructions.

ICELAND, TF. Mike, W2GEZ, will try to be QRV as TF3IRA the early part of October. Activity will be on all bands. QSL via operator's instructions. In addition, look for the Radio Foxes to be QRV as TF2R as a Multi/Single entry in the CQ World Wide RTTY DX contest. QSL via operators' instructions.

COTE d'IVOIRE, TU. Dimitri, F5SWB is QRV as TU5DF until October 20. Activity is on 40 to 10 meters using mostly CW with some SSB. QSL to home call.

BERMUDA, VP9. Operators K3GP, WW3S and ND8L are QRV as VP9/home calls until September 30. In addition, they will be QRV as VP9I in the CQ World Wide RTTY DX contest. QSL VP9I direct via WW3S and all others to home calls.

NEW ZEALAND, ZL. To commemorate the 90th anniversary of the first antipodal QSO between Shag Valley, New Zealand and London, England, special event station ZM90DX will be QRV from October 1, 2013 to October 31, 2014. Activity will be on all bands and modes. QSL via M0OXO. In addition, look for ZM1A to be a Multi-2/High Power entry in the CQ World Wide RTTY DX contest. QSL via operators' instructions.

CHANGE IN OPERATING SCHEDULE. As reported in DX news ARLD038, the TN2MS Congo operation is scheduled for October 12 to 24.

THIS WEEKEND ON THE RADIO. The ARRL EME Contest, CQ Worldwide RTTY DX Contest, NCCC RTTY Sprint Ladder, NCCC Sprint, AGCW VHF/UHF Contest and the Texas QSO Party are all on tap for his upcoming weekend. The 222 MHz Fall Sprint is scheduled for October 1. Please see September QST, page 79, October QST, page 89, and the ARRL and WA7BNM contest web sites for details.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1130
BID: $OPDX.1130
September 30, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, AA3B, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, W4DN, K5KG, WF5E, K8GI, K8YSE, W8GEX & 60m News, AT International, DJ7ZG, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, and the VHF-DX-Portal (MMMonVHF) for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX RTTY Contest announcements. Also, we wanted to provide the OPDX readers with a consolidated listing of the CQWW DX RTTY Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 20th-September, through Friday, 27th-September there were 230 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5N, 5R, 5T, 5U, 5W, 5X, 5Z, 6W, 6Y, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PZ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK9L, VK9N, VP2E, VP2V, VP6, VP8, VP8/h, VP9, VR, VU, XE, XU, XX9, XZ, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5B, CYPRUS. Tony, RT9T, will once again be active as 5B4ALB from Pachyammos (AS-004, MIA MCI-002, WLOTA 0051) between October 17th and November 4th. Activity will be on all bands and modes. QSL via RT9T direct only.

5R, MADAGASCAR. Eric, F6ICX, will once again be active as 5R8IC from Saint Marie Island (AF-090) between November 16th and December 15th. Activity will be holiday style operating CW, RTTY, and PSK63, and using a FT450 with 100 watts into various GPs or Inverted-Ls and a Hexbeam for 20-10 meters. There will be no online log during his activity. QSL via his home callsign (QRZ.com).

5V, TOGO. Wim, ON4CIT, will once again be active as 5V7TH from Togo (Grid Square JJ06rf) sometime in November and December. Activity will be on 40-6 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY. He plans to be on in the evening on 40 and 30 meters. Wim mentions that he will travel during the day to Benin to collect his TY1 callsign papers which is supposed to be ready. During that same day, he will try to search for a nice QTH in Grand Popo (Benin) for his TY1 DXpedition and move from Togo to Grand Popo, Benin, when everything is sorted out. QSL via his home callsign, direct (2 USDs/EU and 3 USDs/US), by the Bureau, LoTW (uploaded year later) or by the ClubLog's OQRS. For more details, visit: http://www.dxpedition.be/5V7TH.html

9Y, TRINIDAD AND TOBAGO. Jim, N6TJ, will be active as 9Y4W from Scarborough, Tobago Island (SA-009, WLOTA 0412), during the CQWW DX CW Contest (November 23-24th) as a Single-Op/Single-Band (20m) entry. QSL via DFL4MDO, direct or by the Bureau.

A2, BOTSWANA (Op Cancelled!). Donovan, ZS2DL, who was expected to lead a team of operators in April of 2014 to Botswana, has announced: "It is with tremendous disappointment, that we have had to cancel the A22D trip in April 2014. The main reason for this has been the breakdown of sponsorship from one of the main Japanese manufacturer of Radio equipment. These negotiations have been ongoing for nearly a year now, and business must be bad as we simply could not reach a workable solution. As a result we have no alternative but to cancel the A22D adventure. Please accept our most sincere apologies, but promise to be back from somewhere else soon, maybe even more sought after than A2."

A5, BHUTAN. Operators Junichi/JH3AEF, Ryo/JH7EQW and Jusei/JA3IVU will be active as A52AEF, A52EQW and A52IVU, respectively, from Dochula Pass between October 10-20th. Activity will be on 160-10 meters using CW, SSB and the Digital modes. QSL via their home callsigns.

AH0, MARIANA ISLANDS. Operators Jussi-Pekka/OH6RX and Esa/OH7WV will be active as AH0K from Northern Mariana Islands (OC-086) during both CQWW DX SSB (October 26-27th) and CQWW DX CW Contests (November 23-24th) as a Multi-2 entry. Activity outside the contest will be on the HF bands and possibly on the 6 meter band. QSL route TBA.

BV60, TAIWAN (Special Event). Members of the China Radio Association (CRA) will activate the special event callsign BV60V from Tainan between September 28th and December 31st. Activity is to celebrate the 60th anni-

versary of Victory Broadcasting Company. Operations will start during this coming weekend's CQWW DX RTTY Contest (September 28-29th) as a Multi-Multi entry. They also plan to operate between October 11-13th, from Lin Mo-Niang Park. Operators mentioned are Tang/BM2AAV, Eddie/BV2DD, Evan/BV2KS, Lee/BV2NT, Pro/BX4AN and Koshiro/JA3AQM. QSL route is available on QRZ.com or <http://www.cra.org.tw/amateur/qsl_en.aspx>.

C6, BAHAMAS. Rich, N0HJZ, will once again be active as C6ARW from Grand Bahama Island between October 22-29th. Activity will be on 30/17/12 meters this time using CW and RTTY. Operations will also include the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via his home callsign direct.

CE0Y, EASTER ISLAND (Update). Operators Jose/CE0HYO, Gustavo/CX2AM, Humberto/CX3AN, Gustavo/CX3CE, Mario/CX4CR, Gen/EA5HPX, Francisco/EA7FTR and Carlos/LU2NI will be active as XR0YY from Hanga Roa, Easter Island, between November 1-7th. Activity will be on 160-6 meters using CW, SSB and the Digital modes. They will have 3 stations operating simultaneously. QSL via EB7DX. They have a Web site available at: http://easterisland2013.com

CR3, MADEIRA. Members of the Madeira Contest Team will be active as CR3A during the CQWW DX RTTY Contest (September 28-29th) as a Multi-? entry. Operators mentioned are Joe/CT3BD, Luis/CT3DL, Joe/CT3DZ, Luis/CT3EE, Duarte/CT3EN, Jose/CT3IA, Tiago/CT3KU, Jose/CT3KY and Tony/CT1FFU. QSL via EA5GL or LoTW.

CR3/CT9, MADEIRA ISLANDS. The CR3L contest station in Santana on Madeira Island (AF-014) will be active during the CQWW DX RTTY Contest (September 28-29th) as a Multi-Multi entry. Operators mentioned are Juergen/DJ2VO, Walter/DJ6QT, Peter/DJ6XV, Hermann/DK1AQ, Tom/DL6TK, Kalle/DM3BJ, Han-J./DL1YFF and Andy/LX1DA. QSL CR3L via DJ6QT. Activity by operators, QSL via their home callsign. Visit the CR3L Santana, Madeira Island, Web page at: http://www.cq3l.de

CY0, SABLE ISLAND. Just a reminder that operators Gary/VE1RGB, Murray/WA4DAN and Rick/AI5P will be active as CY0P from Sable Island (NA-063, CISA NS004, WLOTA 0758, WWFF CYFF-001) between October 1-11th. Activity will be on all bands 160-10 meters using CW, SSB and RTTY. QSL via VE1RGB, direct or by the Bureau. For more information and updates, visit: http://www.cy0dxpedition.com

D4, CAPE VERDE. Operators Babs/DL7AFS and Lot/DJ7ZG will be active as D44TXT from the Island of Santiago (AF-005) between October 19th and Novvember 7th. Operations will be near Praia, the capital town, and from a rented private house. Lot informs OPDX that the license was very difficult to obtain, and took over 10 months to get it. Originally, the DXpedition was planned for the spring of 2013. Activity will be on 80-10 meters using RTTY, PSK63 and SSB. If they have a great opening on 6 meters, they will be on air. With their baggage being limited, they will have 2 stations: 2x Elecraft K2 with 2x 600W PA and 1x FT857 for 6m; Data Interface "IF one" from "Funkamateur Magazine" and data

programs -MixW and WinTest; Triple Leg antennas and dipoles. QSL via LoTW, direct or by the Bureau.

FR/TO2, REUNION ISLANDS. Stephane, F5UOW, will once again be active from Reunion Island (AF-016). He will sign as FR/F5UOW between October 31st and November 21st, but between November 3-17th, he will sign TO2R. His activity will be mostly CW between 40-10 meters. QSL via F5UOW, direct or by the Bureau.

FW, WALLIS AND FUTUNA ISLANDS. Jean-Jacques, TK5JJ, will leave Corsica for 2 years and travel to Wallis Island where he will be active as FW5JJ. He hopes to be active very soon after his arrival with an Icom 756PRO and G5RV antenna. The rest of his equipement will arrive later. He will be active on SSB, CW and the Digital modes on all HF bands, 6m and 2m EME. QSL via F5RXL.

IOTA NEWS.....
AF-018. Aldo, IK2ANI will be active as IH9/IK2ANI from Isola di Pantelleria (IIA TP-001, MIA MI-124, WLOTA 0041) between September 27th and October 1st. Activity will be holiday style on 30-6 meters using CW, SSB and RTTY. He will use 100 watts into a vertical antenna. Listen for QSL route.

AF-019. (Reminder/Update - Ops!) An international team of operators will be active as IG9Y from Lampedusa Island between October 17-30th. Operators mentioned currently are Gabor/HA1YA, Don/JH5GHM, Boyko/LZ1QN, Dale/N3BNA, Frederic/ON4LG, Aurelio/PC5A, Rob/PE1ITR, Vlad/RC0F, Silvo/S50X, Romeo/S52RU, Renato/S57UN, Slavc/S57DX, Drago/S59A and Konstantin/VE3LA. Activity will be on 160-6 meters using CW, SSB, and RTTY, with four stations on the air. The team will be in the CQWW DX SSB Contest (October 26-27th) as a Multi-2 entry. QSL via ON4LG. An OQRS will be available for direct and Bureau cards. Visit their Web page at: http://ig9.ii9p.com

AS-100. Operators Yuli/4X6HP, Vlad/4Z5IW and Ros/4Z5LA will be active as homecall/p, weather permitting, from Akhziv Island between October 18-19th. Activity will be on the HF bands. QSL via their callsigns.

EU-025. Members of the Arcibessi DX & Contest Group will be active as IQ9UI from Sicily Island during the CQWW DX RTTY Contest (September 28-29th) and CQWW DX SSB Contest (October 27-28th) as a Multi-Multi entry (for the first time!). QSL via IT9CHU or LoTW. Operators mentioned are Antonello/IT9EQO, Carmelo/IT9AUG, Fabio/IT9GSF, Marcello/IT9CJC, Vincenzo/IT9CHU, Giuseppe/IT9HBT, Carlo/IK1HJS, Andrea/IV3SKB, Flavio/IV3TMV and Domenico/IW9GTD. Special guests are Luis/IV3PRK and Peter/IV3YYK for support on the low bands. Visit the II9P Web page at: http://ii9p.com

EU-054. Operators Raffaello/IT9ATF, Renato/IT9NPR, Pippo/IT9PPG and Antonino/IT9RDG will be active as IF9A from Favignana Island

(IIA TP-011, MIA MI-025, WLOTA LH-1545) for the CQWW DX SSB Contest as (October 26-27th) as a Multi-Single entry. Activity will be on all bands and modes outside of the contest. QSL via IT9ATF, direct or by the Bureau.

EU-057. Operators Friedrich/DL4BBH, Matthias/DK7LV, Klaus/DL7UXG, Henning/DB5BZ, Peter/DJ4RU and Ric/DL2VFR will be active as DM50IOTA from Hiddensee Island (DID O-005, WLOTA 2371) between September 28th and October 4th. Activity will be on all HF bands using CW, SSB and RTTY. QSL via DL2VFR, by the Bureau or direct. For more details and updates, visit the QRZ.com Web site or: http://www.iota-expedition.com
ADDED NOTES: This is one of many German Island groups activated by DM50IOTA during the 50th IOTA Marathon. DM50IOTA will activate all German IOTAs during that time. If you have worked DM50IOTA from all German IOTAs by the end of 2013, you can apply for a special award. Also, this activation will also count for the Vorpommern Lagoon Area National Park WWFF (WorldWide Flora Fauna) reference DLFF-014. It also counts for the lighthouse Dornbusch (DLTD_GLHA #17, ARLHS FED-026, WLOTA 2371).

NA-060. Dan, HR2DMR, is planning to visit Tigre Island and hopes to be active as HQ4W (appending) between October 17-20th. His operating time on the island may be restricted due to the Honduran Navy exercises. Operations will be on the HF bands using CW and SSB. QSL via KD4POJ.

NA-130. Mike, VE2XB, had to cancel his VY0BRR operation to Broughton (Qikiqtarjuaq) Island, Nunavut, between September 23-27th.

ISWL CALLSIGNS (For October). The following ISWL club callsigns will be used throughout the month of October 2013:

GX4BJC/A & GX4BJC/P - Operated from Walton on the Naze, in Essex, by Herbie - G6XOU. (ISWL Council Member & QSL Bureau Manager) (The /A WAB Square = TM22 - England & IOTA = EU-005 & WLOTA = LH-1841); (If required, the GX4BJC/P WAB details will be given during QSOs).

MX1SWL/A - Operated /A from Hartford, in Cambridgeshire, by Tom, G3RPV. (/A WAB Square = TL27 - England, IOTA = EU-005 & WLOTA = LH-1841).

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual operator. The I.S.W.L. is a member of the European PSK Club. All QSL info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>. NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see <www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for their awards.

J7, DOMINICA. Operators Charlie/K1XX, George/K5KG, Jim/WI9WI and Gus/VO1MP will be active as J79XX, J75KG, J79WI and J79MP, respectively, from

Dominica (NA-101) between November 16-25th. The group plans to also be in the CQWW DX CW Contest (November 23-24th) signing J7A as a Multi-2 entry. QSL J75KG via K5KG, J79XX via K1XX, J79WI via WI9WI, J79MP via VO1MP and J7A via NX4N.

KH9, WAKE ISLAND (Press Release #5). Joe, W8GEX, sent out the following press release on September 24th [edited]: "The Wake Atoll commemorative team is in the final phase of preparation. All equipment has been received in Hawaii and will be transported to Hickam AFB for delivery to Wake Island. Thanks, Kimo, KH7U for your invaluable assistance!
The plan is for the team to assemble in Hawaii on or before 3rd October, depart 4th October and arrive on 5th October. The following day will be dedicated to station set-up.
There will be two CW and two SSB stations on the air. The CW site will be located across from the Arrivals terminal and the SSB site will be housed in a 'beach house' near downtown Wake.
We are planning on being QRV 7th October through 18th October (Wake time). If there are any changes, they will be posted on our website. <http://wake2013.org/pages/bandplan.html> Logs will be uploaded to ClubLog as time and internet access allows.
This is a commemorative DXpedition. Our prime objective is to honor the lives and contributions of the Forgotten 98 civilian contractors who lost their lives on Wake during WWII. Some of these men have yet to be identified and are interred in Honolulu. If you know any of the Forgotten 98 or their relatives, modern DNA testing may identify their remains and provide for a proper burial. Please take a moment to look through their names. <http://wake2013.org/pages/forgotten98.html>
The team wants to thank the DX community, including generous worldwide Foundations, Clubs, Individuals, Equipment manufacturers and outlets for their outstanding support of the Wake commemorative efforts. These DXpeditions are extremely expensive and could not be accomplished without the support of the entire DX community. Visit the <http://wake2013.org> website to view our sponsors and make your personal donation.
Please note! A few other DXpeditions will be on the air during the Wake operation. To avoid the dreaded 'not in the log', please be sure which DXpedition you are working! Our operators will announce the K9W callsign often to help identify your contact.
Please check our website frequently for updates. <http:/wake2013.org/>
And don't forget to sign our guestbook!
73, K9W Wake Atoll Management Team"

ADDED NOTE FROM W8GEX TO THE 60 METERS GANG: "As you may know, I am part of the K9W Wake Island team. Our plans are to leave Hawaii on Oct. 5 for Wake. If all goes well, we will be QRV late on the 6th. After we get into our routine, I'll send an email to let you know my 60m operating times. I am planning to listen for Europe around 0430z at their sunrise as well as South America, then the East coast of North America about 1000z.
I'll be using an IC-706 into an inverted vee. After we get K9W set up and we have our operating schedules working, I'll start setting up my 60m station. I am a phone operator and will be on 5.403.5 unless QRN, and then I'll go to 5.371.5.

I might be able to get one on the team CW ops to get on as well. As always give your call many times so we can pull it through. Give your call many times because with the distance and low power and high QRN, it's hard to pick these calls out..... Joe W8GEX, K9W team member"

KP2, U.S. VIRGIN ISLANDS. Operators Philip/KT3Y, Frederick/K9VV and Robert/WP2XX will once again be active from the KP2M rental shack on St. Croix Island (NA-106) during the CQWW DX CW Contest (November 23-24th) as a Multi-Single entry. QSL via AI4U (DIRECT ONLY) OR LoTW. NO BUREAU QSLs.

P4, ARUBA (Correction/Update). Valery, R5GA, will once again be active as P4/R5GA from Aruba (SA-036, WLOTA 0033) between November 16-26th. Activity will be on CW mainly on 160-10 meters, especially on the 30/17/12 meters. His activity will also include the CQWW DX CW Contest (November 23-24th) [not the CQWW DX SSB Contest] as a Single-Op/All-Band entry using the contest callsign P40F. QSL via UA3DX. QSL P4/R5GA via R5GA, direct, by the Bureau or LoTW.

PJ4, BONAIRE. Operators Paul/K1XM, John/K4BAI, Jeff/KU8E, Martin/W1MD and Dennis/W1UE will be active as PJ4A from the "PJ4G Radio House" on Bonaire (SA-006, WLOTA LH-1279) during CQWW DX CW Contest (November 23-24th) as a Multi-2 entry. The team will be on the island between November 18-26th. Outside the contest, operators will be active as PJ4/homecall. QSL PJ4A, PJ4/K4BAI and PJ4/KU8E via K4BAI. QSL PJ4/K1XM, PJ4/W1MD and PJ4/W1UE via their home callsigns. Check out the "PJ4G Radio House" at: http://www.pj4g.com

3B7RF & 3B6RF LOGS NOW ON LoTW. George, K5KG, reports: "I am pleased to announce that the logs from 3B7RF (1998 St. Brandon, 53K QSOs) and 3B6RF (2001 Agalega, 61K QSOs) have finally been uploaded to Logbook of The World. It has taken many years to get this done, and thanks goes to Karl, HB9JAI/4X1DF, Hanspeter, HB9BXE, and Kurt, HB9AFI, for making it happen."

WF5E DX QSL SERVICE (Closing). Les, WF5E, informed OPDX that after 20 years he will be retiring his service at end of October due to health problems. All incoming QSLs after that date will be forwarded to his clients. See: http://www.qsl.net/wf5e
However, Jim, K3FN, will be taking over his service, but under a new name - Airmail Postage QSL Service. Look for Jim to start promoting the service immediately. His E-mail address is <k3fn@...> and his Web site can be virwed at: http://www.airmailpostage.com

T32, EAST KIRIBATI (Update/Callsign). It has been announced: "In honor of the Russian Robinson Club's twentieth anniversary, a callsign of T32RRC was requested for this DXpedition. As of September 9, 2013, our team was advised that the originally confirmed callsign (T32RRC) is not available. On September 24, 2013, the Communications Commission of The Republic of Kiribati advised Dean - KW7XX that they will issue T32RC for our DXpedition group. As of September 25, 2013, the T32RC license has been issued and is in our possession. We will be using T32RC for the expedition." Also announced are the operators of this DXpedition. Operators mentioned at this time are Tim/NL8F, Dick/N7RO, Dean/KW7XX, David/AH6HY and Paula/NX1P. More details and updates, visit: http://www.t32-2013.com

T33, BANABA ISLAND (Update). The T33A DXpedition to Banaba Island (OC-018), which will be active between November 5-18th, announced on their Web page: "The drums of gasoline needed for our generating capacity have arrived on Banaba. KOIL, the Kiribati Oil Company Limited, has a rep on the island and our provision is under his watch to make sure our dxpedition has the fuel we need for sustained operation." Also, the DXpedition now has a

Blog page: http://banaba2013.wordpress.com
For more details about the DXpedition, visit the T33A Web page at:
http://www.t33a.com/index.htm

TO3/FM, MARTINIQUE. Operators Tatsuo/JA3ARJ and Kunio/JA1CJA will be active as TO3JA (appending) from Martinique (NA-107) between January 13-19th, 2014. If they can not get TO3JA, they may sign FM/homecall. Look for more details to be forthcoming.

TU2, COTE D'LVOIRE. Dimitri, F5SWB, who will be active as TU5DF til October 20th, has put more than 8000 QSOs in his log and hopes to have 12000 QSOs before he leaves. His activity has been on 40-10 meters on CW with some on SSB. QSL via F5SWB.

V2, ANTIGUA. Bud, AA3B, will once again be active as V26K from Antigua (NA-100) between November 21-25th. Activity will include the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band/Low-Power entry. Outside of the contest, activity will be all CW on the HF bands only. QSL via AA3B.

V2, ANTIGUA AND BARBUDA. Kei, KG2A/JJ1RJR will once again be active as V25A from Antigua (NA-100) between November 21st and December 1st. Activity will be on 160-10 meters, including the 30/17/12 meter bands, and using CW and SSB. He will also be in the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Bnand entry. QSL direct only with SASE to KG2A. PLEASE NOTE: Kei informs OPDX that his callsign V25A is a reissued callsign. QSL ONLY TO KG2A and not to W9NJB listed on QRZ.com.

VK9M, MELLISH REEF (Press Release #2 from the VK9MT Web Site): "Planning continues for the previously announced Mellish Reef DX-pedition scheduled for late March ☐ early April, 2014. Landing Authority: Australia's 'Commonwealth Marine Reserve Operations Department' reviewed our DX-pedition project plan and requires that we follow their documented environmental protection regulations. Effective July 1, 2014, Mellish Reef becomes part of Australia's new Coral Sea Marine Reserve proposal which implements additional restrictions to further protect the area's ecology; we appreciate the Australian government's cooperation and spirit of partnership in making this DX-pedition possible."

The VK9MT Web site lists the following suggested frequencies:
CW - 1826.5, 3523, 7023, 10103, 14023, 18079, 21023, 24894 and 28023 kHz
SSB - 3790, 7082, 14145, 18140, 21295, 24955 and 28495 kHz
RTTY - 7035, 10142, 18099, 21080, 24912 and 28080 kHz

QSL Manager is M0URX. An OQRS will be available for direct and Bureau QSLs. LoTW upload will be done at the earliest opportunity. There will be NO eQSL. For more details on QSL info, see their Web page. For more details and updates, visit the VK9MT Web page at: http://www.vk9mt.com

VP9, BERMUDA. Les, N1SV, will once again be active as VP9I from Ed/VP9GE's QTH for the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL VP9I via WW3S. Outside of the contest, look for him to be active as VP9/N1SV starting October 23rd. QSL via his

home callsign.

XT, BURKINA FASO. Harald, DF2WO, will be active as XT2AW from Ouagadougou between the last week of January and the end February 2014. Activity will be holiday style on CW and SSB. QSL via M0OXO.

XV, VIETNAM. Take, JA6CNH, will be active as XV2CNH from Ho Chi Minh City between November 1-9th. Activity will be on 160-6 meters using CW, SSB and the Digital modes. QSL via JA6CNH direct only.

XW, LAOS. "The Daily DX" reports that Bruce, AA4XR (3W3B, HS0ZCY), will be returning to his home in Laos to do some antenna work and be active as XW4XR between September 30th and October 9th. Activity is usually on CW and RTTY. QSL via E21EIC.

ZL, NEW ZEALAND. Members of the Quake Contesters Group will be active as ZL3X during the CQWW DX RTTY Contest (September 28-29th) as a Multi-2/ High-Power entry. QSL via ZL3PAH or LoTW. Operators mentioned are Mark/ ZL3AB, Andrew/ZL3CC, Byron/ZL3DXT, Geoff/ZL3GA, Graeme/ZL3GK, Chris/ZL3LF and Phil/ZL3PAH.

The following stations are expected to be active in the
CQ World Wide DX RTTY Contest (September 28-29th, 2013)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2013 CQWW DX RTTY Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

4X - Look for 4X6HP/p, 4Z5IW/p and 4Z5LA/p to be active from Akhziv Island (AS-100) on 18-19 October. QSL via home calls. [TNX DX world]
5R - Once again Eric, F6ICX will be active as 5R8IC from Sainte-Marie Island (AF-090) from 16 November to 15 December. He will operate mainly CW, with some RTTY, BPSK and SSB, on 40-10 metres. QSL via home call, direct or bureau, and LoTW. Logsearch and OQRS on Club Log.
8R - Alex, W1CDC will be active as 8R1A from Guyana from 13 October to 1 November. He will operate holiday style with an emphasis on 80, 30, 17, 12 and 6 metres CW. QSL via W1CDC, direct or bureau. [TNX The Daily DX]
6W - Once again Luc, F5RAV will be active as 6V7T from Le Calao, Senegal on 8-17 October. He will operate PSK and SSB on 40-10 metres. On 11-14 October he and 6W7RV will operate as 6V7T/p to N'gor Island (AF-045). QSL via F5RAV, direct only. [TNX F8REF]
9A - Sergio, IZ3NXC will be active as 9A8NXC from Krk Island (EU-136) on 28-29 September. He will operate SSB and RTTY on 40, 20 and 15 metres. QSL via IK3GES. Logsearch and OQRS on Club Log. [TNX DX Coffee]
A5 - JA3IVU (A52IVU), JH3AEF (A52AEF) and JH7EQW (A52EQW) will be active from Dochula, Bhutan on 10-20 October. They are part of a medical volunteer team, and in their spare time will be QRV on the HF bands SSB, digital modes and some CW. QSL via home calls, direct or bureau. [TNX The Daily DX]
C6 - Rich, N0HJZ will be active as C6ARW from Grand Bahama (NA-080) on 22-29 October, including full time participation in the CQ WW DX SSB Contest. Outside the contest he will be QRV on 30, 17 and 12 metres, as well on CW and RTTY on other bands. QSL via N0HJZ, direct or bureau. [TNX N0HJZ]
CE0Y - CX2AM, CX2FR, CX3AN, CX3CE, CX4AAJ, CX4CR, CX8FB, CE0YHO, EA5HPX, EA7FTR and LU2NI will be active as XR0YY from Easter Island (SA-001) on 1-7 November. They plan to have three stations active on 160-6 metres CW, SSB and digital modes. QSL via EB7DX. Further information can be found at http://easterisland2013.com
CY0 - Rick AI5P is joining Gary VE1RGB and Murray WA4DAN for the CY0P

DXpedition (www.cy0dxpedition) to Sable Island (NA-063), which is
still scheduled for 1-11 October [425DXN 1143]. They will operate
CW, SSB and RTTY on 160-10 metres. QSL via VE1RGB, direct only.
"To save aircraft weight, logging will be on paper", he says, "and
therefore will not be uploaded to LoTW, Club Log or eQSL.
D4 - Babs, DL7AFS and Lot, DJ7ZG (www.qsl.net/dl7afs (http://www.qsl.net/dl7afs)) will be
active as
D44TXT from Ilha de Sao Tiago (AF-005) from 19 October to 7
November. They will be QRV on 80-10 metres SSB, RTTY, PSK31 and
PSK63. QSL via DL7AFS, direct or bureau.
FH - Target frequencies for the 3-17 October TO2TT expedition to
Mayotte (AF-027) [425DXN 1155] are:
CW 1835 3535 7031 10118 14035 18068 21035 24900 28035 50102
SSB - 3780 7103 - 14260 18155 21310 24975 28420 50123
RTTY - - - - 14087 - - - - -
QSL via I2YSB (direct), IK2CIO (bureau) and LoTW. Further details,
including real-time logsearch, QSLling details and OQRS for direct
cards, can be found at www.i2ysb.com/idt (http://www.i2ysb.com/idt). The pilot stations
will
be IK7JWY and (for 6m) IK0FTA; there will be a dedicated forum on
www.hamradioweb.org (http://www.hamradioweb.org).
FM - Thierry, F4BDG will be active as TO4FM from Martinique (NA-107) on
5-20 October. QSL via EA5GL, plus LoTW and eQSL.
FR - Stephane, F5UOW will be active from Reunion Island (AF-016) in
October-November. He will be signing FR/F5UOW on 31 October-2
November and again on 18-21 November, while on 3-17 November he
will use TO2R. He expects to operate mainly CW on 40-10 metres.
QSL via F5UOW, direct or bureau. [TNX Les Nouvelles DX]
FW - Jean-Jacques, TK5JJ will spend two years on Wallis Island (OC-054)
and will be active as FW5JJ on the HF bands, as well as on 6
metres and 2m EME. QSL via F5RXL, direct or bureau, and LoTW. [TNX
The Daily DX]
GU - A team from the Martello Tower Group (namely 2E0DBY, G0MBA, G6NHU,
G7HJK, M0GWE, M0YNK and M1EAK) will be active as GP0PKT from Herm
Island (EU-114) on 4-8 October. They will run three stations on
80-10 metres SSB and digital modes. QSL via G6NHU, direct or
bureau, and LoTW. Logsearch and further information at
http://martellotowergroup. com/gp0pkt/ (http://martellotowergroup.com/gp0pkt/)
HR - Dan HR2DMR plans to visit and operate CW and SSB as HQ4W from
Tigre Island (NA-060) on 17-20 October. "Operating time on the
island could be restricted, due to Honduran Navy exercises". QSL
via KD4POJ. [TNX DX World]
I - Alex IK8YFU, Domenico IW8RAO, Salvatore IZ8CZR, Maurizio IZ8SJA
and Nicola IZ8SKO will be active as ID9Y from Salina Island
(EU-017) on 3-6 October. QSL via IK8YFU (direct) or HB9FHZ
(bureau), LoTW and eQSL. Further information and logsearch on
www.calabriadxteam.it/salina/ (http://www.calabriadxteam.it/salina/)
I - Alessandro, IZ4AMS will be active as IZ4AMS/p from the island of
Tinetto (EU-083) on 12 October. He will operate QRP on 20 metres
SSB. QSL via home call, direct or bureau (OQRS on Club Log). [TNX

rsgbiota.org (http://rsgbiota.org)]
J8 - Gerd, DL7VOG will be active as J87GU from Union Island (NA-025) on 7-27 November, including entries in the WAE DX RTTY (9-10 November) and CQ WW DX CW contests. He will be QRV on 160-6 metres mainly CW and RTTY. QSL via home call, bureau preferred (OQRS on Club Log).
KH0 - Kazuo, JH8PHT will be active as AH0KT from Saipan (OC-086) on 3-7 October. He will operate digital modes, SSB and CW on the HF bands and 6 metres, and will also be QRV on 10 metres AM and FM (29600 kHz). QSL via JH8PHT and LoTW.
KH9 - Target frequencies for the K9W DXpedition to Wake Atoll [425DXN 1165] are:
CW 1826.5 3523 7023 10103 14023 18079 21023 24894 28023
SSB - 3790 7082 - 14185 18140 21285 24955 28485
RTTY - 3580 7035 10142 14080 18099 21080 24912 28080
Frequencies for 60m are 5405 (CW) and 5403.5 (SSB), while on 6m K9W will use 50107 (CW and SSB).
The team expects to depart Hawaii on 4 October and arrive on the 5th. The following day will be dedicated to station set-up. Plans are to be QRV with two CW and two SSB stations from 7 through 18 October (Wake time) and to upload logs to Club Log as time and Internet access allow.
An OQRS for direct an bureau cards will be activated on Club Log after the DXpedition ends. Traditional requests should be sent direct to Wake Island DXpedition, P.O. Box 5005, Lake Wylie SC 29710, USA, or via bureau to AA4NN. Logs will be uploaded to LoTW six months after the conclusion of the DXpedition. Bookmark www.wake2013.org (http://www.wake2013.org) for further information and updates. [TNX W8GEX]
KL7 - Operators from the KL7 NWR Amateur Radio Club and Moosehorn ARC celebrate National Wildlife Refuge Week and will be active as KL7NWR on 5 October. Activity will be on 15 and 20 metres SSB with some CW. QSL via KL2HD. [TNX KL2HD]
PJ4 - Look for PJ4/K1XM, PJ4/K4BAI, PJ4/KU8E, PJ4/W1MD and PJ4/W1UE to be active from Bonaire (SA-006) on 18-26 November. They will participate in the CQ WW DX CW Contest as PJ4A. QSL PJ4/K4BAI, PJ4/KU8E and PJ4A via K4BAI, others via home call. [TNX NG3K]
TA - Celebrating the 90th anniversary of the Republic of Turkey, the TCSWAT (TC Special Wireless Activity Team) will be active on all bands and modes as TC90TC on 14-31 October. They also plan to participate in the CQ WW DX SSB Contest as a Multi-Multi entry. QSL via TA1HZ (as usual with TCSWAT operations, all of the QSOs will be confirmed automatically via the bureau). [TNX TA1HZ]
V2 - Bud, AA3B will be active as V26K from Antigua (NA-100) on 21-25 November, including an entry in the CQ WW DX CW Contest. This will be an all CW operation on the contest HF bands only. QSL via home call. [TNX AA3B]
VE - Mike, VY0BRR reports that his 23-27 September activity from Broughton Island (NA-130) [425DXN 1167] has been postponed to sometime in October. Keep an eye on http://vy0brr.jimdo.com/

VE - Robert, VE3RHE will use special callsign VX31763 from 6 October to
5 November for the 250th anniversary of the Royal Proclamation of
1763. QSL via home call, direct or bureau, and LoTW.
VK - The Hills Amateur Radio Group will be active as VI6WA100 from 1
October to 31 December to celebrate the centenary of organized
amateur radio in Western Australia. QSL via VK6IR (OQRS for direct
and bureau requests on http://www.ham-radio.biz/qsl- instructions/
(http://www.ham-radio.biz/qsl-instructions/))
W - Jacek, SP5APW plans to be active holiday style as W4/SP5APW from
five IOTA groups between 13 and 22 October as follows:
13 October Talbot NA-138
14-15 October Jekyll NA-058
16-17 October Okaloosa NA-142
17-18 October St. George NA-085
20-22 October Cedar Key NA-076
He will operate SSB on 20, 15 and 10 metres, and he might also give
digital modes a try on 40 metres. QSL via home call, direct or
bureau. See http://na-142.blogspot.com/ for possible updates.
XE - Special event station XE3FMRE will be active on 2-7 October during
the Federacion Mexicana de Radioexperimentadores' national
convention to be held in Cancun. Activity will be on 80-6 metres
SSB, CW, RTTY, PSK31 and probably WSJT. QSL via XE3RCC.
XV - Mike, N0ODK will be active as XV4MN from Phu Quoc Island (AS-128)
on 24-29 October, including an entry in the CQ WW DX SSB Contest.
On 17-23 October and again on 30 October-2 November he will be QRV
as 3W2DK from mainland Vietnam. He will be QRV on 20, 17, 15 and
10 metres. QSL via N0ODK, direct or bureau (Mike is a QSL card
collector, so if you work him and don't need his card, send one
anyway). [TNX N0ODK]

PACIFIC TOUR ---> Hrane YT1AD (N9YU), Dragos YU1AKV, Vasiliy RW4NW, Sergey
RZ3FW (N7AFW) and David WD5COV will visit Hawaii, Samoa, American Samoa,
Fiji and Rotuma between mid November and early December. This will be a
reconnaissance trip in preparation for a future DXpedition.
13-15 November Hawaii KH6/N9YU, KH6/WD5COV, KH6/N7AFW
16-17 November Samoa 5W7A or 5W6A, 5W0OV, 5W0FW, 5W0NW
18-19 November Am. Samoa KH8/N9YU, KH8/WD5COV, KH8/N7AFW
20-22 November Fiji 3D2AD, 3D2OV, 3D2FW, 3D2NW
22-29 November Rotuma 3D2R
29 November-4 December Fiji 3D2AD, 3D2OV, 3D2FW, 3D2NW
Activity from Rotuma will include a m/S or M/2 emtry in the CQ WW DX CW
Contest. QSL via YT1AD (for 3D2AD, 3D2R, 5W7A or 5W6A, KH6/N9YU and
KH8/N9YU), via WD5COV (for 3D2OV, 5W0OV, KH6/WD5COV and KH8/WD5COV), via
RZ3FW (for 3D2FW, 5W0FW, KH6/N7AFW and KH8/N7AFW), via RW4NW (for 3D2NW and
5W0NW). [TNX YT3W]

CQ WW RTTY DX CONTEST ---> This year's event will run from 00.00 UTC on 28
September through 24.00 UTC on the 29th (rules at www.cqwwrtty.com
(http://www.cqwwrtty.com)). Please
Visit www.ng3k.com/Misc/cqrz2013. html (http://www.ng3k.com/Misc/cqrz2013.html) for the
Announced Operations listing

maintained by Bill NG3K. The following stations are expected to participate:

K3FN CUSTOM QSL SERVICE ---> The DX QSL Service run by Les Bannon, WF5E will suspend operations on 31 October [425DXN 1168]. Effective 1 November, it will be taken over by Jim Mackey, K3FN under the new name of "The K3FN Custom QSL Service". Look for the details to be published on www.airmailpostage.com/ qslservice.html (http://www.airmailpostage.com/qslservice.html) in the coming weeks. [TNX QRZ DX]

MELLISH REEF 2014 ---> After their successful operation from Campbell Island in December 2012, members of the ZL9HR team and additional operators have announced their intention to be active from Mellish Reef (requested callsign VK9MT) between late March and early April 2014. Plans are for a multi-national team to be QRV for 12 days, using six stations with linear amplifiers and vertical antennas. Currently signed up for the project are

Pista HA5AO, George HA5UK, Dave K3EL, Gene K5GS, Glenn KE4KY, Luke VK3HJ and Les W2LK. QSL via M0URX. The organizers estimate a budget in the range of USD 110,000. "We will exercise full financial transparency in all aspects of the project", they say, "When the books are closed, clubs and foundations that supported the project will receive a financial accounting". Bookmark http://vk9mt.com/ for further information, updates and donations. [TNX K5GS]

T33A BLOG ---> This is the place to be for up to the minute news regarding the 5-18 November T33A DXpedition to Banaba Island [425DXN 1153]. "We will post information before, during and after the actual DXpedition radio operations", the team says,. "It will be as 'live' as possible". Bookmark http://banaba2013.wordpress. com/ (http://banaba2013.wordpress.com/) as "you will not see any fresher news and
information than what you will see here".

WRTC2014 ---> WRTC2014, Inc., host of the 2014 World Radiosport Team Championship (www.wrtc2014.org (http://www.wrtc2014.org)), is proud to announce the operators that
have been invited to form teams for the competition to be held in July 2014. In addition to the 51 Team Leaders who emerged from the qualifying process, the announcement includes two Wild Card selections, a Youth team, and the defending champion from WRTC2010:

Area	Team Leader	Name
AF	3V/KF5EYY	Achraf Chaabane
AS1	R9DX	Vadim Ovsyannikov
AS2	RC9O	Anatoly Polevik
AS3	5B4WN	Marios Nicolaou
AS4	BA4ALC	Jie Zheng
AS5	JH5GHM	Katsuhiro "Don" Kondou

SA2 CX6VM Jorge Diez
WILD LZ4AX Alexander Avramov
WILD DK6XZ Suad Zukic
YOUTH IZ1LBG Filippo Vairo
CHAMP RW1A Vladimir Aksenov
Each Team Leader will select one Team Mate for the competition. Team Leaders must accept their invitation to WRTC2014 and nominate their Team Mate by October 15, 2013. If a Team Leader is unable to accept, the invitation will go to the next highest qualifying applicant from the selection area.
Once all of the Team Leader invitations are accepted, there will only be one other way to gain entrance to the WRTC2014 competition - through a Team Sponsorship. A Team Sponsor donation earns the right to select a team. Only two Team Sponsorships are currently available. Contact Doug, K1DG (k1dg[@]wrtc2014.org (http://wrtc2014.org)) or Randy, K5ZD (k5zd[@]wrtc2014.org (http://wrtc2014.org)) for details.
Sponsored Teams will be announced at a later date.

21680. Ohio/Penn DX Special Bulletin #1130.1

Yahoo group: DX-IS (2013)
Date: 2013-09-27 20:05:35 UTC
From: Tedd Mirgliotta (KB8NW)
Topic: 21680 Message: 21680

SB DX @ WW < KB8NW $OPDX.1130.1
Ohio/Penn DX Special Bulletin No. 1130.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1130.1
BID: $OPDX.1130.1
September 27, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, IK8YFU, VE1RGB and WA4DAN for the following DX information.

CY0, SABLE ISLAND (Update/Dates). The following was posted September 26th [edited]: "As of today, 26th September, a potential 'show-stopper' regarding total DXpedition costs nearly halted the group in its tracks, one of them (Murray) being at the top of a 2,000 foot tower at the time. Fortunately, through the cooperation of a couple of Canadian government agencies (Environment Canada and Parks Canada), a very suitable arrangement was been made that resolved the financial barriers to going to Sable on 30th September. The only change to the trip now is its duration. Rather than returning on 11th October, for a number of safety (wx) and cost consider-ations, the return date will be on either 7th, 8th, or 9th October.
All required gear has been mustered except for the personal hand luggage that Murray and Rick, who are making their ways separately from NC and NM, respectively, will be bringing. Early weight estimates show us to be roughly 50-75 pounds below the 1,400 pound safety limit.
All freight for the Britten-Norman-Island will be transported to the departure point by Rick and me, weighed, then loaded on the aircraft on Sunday night in time for an early departure on Monday morning.
Operation will be on 160M ☐ 10M on CW and SSB. Unfortunately, due to equipment limitations, there will be no RTTY operation.
On a lighter note, Rick, AI5P, was making threatening noises about staying home if I could not locate Dr. Pepper soda for him to have on Sable. The XYL here, Bev, finally found a case on sale for $3 and change, a near give-away because Canadians won☐t drink the wretched stuff.
A note only to small station owners (little pistols). Please do not ignore trying to work us just because propagation conditions seem to provide discouraging numbers. We conducted a ☐test☐ with a station nearly identical to one of the ones going to CY0P, using 100 CW and wires, during a ten-day period in September. We chose the calendar period that represented what we should see 27 days later in October on Sable. Playing in the CQ Marathon competition but being only moderately active, the test station

worked 45 countries in 24 CQ Zones. Contacts were made from Halifax to all points of the globe. The largest quantity and most impressive contacts were on 17M and included ASIA, and PAC. Since listening conditions should be better on CY0 in all respects than where the test was conducted, this empirical data suggests that if you can hear us, then you should try to work CY0P no matter how weak you think your signal may be. One of the CY0P CW operators is a small-station operator himself and has a distinct fondness for his 100W and wire counterparts elsewhere in the world, and he will try very hard to work the deserving typical small-time operator with limited station resources. He also likes the QRP copy challenge.
Our long wait and much planning is almost over. Wish us good weather and safety in our flight from the mainland of Canada to Sable Island. If all goes well, we should be QRV, late Monday in the early evening.
73, Gary, VE1RGB"

IOTA NEWS (Update). Members of the Calabria DX Team will be active as ID9Y from Salina Island (IIA E-015, MIA MI-083, WLOTA 1005, WWFF IFF-677), Eolie Islands (EU-017), between October 3-6th. They will also activate the following lighthouses: Capo Faro (WAIL SI-035, ARLHS ITA-020, WW Loc. JM78KN) and Punta Lingua (WAIL SI-040, ARLHS ITA-250, WW Loc. JM78KM). Activity will be on all HF bands, plus 6 and 2 meters. Operators mentioned are Alex/IK8YFU, Domenico/IW8RAO, Sal/IZ8CZR, Maurizio/IZ8JSJA and Nicola/IZ8SKO. QSL via IK8YFI direct. QSL via the Bureau to HB9FHZ. Also, QSL via LoTW or eQSL. Visit their Web page at:

21682. ARLP039 Propagation de K7RA

Yahoo group: DX-IS (2013)
Date: 2013-09-27 21:28:16 UTC
From: jjreisert@...
Topic: 6355 Message: 21682

SB PROP @ ARL $ARLP039
ARLP039 Propagation de K7RA

ZCZC AP39
QST de W1AW
Propagation Forecast Bulletin 39 ARLP039
>From Tad Cook, K7RA
Seattle, WA September 27, 2013
To all radio amateurs

SB PROP ARL ARLP039
ARLP039 Propagation de K7RA

Our sun is still very quiet, but solar flux and sunspot numbers were higher this week than last. Average daily sunspot numbers rose from 42.3 to 75.6, and average daily solar flux rose from 95.3 to 109.6. There were no big geomagnetic events this week.

Predicted solar flux is 110 on September 27 through October 2, then 105, 100, 95, 100, 105 and 100 on October 3-8, 95 on October 9-10, then 100, 105 and 100 on October 11-13, 95 on October 14-15, and all the way down to 90 on October 16-19.

Predicted planetary A index is 5 on September 27-28, then 8, 10, 12 and 8 on September 29 through October 2, 5 on October 3-9, 8 on October 10-11, 5 on October 12-13, then 8, 10 and 8 on October 14-16, and 5 on October 17-19. This is unchanged from the forecast in Thursday's ARRL Letter.

F.K. Janda, OK1HH of the Czech Propagation Interest Group predicts active to disturbed conditions September 27, quiet to active September 28, mostly quiet September 29, quiet on September 30, quiet to active October 1, quiet October 2-5, quiet to unsettled October 6-7, mostly quiet October 8, back to active to disturbed conditions October 9, as it was on the first day of this forecast.

David Moore, a shortwave listener in Moro Bay, California is a frequent contributor here, and sends a New York Times article titled "The Sun That Did Not Roar", about our current quiet sun. In reference to a weak solar event last week, it characterized a CME as what "seemed like the halfhearted effort of a slacker star." See it at http://nyti.ms/1fd48GT .

But 160 meter operators are not despairing a dearth of solar activity to come, as more solar activity correlates with higher geomagnetic activity, and they like things nice and quiet.

Often the declining years of a solar cycle are marked by heightened geomagnetic activity (see http://www.spacew.com/gic/guidance.pdf for a treatise on this) and I can recall times during the decline of cycle 22 in the 1990s when it seemed like geomagnetic disturbances were constant. Although the record in its most easily accessible form doesn't go back as far as we would like, check out this geomagnetic index record from 1994:

http://www.swpc.noaa.gov/ftpdir/indices/old_indices/1994_DGD.txt

Check out February 5-15, February 21-22, March 3, March 7-21, April 1-18 (especially April 17, with a huge planetary A index of 130!), May 1-17, May 28-31, Jun 25 to July 7, September 7-10, October 3-7, 23-24, and 29-31, and November 26-27. Note the very large planetary A index values throughout the year, and this represents week after week buffeted by high absorption and even radio blackouts. As if this wasn’t bad enough in the middle latitudes, I recall Vince Van Der Hyde, K7VV was living in Alaska at the time (possibly near the 65th parallel) and told me later that his favorite HF bands were unusable for months at a time, due to the concentration of geomagnetic energy toward the poles.

In the table above, check out the College A index, which is measured near Fairbanks at the University of Alaska. It is in the middle column. See all those asterisks where there should be numerals? Those are periods when the magnetometer was unusable due to being swamped with too much energy from a coronal mass ejection, for instance. Now compare the numbers in 1994 to more recent readings:

http://www.swpc.noaa.gov/ftpdir/indices/old_indices/2012_DGD.txt

http://www.swpc.noaa.gov/ftpdir/latest/DGD.txt

There are a few relatively high numbers, but nothing like what we observed and sometimes suffered with two decades ago.

A glance at this graph shows how far down we were on cycle 22 during 1994:

http://standeyo.com/Geo_Solar/Solar_Cycles_22_23/cycle_22_review_01.gif

By the way, the exact location for the magnetometer which generates the college A and K index is at 64.8742 degrees North latitude and 147.8597 degrees West longitude, roughly one half mile northeast of Smith Lake, 400 yards south of Yankovich Road, and one half mile east of Miller Hill Road in Fairbanks. This is about 117 miles or 188 km south of the Arctic Circle.

You can see photos of the geomagnetic observatory at http://geomag.usgs.gov/monitoring/observatories/college/#photos and also at http://www.bing.com/maps/default.aspx?cp=64.8742|-147.8597style=hlvl=17

Note on the overhead view on Bing Maps you can zoom in, and by clicking on Aerial, then the Bird's Eye dropdown you can see highly detailed images from four different directions. Just click on the arrows outside the compass rose in the upper right to see the observatory from a point of view in each direction.

Dave Greer, N4KZ of Frankfort, Kentucky wrote about 10 meter openings on the autumnal equinox, last Sunday.

"Ten meters was open to southern Europe and South Africa on the morning of September 22, the first day of fall. For the past couple of weeks, various European operators had been telling me on lower bands after I got home from work that 10 meters had been open to the States earlier in the day. But I was at work in each instance and missed out. So I made an effort on Sept. 22 to be on the band and it didn't disappoint. I copied numerous stations but primarily they were from France and Spain. I copied a British station but he was weak. I worked S58WW at 1510 UTC and he had a good signal but not as strong as others. CU7MD from Azores was copied too but with several prior QSOs in our logs, I let others work him. ZS3Y from South Africa had a big signal as did EA8YB in the Canary Islands. But I passed on them as well because of our previous QSOs on the band."

"But my most interesting QSO on Sept. 22 was with F4DSD in France. I think they call this the 10-meter deja vu mode of propagation because Mario and I had worked exactly one year earlier. And I do mean almost exactly a year ago. Our two QSOs, both on 10 meters on Sept. 22, occurred in 2012 and again in 2013 and were only 12 minutes apart in time and only 5 KHz apart in frequency. Now that really is deja vu!"

Thanks, Dave. That really must have been an odd feeling and quite a fun topic of conversation.

You may be surprised to hear of 10 meter openings given the paucity of sunspots, but given seasonal variations, right around the equinox is the ideal time. Run a projection with a program such as W6ELprop from Dave's location (38.205 deg N, 84.896 deg W) to France, for instance, and on September 22 with low sunspot or solar flux numbers, we can see some possibilities for openings around 1530-2100 UTC, and especially between 1900-2030 UTC. But change the date back or forward a month or two, and the opening disappears.

More mail on 10 meters, from Rol Anders, K3RA in Elkridge, Maryland: "Ten has been opening to EU from Maryland more and more, starting in mid September. I worked IW1CHX on September 11 at 1438 UTC on CW. The KD4D team at N3HBX worked 54 EU stations on Sunday of the WAE (Worked All Europe DX Contest) on September 15. Then on September 17 I ran about 15 EU stations between 1600 and 1700 UTC. I was not on for several days, but on September 23 I worked about 25 EU stations on ten meters from 1440-1520 UTC. On September 24 I worked about a dozen EU's in the hour starting at 1640 UTC. Then on September 25 I worked about 100 EU stations between 1300-1600 UTC. On September 26

I worked about 125 EU between 1200-1440 UTC. Many Eastern Europeans and Russians, with occasional Asiatic Russian and Middle-East stations calling in. Also on September 26, with such good conditions in the morning, I checked ten meters for JA's before my sunset, and worked JM7OLW. So, the fall ten meter season is well underway. Station is a 3 element SteppIR at 50 feet, and about 900 watts out."

Great report, Rol. And a little bit of internet searching shows JM7OLW may have been using his 7 element 10 meter Yagi at 100 feet. That must help. Check out the evidence and maybe guess which antenna at http://www.geocities.jp/jm7olw_suke/ . I wouldn't be surprised if he were using a half-wave dipole on his roof.

At the last minute, early Friday, we received this VHF report from Lawrence, GJ3RAX, in Jersey, one of the Channel Islands. He wrote, "The VHF bands over here were a bit more interesting this week. A tropo opening had been predicted due to the high pressure region and that happened on Monday. I was not able to spend very much time on the radio but I was on for an hour or so during the early afternoon and again from 11:30 pm at night. My afternoon QSOs were into Germany at distances of between 600 and 700 miles. Most were on 2 m and one on 70 cm. The later QSOs got me into Germany again on 2 m and 70 cm and also Switzerland on both bands which was about 440 miles. I tried with some of them on 23 cm but nothing was heard this time."

"One of my friends in Guernsey said that he had a large pileup on 23 cm with quite a lot of countries worked. He has a tower with much higher gain antennas than my log periodic and a better take-off to the east where I am looking at the local school building which is about 100 yards away."

"One of the members of the VHF and UHF group said that he was too far north, being in Scotland, to be able to take advantage of that opening which seemed to be mostly at my latitude."

"On Tuesday I was not hearing anything on those bands. During the evening there was an RSGB contest on 6 m which ran from 8 pm to 10:30 pm BST. Normally I would be lucky to get a couple of QSOs but, after starting late at 9 pm, I had 17 QSOs. Most were to England with one GW, one GJ and two in GU. The best distance was 299 miles which is normally not a good distance for me on 6 m. Typical 6 m QSOs are much closer or much more distant during the Sporadic E season but that is now over."

"I am anticipating more and better tropo openings during the next month as I used to find them best during October each year. Last year when I had just got back on those bands in November I caught one opening when I worked into Germany on 2 m, 70 cm and 23 cm."

This weekend is the CQ World Wide RTTY DX Contest. They have a nice countdown clock along with rules at http://www.cqwwrtty.com/. As I

write this early Friday morning, the clock shows the contest starts in 16 hours.

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for September 19 through 25 were 85, 85, 79, 98, 65, 56, and 61, with a mean of 75.6. 10.7 cm flux was 107.9, 108.8, 110.3, 111.2, 107.8, 110.2, and 111.1, with a mean of 109.6. Estimated planetary A indices were 11, 6, 7, 5, 5, 9, and 4, with a mean of 6.7. Estimated mid-latitude A indices were 14, 5, 8, 6, 4, 9, and 4, with a mean of 7.1.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30928
SIDC SOLAR BULLETIN 28 Sep 2013, 1409UT
SIDC FORECAST (valid from 1230UT, 28 Sep 2013 until 30 Sep 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 28 Sep 2013 10CM FLUX: 108 / AP: 006
PREDICTIONS FOR 29 Sep 2013 10CM FLUX: 106 / AP: 006
PREDICTIONS FOR 30 Sep 2013 10CM FLUX: 106 / AP: 006
COMMENT: X-ray background radiation is in the B-level. No C-flares occurr=
ed. Catania
sunspot group 83/NOAA AR 1850 has the potential of producing a C-flare. I=
t
is located between 30=B0 and 45=B0 longitude. A large filament (longitu=
dinal,
between 5=B0 and 30=B0) passed the central meridian. Up to now, it seems =
to be
stable. Two coronal holes (CH) are visible on the solar disk: a small
northern CH (between 35=B0 and 50=B0 latitude, 20=B0 wide) crossed the ce=
ntral
meridian on September 27 and a small equatorial CH (between 5=B0S and 5=B0=
N,
10=B0 wide) that crosses the central meridian today. Unsettled geomagnet=
ic
conditions are possible from October 1-2. The geomagnetic conditions are
quiet at the moment.
TODAY'S ESTIMATED ISN : 036, BASED ON 15 STATIONS.

Topic: 19749 Message: 21685

```
:Issued: 2013 Sep 29 1231 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30929
SIDC SOLAR BULLETIN 29 Sep 2013, 1209UT
SIDC FORECAST (valid from 1230UT, 29 Sep 2013 until 01 Oct 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=3D50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 29 Sep 2013 10CM FLUX: 105 / AP: 005
PREDICTIONS FOR 30 Sep 2013 10CM FLUX: 106 / AP: 011
PREDICTIONS FOR 01 Oct 2013 10CM FLUX: 103 / AP: 008
COMMENT: Solar activity has slightly increased: both NOAA AR 1853/Catania=
90 and
NOAA AR 1850/Catania 83 produced a C1.6 flare. NOAA AR 1853/Catania 90 is
ready to rotate behind the west limb, NOAA AR 1850/Catania 83 is located =
in
the longitudinal segment between 45=B0 and 60=B0. NOAA AR 1853/Catania 9=
0 has
the highest probability producing C-flares. NOAA AR 1854 (near the east
limb) is new on the solar disk and is another candidate to produce
C-flares, although with a lower probability. We predicted eruptive
conditions, i.e. more than 50% probability for C-flares. The filament, n=
ow
situated between 15=B0 and 30=B0 longitude is still stable. The geoma=
gnetic
conditions are quiet. Tomorrow, unsettled conditions are possible when th=
e
equatorial coronal hole becomes geoeffective.
TODAY'S ESTIMATED ISN : 031, BASED ON 14 STATIONS.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30930
SIDC SOLAR BULLETIN 30 Sep 2013, 1209UT
SIDC FORECAST (valid from 1230UT, 30 Sep 2013 until 02 Oct 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Proton event in progress (>10 MeV)
PREDICTIONS FOR 30 Sep 2013 10CM FLUX: 103 / AP: 007
PREDICTIONS FOR 01 Oct 2013 10CM FLUX: 097 / AP: 007
PREDICTIONS FOR 02 Oct 2013 10CM FLUX: 097 / AP: 007
COMMENT: A yet unnumbered, flux emerging region in the South-Eastern solar quadrant
might develop flaring potential in the coming days. A large filament in
the solar north-western hemisphere erupted Sunday evening around 21:45UT.
The event was associated with a long duration C1.2 flare peaking at 23:39.
The GOES proton flux level has crossed the event threshold (> 10 pfu for
10 MeV). LASCO observed a full-halo CME. In STEREO-B Cor2, the plane-of the
sky speed is of the order of 600km/s. In the coming 3 days, we expect
quiet geomagnetic conditions. The halo-CME of midnight Sept 29/30 is
expected to arrive midnight October 2/3.
TODAY'S ESTIMATED ISN : 037, BASED ON 17 STATIONS.

21687. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-10-01 14:01:02 UTC
From: Paul Dunphy
Topic: 19749 Message: 21687

```
:Issued: 2013 Oct 01 1251 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31001
SIDC SOLAR BULLETIN 01 Oct 2013, 1210UT
SIDC FORECAST (valid from 1230UT, 01 Oct 2013 until 03 Oct 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Proton event in progress (>10 MeV)
PREDICTIONS FOR 01 Oct 2013 10CM FLUX: 106 / AP: 007
PREDICTIONS FOR 02 Oct 2013 10CM FLUX: 106 / AP: 019
PREDICTIONS FOR 03 Oct 2013 10CM FLUX: 106 / AP: 026
COMMENT: The flaring probability is low. Only the newly emerging active regions on
East limb and and NOAA AR 1855 have a small chance for a C-class flare.
NOAA AR 1855 (now at central meridian, northern hemisphere) is a new flux
emerging region and has developed a transequatorial connection with an
old decaying active region in the Northern hemisphere. The arrival of the
CME of midnight Sept 29/30 is still expected for midnight Oct 2/3 with an
uncertainty range of +/- 6 hours. The CME is expected to trigger a minor
geomagnetic storm (Kp=5) early Oct 3. Meanwhile the 10 MeV proton levels
are still above the event threshold as a consequence of the same event.
TODAY'S ESTIMATED ISN : 032, BASED ON 11 STATIONS.

SIDC URSIGRAM 31002
SIDC SOLAR BULLETIN 02 Oct 2013, 1210UT
SIDC FORECAST (valid from 1230UT, 02 Oct 2013 until 04 Oct 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Major magstorm expected (A>=50 or K>=6)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 02 Oct 2013 10CM FLUX: 107 / AP: 034
PREDICTIONS FOR 03 Oct 2013 10CM FLUX: 107 / AP: 007
PREDICTIONS FOR 04 Oct 2013 10CM FLUX: 107 / AP: 007
COMMENT: Solar activity is low, a small chance for C-class flaring can come from
NOAA AR 1555/Cat 91 or from the newly emerging active regions on the East
limb (Cat 93 and Cat 94). This morning from 01:00 UT onwards, the ACE
spacecraft recorded a small jump in the solar wind speed, up to 600 km/s,
and a gradual increase in the solar wind density. Together with Southward
fluctuating IMF, this had generated a Kp=6 geomagnetic storm. The event is
probably a consequence of the halo CME that left the Sun on midnight Sept
29/30, which arrived earlier than expected. By now, the IMF is back
steadily Northward so we expect the worst of the storm has passed. Later
today we expect a return to quiet geomagnetic conditions.

DX Bulletin 40 ARLD040
>From ARRL Headquarters
Newington CT October 3, 2013
To all radio amateurs

SB DX ARL ARLD040
ARLD040 DX news

This week's bulletin was made possible with information provided by K5JP, NC1L, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

NEPAL, 9N. Pekka, OH2YY is QRV as 9N2YY until October 5. Activity is during his free time during the evening and night hours on 17, 15 and 12 meters. QSL to home call. In addition, Fred, DL8BF is QRV as 9N7BF until October 12. Activity is on 40, 20, 15 and 10 meters using QRP power. QSL to home call.

BHUTAN, A5. After his Nepal activity, Pekka, OH2YY will be QRV as A52YY from October 6 to 10. Activity will be on 40 to 10 meters. QSL to home call.

PHILIPPINES, DU. Al, DU1KA is now QRV from Luzon, IOTA OC-042. Activity is generally between 2200 to 0200z, and 0800 to 1200z, on 20 to 6 meters using mainly CW. He will soon be active on 80, 40 and 30 meters. QSL via NR6M.

MAYOTTE, FH. A large group of operators are QRV as TO2TT until October 17. Activity is on 160 to 6 meters using CW, SSB and RTTY with four stations active. QSL direct via I2YSB.

AUSTRAL ISLANDS. FO. Grant, KZ1W and Rob, N7QT are QRV as TX5D from Raivavae, IOTA OC-114, until October 14. Activity is on 80 to 10 meters using CW, SSB, RTTY and PSK. QSL via N7QT.

WALLIS AND FUTUNA ISLANDS, FW. Jean-Jacques, TK5JJ is QRV as FW5JJ from Wallis, IOTA OC-054, for the next two years. Activity is on the HF bands using CW, SSB and digital modes, with EME on 6 and 2 meters. QSL via F5RXL.

GUERNSEY, GU. A group of operators are QRV as GP0PKT from Herm Island, IOTA EU-114, until October 8. Activity is on 80 to 10 meters using SSB and digital modes with three stations. QSL via G6NHU.

SOLOMON ISLANDS, H4. Bernard, DL2GAC and Hermann, DL2NUD are QRV as H44MS and H44HP, respectively, from Honiara until November 26. Activity is on the HF bands with EME as well. QSL to home calls.

ST. VINCENT, J8. Fred, DH5FS will be QRV as J8/DH5FS from Union Island, IOTA NA-025, until October 10. He will be active on the HF bands using mostly CW. QSL via DM5JBN.

CURACAO, PJ2. Jeff, K5JP, James, NT5V, and Lanny, W5BOS will be QRV as PJ2/home calls from October 8 to 15. Activity will be on the HF bands with an emphasis on the newer bands. QSL to home calls.

UKRAINE, UR. A group of operators are QRV using special event call EN50N until October 30 to commemorate 50 years of the Vinnitsa TV tower, one of the tallest structures in Europe. Activity is on all bands and modes. QSL via operators' instructions.

CANADA, VE. Robert, VE3RHE will be QRV as VX31763 in celebration of the 250th anniversary of the Royal Proclamation of King George III from October 6 to November 5. Activity will be on 40, 20, 15 and 10 meters. QSL to home call.

MEXICO, XE. Special event station XE3FMRE is QRV until October 7 during the national Mexican ham radio convention in Cancun. Activity is on 80 to 6 meters using CW, SSB, RTTY, PSK31 and possibly WSJT. QSL via XE3RCC.

THIS WEEKEND ON THE RADIO. The Oceania DX Phone Contest, NCCC Sprint, YLRL DX/NA YL Anniversary Contest, 15-Meter SSTV Dash Contest, TARA PSK Rumble Contest, EPC Russia DX BPSK63 Contest, GTC CW Cup, TRC DX Contest, WAB HF Phone Contest, EU Autumn SSB Sprint, California QSO Party, International Hell-Contest, UBA ON SSB Contest and RSGB 21/28 MHz Contest will certainly keep contesters busy this upcoming weekend. The ARS Spartan CW Sprint is scheduled for October 8. The NAQCC Straight Key/Bug CW Sprint, CWops Mini-CWT CW Test, 432 MHz Fall Sprint and RSGB 80-Meter Club CW Sprint are all scheduled for October 9. Please see October QST, page 89, and the ARRL and WA7BNM contest web sites for details.

No 1170
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

4X - Yulik 4X6HP, Vlad 4Z5IW and Ros 4Z5LA will be active as homecall/p from Akhziv Island (AS-100) [425DXN 1169] from about 4 UTC on 18 October until around 12 UTC on the 19th. They will run two stations and operate CW and SSB. QSL via home calls. [TNX 4X1VF]
6W - Luc, F5RAV (6V7T) has cancelled the announced side trip to N'gor Island (AF-045) [425DXN 1169] and will be active only from mainland Senegal on 8-17 October. QSL direct to F5RAV.
C9 - Target frequencies for the C82DX expedition to Mozambique [425DXN 1163] are:
CW 1820.5 3513 7013 10113 14013 18072 21023 24900 28013 50105
SSB 1845 3780 7075 - 14200 18140 21285 24945 28470 50105
RTTY - 3580 7035 10140 14075 18102 21075 24910 28075 -
The group (JN1THL, K6RB, K6TD, K8EAB, N1DG, N4NX, N4XP, N9JA, NF4A, VA7DX, W6OAT, WF4W, ZS6P, ZS6PJH and ZS6RI) plans to be operational by 14 October, and the operation will run until the morning of the 23rd.
An OQRS for direct an bureau cards will be activated on Club Log after the DXpedition ends. Traditional requests should be sent direct to C82DX, P.O. Box 333, Bethlehem GA 30620, USA. Logs will be uploaded to LoTW six months after the conclusion of the DXpedition. Logsearch and further information can be found at www.c82dx.com (http://www.c82dx.com)
E5_sc - Once again Bill, N7OU will be active as E51NOU from Rarotonga (OC-013), South Cook Islands between 14 October and 9 November. He will be QRV in his spare time on 160-10 metres CW. QSL via N7OU. [TNX DX World]
I - Look for Augusto IA5/IK4RQJ, Vanni IA5/IK4RUX and Sergio IA5/IZ4BBF to be active from Isola del Giglio (EU-028) on 8-13 October. They will operate SSB and digital modes on the HF bands. QSL via home calls, direct or bureau. [TNX IK4RUX]
J8 - Fred, DH5FS is active as J8/DH5FS from IOTA group NA-025 until 9 October. From 30 September to 4 October he operated from Bequia Island, while on 5-9 October he will be on Union Island. QSL via Club Log's OQRS (preferred method), otherwise via DM5JBN.
KG4 - Bill, W4WV (KG4WV) and Al, W6HGF (KG4HF) will be active from Guantanamo Bay between 11 and 25 October. They plan to operate

SSB, RTTY, PSK and some CW on all bands. QSL via home calls. [TNX
The Daily DX]
S2 - S21ZBC and S21ZBB are the callsigns for the Mediterraneo DX Club's
DXpedition to Bangladesh [425DXN 1156]: S21ZBC will be used on
16-22 November, while S21ZBB will be used on 23-26 November, CQ WW
DX CW Contest included. A large multi-national team (I2VGW, I8YGZ,
IK2LTR, IK4MTK, IT9ZZO, IZ2GNQ, IZ2KXC, IZ5GST, IZ8CCW, DF7TT,
DJ7JC, DJ9RR, DL3GA, DL5DSM, DL8OBF, F1HRE, F5EOT, HB9OCR, OE3JAG,
ON7RN, RA9USU, S21AM, S21D, S21RC, YO5OED and YO9XC) will be
active on 160-6m with six stations - two for SSB, two for CW and
two for RTTY. QSL via IK2VUC, direct or bureau. Logs will be
uploaded to LoTW six months after the conclusion of the DXpedition
Further information, including logsearch and OQRS in due course,
can be found on www.mdxc.org/bangladesh2013/ (http://www.mdxc.org/bangladesh2013/) [TNX
MDXC]
T8 - Kiichi, JF1LUT will be active as T88IK from Koror (OC-009), Palau
on 8-15 October. He will operate SSB only on the HF bands and 6
metres. QSL via home call, direct or bureau.
V4 - Once again John, W5JON will be active as V47JA from St. Kitts
(NA-104) from 10 October to 10 November. He will operate SSB and
digital modes, and will participate in the CQ WW DX SSB Contest as
V49J. All QSLs via W5JON (direct only) and LoTW. His wife Cathy
(W5HAM) will also operate occasionally as V47HAM. [TNX The Daily
DX]
VK9L - Fred, VK3DAC will be active as VK9DAC from Lord Howe Island
(OC-004) on 14-20 October. He expects to be QRV on or around 3595,
7105, 14250, 21250, 28450 and 50150 kHz, during his early mornings
and into the evenings as time and conditions allow QSL via home
call, direct or bureau.
W - Special event callsigns N1A, N2A, N3A, N4A, N5A, N6A, N7A, N8A,
N9A and N0A will be activated from each of the US call areas on
6-12 October to celebrate the 9th anniversary of the North
American QRP CW Club (NAQCC). QSL direct to KK1X. Details on the
event can be found at http://naqcc.info/ [TNX VA3RJ]
W - Jacek, SP5APW (http://na-142.blogspot.com/) has revised his
schedule [425DXN 1169] and now plans to be active as W4/SP5APW
from five IOTA groups as follows:
14-15 October Jekyll NA-058
16-17 October Okaloosa NA-142
17-18 October St. George NA-085
19 October Talbot NA-138
20-22 October Cedar Key NA-076
He will be QRV holiday style mainly on 20, 15 and 10 metres SSB.
QSL via home call, direct or bureau.
XE - Manuel XE2HUQ, Saul XE2HQI, Craig XE2HWJ and Felix XE2I will be
active as XF1P from Isla Partida (NA-124) on 9-16 November. They
plan to operate SSB and CW on 160-10 metres. QSL via XE2HUQ
(direct only).
YB - Before returning to the Philippines, Leo, YC9MLL [425DXN 1165]
will concentrate his last operations from Flores Island (OC-151)

on 5-6, 12-13, 19-20 and 26-27 October. Look for him on or around 21260 kHz. QSL via M0OXO. [TNX rsgbiota.org (http://rsgbiota.org)]
YB - Joni, YB9WZJ and Lucky, YD9RQX plan to be active from Waigeo Island (OC-239) between 16 and 22 October. Expect them to operate SSB on 40, 20 and 15 metres. [TNX JN6RZM]
YO - Special event station YR900ORA will be active until 15 October to celebrate the 900th anniversary of the city of Oradea. Local amateur radio operators are using special prefix YO900. Information on the relevant award can be found at http://www.qrz.com/db/ YR900ORA (http://www.qrz.com/db/YR900ORA)

*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

CY0P ---> Operations from Sabe Island will stop earlier than planned. "Rather than returning on 11 October", the team said, "for a number of safety (WX) and cost considerations, the return date will be on either 7, 8, or 9 October". Activity is on 160-10 metres CW and SSB. Due to equipment limitations, there will be no RTTY operation.

HP0INT ---> The HP0INT story (32188 QSOs from the six Panama IOTA groups between 5 and 19 September), along with pictures and statistics, can be found at http://www.invokerteam.com/ hp0int/ (http://www.invokerteam.com/hp0int/)

HQ4W ---> Dan, HR2DMR was active as HQ4W from Isla El Tigre (NA-060) for a few hours between 2-3 October. This was a reconnaissance trip in preparation for the main activation on 17-20 October [425DXN 1169]. QSL via KD4POJ. [TNX DX World]

K9W ON HOLD ---> On 1 October the K9W Management team announced that "due to the U.S. Government shutdown, the Wake Island K9W Forgotten 98s Commemorative DXpedition is now on hold pending a revised schedule. We will announce new dates for the DXpedition as soon as possible. Thank you for your patience and understanding." Keep an eye on www.wake2013.org (http://www.wake2013.org).

LY PREFIX HUNTER TROPHY ---> This plaque is issued for working 25 Lithuanian stations with different LY prefixes. Details can be found on the Vytautas Magnus University Radio Club's website (http://rk.vdu.lt). [TNX LY5W]

NOT THE QSL MANAGER ---> Con, DF4SA is not the QSL manager for 7X2ARA. "I ONLY manage my contacts that I made during 2003 CQ WW DX CW Contest from this club station", he says. Please refrain from sending QSL requests to him, as "it is a waste of money and time for everybody". [TNX DF4SA]

QSL 9K2MA ---> "I am still the QSL Manager for 9K2MA", Russ WA3FRP says, "and I am happy to report that Mohammad has, once again, become active and

on-the-air. I have the logs from 1983-1995 plus 2013 - present".

W/VE ISLANDS ---> The W/VE Islands QSO Party will take place from 16 UTC on
19 October through 23.59 UTC on the 20th. Complete information can be found
at www.usislands.org/contest_ rules.html (http://www.usislands.org/contest_rules.html).

>From Tad Cook, K7RA
Seattle, WA October 4, 2013
To all radio amateurs

SB PROP ARL ARLP040
ARLP040 Propagation de K7RA

Solar activity weakened again, with the average daily sunspot number dropping from 75.6 to 52, and average daily solar flux down three points to 106.6, when compared to the previous week, September 19-25.

Geomagnetic activity was up, with planetary A index at 39 on October 2, mid-latitude A index at 29, and the high latitude college A index at 64.

The cause of the upset was a coronal mass ejection barreling toward Earth at 2,000,000 MPH on September 30, triggering a G2 class geomagnetic storm on October 2 and aurora displays well south of the Canadian border.

Predicted solar flux values are 110 on October 4-5, 105 and 100 on October 6-7, 95 on October 8-13, 100 on October 14-15, 105 on October 16-18, and 110 on October 19-24.

Predicted planetary A index is 20 on October 3, 8 on October 4, 5 on October 5-9, 8 on October 10-11, 5 on October 12-13, then 8, 10 and 8 on October 14-16, 5 on October 17-20, 10 on October 21, and 5 on October 22-26.

OK1CC predicts a quiet to unsettled geomagnetic field on October 4, mostly quiet October 5, quiet on October 6, quiet to active October 7-10, quiet to unsettled October 11, quiet on October 12-13, quiet to active October 14, active to disturbed on October 15-16, quiet to active October 17-18, quiet October 19-20, active to disturbed October 21, mostly quiet October 22, quiet October 23-27, quiet to active October 28, and active to disturbed October 29-30.

I've been keeping an archive of the 45-day solar flux and planetary A index predictions from NOAA/NASA, and it is interesting to see how they change over time. Conditions 30-45 days out must be pretty hard

to predict, but I've noticed that the outlook seems to be increasingly pessimistic recently, suggesting weakening sunspot activity.

For instance, the 45 day prediction for September 16 began on August 2, with a solar flux of 125. Then over time it drifted around, within a few days down to 105 (August 5-11), then back up to 125 on August 19-25, then the prediction begins to wither to 115 August 26 to September 8, declining again to 100 (September 9-12), then in the few days before the target date September 13-15 at 95, which was right on the nose with the end result being 94.5. This of course rounds up to 95, the whole number used in the prediction.

I keep seeing predictions with solar flux values dropping below 100, even down to 90. Take a look at, http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html.

You can also see my own longer term archive in spreadsheet format at http://snurl.com/27xfhcg. Password is k7ra. This particular archive goes back to April 19.

The column on the left shows the dates of the forecasts, and across the top are the dates that the data correspond to. The numbers in blue across the bottom are the actual flux values recorded on the dates for each column, or when the column and row intersect on the same date.

A similar spreadsheet for the planetary A index can be downloaded from http://snurl.com/27xfgtc. Same password, k7ra.

Today we have an addition to our three-month moving average data set, and I am now convinced that we may have already passed the now classic double-peak for Cycle 24 that some have predicted based on activity in previous cycles. As others have suggested, those peaks seem to be clearly centered around October to November 2011, and April to May 2013. For the 3-month period ending September 30 the average was 77.4

Starting from a three month average centered on January 2011 (data from December 1, 2010 through February 28, 2011), averages for that year were 35.3, 55.7, 72.3, 74.4, 65.9, 61.5, 63, 79.6, 98.6, 118.8, 118.6 and 110.

For 2012 it was 83.3, 73.7, 71.2, 87.3, 91.5, 96.5, 91.9, 89.9, 81.2, 82.3, 74.4, and 82.8.

So far in 2013 the averages are 73.6, 80.7, 85.2, 106.4, 106.4, 97.5, 85.6 and 77.4.

Some solar scientists suggest a possible subsequent peak in 2014. I certainly hope so, but have no way of knowing. Our nearest star remains baffling and full of surprises. The body of knowledge and available tools expanded tremendously over the past couple of

decades, yet accurate predictions elude us. Remember a few years ago when one of the more optimistic scientific papers suggested a record-breaking Cycle 24, perhaps approaching the levels of Cycle 19 in the late 1950s? The future looked bright.

There is this interesting theory that the first cycle following the beginning of any century is weak. Could there also be a 100 year recurrence of Cycle 19? Tell your children or grandchildren. That would be over a century after my birth, and planning for it now would be a fool's errand.

Thanks to Jimmy Mahuron, K9JWJ for reminding us about the 2007 book by Stuart Clark, "The Sun Kings: The unexpected tragedy of Richard Carrington and the tale of how modern astronomy began." I suggested it in this bulletin several years ago, checked it out from the library, but it joined the tall stack of non-fiction to read and I finally returned it. I just reserved it again, and if you happen to be in Seattle, I see it is currently on display at the Green Lake Branch of Seattle Public Library. I guess that our librarians selected a number of books about astronomy or the Sun for a themed display, but these are never locked in display cases. These books can be picked up, perused and even checked out.

Jimmy also noted on September 27 that 40 meters was good for him the previous Saturday, September 21.

Emil Pocock, W3EP reported on September 29, "It is a bit early in the Fall DX season and solar activity is still low, but 10 meters has come alive. The band opened to Western Europe at the unusually late time of 1920-2000 (I assume he means UTC, rather than local time) September 13. There were teaser openings to Europe on the mornings of September 17, 18, and 21. I was surprised to work 3B8/G0TSM on the September 18 among the European callers.

"The first significant opening from here in Connecticut was on September 22 and then every morning to September 29. Eastern European stations dominated, especially UR and UA. Interesting stations worked included FR5FC, HZ1SK, FH4VOS and OD5ZZ on September 24, all on SSB. The following day, snagged on CW 5A1AL and SU9AF. On September 25, logged 4Z5SG, 4Z5ML, ZA1G, 4K9W and UP5OA. Stations worked on the September 27 included some real surprises, including EW8O and EW3AN (EW not worked on previous days), but also VU3KPL and XV4Y. XV4Y was worked on direct path over the pole. What a thrill to hear Vietnam through the European callers! Eastern Europeans continued to dominate QSOs on September 28 and 29, including UA9XO.

"Hope this bodes well for the rest of the Fall season, even if solar activity remains sluggish."

Hope so too, Emil, and thanks for sending an uplifting counterpoint to my gloomy assessment earlier in this bulletin.

Jim Smith, K3RTU of Aston, Pennsylvania wrote on October 2 about another hike in one of his favorite parks, taking along a portable HF radio and antenna, of course: "Despite the less than desirable predicted solar flux for Monday September 30, I went on a hike in Ridley Creek State Park here in Southeast Pennsylvania (FM29). In one of my favorite spots I tried a different antenna instead of my trusty Buddistick vertical. I was using an end fed wire of 30' with a 9:1 UNUN matching transformer. I got the end of the wire up into a tall tree at about a 50 degree angle and attached the other end with the matching transformer to a plastic tent peg. Then I ran the coax back to my KX3. I was running the KX3 with AA lithium batteries so I kept the power cut back to just under 3 watts. Even with this less simple setup I was able to work CO0CW in Havana and received a RST of 579 at about 1540 UTC on 17 meters. I wasn't hearing many station, however, so I tried 15 meters. I was delighted to then work SM5NZG near Stockholm at about 1620 UTC. I only received an RST of 539 from Heide, but was still able to chat for about 10 minutes. Heide's 6 element Yagi was obviously doing the heavy lifting, but it was still good to see that less than 3 watts from a simple end fed wire could make the trip across the Atlantic even without much help from the Sun."

Thanks to Max White, M0VNG in the UK for this interesting piece on some space weather research:

http://newsroom.ucla.edu/portal/ucla/lunar-orbiters-discover-source-247774.aspx.

And finally, Jeff Hartley, N8II of West Virginia wrote to us last evening, "Conditions on September 27-30 were good on the high bands with October 2 being the poorest day. Throughout the period the SFI ranged from low 100's to around 115.

"On September 27, 12 meters was open well to Europe by 1300 UTC (sunrise is just after 1100 UTC, sunset around 2345 UTC) working many Ukrainians. By 1330 UTC, 10 meters was open to southern Europe and especially the UA6 area and Ukraine. At 1500 UTC, JW9JKA on Bear Island, EU-027 was easily worked S5 on 10 phone followed by OZ1BTE, OH5UZ, several Germans, Polish, Austrians and a few Southern Europeans, mostly with S7-S9 signals going QRT at 1533 UTC. Andy, UA0BA was found on my return at 1828 UTC a solid 599 on 10 CW from far northern zone 18, which is well after midnight there, with some auroral Es probably involved. Then I found him on 12 meter CW at 1846 UTC about 559. Both UA0ZC and R0FA were loud on 12 CW at 2103/2124 UTC, but the band every day seems to close to Asia by sunset. About an hour after sunset RA/KE5FA, HL2XUM, and DU2US were around S5 on 17 CW.

"On September 28, my first morning QSO was UA9FAR on 12 meter CW, and he was 589. By 1318 UTC, 10 meters opened to RA1QD and YL2TQ. DXing took a back seat to the Texas QSO Party for most of the rest of the weekend. 20 meters was in pretty good shape to Texas most of the time except Sunday after about 1730 UTC when absorption was

high. 15 meters opened to Texas well by about 1540 UTC both days and stayed open until past 2230 UTC Saturday, but activity could have been better.

"10 meters opened on Sunday well to Europe at 1308 UTC when I turned on the radio, with many UA3 area stations logged. Conditions actually seemed to favor Russia with about 25 stations logged before QRTing for the Texas QSO Party at 1352 UTC; western EU was weak at best. This was the best day into Russia and surprisingly good conditions considering the fairly low SFI.

"On September 30, 10 meters did not open well to Europe, but again there was some propagation to RU3EG (1506 UTC) and UA3YDH (1335 UTC). And surprisingly, Kumar, VU2BGS was worked S5 on 10 CW using a 6 element yagi on his end and 5 el on my end. Twelve meters was open well to UR and Russia as far as RQ4F. Outside of India, Central Asia conditions have not been good above 20 meters. 8Q7AM was 57 on 15 meter phone at 1653 UTC, but he is far south. Since October 2, 10 has sounded poor except to the south and even 12 meters has been quite poor or closed to Europe.

"Today, Oct 3, conditions seemed to improve later in the day with a good 12 meter opening to JA around 2220 UTC and a good signal from TO2TT on Mayotte in the Indian Ocean on 17 phone at 1942 UTC. There was some sporadic-E into New England as well as to county activator W0GXQ in eastern Oklahoma, logged on 12 and 10 meters with S5 signals or better (1540-1722 UTC) and still loud on 15 most of the time on F2 thru 2046 UTC."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for September 26 through October 2 were 63, 54, 58, 39, 42, 49, and 59, with a mean of 52. 10.7 cm flux was 109.9, 107.9, 105.7, 103.1, 104.9, 106.8, and 108.1, with a mean of 106.6. Estimated planetary A indices were 2, 2, 2, 3, 3, 5, and 39, with a mean of 8. Estimated mid-latitude A indices were 2, 2, 2, 3, 3, 6,

and 29, with a mean of 6.7.

21701. K9W (Wake Island operation) on hold

Yahoo group: DX-IS (2013)
Date: 2013-10-06 04:10:43 UTC
From: <w2zk@...>
Topic: 21701 Message: 21701

From the K9W website (www.wake2013.org) ...

"Due to the U.S. Government shutdown, the Wake Island K9W Forgotten 98's
Commemorative DXpedition is now on hold pending a revised schedule.
We will announce new dates for the DXpedition as soon as possible.
Thank you for your patience and understanding.

The K9W Wake Management Team"

Really too bad,

Ted, W2ZK

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, N1DG, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, WA3FRP, N4AA & QRZ DX, W4DN, WA4DAN, N7OU, K8GI, K8YSE, W8GEX & 60m News, N0HJZ, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, G3UML, I1HYW, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK4RUX, IZ8EDJ, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, UN6QC, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF) and YF1AR for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 29th-September, through Sunday, 6th-October there were 220 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9X, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FO/a, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J6, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PY0F, PZ, S5, SM, SP, SU, SV, SV/a, SV5, SV9, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP8, VP8/h, VP9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZF, ZL, ZL9, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

6W, SENEGAL. Mark, AA1AC, will once again be active as 6W/AA1AC from La Somone, between December 8-14th. QSL direct or by the Bureau to his home callsign.

8R, GUYANA. Alex, W1CDC, will once agin be active as 8R1A from Guyana between October 13th and November 1st. Activity will be holiday style on 80-10 meters using CW and SSB. There will be an emphasis on 80/30/17/12/6 meters. QSL via his home callsign, direct or by the Bureau.

9N, NEPAL. Fred, DL8BF, is now active as 9N7BF from Nepal until October 12th. His activity will be QRP on 40/20/15/10 meters. QSL via his home callsign.

C3, ANDORRA. Members of the "Andorran Amateur Radio Union (URA)" will once again be active as C37NL during the CQWW DX SSB Contest (October 26-27th). QSL via C37URA.

C6, BAHAMAS (Update). Rich, N0HJZ, will once again be active as C6ARW from Grand Bahama Island (NA-080) between October 22-29th. Activity will be on 30/17/12 meters this time using CW and RTTY. Operations will also include the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via his home callsign, direct (with sufficient postage) or by the Bureau.

C82, MOZAMBIQUE (Press Release, Dated September 29th) [edited]: "This marks the last benchmark for C82DX to be operational by October 14th. They will be active until the morning of October 23rd giving us 9 evenings of low band opportunities.
Operators depart from Japan, Canada and the U.S. next week to convene in Pretoria on the 12th for loading the caravan for the trip to Xai at 5 AM on the 13th. Upon arrival the first antennas to go up are the low band Titanex, Battle Creek and Big IR verticals. After that the listening loops and beverages, beams, and VHF antennas will be erected.
Our final team consists of: JN1THL, K6RB, K6TD, K8EAB, N1DG, N4NX, N4XP, N9JA, NF4A, VA7DX, W6OAT, WF4W, ZS6P, ZS6PJH, and ZS6RI.
Team C82DX wishes to thank our Foundation, Club and individual donors, and all the support by lead sponsor ICOM for assisting us in making this happen. Please visit <http://www.c82dx.com/pages/sponsors.html> for a list of all our great and generous supporters.
Hope to see all of you in the logs, especially the low bands!
Don, N1DG, and Tom, N4XP, Co Leaders of Team C82DX
<www.c82dx.com>"

CY0, SABLE ISLAND. By the time you read this, operators Gary/VE1RGB, Murray/WA4DAN and Rick/AI5P should be almost or preparing to go QRT as CY0P from Sable Island (NA-063,CISA NS004, WLOTA 0758, WWFF CYFF-001). They announced just before leaving to go to Sable that they were expected to be on the air until October 8th (not October 11th as planned - see details special bulletin OPDX.1130.1). OPDX received the following from the team on Saturday [edited]: "As of 0200z on October 5th, the CY0P DXpedition team had approximately 16,000 Q's in the log. We will continue to work the very large pile-ups over the weekend. Updates to be posted at <www.cy0dxpedition.com>.
(Not sure about departure date yet....all depends on the WX and condition of the sand 'runway' on the beach)..... 73, Murray, Gary, Rick CY0P"
QSL via VE1RGB, direct or by the Bureau. For more information and

updates, visit: http://www.cy0dxpedition.com

D2, ANGOLA. João, CT2HPM, is once again active as D2CT from Luanda until November 15th. Activity is on 20/17/15/12/10 meters using mostly PSK31 and RTTY. His equipment is a Kenwood TS-480SAT into a EzWire antenna. QSL via CT2HPM.

E5, SOUTH COOK ISLANDS. Bill, N7OU, informs OPDX that he will once again be active as E51NOU from the South Cook Islands on Rarotonga Island (OC-013) between October 14th and November 9th. Activity will be on 160-10 meters CW only; during his spare time as his volunteer work allows. QSL via N7OU.

E5, SOUTH COOK ISLANDS. Just a reminder that Fabio, IZ0YIV, will be active as E51YIV from the following islands between October 9-17th. His tentative schedule is:
October 9-13th - Rarotonga Island (OC-013)
October 13-17th - Aitutaki Island (OC-083)
Activity will be holiday style, possibly on 20/17/15m (he has not yet decided), using SSB and the Digital modes (RTTY, PSK, JT65 and JT9 mainly). QSL via his home callsign, direct, by the Bureau or via eQSL or LoTW.

E6, NIUE, Operators Sasi/JA1KJW (E6AK), Mat/JA1JQY (E6AY) and Kuni/JA8VE (E6AA) will be active from Niue Islands (OC-040) between November 3-9th. Activity will be on 80-10 meters using CW, SSB and the Digital modes. Suggested SSB frequencies are: 3798, 7080/7155, 14170, 18130, 21270, 24940 and 28470 kHz. Radios are an Elecraft K2/100w and K3/100w, and an Icom IC-726, with an Ameritron ALS-500M into a Spider Beam?and Hex Beam. QSL via their home callsigns.

FY, FRENCH GUIANA. Marc, F1HAR, will be active as FY5KE during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/Single-Band (15m) entry. QSL via LoTW or direct to FY5KE. NO MORE QSLs by the Bureau.

FY, FRENCH GUIANA. Didier, FY5FY, will be active as FY5KE during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/Single-Band (20m)/Low-Power entry. QSL via FY1FL, by the Bureau or direct.

GB0, ENGLAND (Special Event). Look for special event station GB0TWY to be activated by the 2nd Twyning Scout Group, as part of the 56th Jamboree on-the-Air (JOTA) event, for one day on October 19th. Operations will be from the Twyning School. Twyning is a small village on the banks of the River Avon, 3 km north of Tewkesbury in the county of Gloucestershire, England. The village has around 70 Beavers, Cubs and Scouts ☐ many of which will be visiting the station to take part in JOTA/JOTI 2013. They will also be joined by other Scout groups from Tewkesbury District. Activity will be on the HF bands (40/20/15 meters) as well as 2m and 70 cm. QSL via info on QRZ.com.

GB2, ENGLAND (Special Event). Special event callsign GB2NZ came on the air on Saturday, October 5th, as part of the preparation for the commemoration of the 90th anniversary this October of the first-ever Europe/Oceania radio communication, between Z4AA in southern New Zealand and

2SZ in London, in 1924. The main object is to make some G/ZL contacts on 80 meters, close to the 3 MHz frequency used in 1924. Laurie Margolis, G3UML, will be on first with the special callsign GB2NZ on October 5th and 6th (UK time). Other operators, including Don/G3BJ, Chris/G3SJJ and John/G3XRJ, will keep it going throughout most of October. The schedule is as follows:
October 5-6th - Op G3UML SSB
October 7-11th - Op G3XRJ SSB and CW
October 12-18th - Op G3BJ SSB and CW
October 19-25th - Op G3SJJ CW (Team Leader & Webmaster)

See the following URL links for more details: http://zm90dx.com
http://gb2nz.com
QSL via M0OXO's OQRS (preferred) for direct and Bureau QSLs.

H4, NICARAGUA (Reminder/Update). Members from the Spanish Aitana DX Group (ADXG) are now active as H7H from Octavio, YN2N, radio shack in Nicaragua until October 16th. Operators mentioned are Javi/EA5KM (CW), Fer/EA5FX (CW), Eugen/EA5HPX (CW), Fran/EA7FTR (SSB/RTTY), Jose/EA1ACP (SSB/RTTY) and Carlos/EA1DVY (SSB/RTTY). Pilot station named is Ismael/EA1AZ. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via EB7DX, direct or by the Bureau. An OQRS will be available for direct and Bureau QSLs. All QSOs will be confirmed via LoTW. For more details and updates, visit: http://nicaragua2013.com

IA0, ANTARCTICA. Max, IW0HEU, will be leaving for the Antarctica on October 14th, and he expects to operate as IA0MZ from the Mario Zucchelli Base Station (WAP ITA-01) until January 31st, 2014. Activity will be limited to his spare time. Suggested frequency and time of operation is 14333 kHz between 1730-1830z or watch your local DXCluster. Full information and a preview of the QSL (Managed by IW0EFA) is posted on the WAP Web site at:
http://www.waponline.it/NewsInformation/tabid/225/Default.aspx

II8, ITALY (Special Event). Look for special event station II8IDXC (suffix "International DX Convention") to be active between November 2013 and May 2015. Activity is to publicize the 10th anniversary of "International DX Convention" that will be held in Paestum, Italy, in April 2015. Operations will be on the HF bands and 6 meters using CW, SSB and the Digital modes. QSL Manager is IZ8EDJ. For more info, see, http://www.dxitalia.it

IOTA NEWS.....
EU-028. Members of the MOdena DXpedition Italian Team (MODXIT) will be active as IA5/homecall from Giglio Island (Tuscany Archipelago, IIA T002, WLOTA 0564 and D.C.I. GR-056) October 8-13th. Operators mentioned are Augusto/IK4RQJ, Vanni/IK4RUX and Sergio/IZ4BBF. Activity will be on the HF bands (including 30/17/12 meters) using SSB and the Digital modes. QSL via their home callsigns (direct or through ARI Bureau).

EU-125. Ric, DL2VFR, will be active as OU1RAEM from Romo Island (DIA NS-001), Wadden Sea National Park (WWFF OZFF-004) between December 28-31st. Activity will be on the HF bands, mainly CW and include an entry in the RAEM Contest (December 29th). QSL via DF5LW, direct or by the Bureau. Also, QSLs will be sent automatically by the Bureau. PLEASE NOTE: Ric will also continue to be active between January 1-3rd, but as OZ/DL2VFR. This activity will be a CW only operation. For more details, see: http://www.iota-expedition.com

NA-060. Dan, HQ4W, was only active for one day this past week to Tigre Island in celebration of the Honduran Armed Forces Day. He is expecting/hoping to return to operate between October 17-20th. QSL via KD4POJ.

NA-124. (Update) Operators Manuel/XE2HUQ, Saul/XE2HQI, Craig/XE2HWJ and Felix/XE2I will be active as XF1P from Partida Island between November 9-16th. Activity will be on 80-10 meters using CW and SSB. QSL via XE2HUQ.

NA-144. Benjamin, KK6FUT, will be active on Santa Cruz Island (USI CA-012S, WLOTA 0813), in the Channel Islands National Park (WWFF KFF-014, Santa Barbara County, CA) between October 19-20th. He will be there with a Boy Scout Troop for the Jamboree-On-The-Air (JOTA). Activity will be on 20 and 15 meters, possibly 40 meters. Operations will be QRP (50w or less), intermittent operating times. QSL via KK6FUT, direct (preferred) or by the Bureau.

OC-109/ Operations YE5T from Tambelan Island (OC-122) and YE5S from OC-122. Natuna Selatan (OC-109) have now been postponed until Spring of 2014.

OC-177. Budi, YF1AR, will be active as YF1AR/0 from Payung Besar Island in the Seribu IOTA Group between October 12-15th. Activity will be on 40-10 meters using mainly SSB with some CW. QSL via N2OO. For more details and update, see: http://www.yf1ar.com/2013/10/payung-besar-island-oc-177-ido-236.html

OC-239. Operators Joni/YB9WZJ and Lucky/YD9RQX will be active as homecall/p from Waigeo Island between October 16-22nd. Activity will be on 40/20/15 meters SSB only. QSL via their home call-signs.

OC-244. James, KJ6YAP, will be active as DV1/KJ6YAP from Masbate Island (WLOTA 0900), Philippines, between October 28th and November 24th. Activity will be holiday style on the HF bands using mainly SSB and with some CW. QSL via his home callsign, by the Bureau or direct.

J8, ST. VINCENT (IOTA Op). Fred, DH5FS, who was active this past week from Bequia Island (NA-025), is now active as J8/DH5FS from Union Island (NA-025) until October 10th. Activity is mostly CW and on the low bands.

QSL via ClubLog's OQRS or direct to DM5JBN.

JD1, OGASAWARA. Take, JA1UII, will be active as JD1BON from Chichijima Island (AS-031) between November 1-4th. Activity will be on HF bands. QSL via his home callsign.

K5, UNITED STATES (LH and Special Event Op). Members of the Jackson County Amateur Radio Association, Inc. (JCARA) will be active as K5R from the Round Island Lighthouse (USA-711) between October 18-20th. Team Leaders are Fred/N5GJ and Dan/AE5JG. Activity will be on 80-10 meters using CW, SSB and RTTY/PSK31. The suggested frequencies are:
CW - 3535, 7035, 10115, 14035, 18075, 21035 and 28035 kHz
SSB - 3855, 7255, 14255, 18155, 21355 and 28455 kHz
RTTY/PSK31 - 3585, 7045, 10145, 14085, 18105, 21085 and 28085 kHz

QSL request should be sent to: Dan Miller AE5JG, K5R QSL Manager, 18724 Reese Drive, Saucier, MS 39574. QSL cards will have pictures of the Round Island Lighthouse at its various stages, as well as some of its history. USA: Please include SASE with request. Outside USA: Please include SAE and 3 USDs or current IRC with request.

KG4, GUANTANAMO BAY (Reminder). Operators Bill/W4WV and Al/W6HGF will be active as KG4WV and KG4HF, respectively, from Guantanamo Bay (NA-015) between October 11-25th. Activity will be on all bands, 160-6 meters using SSB, RTTY, PSK, and some CW. They will be on the air for the JOTA to put the local Boy Scouts on the radio. They will complete the antenna repairs from damage by hurricane Sandy and a few minor repair items to the shack. QSL via their home callsigns.

KH9, WAKE ISLAND (Press Release). Joe, W8GEX, sent out the following press release on October 1st: "Due to the U.S. Government shutdown, The Wake Island K9W Forgotten 98's Commemorative DXpedition is now on hold pending a revised schedule. We will announce new dates for the DXpedition as soon as possible. Thank you for your patience and under* standing..... The K9W Wake Management team" Please check their Web site frequently for updates: http:/wake2013.org
ADDED NOTE: See "Bloomberg" for an interesting story about the DXpedition at: http://www.bloomberg.com/news/2013-10-04/shutdown-upends-ham-radio-buffs-trip-marking-massacre.html

NEW DX MAILING LIST. There is a new DX mailing list available online from "YB Land DX Club" from Indonesia on YAHOO Groups called YBDXC_News.

P29, PAPUA NEW GUINEA (Update/Rescheduled). Akira, JA1NLX, reports on his Web page that he will be active as P29VNX from Lissenung Island (New Britain Island), in the Bismarck Archipelago IOTA Group (OC-008) between December 1-6th. Activity will be mostly on the IOTA frequencies on 3010 meters using CW, RTTY and PSK31. His transceiver is a Elecraft KX3 with a small 100w amp into a 1/4 wave vertical with elevated radials. QSL via JA1NLX, direct (w/SASE & 2 USDs) or OQRS (direct (3 USDs) or Bureau). Do not send your QSL via Bureau. He is no longer a member of JARL. All logs will be uploaded on LoTW and the Online Log search available on ClubLog.

Akira states, "I will send you QSL via Bureau from GlobalQSL if you request OQRS_Buro." For more details and updates, watch Akira's Web and Blog pages at: http://www.asahi-net.or.jp/~yy7a-ysd/P29VNX-2013.htm http://ja1nlx-aki.blogspot.jp

PJ2, CURACAO (Ops Needed). Geoff, W0CG/7 (PJ2DX), the Rental Coorinator for the Caribbean Contesting Consortium's (CCC) Signal Point PJ2T Station on Curacao (SA-099, WLOTA LH-0942), reports: "None of the members of the CCC group are able to be at the QTH for the December ARRL 10 meter contest except for me. If you would like to come as a single op, or would like to put together a team to operate the contest during that time, let me know. I could operate with you if you wish, or turn it all over to you if that's your preference. (We will be signing PJ2T, and that letter of permission has already been issued.) The station is very capable on 10, with seven yagis available on 10 in various configurations and aimed in various directions. You would have two bedrooms available, each with a private bathroom and two beds. Questions? Drop me an E-mail for details." Geoff's E-mail address is: ghoward@...

PJ4, BONAIRE. Members of the "PJ4 Contest Club" will once again be active as PJ4X from Bonaire (SA-006, WLOTA LH-1279) during the CQWW DX SSB Contest (October 26-27th) as a Multi-Op entry. Check the low bands (160m) on the hour. QSL via LoTW or direct to W1MD.

9K2MA UPDATE. Russ, WA3FRP, reports, "I am still the QSL Manager for 9K2MA and I am happy to report that Mohammad has, once again, become active and on-the-air. Therefore, please modify any 9K2MA listing to show that I have the logs from 1983-1995 plus 2013 - present."

PIRATE ALERT. Huy, XV2B, reports, "It seems my callsign has been pirated. PSKReporter spotted PSK63 QSOs from 'me'. I do very few digimode!"

QSL UP44WFF via LoTW, by the Bureau or direct (see QRZ.com). Activity was by the "Travelling Radio Amateurs" (Art/UN6QC, Sergey/UN6GAO and Viktor UN7GIT) between October 4-6th, from the following references: UNFF-025 (Almaty State natural reserve), UNR□039 (Talgar River - NEW ONE), UNM□047 (Mount Camel 1659m - NEW ONE), KDA Q-13 (Talgar) and WW Loc. MN83OG.

U.S. POSTAL INCREASE PROPOSED FOR 2014. The United States Postal Service announced on September 25th proposed price changes, including an increase in the price of a First-Class Mail single-piece letter from 46 cents to 49 cents. The proposed changes, which would go into effect in January 2014, are intended to generate $2 billion in incremental annual revenue for the Postal Service. Highlights of the new single-piece First-Class Mail pricing, effective Jan. 26, 2014, include:
Letters (1oz.) - 3-cent increase to 49 cents
Letters additional ounces - 1-cent increase to 21 cents
Letters to all international destinations (1 oz.) - $1.15
Postcards - 1-cent increase to 34 cents

S2, BANGLADESH (Project 2013 by MDXC - Press Release #4). The Mediterraneo DX Club (MDXC) announced on Tuesday, October 1st, that they received two callsigns for their Bangladesh operation [edited]: "Great news from the Mediterraneo Dx Club International Team. The leader Antonio, IZ8CCW, and the co-leader Gabriele, I2VGW, are happy to announce to the Dxer Community that, after many months of hard work and with the great help of a local friend, Manjur, they became able to obtain a wonderful couple of twin callsigns that will accompany the team during their new DXpedition in Bangladesh: S21ZBC and S21ZBB
As a matter of fact, they are going to use the first one (S21ZBC) from the DXpedition starting (November 16th) to November 22nd included, and then they'll shift on the other call (S21ZBB) that they'll use starting from November 23rd for the CQ WW CW CONTEST week-end and the remaining days till they leave the Country.
For any further news and updates please visit the official web site of Bangladesh 2013 adventure: http://www.mdxc.org/bangladesh2013
Any donation will be,of course,very very appreciated by the team.

T6, AFGHANISTAN. Jean-Marc, ON4JM, just received his official T6 license from the ISAF HQ. Look for him to be active as T6JR from Camp Marmal, near Mazar e Sharif, in the northern part of Afghanistan, until the end of December. Activity will be on CW and SSB. QSL via ON4JM, direct or by the Bureau.

T8, PALAU. Kiichi, JF1LUT, will once again be active as T88IK from Arakabesan Island, Koror (OC-009), between October 8-15th. Activity will probably be on 17-6 meters SSB only. QSL via his home callsign, direct or by the Bureau.

TK, CORSICA. Mek, SP7VC, will be active as TK/SP7VC from Corsica Island (EU-014) between October 22-28th. Activity will be on 160-6 meters using SSB and FSK441 via meteor scatter on 6m from WW Loc. JN42. Also, he will be in the CQWW DX SSB Contest ((October 26-27th) as a Single-Op/All-Band/ High-Power entry. QSL via LoTW or direct to SP7VC.

TO1, FRENCH GUYANA. Herve, F5HRY, will be active as TO1A during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/Single-Band (10m)/High-Power entry. QSL via LoTW.

TO2, MAYOTTE (Reminder). Members of the "Italian Dxpedition Team" are now active as TO2TT from Mayotte Island until October 17th. Activity will be on 160-6 meters using CW, SSB and RTTY. They will have with them four Elecraft K3 w/amps, one Spiderbeam (20-10m), two yagis (20-10m), three vertical antennas (80/40/30m), longwire for 160m and 3 element Cubical Quad for 6m. For more details and updates, see the following related Web pages: Official website: http://www.i2ysb.com Official forum: http://www.hamradioweb.org

TO4, MARTINIQUE (Reminder). By the time you read this, Thierry, F4BDG, will be active as TO4FM from Martinique (NA-107) until October 20th. Activity will be on the HF bands. QSL via EA5GL or on eQSL and LoTW.

VK9L, LORD HOWE ISLAND. Fred, VK3DAC, will be active as VK9DAC from Lord Howe Island (OC-004) between October 14-20th. His suggested frequencies are on or around 3595, 7105, 14250, 21250, 28450 and 50150 kHz, but during his early mornings and into the evenings as time and conditions permit. QSL via his home callsign, direct or by the Bureau.

VK9M, MELLISH REEF (News from the VK9MT Web Site): "We are pleased to announce the selection of a boat and crew. Steve Kafka, owner and skipper of the expedition yacht Evohe <http://www.expedition-sailing-vessel.com/> has agreed to be our transportation partner for Mellish Reef 2014. Steve's pricing and willingness to negotiate a fair price is very much appreciated. Evohe and crew are experienced in doing DX-peditions, we are very happy to again have Steve and his crew on the team." For more details and updates, visit the VK9MT Web page at: http://www.vk9mt.com

YJ, VANUATU. Operators Kanno/JA2AAU, Iwao/JA2LSS, Iku/JA2ATE and Tug/JA2ZS (team leader) will be active as YJ0AU, YJ0CJ, YJ0TE and YJ0ZS, respectively, from the Iririki Island Resort, Port Villa, between November 1-11th. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via the following: YJ0AU and YJ0CJ via JA2ATE direct only; YJ0TE via JA2ATE and YJ0ZS via JA2ZS.

ZF2, CAYMAN ISLANDS. Curt, N0OK, will be active as ZF2OK from Grand Cayman Island (NA-016) between December 1-8th. Activity will be holiday style mostly on the Digital modes. QSL via N0OK.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31006
SIDC SOLAR BULLETIN 06 Oct 2013, 1210UT
SIDC FORECAST (valid from 1230UT, 06 Oct 2013 until 08 Oct 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 06 Oct 2013 10CM FLUX: 108 / AP: 007
PREDICTIONS FOR 07 Oct 2013 10CM FLUX: 109 / AP: 007
PREDICTIONS FOR 08 Oct 2013 10CM FLUX: 111 / AP: 007
COMMENT: Flaring activity is expected to be below C-class. Quiet (K<4) geomagnetic
conditions are expected. A partial halo CME was observed by LASCO, leaving
the Sun towards the SE quadrant on Oct 4, 19:18 UT and an homologous event
on Oct 5 07:09 UT. From STEREO imagery, the last event is determined to be
back-sided and will thus not have geomagnetic consequences. Arrival at
STEREO-B is expected in the coming days. For the first event this is not so
clear (STEREO data gap) but we presume it is back-sided too, given its
similarity and absence of on-disk associated phenomena.

21704. Ohio/Penn DX Special Bulletin #1131.1

Yahoo group: DX-IS (2013)
Date: 2013-10-06 21:57:37 UTC
From: Tedd Mirgliotta (KB8NW)
Topic: 21704 Message: 21704

SB DX @ WW < KB8NW $OPDX.1131.1
Ohio/Penn DX Special Bulletin No. 1131.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1131.1
BID: $OPDX.1131.1
October 6, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, WA4DAN and W0GJ for the following DX information.

**** NOTE FROM EDITOR: These items would have been included into today's bulletin, but I was on the road early this morning heading back to Ohio (arrived 5:00 PM EDST) from Tennessee.

CY0, SABLE ISLAND (Update). OPDX received the following from the team on Sunday [edited]: "As of 0000z on October 6th, the CY0P DXpedition team has 18,203 contacts in the log including 900 to Japan where CY0 is in the Top 20. Not sure on the departure date as it depends on the weather and the condition of the beach landing. We are scheduled for a Tuesday flight but schedules mean nothing when dealing with the weather and landing conditions! Right now Parks Canada advises the landing area has too much loose sand. We have been experiencing strong winds but nothing out of the ordinary for Sable. One of the fiberglass antenna masts broke in the strong winds but we were able to make repairs and it is operational again. We will keep operating until the last possible hour. Will keep you posted..... Murray Gary Rick CY0P Team"

NCDXF PRESS RELEASE (W7OO Contribution Challenge) [edited]: "The Northern California DX Foundation is pleased to announce the establishment of the W7OO Contribution Challenge.
Long-time DXer Bill Everett, W7OO, has issued a challenge to the world-wide DX community to contribute to NCDXF: Bill will match contributions received by NCDXF from October 15th to the end of December 2013.
This is a terrific opportunity to make your contribution count. If your employer has a matching contribution program your gift of $50 will result in $200 to NCDXF! There are many DXpeditions coming on the air over the next year, so please take this unique opportunity to have your dollars count and make it possible for NCDXF to support additional DX expeditions.
As a reminder, for those contributors who file United States income tax returns, contributions to NCDXF are tax-deductible as NCDXF is a Section 501(c)(3) entity with the IRS.
For over 50 years, NCDXF has funded major DXpeditions to many Most

Wanted countries. The credit for these large grants goes to the NCDXF
contributors who make DX like this possible. Have you contributed yet?

21705. DXpeditions 2014

Yahoo group: DX-IS (2013)
Date: 2013-10-06 22:07:34 UTC
From: Frosty
Topic: 21705 Message: 21705

DXpeditions for the year 2014

I have had several inquiries about going over to Southern Africa and doing a DXpedition. Everyone asks when the next trip is. In looking over the 2014 calendar I have thought about the following times.

· Feb: CQ WW WPX RTTY CONTEST

ARRL INTERNATIONAL CW DX CONTEST

· March: CQ WPX SSB CONTEST

ARRL INTERNATIONAL SSB DX CONTEST

· May: CQ WPX SSB CONTEST

· July: IARU HF WORLD CONTEST

· Sept: CQ WW RTTY CONTEST

· Oct: CQ WW SSB CONTEST

· Nov: CQ WW CW CONTEST

· Dec: ARRL 160 CONTEST

ARRL 10 METER CONTEST

Aside from the above suggestions, if you or a group have something else in mind as a preference for either dates or to cover a specific contest, please feel free to reach out to me via email at 3da0cf@... so we can talk about possibilities. I can cover various destinations and have plenty of experience coordinating these trips.

With fixed infrastructure in places at some venues for 7P8, A2, and 3DA, I can also cater for different venues with some upfront planning, such as C9. We are potentially looking at a 9J operation in the not-too-distant future as well.

Non radio activities are available, such as game viewing at Kruger National Park, hunting, Victoria Falls and other tourist attractions, as add-ons to the DXepidition.

Charles Frost

Frosty K5LBU

21706. Report SIDC Ursigram

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31007
SIDC SOLAR BULLETIN 07 Oct 2013, 1210UT
SIDC FORECAST (valid from 1230UT, 07 Oct 2013 until 09 Oct 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 07 Oct 2013 10CM FLUX: 107 / AP: 009
PREDICTIONS FOR 08 Oct 2013 10CM FLUX: 105 / AP: 007
PREDICTIONS FOR 09 Oct 2013 10CM FLUX: 105 / AP: 007
COMMENT: We expect essentially quiet conditions for the solar activity with a risk
for an isolated C class flare from NOAA AR 1856. It produced on October 7 a
C6.2 flare, peaking at 0414 UT. Current coronagraphic observations do not
show a CME related to this event, but data are scarce and this will be
checked in the coming hours. A C1.1 flare occurred on October 6, in Catania
region 95, east of NOAA AR 1859. Peaking at 1424 UT, it was associated with
a dimming and a faint halo CME observed in LASCO C2. This event might have
a weak effect on the geomagnetic activity, triggering active conditions by
the end of Oct. 10. For the current 48 hours, the geomagnetic activity is
expected to remain mostly quiet with possibly an isolated period of
unsettled conditions. Current ACE observations show weak excursions of the
Bz component of the magnetic field down to -5 nT, corresponding to a sector
boundary crossing.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31008
SIDC SOLAR BULLETIN 08 Oct 2013, 1210UT
SIDC FORECAST (valid from 1230UT, 08 Oct 2013 until 10 Oct 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 08 Oct 2013 10CM FLUX: 114 / AP: 010
PREDICTIONS FOR 09 Oct 2013 10CM FLUX: 117 / AP: 007
PREDICTIONS FOR 10 Oct 2013 10CM FLUX: 120 / AP: 016
COMMENT: Solar activity has been rather low in the past 24 hours, with a C2.3 flare
occurring in NOAA AR 1856, on October 07, 1540 UT (peak time). It doesn't
appear to be associated with a CME. A filament eruption occurred on October
8, after 0800 UT, close to the North-East limb. It is associated with a
CME, which is not geoeffective. We expect eruptive conditions (C flares
possible) for the next 48 hours, as AR 1856 is still capable of an isolated
C-class flare. To a lesser extent, NOAA AR 1861 might also produce a
isolate C-class event. Geomagnetic activity is currently very low and is
expected to remain so for the next 48 hours. Unsettled to active conditions
are foreseen by the end of October 10, due to the possible arrival of the
CME observed on October 6, combined with the influence of a small coronal
hole in the northern hemisphere.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31009
SIDC SOLAR BULLETIN 09 Oct 2013, 1310UT
SIDC FORECAST (valid from 1230UT, 09 Oct 2013 until 11 Oct 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 09 Oct 2013 10CM FLUX: 115 / AP: 027
PREDICTIONS FOR 10 Oct 2013 10CM FLUX: 117 / AP: 011
PREDICTIONS FOR 11 Oct 2013 10CM FLUX: 120 / AP: 003
COMMENT: An M2.8 flare peaking at 01:48 UT today was detected in the Catania sunspot
group 5 (NOAA AR 1865) near the south-east solar limb. The associated CME
was narrow and is not expected to arrive at the Earth. This sunspot group
is expected to provide more flaring on the C-level and possibly even up to
the M-level. An interplanetary shock wave was detected by ACE and
SOHO/CELIAS around 20:00 UT on October 8. The solar wind speed in the post-
shock solar wind flow reached 700 km/s, and the interplanetary magnetic
field (IMF) magnitude reached 35 nT, with brief intervals of strong (up to
-20 nT) southward fields. Dourbes, NOAA, and IZMIRAN reported minor storm
conditions (K = 5). This interplanetary disturbance is most probably
associated with the halo CME observed on the Sun on October 6. Currently
the solar wind speed is around 590 km/s. The IMF magnitude is around 10 nT,
but the north-south Bz component is close to zero. The decrease of the
proton temperature might indicate the imminent arrival of the magnetic
could. Due to high solar wind speed and IMF magnitude, disturbed
geomagnetic conditions up to the minor storm level (K = 5) are still
possible.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31010
SIDC SOLAR BULLETIN 10 Oct 2013, 1210UT
SIDC FORECAST (valid from 1230UT, 10 Oct 2013 until 12 Oct 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 10 Oct 2013 10CM FLUX: 118 / AP: 021
PREDICTIONS FOR 11 Oct 2013 10CM FLUX: 122 / AP: 010
PREDICTIONS FOR 12 Oct 2013 10CM FLUX: 126 / AP: 007
COMMENT: Despite up to eight active regions, solar activity has been rather low in
the past 24 hours, with moderate C class flares from NOAA AR 1861 and 1865.
We foresee active conditions for the next 48 hours with a fair chance for
an isolated M class event from these two regions. AR 1861 quickly evolved
in the past 24 hours, with the leading spot developing a delta magnetic
configuration. AR 1865 remains a complex region, and is still capable of
producing M flares. C flares are possible from NOAA ARs 1862 and 1856. We
expect geomagnetic activity to stay at unsettled to active conditions
levels for the next 24 hours (as a sector boundary crossing is expected by
the end of Oct. 10) and then return to mostly quiet conditions in the
second half of October 11. Current ACE observations show a very slow return
to quiet solar wind conditions after the shock of late Oct. 8, and the
subsequent crossing of the associated ICME, which started on Oct. 9 around
1000 UT.

SB DX ARL ARLD041
ARLD041 DX news

This week's bulletin was made possible with information provided by NC1L, PA3AD, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

VIET NAM, 3W. Look for Mike, 3W2DK to be QRV from October 17 to November 2. Activity will be on 20, 17, 15 and 10 meters. QSL via N0ODK.

GUYANA, 8R. Alex, W1CDC plans to be QRV as 8R1A from October 13 to November 1. Activity will be holiday style on 80 to 10 meters with a focus on 80, 30, 17, 12 and 6 meters using CW. QSL to home call.

SIERRA LEONE, 9L. Jerry, K4ZIN and William, N4WDT will be QRV as 9L1JT from October 15 to 22. Activity will be on the HF bands with a focus on 30, 17 and 12 meters with two stations active 12 hours each day. QSL direct via N4WDT.

BHUTAN, A5. Operators JH3AEF, JH7EQW and JA3IVU are QRV as A52AEF, A52EQW and A52IVU, respectively, until October 20. Activity is on 160 to 10 meters using CW, SSB and digital modes. QSL to home calls.

MOZAMBIQUE, C9. A large group of operators plan to be QRV as C82DX from October 15 to 22. Activity will be on 160 to 6 meters using CW, SSB and RTTY. QSL via operators' instructions.

ANGOLA, D2. Joao, CT2HPM is QRV as D2CT from Luanda until November 15. Activity is on 20, 17, 15, 12 and 10 meters using mostly RTTY and PSK31. QSL to home call.

SOUTH COOK ISLANDS, E5. Fabio, IZ0YIV is QRV as E51YIV from Rarotonga Island, IOTA OC-013, until October 13 and then Aitutaki Island, IOTA OC-083, from October 13 to 17. Activity is on the HF

bands using SSB and various digital modes. QSL to home call.

ANTARCTICA. Max, IW0HEU will be QRV as IA0MZ from the Mario Zucchelli Base Station beginning after October 14 until January 31, 2014. Activity will be mainly on 20 meters SSB in his spare time. QSL via IW0EFA.

SVALBARD, JW. LA9DL and LA7XK are QRV as JW9DL and JW7XK, respectively, until October 14. They will be active as JW5X in the Scandinavian Activity SSB contest. QSL via operators' instructions.

LITHUANIA, LY. The national Lithuanian ham radio organization Lietuvos Radijo Megeju Draugija is QRV as LY75RMD during October in celebration of its 75th anniversary. QSL via bureau.

SEYCHELLES, S7. Andrea, IZ1MHY is QRV as S79MHY from Praslin Island, IOTA AF-024, until October 17. Activity is on 160 to 10 meters using all modes. QSL to home call.

PALAU, T8. Kiichi, JF1LUT is QRV as T88IK from Arakabesan Island, IOTA OC-009, until October 15. Activity is on 17 to 6 meters using only SSB. QSL to home call.

TURKEY, TA. Special event station TC90TC will be QRV from October 14 to 21 to celebrate the 90th anniversary of the Turkish Republic. Activity will be on the HF bands with all modes. QSL via TA1HZ.

CONGO (REPUBLIC OF), TN. Operators PA3A, PD1AEG, PA8AD and PA8AN will be QRV as TN2MS from October 12 to 24 while part of the 4th DAGOE Mercy Ships Radio DX-Pedition. Activity will be on the HF bands using CW, SSB and RTTY as time permits. QSL via PA3AWW.

EUROPEAN RUSSIA, UA. Special event station R100MFF will be QRV from October 15 to December 15 to commemorate the 100th birthday of the legendary radio operator Michail Fjodorowitsch Feofanov. QSL via UA4AM.

ST. KITTS AND NEVIS ISLANDS, V4. John, W5JON and Cathy, W5HAM are QRV as V47JA and V47HAM, respectively, from St. Kitts until November 10. Activity is on the HF bands using SSB and digital modes. W5JON will be QRV as V49J in the upcoming CQ WW SSB contest. QSL via operators' instructions.

MICRONESIA, V6. Yuki, JH1NBN is QRV as V6P from Pohnpei until October 17. Activity is on 80 to 6 meters using SSB in his free time. QSL to home call.

LORD HOWE ISLAND, VK9L. Fred, VK3DAC plans to be QRV as VK9DAC from October 14 to 20. Activity will be on 80, 40, 20, 15, 10 and 6 meters during his morning and evening hours. QSL to home call.

INDONESIA, YB. Budi, YF1AR will be QRV as YF1AR/0 from Payung Besar Island, IOTA OC-177, from October 12 to 15. Activity will be on 40

to 10 meters using mainly SSB with some CW. QSL via N2OO.

THIS WEEKEND ON THE RADIO. North American RTTY Sprint, Oceania DX CW Contest, SKCC Weekend CW Sprintathon, NCCC RTTY Sprint Ladder, NCCC Sprint, Makrothen RTTY Contest, Microwave Fall Sprint, Scandinavian SSB Activity Contest, QRP ARCI Fall QSO CW Party, EU Autumn CW Sprint, Arizona QSO Party, Pennsylvania QSO Party, FISTS Fall CW Sprint, PODXS 070 Club 160-Meter Great Pumpkin PSK31 Sprint and the UBA ON CW Contest will certainly keep contesters busy this upcoming weekend. Please see October QST, page 89, and the ARRL and WA7BNM contest web sites for details.

SIDC FORECAST (valid from 1230UT, 11 Oct 2013 until 13 Oct 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 11 Oct 2013 10CM FLUX: 128 / AP: 007
PREDICTIONS FOR 12 Oct 2013 10CM FLUX: 132 / AP: 007
PREDICTIONS FOR 13 Oct 2013 10CM FLUX: 136 / AP: 007
COMMENT: Solar activity is expected to stay at active levels for the next 48 hours,
with M flares likely from NOAA AR 1861 and 1865. AR 1861 continues to grow
in complexity and size and is likely to produce M class events (two C5
flares occurred in this region on Oct. 11). AR 1865 doesn't evolve much,
but retains a capability of producing C and M class flares. A region,
currently behind the East limb (N21) produced a M1.5 flare on Oct. 11, 0723
UT (peak time). It was accompanied by a wide CME, a coronal EUV wave and a
metric type II burst. More M class event might occur in this region, but no
proper assessment can be done until magnetic observations are available. It
is unlikely, due to the position of the source region that the CME will
have an effect on the geomagnetic activity. Finally, there is an indication
of a filament eruption, which occurred on Oct. 11, arount 02-03 UT, north
of AR 1867. Due a data gap in LASCO data, we do not know if a CME is
associated with this event. Geomagnetic activity is expected to be mostly
quiet for next 48 hours. Current ACE observations show very quiet
interplanetary conditions.

Propagation Forecast Bulletin 41 ARLP041
>From Tad Cook, K7RA
Seattle, WA October 11, 2013
To all radio amateurs

SB PROP ARL ARLP041
ARLP041 Propagation de K7RA

Solar activity picked up over the seven days of our reporting week, October 3-9, and the outlook has improved somewhat. There now are no predictions for the solar flux dropping below 100 in the next 45 days. October 6 was the date of the last forecast predicting any flux values below 100. These predictions were for periods later in October and again in November.

Average daily sunspot numbers increased by 47 points to 79, and average daily solar flux increased 3.8 points to 110.4. These averages compare the recent October 3-9 period with the previous seven days, September 26 through October 2.

The latest prediction for solar flux is 125 on October 11-13, 120 on October 14-16, 115 on October 17, 105 on October 18-23, 100 on October 24-29, 105 on October 30-31, 100 on November 1-2, 105 on November 3-4, 100 on November 5-6, and 105 on November 7-15.

Predicted planetary A index is 10 on October 11-12, 5 on October 13, 8 on October 14-15, 10 on October 16, 8 on October 17, 5 on October 18-20, 10 on October 21, 5 on October 22 to November 6, 10 on November 7-8, and 8 on November 9-12.

OK1HH predicts geomagnetic activity as quiet to unsettled October 11, mostly quite October 12, quiet October 13, quiet to unsettled October 14-16, quiet to active October 17-18, quiet October 19-20, quiet to active October 21, mostly quiet October 22, quiet October 23-27, quiet to active October 28, and active to disturbed October 29-30.

NBC news has an article about Tuesday's solar flare, which was strong considering how quiet the Sun has been lately, but was not aimed directly at Earth. Planetary A index rose to 24 on Wednesday, October 9, and Alaska's college A index hit 40.

You can read the article at,
http://www.nbcnews.com/science/strongest-solar-flare-months-unleashed-sun-8C11369482

Tomas Hood, NW7US, who writes propagation columns for CQ, CQ VHF and Popular Communications, sent a video he put together concerning a solar flare mentioned in last week's Propagation Forecast Bulletin ARLP040:

http://g.nw7us.us/19hP1c3

Silverio, IK3IUL sent an inquiry, but replies to him seem to be bouncing. Perhaps he could try again via another email account.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for October 3 through 9 were 61, 84, 69, 53, 76, 99, and 111, with a mean of 79. 10.7 cm flux was 113.8, 109.1, 105.9, 106.5, 112, 111.9, and 113.4, with a mean of 110.4. Estimated planetary A indices were 6, 2, 1, 2, 6, 16, and 24, with a mean of 8.1. Estimated mid-latitude A indices were 5, 2, 2, 3, 8, 12, and 21, with a mean of 7.6.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31012
SIDC SOLAR BULLETIN 12 Oct 2013, 1110UT
SIDC FORECAST (valid from 1230UT, 12 Oct 2013 until 14 Oct 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 12 Oct 2013 10CM FLUX: 132 / AP: 010
PREDICTIONS FOR 13 Oct 2013 10CM FLUX: 134 / AP: 007
PREDICTIONS FOR 14 Oct 2013 10CM FLUX: 134 / AP: 016
COMMENT: Active conditions are expected to prevail for the next 48 hours, with risks
of M class events from NOAA ARs 1861 and 1865. Both regions are
magnetically complex enough for such class of flares, but somehow do not
show anymore significant evolutions. Many C flares occurred in the past 24
hours related to these two regions. A noticeable one, a C6.2 event,
occurred in AR 1865 on Oct. 11, 1228 UT peak time. It was associated with a
CME, which is heading essentially eastward, compared to the Earth, and is
therefore expected not to be geoeffective. We expect quiet geomagnetic
conditions for the next 24-36 hours, and then unsettled to active
conditions by the second half of Oct. 14, due a small coronal hole becoming
geoeffective. Current interplanetary conditions are quiet.

Does anyone have a current e-mail address to YV5AIE? I lost about 2000 q's of contest logs awhile back, and can not verify his date of qso (I cant't read it). Would like to confirm, but email keeps bouncing. It would make a big difference if he were working on WAS, or Grids QRZ keeps bouncing
TIA
Dale K8TS

QRZ.COM has yv5aie@... . . . but you said that bounces.
This database seems to have his record archived to pre-2000:

http://hamcall.net/call/YV5AIE%3A2000

It has no email address.

Also doing SH/DX YV5AIE on the DX Cluster shows no spots . . . I have archives of spots going back a number of years on the VE1DXI node and he ain't there.

All of this indicates he isn't very active. Did you just get the QSL request? I see no evidence on the DX Clusters or a Google search that suggests he has been active in the past 5-6 years. When did you work him (what year?)

73, Paul VE1DX

12 October 2013 A.R.I. DX Bulletin
No 1171
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3D2 - Andrey, 3D2RA and Stan, 3D2GC/p went QRT from Rotuma earlier than planned, and have been active as 3D2RA/p and 3D2GC from Fiji since 5 October. According to their original plans, they will remain there until 13 October (Andrey) and 15 October (Stan). QSL via home calls. Further information on http://3d2gc.com/.
6W - Mark, AA1AC will operate as 6W/AA1AC on 8-14 December from Le Calao's rental shack in Sonome, Senegal. QSL via home call, direct or bureau. [TNX AA1AC]
9L - David, N4WDT and Jerry, K4ZIN will be active as 9L1JT from Sierra Leone on 15-22 October. They plan to be QRV on 160-10 metres, with a focus on 30, 17 and 12m and on the low bands. They will have two stations on the air at least 12 hours a day. QSL via N4WDT. [TNX NG3K]
DU - James, KJ6YAP will be active as DV1/KJ6YAP from Masbate Island (OC-244) between 28 October and 24 November. QSL via home call, direct or bureau. [TNX rsgbiota.org http://rsgbiota.org]
E6 - Sasi/JA1KJW (E6AK), Mat/JA1JQY (E6AY) and Kuni/JA8VE (E6AA) will be active from Niue (OC-040) on 3-9 November. They will operate CW, SSB and digital modes on 80-10 metres. QSL via home calls. [TNX NG3K]
EI - Olivier, ON4EI will be active again as EI8GQB from Fethard, Ireland (EU-115) on 20-30 October using an hybrid wind-solar power system from his caravan. He will participate in the CQ WW DX SSB Contest as EI1A. QSL for both callsigns via PA3249. Follow his activity and antenna experimentation on www.qrz.com/db/EI8GQB http://www.qrz.com/db/EI8GQB. [TNX ON4EI]
HB0 - Laci, HA7JTR will be active as HB0/HA7JTR from Liechtenstein on 24-29 October. Main activity will be during the CQ WW DX SSB Contest. He will run 100 watts to a GP for 40-10 metres and an Inverted Vee for 80 metres. QSL via home call. [TNX HA0HW]
HB9 - HB9S, the amateur radio station of the World Scout Bureau, will be on the air from Geneva during the Jamboree On The Air annual event (http://scout.org/en/ information_events/events/ jota_joti http://scout.org/en/information_events/events/jota_joti) on 19-20 October. The 56th JOTA in 2013 will be the last one for HB9S, as

The WSB (the HQ of the World Organization of the Scout Movement)
intends to move out of Geneva next year. QSL via HB9AOF.
I - IT9ATF, IT9NPR, IT9PPG and IT9RDG will participate in the CQ WW
SSB Contest as IF9A from Favignana Island (EU-054) in the
Multi-Single category. QSL via IT9ATF. [TNX NG3K]
J3 - Mark, N2MD and Arnal, N9ACC will be active holiday style as
J3/N2MD and J3/N9ACC from Grenada (NA-024) on 23-30 October. They
will be QRV on 80-6 metres SSB. QSL via LoTW only. [TNX The Daily
DX]
J3 - J34J is the callsign to be used on 20-29 November from Grenada by
a group of Japanese operators [425DXN 1164]. They plan to be
active on 160-10 metres CW, SSB and digital modes, and to
participate in the CQ WW CW Contest. QSL via JA1HGY (OQRS to be
activated on Club Log) and LoTW. [TNX NG3K]
KG4 - Bill, W4WV (KG4WV) and Al, W6HGF (KG4HF) will be active from
Guantanamo Bay (NA-015) on 11-25 October [425DXN 1170]. KG4HF
(www.qsl.net/w6hgf/KG4HF.html http://www.qsl.net/w6hgf/KG4HF.html) will focus on RTTY and
other
digital modes, with some CW when time permits. He will be QRV on
160-10 metres, plus 6 metres if the band is open. "This is not a
vacation", he says. "I plan to operate until I fall asleep". QSL
KG4HF via LoTW or direct to W6HGF (logserach on Club Log). QSL
KG4WV via W4WV, direct or bureau.
KH0 - Miho, JJ2VLY and Yutaka, JQ2GYU will be active as NH0J from Tinian
Island, Mariana Islands (OC-086) on 17-21 October. They will
operate CW, SSB and RTTY on 80-10 metres. Miho will participate in
the JARTS WW RTTY Contest (http://jarts.jp/rules2013. html http://jarts.jp/rules2013.html)
on
19-20 October. QSL via JJ2VLY, direct or bureau. [TNX NG3K]
KH2 - Yuji, JF2WGN will be active as AH2EA from Guam (OC-026) on 17-21
October. All of the QSOs will be confirmed via the bureau, direct
cards should be sent to JF2WGN not later than 31 January 2014.
LY - The Lietuvos Radijo Megeju Draugija, the Lithuanian Amateur Radio
Society, was establihed on 2 October 1938. Celebrating this 75th
anniversary, special callsign LY75RMD will be used until 31
October. QSL via the bureau.
P2 - Akira, JA1NLX (www.asahi-net.or.jp/~yy7a- ysd/P29VNX-2013.htm
http://www.asahi-net.or.jp/%7Eyy7a-ysd/P29VNX-2013.htm) has
rescheduled his trip to Lissenung Island, Bismarck Archipelago
(OC-008), and now he plans to be active as P29VNX on 1-6 December.
He will operate CW, SSB and RTTY on 30-10 metres. QSL via JA1NLX
(direct only) and LoTW. An OQRS for direct and bureau cards will
be available at Club Log (bureau cards will be sent through Global
QSL).
PY - A team from Brazil (PP5ALE, PU5IKE, PU5SVE, PU5UAI, PY5FAB,
PY5JAP, PY5PS, PY5RCB, PY5VC and PY5XH) will be active as PR5C
from Ilha do Mel (SA-047) on 25-30 October, including an entry in
the CQ WW SSB Contest. QSL via PU5SVE, LoTW and eQSL. Further
information at www.pr5c.qsl.br http://www.pr5c.qsl.br
PY0F - Miguel, PY3MM will be active from Fernando de Noronha(SA-003) on

18-28 October. Main activity will be during the CQ WW DX SSB
Contest as PR0F on 40 metres, while outside the contest he will
operate mainly CW as PY0F/PY3MM. QSL via PP5VB. [TNX NG3K]
T8 - Kunio, JO1AEC will be active as T88EC from Palau on 15-23 October.
He will be QRV on 40-10 metres CW, RTTY and JT65. QSl via JO1AEC,
direct or bureau. [TNX The Daily DX]
TK - Mek, SP7VC will be active as TK/SP7VC from Corsica (EU-014) on
22-28 October. He will be QRV on 160-6 metres SSB and FSK441 via
meteor scatter on 6m. He will also participate in the CQ WW DX SSB
Contest. QSL via home call and LoTW. [TNX NG3K]
UA - Special station R100MFF will be active from 15 October to 15
December in remembrance of Mikhail F. Feofanov (1913-1994,
callsigns U4AA and UA4AA). QSL via UA4AM. Further information on
this "legendary radio operator", as well as an OQRS for bureau
cards and details on the relevant award, can be found at
www.cqr4a.ru/r100mff/ http://www.cqr4a.ru/r100mff/ [TNX DXNL]
V2 - Kei, KG2A will be active as V25A from Antigua (NA-100) from 21
November to 1 December. He will operate CW and SSB on 160-10
metres, and will participate in the CQ WW DX CW Contest. QSL
direct to KG2A. [TNX NG3K]
V3 - Dick, AD7AF will be active again as V31RL from Placencia, Belize
on 11-30 October. He will operate CW and SSB on 80-10 metres, with
activity during the CQ WW DX SSB Contest. QSL via home call,
direct or bureau, and LoTW. Logsearch on Club Log. [TNX The Daily
DX]
VP5 - Frank, WA2VYA, and Tony, K4QE will be active from Providenciales,
Caicos Islands (NA-002) on 22-29 October, including an entry in
the CQ WW DX SSB Contest as VP5T (QSL via WA3RHW, direct or
bureau, and LoTW). Outside the contest VP5/WA2VYA will operate CW,
and possibly some RTTY or SSB, with an emphasis on 160, 80, 30,
17, 12 and 10 metres (QSL via WA2VYA, direct - no return postage
is required- or bureau), while VP5/K4QE will be operate mainly
SSB, with an emphasis on 17 and 12 metres (QSL via LoTW). [TNX
WA3RHW]
VP8 - Peter, M1AYI expects to be active as VP8DNY from the Falkland
Islands (SA-002) between 20 October and 19 November. He will
operate SSB on the HF bands. QSL via bureau to M1AYI. [TNX VK7BC]
W - Members of the Jackson County Amateur Radio Association
(www.jcmsara.com http://www.jcmsara.com) will be active as K5R from Round Island (NA-082)
and lighthouse on 18-20 October. They will be QRV on 80-10 metres
CW, SSB and RTTY/PSK31. QSL via AE5JG. [TNX OPDX Bulletin]
W - "Assuming the National Park Service reopens the island in time",
Benjamin, KK6FUT will be on Santa Cruz Island (NA-144) on 19-20
October with a Boy Scout Troop for the Jamboree On The Air. Plan
is to operate QRP (50W or less) on 20, 15 and maybe 40 metres SSB.
QSL via KK6FUT, direct or bureau.
XT - David, OK6DJ and Petr, OK1FCJ will be active as XT26DJ and XT2FCJ
from Burkina Faso on 17-26 November. They will be QRV on 160-10
metres. Look for XT2FCJ to participate in the CQ WW DX CW Contest.
QSL for both callsigns via OK6DJ. Logsearch and QSLling policy at

www.qrz.com/db/XT26DJ http://www.qrz.com/db/XT26DJ
YB - Adhi, YB3MM has plans to operate as YB3MM/p from Bawean Island
(OC-197) this weekend. He expects to be active on 40, 20 and 15
metres SSB and CW, but "nothing is certain until he is actually on
the island and operating", W2FB says.
YB - Budi, YF1AR (www.yf1ar.com http://www.yf1ar.com) will be active as YF1AR/0 from Payung
Besar, Seribu Islands (OC-177) on 12-15 October. He will operate
mainly SSB running 100 watts into a vertical dipole for 20, 15 and
10 metres, and a GP for 40 metres. QSL via N2OO. [TNX YF1AR]
YB - Look for YB8VM/p, YB8XM/p, YC8VDT/p, YC8VFB/p, YD8VKF/p, YD8VRA/p,
YD8VRS/p and YD8VSR/p to be QRV from Saparua Island (OC-070) on
12-15 October. [TNX JN6RZM]
YB - Budi, YF1AR (www.yf1ar.com http://www.yf1ar.com) and Fan, YB0AI will be active as
YF1AR/7 (QSL via N2OO) and YB0AI/7 (QSL via home call) from
Sebatik Island (OC-295) on 23-28 October, including activity
during the CQ WW DX SSB Contest. They will be QRV on 40-10 metres
mainly SSB. This will be the first operation from the Indonesian
side of Sebatik, and it will count as a new one for the Nusantara
Award (the Indoensian Islands Award: www.nusantaraaward.com http://www.nusantaraaward.com)
[TNX
YF1AR]
YB - The YE5R expedition to the Anambas Islands (OC-108) [425DXN 1167]
has been postponed to sometime between 10 and 20 November
(possibly 14-19 November). A large team (YB1AR, YB1HK, YB4IR,
YB5QZ, YB6CA, YB6ODD, YB6VK, YB7GRN, YC2WWW, YC5WIR, YE5TA, YE5YE,
YE6YE, YF1AR and YG5TZ) is expected to participate in the
expedition. QSL via YB4IR. Logsearch and OQRS on Club Log. [TNX
W2FB]

ANTARCTICA ---> Massimo, IW0HEU will be working at the Mario Zucchelli
Station, Antarctica after mid-October until at least 31 January 2014. He
plans to be QRV as IA0MZ in his spare time, typically between 17.30-18.30
UTC around 14333 kHz. QSL via IW0EFA, bureau preferred. [TNX I1HYW]

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

NCDXF CONTRIBUTION CHALLENGE ---> The Northern California DX Foundation
(www.ncdxf.org http://www.ncdxf.org) is pleased to announce the establishment of the W7OO
Contribution Challenge. Long-time DXer Bill Everett, W7OO, has issued a
challenge to the worldwide DX community to contribute to NCDXF: Bill will
match contributions received by NCDXF from October 15 to the end of
December 2013. [TNX W0GJ]

QSL JY9FC ---> Boris, E73Y reports that the QSL cards for Jovica, JY9FC
have arrived from the printer. All of the direct requests received so far
(by mail and through Club Log's OQRS) were processed on 5 October.

QSL ZC4LI ---> Phil, G3SWH has managed to obtain copies of the late Steve Hodgson's logs (ZC4LI, 5B4AHA, ZD8LII and G0LII) from his widow and should be able to confirm any outstanding QSOs. All logs have been previously uploaded to LoTW, and there will be log searches available shortly at www.g3swh.org.uk http://www.g3swh.org.uk. "I understand that Steve's widow has already returned to
their sender any unanswered QSL requests at the time of his death", Phil says. "Anyone in that situation should re-apply to me". Steve was not a member of the RSGB, and Phil is unable to process any bureau requests whatsoever.

+ SILENT KEYS + Robert W. Ford, who operated from Tibet as AC4RF on 1948-50, passed away on 20 September at 90 years of age. "His fascinating autobiography, 'Wind Between the Worlds', published in 1957 and available as a free Internet Archive (http://archive.org/ http://archive.org/) download, describes his
time and travails in Tibet and how his radio work nearly cost him his life". [TNX ARRL]
Other recently reported Silent keys include Ulrich Mauer (DK9UMA), Robert B Block (K6LX), Richard N. Olson (K9BWI), Billy W. Putnam (W3EL) and Les Himing (ZL3BG), as well as Raleigh "Lee" Shaklee (W6BH), one of the co-founders of the Northern California DX Foundation, and Panos Gkekas (SY2ALT), eighteen-year-old son of Vangelis, SV2BFN.

---------- ---------- ----------

QSLs received direct or through managers: 3DA0TM, 5W0TH, 9A/OM5AW (EU-136), 9G5TT, 9H3MMM, 9M4SLL, A35UD, A52SV, A71CM, A71CT, C31CT, CP4BT, CQ9D (AF-046), CU5AQ, D2QR, EJ0PL (EU-006), ES1QD, F9IE/VK/p (OC-136), FO/UT6UD, FR4NT, GM3VLB/p (EU-123), GX5M (EU-120), H40IOTA, H44AJ (OC-285), H44IOTA, HB0Y/PD5AX, HH2/PA5M, HH5/KC0W, HK1X, HK1XX, HP1RIP, HQ3W (NA-160), HQ8D (NA-223), HQ8S (NA-035), HV0A, JG8NQJ/JD1 (OC-073), JY5HX, K4N, K6VVA/KL7 (NA-050), K8GI/4 (NA-058), KG4RX,KG4TO,KL7NWR (NA-064), MD0CCE, MU0FAL, N4OW (NA-141), NE1RD/1 (NA-148), OH0/OH2FNZ, P29NO, PX8Z (SA-060), S79NU, SV2ASP/A, SZ7SER, T2YY, T6SM, TF4M, TI2CF, TT8/US3EZ, TZ6BB, V31LJ, V5/DF2UU, V63DDD (OC-010), V85TL, VE2CSI, VK5CE/p (OC-261), VP2ETE, VP2V/W9DR, VP5H, VP9/AA1AC, VP9I, XF3/IZ2LSC (NA-045), XV1X, YB1AR, YB3MM/6 (OC-245), YB3MM/7 (OC-166), YB3MM/p (OC-217), YB3MM/p (OC-237), YC9MLL (OC-151), YV5EED, YW5X (SA-054), ZB2JK.

21720. Re: [DX-IS] qsl

Yahoo group: DX-IS (2013)
Date: 2013-10-13 04:46:18 UTC
From: dale cole
Topic: 21716 Message: 21720

Unfortuntly Paul that is the reason I wanted to contact him. His handwriting is unclear when he posted the date on the qsl card which I got in the mail yesterday. I wanted to confirm the date. I lost a great many qso records a year of so ago on a computer crash. My data bases on LoTW anACLog, do not show him up. He refers to me as K9TTT, which I changed in mid summer 2008. It looks like I'm going to handle this as a busted call. I really feel that it is for these very reasons, the sticker type of the data is the only way to go.
Thanks for the info
73
Dale K8TS

> Does anyone have a current e-mail address to ? I lost about 2000 q's of contest logs awhile back, and can not verify his date of qso (I cant't read it). Would like to confirm, but email keeps bouncing. It would make a big difference if he were working on WAS, or Grids QRZ keeps bouncing
> TIA
> Dale K8TS
>

QRZ.COM has yv5aie@... . . . but you said that bounces.
This database seems to have his record archived to pre-2000:

http://hamcall.net/call/YV5AIE%3A2000

It has no email address.

Also doing SH/DX YV5AIE on the DX Cluster shows no spots . . . I have archives of spots going back a number of years on the VE1DXI node and he ain't there.

All of this indicates he isn't very active. Did you just get the QSL request? I see no evidence on the DX Clusters or a Google search that suggests he has been active in the past 5-6 years. When did you work him (what year?)

73, Paul VE1DX

21721. Report SIDC Ursigram

```
:Issued: 2013 Oct 13 1220 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31013
SIDC SOLAR BULLETIN 13 Oct 2013, 1210UT
SIDC FORECAST (valid from 1230UT, 13 Oct 2013 until 15 Oct 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 13 Oct 2013 10CM FLUX: 132 / AP: 007
PREDICTIONS FOR 14 Oct 2013 10CM FLUX: 132 / AP: 014
PREDICTIONS FOR 15 Oct 2013 10CM FLUX: 134 / AP: 011
COMMENT: Active conditions are foreseen for the next 48 hours, with NOAA AR 1865
being the main candidate for an isolated M class flare, as well as, but to
a lesser extent, AR 1861. An M1.7 flare occurred in AR 1865 on Oct. 13,
0043 UT (peak time). It was associated with a partial halo CME as observed
from SOHO by LASCO. We expect the bulk of this CME to pass south of the
Earth, but a partial hit is not excluded, with a possible arrival time on
Oct. 16, around mid-day, triggering unsettled to active geomagnetic
conditions. We expect quiet geomagnetic conditions for the next 24 hours,
and then unsettled to active conditions by the end of Oct. 14, due a small
coronal hole becoming geoeffective. Current interplanetary conditions are
rather quiet, with weak Bz negative excursions, linked to a sector boundary
crossing.
TODAY'S ESTIMATED ISN : 094, BASED ON 05 STATIONS.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th-October, through Sunday, 13th-October there were 221 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9X, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FO/a, FP, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, PA, PJ2, PJ4, PJ5, PY, PZ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP6, VP8, VP8/h, VP9, VR, VU, XE, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5X, UGANDA. Eric, SM1TDE, is currently active as 5X8A from Entebbe. He showed up on the air on October 11th. Activity has been on 40/30/20/17/15

meters CW. However, Eric will be QRT for for 2 days (Monday and Tuesday), but he hopes to be active again between Wednesday and Friday, mainly in the mornings and evenings. He will go QRT after this. QSL via his home callsign. Look for Eric to post more updates and pictures on his Blog page at: http://sm1tde.bloggspace.se

7P, LESOTHO. Gert, ZS6AYU, will once again be active as 7P8GF from Roma between October 23-26th (tentative). Activity will be holiday style on 40-10 meters, CW only and using just 100 watts into a vertical. QSL via ZS6AYU (see QRZ.com).

9A, CROATIA. Operators Tomi/HA4DX and Laci/HA0HW will be active as 9A/homecall and homecall/mm on their way to Croatia between October 18-21st. They will do some work on the yacht before winter and do some sailing for the last time this year. QSLs via the HA Bureau.

9L, SIERRA LEONE (Update). Operators David/N4WDT and Jerry/K4ZIN will be active as 9L1JT from here between October 15-20th. Activity will be on 160-10 meters with a focus on the 30/17/12 meters and lower bands. They will have two stations on the air at least 12 or more hours a day. QSL via LoTW or via their home callsigns.

9L, SIERRA LEONE. Zbig, SP5BTB, will once again be active as 9L1BTB from Freetown for the UN between October 25th and November 10th. Activity this time will only be 20 and 15 meters using a sloper for 20m and a DL special collinear Delta Loop (ON6WG/F5VIF model) for 15 meters. He did not mention what modes he will use, but he does operate CW, SSB and RTTY. QSL via his home callsign direct.

9Y4, TRINDADE AND TOBAGO. Chris, 9Y4D (ex-9Y4NZ), will be active during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/Single-Band (20m)/Assisted/Low-Power entry. QSL via 9Y4D (see QRZ.com).

A7, QATAR. Members of the Qatar Amateur Radio Society are heading for the beach again for a Multi-Op entry in the CQWW DX SSB Contest (October 26-27th) as A71BX. Operators mentioned are Saif/A71AM, Ali/A71BX, Abdulla/A71CV, Khalid/A71CO, Mohammad/A71EL, Faisal/9K2RR, Dave/K5GN and Daniel/K1TO. The Field-Day style set-up will begin the weekend before the contest, so look for them from then until sunrise, after the contest is when it all comes down. Activity on the 30/17/12m bands are not planned - the objective is the contest. QSL via EA7FTR. NO BUREAU QSLS.

AFRICAN TOUR (Update). Wim, ON6DX (ex-ON4CIT), will once again return to Togo (Grid Square JJ06rf) on November 18th and will be active as 5V7TH. Activity will be on 40-6 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY. He plans to be on in the evening on 40 and 30 meters. See Web site at: http://dxpedition.be/5V7TH.html
Wim also mentions that he will travel during the day to Benin to collect his TY1 callsign papers which are supposed to be ready. During that same day, he will try to search for a nice QTH in Grand Popo (Benin) for his TY1 DXpedition and move from Togo to Grand Popo, Benin, when everything is sorted out. So, he now expects to be active between November 20th and

December 3rd. Activity will also be on 40-6 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY. He plans to be on in the evening on 40 and 30 meters. See Web site at: http://dxpedition.be/Benin.html QSL both callsigns via his home callsign, direct (2 USDs/EU and 3 USDs/US), by the Bureau, LoTW (uploaded year later) or by the ClubLog's OQRS.

ARRL NEWS (Updating ARRL.NET Forwarding Service). On October 15, 2013, the ARRL will be switching providers for the ARRL.NET E-mail forwarding service. The change will take place at 8:00am Eastern Time. There should be no interruption in the forwarding of messaging during this transition. If you find that delivery of messages to you has been disrupted, please E-mail <itstaff@...>..... Thank You, ARRL HQ Staff

C8, MOZAMBIQUE (Just a Reminder!). An international team of operators will be active as C82DX from Xai Xai (WW Loc KG64) between October 15-22nd. Operators' list has been updated and includes Bill/K1MM, Doug/N1DG, Tom/N4XP, Kevin/K6TD, Charlie/NF4A, Ray/N9JA, Charles/W6OAT, Bruce/W6OSP, Tjerk/ZS6P (C91TJL), Pierre/ZS6PJH and Christian/ZS6RI. Activity will be on 160-10 meters using CW, SSB and RTTY. Suggested frequencies are available in OPDX.1114. QSL via the OQRS by ClubLog (Highly Recommended/Preferred Method) to receive a QSL either direct and by the Bureau. To QSL direct via the mail, send it to: C82DX, Box 333, Bethlehem, GA 30620 USA [Please do not send IRCs. See details on their Web page]. They will not confirm QSOs via the eQSL system. The C82DX Web page is at: http://c82dx.com

CASTLES NEWS.....
October 20th - Ivo, ON7IVO, will be active as ON7IVO/P from V12 Bunkery Castle (WCA ON-01932, BCA AN-208). Activity will be on 40 meters SSB. QSL via his home callsign, by the Bureau or direct.

October 26th - Operators Susanne/ON2SL, Roger/ON4AHQ, Andre/ON4DTO and Erwin ON5BWE will be active as ON5BWE/P from Ordingen Castle (WCA ON-01134, BCA LB-103). Activity will be on 80 and 40 meters only SSB. QSL via ON5BWE, by the Bureau or direct.

CY0, SABLE ISLAND (Update). The CY0P team is now QRT as 1830z, October 9th. They were expected to depart the island that day around 2100z. The team reported on October 8th, at 0100z [excerpts]: "The CY0P DXpedition team reports 24,414 contacts in the log as of 0100z on October 8th. The team reported excellent band conditions with very strong signals. The weather forecast is not looking good for a Tuesday departure..... Needless to say the team is exhausted. There are three operators and three stations so 12-14 hour days at the radio have been the norm." QSL via VE1RGB. For more details and updates, see: http://www.cy0dxpedition.com

ED9, CEUTA AND MELILLA. Operators Jorge/EA7HZ, Julio/EA7JB, David/EA7JW, Cris/EA7RU and Jorge/EA9LZ will be active as ED9Z from Ceuta during the CQWW DX SSB Contest (October 26-27th) as a Multi-? entry. The group will be using all Spiderbeam antennas. QSL via EA5KB and LoTW.

HB0, LIECHTENSTEIN. Laci, HA7JTR, will be active as HB0/HA7JTR from Masescha (1240m ASL) between October 24-29th. Activity will be holiday style on 80-10 meters using 100 watts into a 4 band DunaX Gp for 40-10m, and Inverted Vee for 80m. Laci will also take part in the CQWW DX SSB Contest (October 26-27th). QSL direct via his address on QRZ.com.

HI, DOMINICAN REPUBLIC. Jim, K8MR, will be active as HI/K8MR from Punta Cana between November 15-25th. He plans to be in the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band/QRP entry. Jim informs OPDX that he will be taking his Elecraft KX3 and some wire and will modestly be operating outside the contest [to keep his wife happy]. He states, "Probably whatever operating I do outside the contest will be focused on the WARC bands." QSL via K8MR.

HK0/S, SAN ANDRES ISLAND (Update). Members of the "DX Friends" will activate San Andres Island (NA-033) between November 1-10th. The current list of operators mentioned are Alberto/EA1SA, Toni/EA5RM (Team Leader), Roberto/EA2RY, Manolo/EA7AJR, Jose/EA7KW, Fabrizio/IN3ZNR, Alain/F6ENO, Tony/F8ATS, Faber/HK6F, Bernard/F9IE, Roberto/HK3CW and Valery/RG8K. Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are:
CW - 1824, 3524, 7004, 10104, 14024, 18074, 21024, 24894 and 28024 kHz
SSB - 1845, 3780, 7065/7160, 14195, 18145, 21295, 24945 and 28494 kHz
RTTY - 7035, 10140, 14080, 18100, 21080, 24921 and 28080 kHz
6m - 50105/CW and 50115/SSB
They will have at least 4 stations at the same time on different bands and modes. Equipment is an Elecraft K3 and 3 Icom IC-7000. Antennas are Hexbeams, SpiderBeam, Verticals (160/80/40/30m) and Yagi for 6 meters. QSL via EA5RM direct (see Web page). You can use the OQRS (see Web page) for direct and Bureau cards. More details should be forthcoming, especially their callsign. Visit their Web page at:
http://www.dxfriends.com/SanAndres2013

IOTA NEWS.....
AF-018. Simone, IV3NVN, will be active as IH9/IV3NVN from Pantelleria Island (IIA TP-001, WLOTA 0041) before and after the following contests. During the contests, look for him to sign IH9B. The contests that are scheduled are:
CQWW DX SSB Contest (October 26-27th) as a SOSB on 80m
CQWW DX CW Contest (November 23-24th) as a SOSB on 80m
2014 CQWW WPX CW Contest (May 24-25th) as a SOSB 40m
QSL via his home callsign by the Bureau.

AF-045. Luc, F5RAV, has cancelled his trip to N□gor Island and will stay on the mainland of Senegal through October 17th.

EU-034. Simo, OH2HAN, will be active as ES0HAM from Estonian Hiiumaa Island between October 17-22nd. Activity will be on 80-10 meters, and the mode will be mainly RTTY. He will participate in the JARTS RTTY Contest (October 19-20th), and is happy to share the Estonia multiplier as much as possible. Outside of the contest some SSB, too. QSL via OH2HAN, by the Bureau or

direct with SASE.

OC-108. Members of the YB Land DX Club will be active as YE5R from
Anambas Island between November 10-20th. Activity will be on
80/40/30/20/17/15/12/10 meters using CW, SSB and RTTY. The
operators mentioned are Yana/YB1AR, Hendra/YB1HK, Imam/YB4IR,
Anton/YB5QZ, Aled/YB6CA, Fir/YB6ODD, Ady/YB6VK, Ronny/YB7GRN,
Masri/YC2WWW, Wirzamrisal/YC5WIR, Agus/YE5TA, Erizal/YE5YE,
Tara/YE6YE, Budi/YF1AR and Teuku/YG5TZ. QSL via YB4IR. For
more information and updates, visit the following Web pages:
http://www.ybdxc.net/2013/10/ye5r-anambas-island-oc-108.html
http://qrz.com/db/YE5R

OC-109/ (Postponed/Update) John, YB5NOF, informs OPDX that the reason
OC-122/ for the postponement of OC-109 and OC-122, is that his wife had
OC-209/ a stroke on August 23rd, and was in the hospital. He did mention
OC-210. that they will try to activate Tambelan (OC-122) and Siantan
Island (OC-108) some time between April and May of 2014. Exact
days and time will depend on transport and weather. However,
John did say he will activate Sangihe Island (OC-210) and
Talaud Island (OC-209), as well as some small islands around
there at the end of January 2014. Stay tuned for updates! These
operations will count towards the Nusantara Indonesian Island
Award: http://www.nusantaraaward.com
http://www.facebook.com/nusantaraaward

OC-111. Ralph, H44RK (YJ0RK), is planning to activate Emae Island,
Shepherd Islands, sometime soon. Watch his FaceBook page for
updates at: https://www.facebook.com/ralph.kluge?fref=ts

OC-239. Operators Joni/YB9WZJ and Lucky/YD9RQX have postponed their
operation to Waigeo Island.

OC-255. Just a reminder that Craig, VK5CE, will be active as VK5CE/4
from the totally uninhabited and very rare Red Island between
October 16-21st. If like his Flinders Island operation, Craig's
activities will be on 80-10 meters, with most of the operations
being on 40/20/15m, using SSB and PSK. QSL via his home call-
sign. For more details and updates, watch Craig's Blog page at:
http://oc255.blogspot.com.au

OC-262. Bimbo, YB3MM, will be active as YB3MM/4 from Sebesi Island
between October 19-21st. Activity will be on the HF bands.
QSL via IZ8CCW.

OC-295. (New IOTA!) Operators Budi/YF1AR and Fan/YB0AI will be active
as homecall/7 from (never been activated) Sebatik Island between
October 23-28th. Activity will include the CQWW DX SSB Contest
(October 26-27th). Activity will be on 40-10 meters using
mainly SSB as well as CW and the Digital modes. QSL YF1AR/7
via N2OO and YB0AI/7 via his home callsign (see QRZ.com).
For more details about the island and the operation, see:

http://www.yf1ar.com/2013/09/oc-295-sebatik-island-new-iota-for-yb.html
http://id.wikipedia.org/wiki/Daftar_pulau_terluar_Indonesia

SA-047. Members of the CM DX Group will be active as PR5C from Mel Island (DIB-PR-01) during the CQWW DX SSB Contest (October 26-27th) as a Multi-Op entry. A 9 member team will be on the island between October 25-30th. Operators mentioned are Joe/ PY5XH, Evan/PU5SVE, Jose/PY5JAP, Art/PY5VC, Martins/PU5UAI, Fabio/PY5FAB, Cesar/PY5RCB, Jose/PU5IKE, Alex/PP5ALE and Evans/PY5PS. Activity will be on 160-6 meters using CW, SSB and the Digital modes. QSL via PU5VE, by the Bureau, LoTW and eQSL. For more informations, see: http://www.pr5c.qsl.br

J3, GRENADA. Mark, N2MD, is returning to Grenada (NA-024, WLOTA 0718) and will be signing J3/N2MD between October 23-28th. This year is the 30th anniversary of the U.S. intervention and rescue of U.S. medical students in Grenada (1983) during which Mark operated as KA2ORK/J37. He will be joined by Arnal, N9ACC, who will sign J3/N9ACC. Arnal is a U.S. Navy officer (retired) who was also involved in the 1983 mission. Plans are to operate both fixed and mobile. Operations will be on 80-6 meters (SSB) and 2 meter (FM); band conditions and time permitting. Activity will be holiday style but mostly evening hours. QSL via LoTW only.

J3, GRENADA. JA operators Takayuki/JA1MZL, Yutaka/JJ1LIB, Nao/JN1RVS, Masayuki/JN3NFQ and Isao/JH1ROJ will be active as J34J between November 20-29th. Their activity will include the CQWW DX CW Contest (November 23-24th). QSL via JA1HGY.

JD1, OGASAWARA (Update). Take, JA1UII, informs OPDX that he will be active as JD1BON from Chichijima Island (AS-031) between November 1-4th. Activity will be on 80-10 meters with 200 watts using CW, SSB and RTTY. QSL via his home callsign, by the JARL Bureau or direct [see QRZ.com] (w/SASE+2 USDs or 1 IRC).

KG4, GUANTANAMO BAY (Update). By the time you read this, Al, W6HGF, will be active as KG4HF, from Guantanamo Bay (NA-015) between October 11-25th. Al states, "I will focus on RTTY and digital modes, then CW." Operations will be on 160-10 meters and on 6 meters if it opens. QSL Direct to W6HGF. He mentions, "This is not a vacation, I plan to operate until I fall asleep. I will be operating with Bill, KG4WV." They will be on the air for the JOTA to put the local Boy Scouts on the radio. They will complete the antenna repairs from damage by hurricane Sandy and a few minor repair items to the shack. QSL via their home callsigns. For more details and updates, see the Web site at: http://www.qsl.net/w6hgf/KG4HF.html

MOST WANTED DX SURVEY DEADLINE (Just a Reminder!). Carl Smith, N4AA, Editor of The DX Magazine and QRZ DX, wants to remind DXers that the "2013 DX Magazine MOST WANTED Survey" is coming to a close and the deadline is October 15th. This survey is considered to be the most useful and popular tool for many DXers, DX clubs and DXpeditioners when in making decisions to fund and planning upcoming DXpeditions. Look for results to appear in the January/February issue of The DX Magazine. The

survey can be found online at: http://www.dxpub.com/survey/survey2013.html

NH2, GUAM (OC-026). Joel, KG6DX, will be active as NH2DX in the CQWW DX SSB Contest (October 26-27th) as a Single-Op/Single-Band (15m)/High-Power entry. QSL via NH2DX, CBA or QRZ.com address. NO Bureau QSLs.

NH7, HAWAII. Operators Jim/N6TJ and Oliver/W6NV will be active as NH7A from KH6LC's QTH during the CQWW DX SSB Contest (October 26-27th) as a Multi-Op-2 entry. QSL via F5VHJ.

P3, CYPRUS (Press Release). Lee, KY7M, sent out the following press release on October 8th: "The Voodoo Contest Group is leaving behind 20 years of West African CQWW CW contest operations this year to see new places. They will operate from the Cyprus QTH of Voodude 5B4AGN using the callsign P3F in the Multi-Two category. In addition to 5B4AGN, operators will include Roger/G3SXW, John/G4IRN, Ned/AA7A, and Lee/KY7M. The visiting Voodudes may operate before and after the contest as 5B/home-call or 5B4AJX. QSLs for P3F and 5B4AJX are via M0URX."

P4, ARUBA. Robert, W5AJ, will once again be active as P40P for the CQWW DX SSB Contest (October 26-27th). His operating class is TBD. This is his 12th contesting trip to Aruba. Outside of the contest (before), Robert will be on the air, possibly on 40 meters. QSL via LoTW (Please) or direct to W5AJ. NO BUREAU.

PJ2, CURACAO. Andy, W9NJY, will once again be active as PJ2/W9NJY from Curacao (SA-099, WLOTA LH-0942) between November 19-25th. He is actually there as a team member to help put the Caribbean Contesting Consortium's (CCC) Signal Point Station PJ2T on the air for the CQWW DX CW Contest (November 23-24th). His activity outside of the contest will be mainly on CW on 160-10 meters. QSL PJ2/W9NJY via WD9DZV or LoTW. QSL PJ2T via LoTW or W3HNK.

PJ2, CURACAO. Andy, DK5ON, will once again be active as PJ2/DK5ON from Curacao (SA-099, WLOTA 0942) between March 12-29th (2014). Activity will be on 80-6 meters including the 17/12 meter bands using CW, SSB, RTTY and PSK. QSL via his home callsign (see QRZ.com). NO eQSL.

PJ7, SINT MAARTEN (Reminder). Philip, WA1ZAM, will be active as PJ7PL, a week before the CQWW DX SSB Contest (October 26-27th) and a week after. He will be a Single-Op entry during the contest. Outside of the contest, he will try some RTTY. QSL WA1ZAM.

PJ7, ST. MAARTEN (Update). Operators Dennis/K2SX, Les/W2LK and Andy/K2LE will be active as homecall/PJ7 from Dawn Beach on the eastern side of St. Maarten (NA-105, WLOTA 0711) between November 19-26th. QSLs should go to their home calligns. Activity will include this year's CQWW DX CW Contest (November 23-24th) using the special callsign PJ7W. QSLs for the contest operation should go to W2LK.

QSLS FOR ZC4LI, 5B4AHA, ZD8LII AND G0LII. Phil, G3SWH, announced:
"I am pleased to advise that I have managed to obtain copies of Steve's
(G0LII) logs from his widow and should be able to confirm any outstanding
QSOs. All logs have been previously uploaded to LoTW. There will be log
searches available shortly at: http://www.g3swh.org.uk
I understand that Steve's widow has already returned to their sender
any unanswered QSL requests at the time of his death. Anyone in that
situation should re-apply to me. Please note that as Steve was not a
member of the RSGB, I am unable to process any bureau requests what
so ever....."

QSL RECEIVED VIA LoTW: DK2OY, G3XVR, G8NEO, ID9Y, OH1TD, OM3DX, PY0F/PP1CZ, SP6NXG, SU9AF and TO7Y

QSLS RECEIVED VIA MAIL: 5W0TH, CU5AQ, D2QR, EJ0PL, HV0A, P29NO, TF4M and VE3FUJ

QSLS RECEIVED VIA THE BUREAU: 5B/R2DX, 6V7S, 7O6T, 9U0VB, D2QMN, D3AA, E40VB, EA8/RW3DO, EF8M, FM/R5GA, HC2/UA4WHX, JT7WFF, R60SKV, R1150VN, R1941MB, RI0NZ, SU9AF, UE75VV, V26AO and V26DZ

S7, SEYCHELLES. By the time you read this, Andrea, IZ1MHY (MDXC #055), will be active as S79MHY from Praslin Island (AF-024), Seychelles, until October 17th. Activity will be on 160-10 meters using CW, SSB and the Digital modes. QSL via his home callsign. For more information, an online log search and etc..., visit the Web site at: http://www.mdxc.org/s79mhy

ST, SUDAN (JOTA Op). Members of the "Boy Scouts of Sudan" (ST2BSS) will participate and operate from the Khartoum Sea Scout Amateur Radio Club (ST2KKS) for the 56th Jamboree On The Air (JOTA) activities. Operations are expected to be on all bands and modes. QSL via ST2M. For more details, see QRZ.com.

T30, WEST KIRIBATI (Update). Operators Ted/JF1CCH and Kazu/JA1FUF will be active as T30TS and T30NK from West Kiribati between November 28th and December 4th. Activity will be on the HF bands (all mostly 40-10m) and possibly 6m, using CW, SSB, RTTY and PSK. Ted will operate mainly on CW and SSB, while Kazu will operate mainly RTTY and PSK. They will use 100 watts into a dipole. QSL via their home callsign, direct, by the Bureau and eQSL. NO LoTW.

T48, CUBA. Members of the "Las Tunas Contest Crew", T48K, will be active once again during the CQWW DX SSB Contest (October 26-27th) as a Multi-Single or a Multi-2 entry from "La Herradura" on the north coast of the Las Tunas Province. Operators mentioned are Doug/CO8DM, Alex/CO8KA, Raúl/CO8ZZ, Ernesto/CO8GJ, Carlos/CO8CML, Alex/CM8AKY and Jose/CM2XN. They are going to use a two element vertical and slopers very close to the salt water. The QSL Manager is Erhard, DK1WI.

TM1, FRANCE. Members of the F6KOP team will enter the next CQWW DX SSB Contest as TM1A and as a Multi-Multi category, from its facilities of Provins City (100 km SE of Paris). Well known DXpeditioner/Contester, Frank, F4AJQ, will lead the team of operators: YL Sophie/F4DHQ, Olivier/F4FLF, Yann/F1NGP, Silvain/F4ERS, Jimi/F4DLM, Benoît/F1JHB, Johan/F4GTD, Thierry/F4BDG, Antoine/F5RAB, Christian/F6AXN, Alain/F5JTV, Maurice/F5NQL, Damien/F4EZF, Joël/F6JMT, Thierry/F4TTR and may be Jean-Luc/F1ULQ and Florent/F4EJL. Some of the above operators have been active in the past during contests and DXpeditions which include 5V, J5, XT2, FY, 3V, 5X8, 5H, PJ4, IS0 and many other DXpeditions to French IOTAs. QSL via F6KOP through the French REF Bureau (and please only this one).

V3, BELIZE. By the time you read this, Dick, AD7AF, should be active as V31RL from Placencia until October 30th. Activity will be on 80-10 meters using CW and SSB. He will try to focus on working JA and EU stations. His

operations will also include the CQWW DX SSB Contest (October 26-27th). QSL via AD7AF. Log will be uploaded to LoTW after his return.

V3, BELIZE. Marc, V31MA, will be active with the special callsign V3A during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via M0OXO. QSOs are regularly uploaded to LoTW, eQSL and ClubLog.org.

VP2V, BRITISH VIGRIN ISLANDS. Art, N3DXX, will once again be active as VP2V/homecall from Virgin Gorda (Tortola) between November 19-29th. Activity will include the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band entry. QSL via NR6M.

VP5, TURKS AND CAICOS ISLANDS. Operators Frank/WA2VYA and Tony/K4QE will be active as VP5T during the upcoming CQWW DX SSB Contest (October 26-27th) from Providenciales (NA-002). QSL via WA3RHW, direct or by the W3 Bureau, (not the VP5 bureau) and LoTW. Frank will sign VP5/WA2VYA outside of the contest between October 22-29th, and will be active on CW, with an emphasis on 160/80/10 meters, and the 30/17/12 meter bands, and possibly some RTTY or SSB. QSL via WA2VYA, direct or by the Bureau. No return postage is required; Frank would like to receive your QSL card. Tony will sign VP5/K4QE outside of the contest between October 22-29th, primarily on SSB, with an emphasis on the 17/12 meter bands. QSL via LoTW.

VP8, FALKLAND ISLANDS. Peter, M1AYI, is expected to be active as VP8DNY from the Falkland Islands between October 20th and November 19th. Activity will be on the HF bands using SSB. QSL via his home callsign by the RSGB Bureau.

VP8, FALKLAND ISLANDS. Mick, G1EUZ (ZD8RAF), will once again be active as VP8BTU from the Falkland Islands between November 25th and May 25th, 2014. Activity will be on the HF bands. QSL via his home callsign. Cards will not be sent out until he returns home. Also, log will be uploaded to LoTW on his return home.

XR0, JUAN FERNANDEZ ISLAND (Press Release - XR0ZR Countdown). The following was sent out on October 8th [edited]: "There are now less than 30 days to our departure. The Team will start from Italy, of the 6th of November, and we plan to be active on the late evening of November 8th (GMT). We will leave from Santiago, aboard two twin-engine Cessna and after about two hours, of adventurous flight, we land on the Juan Fernandez airport. Arrived on island, we reach our location, in about two hours, aboard two boats, as there are no road links. In all, if the weather conditions will be tolerant, and it will allow us to meet our destination. Compatibly to the location, we believe to be able to install 3 beams looking on the sea, two loops, one for 30 and one for 40 meters, other than the usual vertical for 80 and inverted L for 160. Will also be installing a beverage of about 200 meters on the beach facing the sea. We should have sporadic access to the Internet, and then try to send the logs to ClubLog, once a day. If for any reason this is not possible, do not panic, know that we will do so as soon as possible, and in any

case the logs will be saved in 3 backup copies.
As always, we ask you not to make dupes QSOs, in order to give the
opportunity for everyone to contact us in various bands and modes.
You can follow XR0ZR Team on the following media links at:
Website : http://www.juanfernandez2013.com
FaceBook : https://www.facebook.com/groups/xr0zr/
Twitter : @xr0zr
I'm sure we'll all have fun together, and that we will have fun.
73, Fabri ☐ IW3SQY"

XT2/XT26, BURKINA FASO. Operators David/OK6DJ and Petr/OK1FCJ will be
active as XT26DJ and XT2FCJ between November 17-26th. Activity will
be on 160-10 meters including the 30/17/12 meters using CW and SSB.
They also will be in the CQWW DX CW Contest (November 23-24th) as XT2FCJ.
Their set up will be Elecraft K3 and Kenwood TS-480 into a Spiderbeam
antenna (20/15/10m - including the WARC), a vertical (40-10m), 80m dipole
and LW for 160m. QSL via OK6DJ for both callsign. QSL methods are: the
ClubLog OQRS (for LoTW - confirmed every day), direct (minimum 2 USDs or
new IRC (accepted IRC that expire in 2017; QSO confirmed to LoTW every
day), OQRS by the Bureau, LoTW and eQSL (confirmed 6 months) and paper
QSL via the Bureau (confirmed 12 months).

XV2, VIETNAM. Toshitaka, JA3NHL, will once again be active as XV2NHL
from Ho Chi Minh City between November 2-8th. Activity will be on 160-6
meters using CW, SSB and RTTY. QSL via JA3NHL.

YE2, INDONESIA. Members of the ORARI Semarang Contesting Team will be
activating YE2C for the first time during the CQWW DX SSB Contest (October
26-27th) as a Multi-Single entry. Operators mentioned Agus/YC2BYC, Bobby/
YC2SBG, Pur/YC2FNT, YL Sri/YB2BSE, Edi/YC2PWL, Bamband/YB2ERL, Jon/
YB2ECG and Adi/YD2PST. QSL via LoTW (PLEASE). For more info on the YE2C
station, see: http://ye2c.wordpress.com

Z21, ZIMBABWE. Mirek, SP5IXI/VK6DXI, will be active as Z21DXI from Bulawayo
starting October 14th for 2-4 weeks. He states that this is a business
trip. His activities will limited after his working hours. Operations
will be on 160-6 meters using only 100 watts and simple wire antennas.
Mirek has operated from Zimbabwe before: February 4-12th and December
6-17th of 2010. QSL via SP5UAF, by the Bureau or direct. Online log
will be available at: http://www.sp5ixi.dxing.pl/z21dxi

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31014
SIDC SOLAR BULLETIN 14 Oct 2013, 1310UT
SIDC FORECAST (valid from 1230UT, 14 Oct 2013 until 16 Oct 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 14 Oct 2013 10CM FLUX: 130 / AP: 010
PREDICTIONS FOR 15 Oct 2013 10CM FLUX: 130 / AP: 007
PREDICTIONS FOR 16 Oct 2013 10CM FLUX: 130 / AP: 011
COMMENT: Several C-class flares in past 24h, the strongest being a C4.5 flare
peaking at 17:58 UT on October 13, from NOAA AR 1861 (beta gamma magnetic
field configuration). This AR, and in particular AR 1865 (beta-gamma-
delta), can produce M-class flares in the next 48h. Geomagnetic conditions
are currently unsettled due to the arrival of a fast speed stream from a
coronal hole. The solar wind speed is at 500 km/s with magnetic field
intensities currently at 7 nT. Conditions may reach active levels.
TODAY'S ESTIMATED ISN : 097, BASED ON 09 STATIONS.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31015
SIDC SOLAR BULLETIN 15 Oct 2013, 1210UT
SIDC FORECAST (valid from 1230UT, 15 Oct 2013 until 17 Oct 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 15 Oct 2013 10CM FLUX: 125 / AP: 016
PREDICTIONS FOR 16 Oct 2013 10CM FLUX: 123 / AP: 013
PREDICTIONS FOR 17 Oct 2013 10CM FLUX: 122 / AP: 007
COMMENT: Solar activity has been moderate, many C-class flares were detected from AR
1865, 1861 and from an AR behind the east limb (related to a backsided
partial halo CME on October 14 at 22:00 UT). NOAA AR 1865 produced an M1.1
flare with peak at 09:00 UT. There are clear dimmings as signs of a CME in
SWAP and AIA data but no coronagraph images yet to confirm. Due to the
location of this AR (S21 W16), an ejection has strong chances of being
Earth-directed. As AR 1861 and 1865 are rotating into the western
hemisphere of the Sun, the risk of proton events at Earth has increased, a
warning condition has been set. Geomagnetic conditions have ranged from
unsettled to active due to the fast speed stream from a coronal hole. The
solar wind speed is currently at 500 km/s and the magnetic field intensity
around 5 nT. The effect of the coronal hole-related solar wind is expected
to fade today, even though more active periods cannot be excluded. The
possible arrival (estimated probability of 30%) of the CME from October 13
could raise the geomagnetic conditions up to storm levels late on October
16.
TODAY'S ESTIMATED ISN : 095, BASED ON 08 STATIONS.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31016
SIDC SOLAR BULLETIN 16 Oct 2013, 1310UT
SIDC FORECAST (valid from 1230UT, 16 Oct 2013 until 18 Oct 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 16 Oct 2013 10CM FLUX: 125 / AP: 012
PREDICTIONS FOR 17 Oct 2013 10CM FLUX: 125 / AP: 010
PREDICTIONS FOR 18 Oct 2013 10CM FLUX: 124 / AP: 007
COMMENT: Solar activity has been moderate, many C-class flares were detected from AR
1865, 1861. NOAA AR 1865 produced an M1.3 flare with peak time at 23:36 UT
on October 15, no CME was associated with this flare. More M-class flares
can be expected from these two active regions. The CME associated with the
M1.8 flare from yesterday peaking at 08:38 UT is not expected to arrive to
the Earth. Geomagnetic conditions have ranged from quiet to unsettled due
to the fast speed stream from a coronal hole. The solar wind speed is
currently at 480 km/s and the magnetic field intensity around 4 nT. We
expect quiet conditions, except for the possible arrival (estimated
probability of 30%) of the CME from October 13 that could raise the
geomagnetic conditions up to storm levels late today.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31017
SIDC SOLAR BULLETIN 17 Oct 2013, 1210UT
SIDC FORECAST (valid from 1230UT, 17 Oct 2013 until 19 Oct 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 17 Oct 2013 10CM FLUX: 128 / AP: 007
PREDICTIONS FOR 18 Oct 2013 10CM FLUX: 125 / AP: 007
PREDICTIONS FOR 19 Oct 2013 10CM FLUX: 124 / AP: 007
COMMENT: Solar activity has been low, there is potential for moderate conditions in
NOAA ARs 1861 and 1865. They have been both producing C class flares,
together with 1870 and 1867. AR 1865 produced the strongest flare in the
past 24h: a C8.9 with peak at 14:32 UT on October 16. There was a slow
faint full halo CME, seen first at 15:48 UT (first seen in LASCO C2). It
was related with a C1.8 flare from NOAA AR 1870. The bulk of the material
was directed towards the west, with a speed of 300 km/s. An impact with the
Earth is possible early on October 21, although geomagnetic conditions are
not expected to be greatly affected by this weak event. The solar wind
speed at the L1 point is 450 km/s with magnetic fields around 4 nT.
Geomagnetic conditions have ranged from quiet to unsettled, quiet
conditions are expected for next 48h.
TODAY'S ESTIMATED ISN : 102, BASED ON 11 STATIONS.

SB DX ARL ARLD042
ARLD042 DX news

This week's bulletin was made possible with information provided by NC1L, ON4EI, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

VIET NAM, 3W. Mike, N0ODK is QRV as 3W2DK from Ho Chi Minh City until October 24. Activity is on 20, 17, 15 and 10 meters. QSL to home call.

CYPRUS, 5B. Tony, RT9T is QRV as 5B4ALB from Pachyammos, IOTA AS-004, until November 4. QSL direct to home call.

SENEGAL, 6V. Vlad, RK4FF plans to be QRV as 6V7S from October 22 to November 27. Activity will be on 80, 40, 20, 15 and 10 meters using CW, SSB and RTTY. QSL to home call.

LESOTHO, 7P. Gert, ZS6AYU will tentatively be QRV as 7P8GF from Roma from October 23 to 26. Activity will be holiday style on 40 to 10 meters using CW. QSL to home call.

BAHAMAS, C6. Rich, N0HJZ will be QRV as C6ARW from Grand Bahama Island, IOTA NA-080, from October 22 to 29. Activity will be mainly on 30, 17 and 12 meters using CW and RTTY. This includes being an entry in the upcoming CQ World Wide SSB DX contest. QSL to home call.

CAPE VERDE, D4. Babs, DL7AFS and Lot, DJ7ZG will be QRV as D44TXT from Santiago, IOTA AF-005, from October 19 to November 7. Activity will be on 80 to 10 meters using SSB, RTTY and PSK63 with two stations. QSL via DL7AFS.

IRELAND, EI. Oliver, ON4EI, will be QRV as EI8GQB from October 20 to 30 using wind and solar power. He will be active as EI1A in the upcoming CQ World Wide SSB DX contest as a Single Op/All Band/Low

power entry. QSL both calls via PA3249.

ESTONIA, ES. Simo, OH2HAN is QRV as ES0HAM from Estonian Hiiumaa Island, IOTA EU-034, until October 22. Activity is on 80 to 10 meters using mainly RTTY with some SSB. This includes being an entry in the JARTS RTTY contest. QSL to home call.

ENGLAND, G. Members of the 2nd Twyning Scout Group will be QRV as GB0TWY during the 56th Jamboree On The Air. Activity will be on 40, 20, 15 and 2 meters and 70 cm. QSL via operators' instructions.

SWITZERLAND, HB. World Scout Bureau station HB9S will be QRV in the Jamboree On The Air from Geneva. This is the last time from Geneva because the office is moving to Kuala Lumpur. QSL via HB9AOF.

MARIANA ISLANDS, KH0. Miho, JJ2VLY and Yutaka, JQ2GYU are QRV as NH0J from Tinian Island, IOTA OC-086, until October 21. Activity is on 80 to 10 meters using CW, SSB and RTTY. This includes being an entry in the JARTS RTTY contest. QSL via JJ2VLY.

BULGARIA, LZ. Special event station LZ2013IPA is QRV until the end of 2013 in commemoration of the International Police Association. QSL via LZ3HI.

CURACAO, PJ2. Scouting Antiano station PJ2SA will be QRV in the Jamboree On The Air. Activity will be on 40 and 20 meters. QSL via operators' instructions.

FERNANDO de NORONHA, PY0F. Miguel, PY3MM is QRV as PY0F/PY3MM until October 28. He will be QRV as PR0F in the upcoming CQ World Wide SSB DX contest. QSL both calls direct via PP5VB.

SUDAN, ST. Members of Boy Scouts of Sudan will be QRV as ST2BSS from Khartoum during the Jamboree On The Air. Activity will be on all bands and modes. QSL via ST2M.

TURKS AND CAICOS ISLANDS, VP5. Frank, WA2VYA and Tony, K4QE will be QRV as VP5/home calls from Providenciales, IOTA NA-002, from October 22 to 29. Activity will be 160 to 10 meters using CW with some SSB and RTTY. They will be QRV as VP5T in the upcoming CQ World Wide SSB DX contest. QSL to home calls and VP5T via WA3RHW.

FALKLAND ISLANDS, VP8. Peter, M1AYI plans to be QRV as VP8DNY from East Falkland Island, IOTA SA-002, from October 20 to November 19. Activity will be on the HF bands using SSB. QSL to home call.

ZIMBABWE, Z2. Mirek, SP5IXI is QRV as Z21DXI from Bulawayo for the next two to four weeks. Activity is in his free time on 160 to 6 meters. QSL via SP5UAF.

THIS WEEKEND ON THE RADIO. The JARTS World Wide RTTY Contest, 10-10 International Fall CW Contest, Stew Perry Topband CW Challenge, Scout Jamboree On The Air, Iowa QSO Party, New York QSO Party,

Worked All Germany Contest, W/VE Islands QSO Party, Feld Hell Sprint, Asia-Pacific Fall CW Sprint, UBA ON 2-Meter Contest and Illinois QSO Party will certainly keep contesters busy this upcoming weekend. The ARRL School Club Roundup is scheduled for October 21 to 25.

The Run for the Bacon QRP CW Contest and NAQCC-EU Monthly Sprint are scheduled for October 21. The SKCC CW Sprint and CWops Mini-CWT Test are scheduled for October 23. Please see October QST, page 89, and the ARRL and WA7BNM contest web sites for details.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31018
SIDC SOLAR BULLETIN 18 Oct 2013, 1210UT
SIDC FORECAST (valid from 1230UT, 18 Oct 2013 until 20 Oct 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 18 Oct 2013 10CM FLUX: 136 / AP: 007
PREDICTIONS FOR 19 Oct 2013 10CM FLUX: 134 / AP: 007
PREDICTIONS FOR 20 Oct 2013 10CM FLUX: 132 / AP: 007
COMMENT: Solar activity has been moderate, many C-class flares coming mostly from
NOAA AR 1875 that rotated into view over the eastern limb and has magnetic
beta configuration. NOAA AR 1865 has simplified to a beta configuration but
it is still producing C-class flares. AR 1861 is about to rotate over the
western limb, but remains very active, it produced an M1.2 flare peaking at
15:41 UT on October 17. A faint narrow CME was associated with this flare,
not expected to arrive to the Earth. Geomagnetic conditions have been
quiet and are expected to remain so.
TODAY'S ESTIMATED ISN : 116, BASED ON 08 STATIONS.

SOLAR INDICES FOR 17 Oct 2013

Propagation Forecast Bulletin 42 ARLP042
>From Tad Cook, K7RA
Seattle, WA October 18, 2013
To all radio amateurs

SB PROP ARL ARLP042
ARLP042 Propagation de K7RA

Recent solar activity took a healthy jump this week, with the average daily sunspot number increasing nearly 48 points to 126.9, a positive change of 60 percent compared to the previous week. Average daily solar flux was up 16.4 points to 126.5.

The daily sunspot number rose to 148 on October 15, then 166 on October 17, the highest it's been since May 15-17 when it was 186, 212 and 198.

The average planetary A index was unchanged at 8.1. The high latitude college A index indicated active geomagnetic conditions on October 14-15, when it was 31 and 27.

The latest prediction shows solar flux at 135, 130 and 120 on October 18-20, 115 on October 21-23, 110 on October 24-25, 100 on October 26-29, 105 on October 30-31, 100 on November 1-2, 110 on November 3-4, 115 on November 5, 120 on November 6-7, and 125 on November 8-12.

The predicted planetary A index is 8 on October 18, 5 on October 19-20, 12 and 10 on October 21-22, 5 on October 23 through November 10, 12 on November 11, 5 on November 12-16 and 8 on November 17-19.

F.K. Janda, OK1HH sent his geomagnetic forecast for this week, and it predicts quiet to unsettled conditions October 18, quiet on October 19-20, mostly quiet October 21, quiet to unsettled October 22, quiet October 23-24, mostly quiet October 25-26, quiet to unsettled October 27, quiet to active October 28-29, quiet October 30 through November 3, quiet to unsettled November 4, quiet to active November 5, quiet to active November 6, mostly quiet November 7-8, and quiet to unsettled November 9.

Two weeks ago we offered links to spreadsheets I've been maintaining which show the recent history of the NOAA/USAF 45 day forecast for

solar flux and planetary A index. The recent forecasts are online at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html.

You can download my solar flux spreadsheet at http://snurl.com/280h6pb and planetary A index sheet at http://snurl.com/280h74f . No password needed this time. These can be interesting for checking recent forecast trends, such as when projections for future activity trend up or down, and you can see this clearly when you peruse the spreadsheet. Note how there were projections over the last 3-7 weeks showing predicted solar flux values for some periods at 90 or 95. The most recent predictions show a stronger outlook.

Randy Crews, W7TJ sent this report on October 17: "Last weekend 10 and 12 meters were the best I have heard all Fall. The Solar Flux rising out of the mid nineties doldrums was a BIG help. Looks as if we are going to enter a period of reasonably high solar activity, (Solar flux at 100-125) coupled with a long period of quiet geomagnetic conditions and low solar wind, in addition to the seasonal improvements we have in October. The aforementioned coupled with all the DXpedition activity and the upcoming CQ WW SSB Contest, the bands should be hot! I am making the most of 10 and 12 meter propagation, as I don't think propagation on those bands will be there a year from now. Our solar flux will be pressed to average over 117 this Month. A year ago October's average was 123. I like the old Farm quote: 'Make Hay While The Sun Shines'."

That's right, Randy, flux values were a little stronger a year ago. In Propagation Forecast Bulletins ARLP040 to 044 from 2012, the weekly averages of solar flux were 128.7, 104.9, 129.2, 143.9 and 116.9. It is interesting though that sunspot numbers are higher now. The average sunspot number over this past week was 126.9, but sunspot number averages from those same 2012 bulletins referenced above for solar flux were 73, 51.7, 97, 95.3 and 58.4.

Jon Jones, N0JK, the QST columnist who writes "The World Above 50 MHz" wrote on October 11 from EM28 in Kansas in a message titled, "F2 on 6 meters October 9."

"I heard LW3EX on 50.100 MHz CW weak via afternoon F2/TEP on Oct. 9 about 2040 UTC. Walt and other Argentinean stations were much louder about 3 grids south of me (EM28) in Oklahoma (EM25) and Texas.

"The geomagnetic field was active at the time."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see

http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for October 10 through 16 were 138, 115, 106, 125, 136, 148, and 120, with a mean of 126.9. 10.7 cm flux was 120.7, 129, 127.9, 129.3, 125, 125.3, and 128.1, with a mean of 126.5. Estimated planetary A indices were 9, 5, 5, 2, 13, 14, and 9, with a mean of 8.1. Estimated mid-latitude A indices were 7, 3, 3, 2, 10, 14, and 9, with a mean of 6.9.

No 1172
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

7P8 - Gert, ZS6AYU plans to be active as 7P8GF from Lesotho on 23-26 October. He will operate holiday style on 40-10 metres CW only. QSL via ZS6AYU, direct or bureau. [TNX NG3K]
9L - Zbig, SP5BTB will be active again as 9L1BTB from Sierra Leone from 25 October to 10 November. He will be QRV on 20 and 15 metres only. QSL via home call (direct). [TNX DX World]
A9 - Special event station A91ACC will be active on the HF bands during the Arab Cycling Championship to be held in Bahrain. Activity days will be 22-24 October and 28-29 October. This amateur radio event is endorsed by H.E. Shaikh Khalid bin Hamad Al-Khalifa, President of the Bahrain Cycling Association. QSL via IZ8CLM. [TNX A92AA]
D4 - The Monteverde Contest Team (http://d4c.cc/ http://d4c.cc/) will participate in the CQ WW DX SSB Contest as a Multi-Multi entry from the D4C station on Sao Vicente (AF-086), Cape Verde. The team includes 9A1TT, CT1ESV, E7DX/OE1EMS, HB9DUR, I4UFH, I4VEQ, IK1HJS, IT9RGY, IT9SPB, IZ1LBG, IZ4DPV, IZ4UEZ, JK3GAD, SG7A and and YL2GM. QSL via IZ4DPV (direct or bureau), LoTW and eQSL. Watch the video teaser on YouTube! (http://youtu.be/gIHsOidudCY http://youtu.be/gIHsOidudCY) [TNX IK1HJS]
E5_sc - Al, K7AR will be active as E51AAR from Rarotonga (OC-013), South Cook Islands on 21-26 October. He plans to operate mainly RTTY, but will also be active during the CQ WW DX SSB Contest. QSL via K7AR, direct or bureau, and LoTW. Logserach on Club Log. [TNX The Daily DX]
ES - Simo, OH2HAN will be active as ES0HAM from Hiiumaa Island (EU-034) on 17-22 October. He will operate mainly RTTY on 80-10 metres, and will participate in the JARTS WW RTTY Contest. QSL via OH2HAN, bureau or direct.
FS - Randy N0TG, Ron AA4VK and Jeff N1SNB will be active as FS/homecall from St. Martin (NA-105) on 24-31 October. They will participate in the CQ WW DX SSB Contest as FS/N1SNB. QSL all callsigns via AA4VK. [TNX NG3K]
KH0 - OH6RX and OH7WV will be active as AH0K from Saipan (OC-086) on 22-29 October and again on 20-27 November. They will participate in the CQ WW DX SSB and CW contests as Multi-Two entrants. Outside the contests, they will focus on 160-40 metres. QSL via OH6GDX. [TNX The Daily DX]

PA - Ben, DO1BEN (www.do1ben.de http://www.do1ben.de) and Barbara, DO1IQ will be active as PD/DO1BEN and PD/DO1IQ from Texel Island (EU-038) on 21-27 October. They will RTTY, PSK31 and SSB on 40, 20 and 10 metres. QSL via home calls, bureau preferred.
PJ6 - Look for PJ6/KB1ZOJ, PJ6/K4UEE, PJ6/N4GRN, PJ6/K5AC and PJ6/W6IZT to be active from Saba (NA-145) on 23-29 October. They will participate in the CQ WW DX SSB Contest as PJ6A. [TNX The Daily DX]
SV5 - Rich, M5RIC will be active as SW5CC from the island of Rhodes (EU-001) on 23-31 October. He will operate SSB and RTTY on 30-10 metres, and will participate in the CQ WW DX SSB Contest as a single-op single band entry. QSL via M5RIC (direct).
T8 - Tom, JN2AMD will be active as T88AZ from Palau (OC-009) on 25-28 October, including participation in the CQ WW DX SSB Contest. He will operate SSB, CW and RTTY on 80-10 metres. QSL via JN2AMD, direct or bureau. [TNX The Daily DX]
TU - Chris F4WBN (ex TL0A) as TU5AX, Paul F6EXV as TU5XV and Jan DJ8NK as TU5NK will be active from Cote d'Ivoire on 17-30 November. They will operate SSB, CW and RTTY on 160-6 metres. QSL via home calls, direct or bureau (OQRS on Club Log). This will be a "solidarity radio operation": in an effort to "revive the Abidjan Radio Club", they will donate their equipment to TU2CI and train local operators to use it. The team will also assist local operators "who have strongly suffered from the civil war that hit the country some time ago". [TNX F4WBN and F6EXV]
VP9 - Markus, DJ4EL will be active as VP9/DJ4EL from Bermuda on 19-31 October. He will be QRV holiday style on 40-10 metres SSB. QSL via home call. [TNX DX World]
VP9 - N1SV will participate in the CQ WW SSB Contest as VP9I (QSL via WW3S) from Bermuda (NA-005). Before the contest, starting on 23 October, he will be QRV as VP9/N1SV (QSL via home call). [TNX NG3K]
XW - Champ, E21EIC will be active as XW0YJY from Laos on 25-29 October, inclduing an entry in the CQ WW DX SSB Contest. Before and after the contest he will operate CW on 80-10 metres. QSL via E21EIC and LoTW; logsearch and OQRS on Club Log. [TNX NG3K]
YB - Adhi, YB3MM (www.yb3mm.com http://www.yb3mm.com) will be active as YB3MM/4 from Sebesi Island (OC-262) on 19-21 October. This IOTA group was activated only once, back in 2003. Adhi will operate SSB and CW on 20 and 15 metres. QSL information on qrz.com http://qrz.com.
YB - The YB9Y expedition to Bras Island (OC-276, new one) [425DXN 1166] is now expected to start around 12 UTC on 21 October and finish around 00 UTC on the 28th. Plans are to be QRV on 160-6 metres CW, SSB and RTTY with several stations. QSL via YB1GJS, direct or bureau (OQRS on Club Log). Further information can be found at www.yb9y.com http://www.yb9y.com [TNX PD9DX]
Z2 - Mirek, SP5IXI (VK6DXI) has been active as Z21DXI from Bulawayo, Zimbabwe since 14 October. He should remain there until late October at least. This is a business trip, and he is QRV in his spare time using 100 watts and simple wire antennas. QSL via SP5UAF, direct or bureau. Logsearch at www.sp5ixi.dxing.pl/z21dxi/ http://www.sp5ixi.dxing.pl/z21dxi/

Direttore Responsabile I2VGW

425 DX NEWS MAGAZINE ---> The September 2013 issue is now available for download at www.425dxn.org/monthly/index. html http://www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

AMSTERDAM 2014 ---> "Since the early planning days of this DXpedition, we have been accumulating and storing equipment at our staging site in Atlanta, Georgia. On October 15 our packing and organizing was completed, equipment was placed on pallets, loaded into our sea container, and began its journey to New Zealand where it will be loaded aboard our ship". See the pictures on the FT5ZM's website (www.amsterdamdx.org http://www.amsterdamdx.org).

BANGLADESH 2013 ---> The Mediterraneo DX Club's team in Bangladesh (S21ZBC and S21ZBB) [425DXN 1170] will operate from the Bangladesh Scouts' Headquarters, and would like to organize skeds with other Scout groups on 20-21 November. If interested, please contact IK7JTF (rborace[@]gmail.com http://gmail.com).

HAM RADIO 2013 LECTURES ---> The lectures held at Ham Radio 2013 (Friedrichshafen) are now available on DokuFunk (the Documentary Archive for the History of Radio Communication and Electronic Media):
OH2BH Changing Times in DX Hunt (keynote speech)

OH6KN & OH8GLV Technology Innovations Helping DXers
W1TP The ENIGMA and other Historic Cipher Machines. Introduction to the Enigma
G7GCT Small Cipher Machines
DK7ZB Development of Broadcasting in Germany 1923-2013 (In German)
G3SVL 100 Years of the RSGB and its International Partners
The Powerpoint slides with synchronized audio are at www.dokufunk.org/talk http://www.dokufunk.org/talk
[TNX OE1WHC]

WAG & JOTA ---> The Jamboree on the Air is an annual event in which half a million Scouts and Guides all over the world make contact with each other by means of amateur radio. The 56th edition will take place on 19-20 October. Specific "contest-free frequencies" have been agreed with the organizers of the Worked All Germany Contest in order to avoid interference between the two events. Complete information can be found at www.darc.de/referate/dx/ contest/wag/en/ http://www.darc.de/referate/dx/contest/wag/en/.

KOSOVO ---> "CQWW SSB will bring several Kosovar stations active from this new state recognized today by 105 United Nations member states and qualifying as separate country multiplier in the CQWW Contest. Among the activity, Z68BH will be operated by Martti, OH2BH, using the new antennas of Driton, Z61DX, with great support of Igor, UA2FZ.
During the most recent European DX Contest (WAEDC) many non-EU station had

difficulty with their contest logging programs on Z6 prefix. A new CTY.dat
file can be loaded at www.country-files.com http://www.country-files.com. QSL Z68BH via
OH2BH". [TNX
OH2BH]

OC-239 ---> The 16-22 October expedition by YB9WZJ and YD9RQX to Waigeo
Island [425DXN 1170] has been postponed, "maybe till 2014". [TNX W2FB]

WRTC 2014 ---> WRTC2014, Inc., host of the 2014 World Radiosport Team
Championship (www.wrtc2014.org http://www.wrtc2014.org), has announced the fifty five
teams that
will be invited to compete in New England next July. Team Leaders were
selected for each qualifying region based on 3 years of qualifying scores.
The Team Leaders were given the choice to select any operator as a Team
Mate to complete their team.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31019
SIDC SOLAR BULLETIN 19 Oct 2013, 1310UT
SIDC FORECAST (valid from 1230UT, 19 Oct 2013 until 21 Oct 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 19 Oct 2013 10CM FLUX: 138 / AP: 007
PREDICTIONS FOR 20 Oct 2013 10CM FLUX: 136 / AP: 007
PREDICTIONS FOR 21 Oct 2013 10CM FLUX: 135 / AP: 010
COMMENT: Only C-class flares were observed in the past 24h, the strongest was a C8.4
with peak at 15:26 UT on October 18, from NOAA 1861. As this AR (and NOAA
1865) are rotating over the west limb, only C-class flares are expected
(but still M-flares remain possible). Geomagnetic conditions have been
quiet. There is a coronal hole which influence may reach the Earth in the
coming 48h, but it is located probably too much to the north (40 degrees)
to become geoeffective.
TODAY'S ESTIMATED ISN : 092, BASED ON 12 STATIONS.

21733. QSL via QRZ.COM ??

Yahoo group: DX-IS (2013)
Date: 2013-10-19 15:03:29 UTC
From: Paul M Dunphy
Topic: 21733 Message: 21733

I've noticed lately stations send "QSL VIA QRZ DOT COM" and when you look them up, it says "QSL via buro or direct." Seems to me they ought to say that on the air instead of directing their QSO partner to look them up on the Internet.

Just curious why they do that. Perhaps a photo they are proud of on qrz.com that they want you to look at? Oh well. I don't think they are saying AA7BQ is their manager!

73, Paul VE1DX

21734. Re: [DX-IS] QSL via QRZ.COM ??

Paul,

I've also wondered why one would display kilobucks worth of gear on a
web page giving your address and perhaps exact GPS coordinates.

Makes shopping for thieves easy.

73 de Brian/K3KO

A good point, Brian. We tend to think of all Hams as honest, but in reality our fraternity is just a cross section of the population . . . or for that matter, any non-Ham can access QRZ or any web site and find out who you are and what you have (if you tell them.)

I removed 90% of the personal info from my own personal web page, but still I can be found. I think we should put our grid on QRZ, but little else in terms of the gear we have. I am not innocent in that aspect. I think in years past when the Internet was just taking off we all didn't realise how vulnerable we were. What started as a "gimmick" a few decades ago has become more popular than telephones and TVs were when we were young. Some of us haven't adjusted out behaviour to match the growth of the Internet.

73, Paul VE1DX (QSL via QRZ.COM) :-)

I always interpreted "QSL via QRZ.COM" as "My QSL information
(including address, etc) can be found at QRZ.COM"

My instructions at QRZ.COM are "Direct, LoTW, BURO, ClubLog Wizard". Sending you to Qrz.com gives you four choices. And yes, Brian, a short biography, a photo of my station, and an introduction into my other interests

73, de Hans, K0HB

And don't forget to talk up all your vacation plans, including dates you will be gone, on the local repeater. A thief would never happen to have a scanner. Make sure you get on APRS as well so they can see where you are and how long it would take you to get home.

Even most of those cordless telephones, although they are not Ham gear. One of my friends was complaining about how expensive his car insurance was on a repeater 5-6 years ago. 10 minutes later he got a call from another insurance company with a sales pitch!

On a somewhat related issue, I know of two separate cases where gear (a hand held and a HF tuner) were swiped off sellers' tables at a Hamfest/Flea Markets. Apparently we can't trust some "Hams."

I don't have a lot of time for thieves, regardless of whether or not they hold a Ham ticket. There are some dandies buying and selling gear of the Internet. How do you tell the honest ones from the swindlers?

Hi Paul...

My sign off says "QSL via LoTW, buro or direct. See QRZ.com for details".

The 'details' spell out how I will respond to cards received directly, but with insufficient or incorrect postage, and how many green stamps to send for return postage to the US (2) or the rest of the world (3).

It is far more efficient to direct a QSO partner to your QRZ.com page for QSL details than to spell it out in every QSO (Unless you have it set up in a macro!).

73,

Phil/VE1BVD

Yes, I agree if it is complicated like "Send $3.50 in nickels and a
green SAE, or use the RSGB Buro (even though I'm on Canada), or LoTW, or
eQSL (AG), or to my manager W2NQ/7 during the summer." I just was
pointing out that it's easier to send "QSL VIA BURO" than to direct them
to an Internet link that says the same thing.

This is an old school vs new school discussion. VE1AL (SK) would
have some thoughts on this. I miss his input.

As a matter of fact, I actually copied the text of my QRZ.com message from Alan's. I would be the first to admit that he was definitely 'old school', but he was also open to new ideas, even if he did reserve the right to ignore them!

I don't know if you are aware, Paul, but Al's wife passed away about three weeks ago. Yet another burden for their children and grandchildren to bear.

73,

Phil/VE1BVD

SIDC URSIGRAM 31020
SIDC SOLAR BULLETIN 20 Oct 2013, 1410UT
SIDC FORECAST (valid from 1230UT, 20 Oct 2013 until 22 Oct 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 20 Oct 2013 10CM FLUX: 133 / AP: 007
PREDICTIONS FOR 21 Oct 2013 10CM FLUX: 135 / AP: 007
PREDICTIONS FOR 22 Oct 2013 10CM FLUX: 140 / AP: 007
COMMENT: Only C-class flares in past 24h, more are expected. The strongest was a
C2.9 at 08:40 UT from NOAA AR 1868. NOAA AR 1875 has a beta-gamma
configuration and could produce M-class flares. Geomangetic conditions have
been quiet and are expected to remain so. There are small probabilities
that the fast solar wind from a coronal hole at high northern latitudes,
and the effects of the halo CME from October 16 could affect geomagnetic
conditions in the next 48h.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13th/October, through Sunday, 20th/October there were 234 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9X, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FO/a, FP, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9L, VP2E, VP2V, VP5, VP6, VP8, VP8/h, VP9, VR, VU, XE, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS. Serge, UU5WW, will be active as 3B8/UU5WW from Mauritius Island between November 17-30th. Activity will be holiday style, mostly CW on the HF bands and an entry in the CQWW DX CW Contest (November 23-24th). QSL via K2PF (OQRS preferred). A Web site with more details

will be available soon.

3D2, FIJI. John, N7CQQ, is expected to be active as 3D2QQ from Fiji during the CQWW DX SSB Contest (October 26-27th) before he participates in the upcoming T33A Banaba Island DXpedition. QSL 3D2QQ via N7CQQ (see QRZ.com).

4K, AZERBAIJAN. Alim, 4K6FO, will be active during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/?/Low-Power entry. QSL via LoTW and eQSL. Also, he welcomes paper QSLs (see 4K6FO on QRZ.com).

4U0WFP, ITALY. Station 4U0WFP is an amateur radio station located at the "World Food Programme Headquarters" in Rome, Italy. Currently the operators are Robert/S53R and Dane/S53T. Activity this past week was on 21023 kHz around 1325z. Give them a call and learn about what World Food Programme <www.wfp.org> does to fight the hunger worldwide! QSL via info on QRZ.com.

6V, SENEGAL. Vladimir "Vlad", RK4FF, will once again be active as 6V7S from Le Calao in Ngaparou between October 22nd and November 27th. Activity will probably be on 80/40/20/15/10 meters using CW, SSB and RTTY. QSL via RK4FF. Log is available on ClubLog. Check out QRZ.com for some pictures.

8P, BARBADOS. Tom, W2SC, will be active as 8P5A during the CQWW DX SSB Contest (October 26-27th) as Single-Op/All-Band entry. QSL via LoTW or direct to NN1N.

8P, BARBADOS. Dean, 8P6SH, will be active as 8P2K during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/Single-Band (10m) entry. QSL via KU9C.

AH0, MARIANA ISLANDS. Operators Kuniyoshi/7L1FPU (W1FPU), Moto/JE1NDE (W1NDE), Naoyuki/JK1FNL (NA8O), Matthew/K0BBC and Hiroyuki/JG7PSJ (KW2X) will be active as AH0BT during the CQWW DX SSB Contest (October 26-27th) as a Multi-2 entry. QSL via 7L1FPU, direct, by the Bureau or LoTW.

B9, CHINA (ZONE 23). Dale, BA4TB, and a team of others will be active as B9/BY9GA from Zone 23 (Gansu) between October 20-28th. Activity will include the CQWW DX SSB Contest (October 26-27th). Also, look for BJ9TA to be active on 6m and up (EME included) during same dates. QSL via their operator's instruction.

C6, BAHAMAS. Operator Tim/N4UM (C6ARU), Mike/K4RUM (C6AUM) and Bob/N4BP (C6AKQ) will be operating from Freeport between November 19th and December 10th. Look for C6AUM and C6AKQ to be active mainly on CW and on 160-10 meters including the 30/17/12 meter bands. C6ARU will be mainly on the Digital modes (some JT65 and JT9) on 30/17/12 meters bands. During the CQWW DX CW Contest (November 23-24th), look for C6AUM to be active as a Single-Band 40m entry, and C6AKQ to be Single-Band 80m entry. For the ARRL 160 Contest (December 6-8th), the trio will be a Multi-Single entry as C6AKQ. QSL via operator's QRZ.com address.

C8, MOZAMBIQUE (Update). The international team of operators active as C82DX from Xai Xai (WW Loc KG64) are expected to go QRT on October 22nd. Activity continues on 160-10 meters using CW, SSB and RTTY. Suggested frequencies are available in OPDX.1114. John, K6MM, reported on Saturday: "Saturday, 19-October @ 1415 UTC....25 New photos posted (see PHOTOS link).....Power pole caught fire last night causing 3-hour delay.....Low band Qs continue to be difficult due to high noise and very windy conditions.....Continuing to emphasize 160m and 80m each night.....Will operate more RTTY today.....Over 14,000 QSOs in Log now....Check PROPAGATION page to create your own personalized prediction charts.....Send questions or comments to <webaron@...>. Also, from QRZ DX, on October 20th, Tom, N4XP, reported that they lost power (Whole City) for about 5 hours and they were down to 2 radios with no amps. Power did return about 1100 local time. QSL via the OQRS by ClubLog (Highly Recommended/Preferred Method) to receive a QSL either direct and by the Bureau. To QSL direct via the mail, send it to: C82DX, Box 333, Bethlehem, GA 30620 USA [Please do not send IRCs. See details on their Web page]. They will not confirm QSOs via the eQSL system. The C82DX Web page is at: http://c82dx.com

D4, CAPE VERDE. John, G4IRN, will be active as D44TWQ from Boa Vista, Cape Verde (AF-086), between November 5-12th. Activity will be holiday style (primarily a windsurfing holiday) on the 30/17/12 meters and on CW only using a K2 and KPA500 into dipoles. QSL via his home callsign, by the Bureau and direct. An OQRS will be available on ClubLog and he will use LoTW. For more details, see: http://g4irn.com/cap-verde-2013

E2, THAILAND. Dej, E21YDP, will be active during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/Single-Band (15m)/Low-Power entry. QSL via E21YDP.

EF8, CANARY ISLANDS. Juan, EA8RM, will be active as EF8U from the Las Palmas Contest station during the CQWW DX SSB (October 26-27th) and the CQWW DX CW Contests (November 26-27th) as a Single-Op/All-Band entry. QSL via LoTW.

ED8, CANARY ISLANDS. Manuel, EA8DO, will be active as ED8W during the CQWW DX SSB Contest (October 26-27th) Single-Op/Single-Band (20m)/High-Power entry. QSL via EA8DO.

ED9, CEUTA AND MELILLA (Cancelled!). A group of operators that were expected to be active as ED9Z as a Multi-Op from Ceuta have announced that they have cancelled their CQWW DX SSB Contest operation due to some serious personal issues.

FJ, ST. BARTHELEMY (Also PJ7). Pete, VE3IKV/VA3RA, will be active as FJ/VA3RA from St. Barts during the CQWW DX CW Contest (November 23-24th) as a Single-Op/Single-Band (10m) entry. Outside of the contest (before and after) look for him to be active on CW, SSB and 6 meters, as well as 10m and 6m mobile around the island. The Grid Square on St. Barts is FK87. He will be on the island between November 21-25th. QSL via VE3IKV. He also mentions that he will travel to Sint Maarten and be active as PJ7/VA3RA between November 25-28th. Activity will also be on 10 and 6 meters. Also QSL via VE3IKV.

FK/TX5, NEW CALEDONIA. Freddy, F5IRO, will once again be active as FK/F5IRO from Plum, New Caledonia (OC-032, DIFO FK-001, WLOTA 1280, DDFM 988), starting sometime at the end of October until February 2014. Activity will be on 80-10 meters using mostly CW and some PSK, with a Elecraft K3 and dipoles and long wire antennas. Freddy will team up with Michel, FK8IK, in Noumea using the special callsign TX5W for the CQWW DX CW Contest (November 23-24th). Sometime after the contest, Freddy and Michel are looking into possibly activating some FK IOTAs. Look for details to be posted on QRZ.com and Freddy's Blog page at: http://j28ro.blogspot.com QSL both FK/F5IRO and TX5W via F5IRO, direct or by the Bureau. Logs will be uploaded to ClubLog and LoTW sometime in March 2014.

FO, FRENCH POLYNESIA. Heinz, DF1YP, is now active as FO/DL1YP from Moorea Island (OC-046) until November 6th. Activity has been mainly 20 meters on SSB. QSL via his home callsign.

FT5Z, AMSTERDAM ISLAND. Stan, SQ8X, posted the following on October 17th, on the FT5ZM Web page <http://www.amsterdamdx.org> [edited]: "Since the early planning days of this DXpedition, we have been accumulating and storing equipment at our staging site in Atlanta, Georgia. On October 15th, our packing and organizing was completed, equipment was placed on pallets, loaded into our sea container, and began its journey to New Zealand where it will be loaded aboard our ship." The photos will tell the story at: http://www.amsterdamdx.org/our-equipment-has-been-shipped

G3/GB4, ENGLAND (Special Event). The Royal Air Force station at Henlow, in Bedfordshire, UK, - G3ELV and the RAF Signals Museum, will be open for business under the Permanent Special Event callsign GB4SMH effective November 1st, 2013. Normal operating times will be 10:00 UKT to 16:00 UKT on each Tuesday and on the first Saturday of each month. QSL via Bureau.

GJ, JERSEY. Members of the Jersey Contest Group will be active as GJ2A from Jersey Island (EU-013) during the CQWW DX SSB Contest (October 26-27th) as Multi-Single entry. QSL via LoTW, or direct to GJ3DVC.

HK0/S, SAN ANDRES ISLAND (Update to OPDX.1132/Callsign). Members of the "DX Friends" will activate San Andres Island (NA-033) as HK0R between November 1-10th. Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are listed in OPDX.1132. QSL via EA5RM direct (see Web page). You can use the OQRS (see Web page) for direct and Bureau cards. Visit their Web page at: http://www.dxfriends.com/SanAndres2013

HS4, THAILAND. Operators Obby/HS4SSP, Ray/HS4RAY, Yut/HS4ESF and HS4SCM will be active as HS4SSP during the CQWW DX SSB Contest (October 26-27th) as a Multi-Single/Low-Power entry. QSL via HS4RAY.

IOTA NEWS.....
AS-043. Operators Suehiro/JI1PLF, Mitsuo/JA1UNS, Hisashi/7N1GMK, Takeo/7L4PVR and Kazuhiko/7N4VPS will be active as homecall/1 from Hachijo Island in the JA1 South Izu Group, between October 18-21st. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via their home callsigns, direct or by the Bureau.

OC-262. (Update) Adhi, YB3MM, will be active as YB3MM/4 from Sebesi Island between October 19-21st. Activity will be on 20-15 meters using CW and SSB. QSL preferred OQRS (ClubLog) or direct (see QRZ.com). For more details and updates, see: http://www.yb3mm.com

OC-276. (Update) Members of the "ORDA PAPUA DXPEDITION TEAM" will activate for the first time Mapia Island as YB9Y. However, it was reported [edited], "Due to weather reasons, which the team received from the captain of the vessel Papua Lima, there is now a delayed departure from the original schedule. It can be confirmed that the team departure will be on the evening of October 20th, from Jakarta and will arrive in Bras Island ☐ Mapia Island on the morning of October 22nd, and plan to start activity on the 22nd October at 09:00 UTC." The YB9Y operation will be active until October 28th. Activity will be on 160-6 meters using CW, SSB and the Digital modes. QSL via YB1GJS, direct or by the Bureau. A OQRS will be used on ClubLog. For more details and updates, see: http://yb9y.com

OC-295. (Small Correction to OPDX.1132). John, 9M6XRO, tells OPDX: "Sebatik Island is actually NOT a new IOTA activation. We members of the Borneo Amateur Radio Club first activated it as 9M4SEB in 2006. In 2010, 9M6DXX/P and 9M6XRO/P also operated from Sebatik. The IOTA website shows 22% of claimants with OC-295 from these operations. The confusion arises because Sebatik Island is a split sovereignty island - the northern part belongs to Malaysia and the south to Indonesia. This will actually be the first operation from the YB side. It will also be a chance for me to work OC-295 :-)".

J3, GRENADA (Update). Operators Clarence/WX7E, Ron/WJ7R, Mike/W7RIS, Mike/W7MJJ, Terence/KS5Z and possibly two more operators are planning to be active as J3A from Grenada (NA-024, WLOTA 0718) during the CQWW DX SSB Contest (October 26-27th) as a Multi-2 entry. QSL via WA1S, direct, by the Bureau or LoTW. The team is still waiting for their own personal callsign to use outside of the contest. Clarence, WX7E, informs OPDX that they will be arriving on Wednesday evening, October 23rd, which gives them two days to get everything ready. They will be staying for three days after the contest to look around the island. The team will work 160-10 meters during the contest. Activity before the contest on Thursday and Friday will probably be on CW - most likely on 40, 20, 15 and 10 meters (NO 30/17/12m). QSL via LoTW.

J3, GRENADA (Just A Reminder). Mark, N2MD, is returning to Grenada (NA-024, WLOTA 0718) and will be signing J3/N2MD between October 23-28th. This year is the 30th anniversary of the U.S. intervention and rescue of U.S. medical students in Grenada (1983) during which Mark operated as KA2ORK/J37. He will be joined by Arnal, N9ACC, who will sign J3/N9ACC. Arnal is a U.S. Navy officer (retired) who was also involved in the 1983 mission. Plans are to operate both fixed and mobile. Operations will be on 80-6 meters (SSB) and 2 meter (FM); band conditions and time permitting. Activity

will be holiday style but mostly evening hours. QSL via LoTW only.

PG200, THE NETHERLANDS. Fred, PA0FAW, will be operating as PG200NL, to celebrate "200 years of The Netherlands", between November 2-29th. His operations will be mainly on CW, but with some Digital modes and SSB only upon availability of a good QTH. Fred is an ISWL Member and can be worked, or heard by ISWL members for the Monitor award. QSL to PA0FAW, by the Bureau, direct, or via eQSL.cc. SWL reports are very welcome.

PJ6, SABA. Operators Jeff/KB1ZOJ, Bob/K4UEE, John/K5AC, George/N4GRN and Gregg/W6IZT will be active as PJ6A from Saba Island (NA-145, WFF PAFF-027, WLOTA 2043) during the CQWW DX SSB Contest (October 26-27th) as a Multi-Single entry. QSL PJ6A via N4NX. The team will be there October 23-29th, and is expected to be active outside of the contest as PJ6/homecall, possibly on CW and RTTY. Listen for QSL instructions by the operators.

PRESS RELEASE (Friedrichshafen, Germany). Wolf Harranth, OE1WHC, from the Amateur Radio Section of ORF (Austrian Broadcasting Corporation) and the Documentary Archives Radio Communications/QSL Collection, has informed OPDX that the following 2013 Friedrichshafen Ham Radio Lectures (listed below) are available at: http://www.dokufunk.org/talk
The Ham Radio Lectures (Powerpoint slides with synchronized audio) are:
* Martti Laine, OH2BH: Changing Times in DX Hunt (Keynote speech)
* Veijo Kontas, OH6KN and Juho Juopperi, OH8GLV: Technology Innovations in Helping DXers
* Tom Perera, W1TP: The ENIGMA and other Historic Cipher Machines. Introduction to the Enigma.
* John Alexander, G7GCT: Small Cipher Machines
* Martin Steyer, DK7ZB: Development of Broadcasting in Germany 1923-2013 (In German)
* Chris Ducking, G3SVL: 100 Years of the RSGB and its International Partners

S2, BANGLADESH (Project 2013 by MDXC - Press Release). The Mediterraneo DX Club (MDXC) announced on Wednesday, October 16th, that they will be [edited] "organizing some skeds from the Headquarter of Bangladesh Scouts, where they□ll operate, with others Scouts groups in the World. This is a good opportunity for Bangladesh Scouts to listen and contact others Scouts on the air. The team's idea is to offer these special skeds on 20 meters on November 20th and 21st around 1300 UTC. Scout Groups interested can write an E-mail to their Pilot station IK7JTF. More updates will be forthcoming soon." Just a reminder that this DXpedition will take place between November 16-26th, using two callsigns - S21ZBC from the start of the DXpedition (November 16-22nd), and then they'll shift to the other callsign S21ZBB, starting from November 23rd for the CQWW CW Contest weekend and the remaining days until they leave the country. For any further news and updates, please visit the official Web site of Bangladesh 2013 adventure at: http://www.mdxc.org/bangladesh2013

T33, BANABA ISLAND (Update). The T33A DXpedition to Banaba Island (OC-018), is fastly approaching and is expected to be active between November 5-18th.

It was reported on the T33A Blog Page this past week on October 17th [edited]: "Reported by co-team leader Jay, W2IJ, - Our container just departed Suva, Fiji, at 14 knots now on the way by sea to Tarawa. Our advance team will arrive in Tarawa Oct. 31st to attend to picking up local provisions and getting our container unsealed and through customs, and loaded onto our boat in preparation for a Nov. 3rd departure to Banaba Island." It was also mentioned on October 12th, that the T33A main sponsor is Elecraft, who is supplying six K3 Transceivers and five KPA-500 Amplifiers. The team appreciates the generosity of all their T33A corporate sponsors and individual donors. See their sponsors page to view those who have generously made donations, go to: http://www.t33a.com/sponsors.html
It was also announced this past week, the T33A team will be using DXA interface for their operation. DXA is an innovative Web site that allows DXers to view the status and activities of a DXpedition in near-real-time. Within a few minutes after making a contact with the DXpedition, the DXer is able to see a graphical listing of their contact. The DXA Web page for the T33A operation is located at: http://dxa2.org/t33a
The T33A DXpedition's Blog page is at: http://banaba2013.wordpress.com
For more details about the DXpedition, visit the T33A Web page at: http://www.t33a.com/index.htm

T8, PALAU. Satomi "Tom", JN2AMD, will be active as T88AZ from Palau Island (OC-009) between October 25-28th. Activity will include the CQWW DX SSB Contest (October 26-27th). Outside of the contest, operations will be on 80-10 meters using CW, SSB and RTTY. His equipment is a TS-570S with an Ameritron ALS-600 amp (500w) into a yagi, dipole and vertical. QSL via JN2AMD, direct or by the JARL Bureau.

TC0, TURKEY. Operators Mustafa/TA2TX, Nick/LZ1NK, Llian/LZ1CNN, Krasi/LZ2UW, Nasko/LZ3YY, Christo/LZ3FN, Nick/LZ3ND and Vesselin/LZ5VK will be active as TC0A from an island in Asiatic Turkey, in the Canakkale/Balikesir/Izmir Province IOTA Group (AS-099), during the CQWW DX CW Contest (November 23-24th) as a Multi-2 entry. QSL via TA2TX or LZ1NK. The team will be there between November 19-25th. Outside the contest, look for the operators to be on CW and SSB signing TA0/homecall. QSL via their home callsign. For possible updates, see: http://tc3a.alle.bg

TG0, GUATEMALA. Operators Edgar/TG9AXF, Mario/TG9ADQ and Dani/TG9AMD will be active as TG0AA from Monterrico during the CQWW DX SSB Contest (October 26-27th). See QRZ.com for QSL info. ADDED NOTE: Monterrico, Guatemala, is situated on the Pacific coast of Guatemala. Known for its volcanic black sand beaches and annual influx of sea turtles. A few turtle conservation organizations operate in the Monterrico area because the long stretch of beach serves as a breeding ground for 4 species of sea turtles."

TU, COTE D'LVOIRE. Operators Chris/F4WBN (ex-TL0A), Paul/F6EXV and Jan/DJ8NK will be active as TU5AX, TU5XV and TU5NK, respectively, for a solidarity radio operation which will take place between November 17-30th. Activity will be on SSB, CW and RTTY, with operations on 160-6 meters (including 60m). QSL via their home callsigns, by the Bureau, direct or the OQRS on Clublog. Jan informs OPDX, "The 3 operators will

support the club station TU2CI and will leave equipment behind (radios and antennas), install it and train the local operators to use it, in order to revive the Abidjan radio club, and assist some local hams who have strongly suffered from the civil war that hit the country sometime ago."

V4, ST. KITTS (NA-104). Andy, N2NT, will once again be active as V47NT from the QTH of V47KP between November 17-26th. Activity will include the CQWW DX CW Contest (November 23-24th) signing as V47T and as a Single-Op/All-Band/High-Power entry. QSL via W2RQ.

VP9, BERMUDA. By the time you read this, Markus, DJ4EL, will be active as VP9/DJ4EL from Bermuda (NA-005) until October 31st. Activity will be holiday style on 40-10 meters on SSB using wire antennas. QSL via his home callsign.

XQ7, CHILE. Esteban, XQ7UP, will be active from the rare Coyhaique (Patagonia) Province of Chile, between October 21-28th. Activity will be mainly 20, 15 and 10 meters, but he will also try to work 30 meters PSK31. Other activity will be on SSB and PSK31. Participation also in the CQWW DX SSB Contest (October 26-27th). Also, this activity is good for the Antarctic Challenge. QSL via XQ7UP.

XW, LAOS. Champ, E21EIC, will once again be active as XW0YJY from Vientiane between October 25-29th. Activity will include the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band/Lower-Power entry. Operations before and after will be CW on 80-10 meters. QSL via E21EIC or OQRS (ClubLog) and LoTW. No eQSL.

Z6, REPUBLIC OF KOSOVO (Z68BH - IN THE CQWW CONTEST). Martti, OH2BH, sent out the following press release on October 18th: "CQWW SSB will bring several Kosovar stations active from this new state recognized today by 105 United Nations member states and qualifying as separate country multiplier in the CQWW Contest.
Among the activity, Z68BH will be operated by Martti, OH2BH, using the new antennas of Driton, Z61DX, with great support of Igor, UA2FZ.
http://ant-depot.com/en.html
During the most recent European DX Contest (WAEDC) many non-EU stations had difficulty with their contest logging programs on Z6 prefix. A new CTY.dat file can be loaded at: http://www.country-files.com
QSL Z68BH via OH2BH."

participants among the Team members. The Teams represent over 30 countries and a wide range of personal backgrounds. While the focus will be on the competition, we are looking forward to hosting the teams as they share and spread the international goodwill of the ham radio community in the Team Village during WRTC Week.☐

There are some interesting stories hidden within the team pairings. There are two teams with family members; K1ZM chose his son KK6ZM and KU1CW chose his cousin EA5GTQ. There will be a YL (female) team with DL1QQ selecting DL8DYL as her partner. E77DX declined his Team Leader spot to become the Team Mate of OE3DIA. This enabled 9A5K to gain entry as a Team Leader. ES5TV-ES2RR and 5B4WN-5B4AFM will be operating together in their third consecutive WRTC.

There are four sponsored teams yet to be announced. A Team Sponsor donation earns the right to select a team. Contact Doug, K1DG, for details about the Team Sponsor program.

Questions regarding WRTC2014 team selection should be submitted by e-mail to teamleader@....

About WRTC2014

The World Radiosport Team Championship (WRTC) is held every four years and consists of 50+ two-person teams of amateur radio operators from around the world competing in a test of operating skill. Unlike most on-the-air competitions, all stations are required to use identical antennas from the same geographic region, eliminating all variables except operating ability. Previous WRTCs have been held in Seattle (1990), San Francisco (1996), Slovenia (2000), Finland (2002), Brazil (2006), and Russia (2010). More information is available at www.wrtc2014.org or contact WRTC Chairman Doug Grant, K1DG, via e-mail at k1dg@....

21747. Great DX!

Yahoo group: DX-IS (2013)
Date: 2013-10-22 02:45:10 UTC
From: Lance Martin
Topic: 21747 Message: 21747

Hi Guys,

Was on this morning around 2230 - 2300z and the high bands were kickin!
Managed to work ZD8O on the long path on 10m! Now that is some amazing DX!
Worked a few Ws on 10m CW. Got the TN guys on 17m SP SSB (and the NA pile was loud!! LP).
Then LU7HF came through over the south pole on 12m CW...it seemed I was in DX heaven for half an hour!

I will be on again tomorrow and plan to be on K3UK's web page if you need Zone29.
Also be aware that VK6IR has a 5 element monobander on 10m, so look out for him too.

The TN guys have been light copy hear mostly as I believe they are beaming north to EU most of the time, I guess that's where most of the contacts would be so I can't blame them.
Looking forward to CE0Z coming up next month!

73, Lance - VK6DU

21748. FW: 8R1A

Yahoo group: DX-IS (2013)

From: Lance Martin
Topic: 21748 Message: 21748

Hi Guys,

Got this email below the other day and (with Luke's permission) thought I would share it, just so that you W's that go to the Caribbean and South and Central America for DXpeditions have some idea of what it's like over here in VK. Also for any SA, Caribbean stations on the list.

South America and most of the Caribbean is via the south pole for VK6 (and much of VK). We get two main chances each year in the peak of the cycle and they are around equinox. South pole openings start around 2300z for VK6 (20m and above) and can extend through to 0400z. Long path is 1000z extending through to 1400z on a good day.

Polar propagation can be so unstable as I have mentioned various times on this reflector. Seems to be open at present, hope we get more of this!

See you on the bands!

73, Lance - VK6DU

Hi Lance,
Good thing I'm running late this morning!
That is only my second ever QSO with Guyana.
First was the Brazilian exp a couple of years ago.
I never, ever hear the resident hams there, even though they are on almost daily.

Similar situation with Bolivia. The German chap who was there last week allowed me to make two new bands. First was CP4BT about 3 years ago, apart from a few I never confirmed decades ago. Again, the locals are on daily, but never, ever heard here!

Ok mate, must dash.

73,
Luke VK3HJ

21749. Report SIDC Ursigram

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31024
SIDC SOLAR BULLETIN 24 Oct 2013, 1310UT
SIDC FORECAST (valid from 1230UT, 24 Oct 2013 until 26 Oct 2013)
SOLAR FLARES : Major flares expected (X-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 24 Oct 2013 10CM FLUX: 156 / AP: 015
PREDICTIONS FOR 25 Oct 2013 10CM FLUX: 156 / AP: 017
PREDICTIONS FOR 26 Oct 2013 10CM FLUX: 151 / AP: 007
COMMENT: There were six M flares and eleven C flares on the Sun during the past 24
hours. The brightest one was an M9.3 flare released by NOAA AR 11877 with
peak time at 00:30 UT on October 24, and caused a Type II radio burst with
estimated shock speed of 750 km/s. All C and M flares were produced either
by NOAA AR 11875 or NOAA AR 11877, both of which are beta-gamma-delta
regions with rapidly evolving topology. In the next 48 hours, X flares from
either region are possible. Since both regions are near the central
meridian, there is a substantial risk of halo CMEs and a warning condition
for proton storms is issued. In the past 24 hours, solar wind has varied
between about 310 and 350 km/s. In the same period, the Interplanetary
Magnetic Field has varied between 5 and 8 nT. The M4.2 flare of October 22
was accompanied by a faint halo CME, which could deliver a glancing blow to
Earth on October 27. Geomagnetic activity was at quiet levels (K Dourbes
between 0 and 3; NOAA Kp between 0 and 1) during the past 24 hours. Active
conditions (K Dourbes = 4) with isolated minor storm intervals (K Dourbes =
5) are possible in the second half of October 24 and on October 25, due to
a possible glancing blow from the CME from October 22 (observed by LASCO C2
at 4:36 UT). Quiet conditions (K Dourbes < 4) are expected for October 26.
TODAY'S ESTIMATED ISN : 105, BASED ON 13 STATIONS.

SOLAR INDICES FOR 23 Oct 2013
WOLF NUMBER CATANIA : 158

SB DX ARL ARLD043
ARLD043 DX news

This week's bulletin was made possible with information provided by KX9X, NC1L, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TUNISIA, 3V. A group of operators will be QRV as 3V7A as a Multi/Single entry in the CQ World Wide SSB DX contest. QSL via LX1NO.

AZERBAIJAN, 4K. Alim, 4K6FO will be a Single Op entry in the CQ World Wide SSB DX contest. QSL direct to home call.

SIERRA LEONE, 9L. Zbig, SP5BTB is QRV as 9L1BTB until November 10 while working for the UN in Freetown. He is active on all bands and modes. QSL direct to home call.

QATAR, A7. A group of operators will be QRV as A73A in the CQ World Wide SSB DX contest as a Multi/Two entry. QSL via A71A.

BAHRAIN, A9. Special event call A91ACC is QRV until October 31 during the Arab Cycling Championship. QSL via IZ8CLM.

TAIWAN, BV. A group of operators will be QRV as BV55D as a Multi/Single entry in the CQ World Wide SSB DX contest. QSL via operators' instructions.

CHILE, CE. Estebam, XQ7UP is QRV from Coyhaique until October 28. Activity is mainly on 20, 15 and 10 meters using SSB and PSK31 with PSK31 only on 30 meters. This includes being an entry in the CQ World Wide SSB DX contest. QSL to home call.

MOROCCO, CN. A large group of operators will be QRV as CN2AA as a Multi/Single entry in the CQ World Wide SSB DX contest. QSL via UA2FM.

CAPE VERDE, D4. A group of operators will be QRV as D4C from Sao Vicente Island, IOTA AF-086, in the CQ World Wide SSB DX contest as a Multi/Multi entry. QSL via YL2GM.

CANARY ISLANDS, EA8. Jaime, WP3A will be QRV as ED8P from Santa Cruz de Tenerife, IOTA AF-004, in the CQ World Wide SSB DX contest as a Single Band/Low Power entry on 15 meters. QSL direct via NP3O.

LIECHTENSTEIN, HB0. Laci, HA7JTR is QRV as HB0/HA7JTR from Masescha until October 29. This includes being an entry in the CQ World Wide SSB DX contest. QSL to home call.

ARUBA, P4. Valery, R5GA is QRV as P4/R5GA. He will be active as P40F in the CQ World Wide SSB DX contest. QSL contest call via UA3DX and P4/R5GA to home call.

SABA, ST. EUSTATIUS, PJ6. Operators KB1ZOJ, K4UEE, K5AC, N4GRN and W6IZT are QRV as PJ6/home calls from Saba Island, IOTA NA-145, until October 29. Activity is on the HF bands using CW and RTTY. They will be active as PJ6A as a Multi/Single entry in the CQ World Wide SSB DX contest. QSL contest call via N4NX and all others via operators' instructions.

DODECANESE, SV5. Rich, M5RIC is QRV as SW5CC from Rhodes Island, IOTA EU-001, until October 31. This includes an entry in the CQ World Wide SSB DX contest. QSL via M0OXO.

PALAU, T8. Tom, JN2AMD is QRV as T88AZ until October 28. Activity is on 80 to 10 meters using CW, SSB and RTTY. This includes being an entry in the CQ World Wide SSB DX contest. QSL to home call.

GUATEMALA, TG. A group of operators will be QRV as TG0AA from Monterrico in the CQ World Wide SSB DX contest. QSL via bureau.

HONG KONG, VR. A group of operators will be QRV as VR2PX as a Multi/Single entry in the CQ World Wide SSB DX contest. QSL via IV3TAN.

VIET NAM, XV. Mike, N0ODK is QRV as XV4MN from Phu Quoc Island, IOTA AS-128, until October 29. He will be a Single Op/All Band/Low Power entry in the CQ World Wide SSB DX contest. QSL to home call.

LAOS, XW. Champ, E21EIC is QRV as XW0YJY. This includes being a Single Op/All Band/Low Power entry in the CQ World Wide SSB DX contest. Before and after the contest he is active on the HF bands using some CW. QSL to home call.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC Credit: Afghanistan, T6JR, 2013 operation.

THIS WEEKEND ON THE RADIO. The ARRL EME Contest and CQ Worldwide SSB DX Contest are scheduled for this weekend. Please see October QST, page 89, and the ARRL and WA7BNM contest web sites for details. NNNN

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31025
SIDC SOLAR BULLETIN 25 Oct 2013, 1210UT
SIDC FORECAST (valid from 1230UT, 25 Oct 2013 until 27 Oct 2013)
SOLAR FLARES : Major flares expected (X-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 25 Oct 2013 10CM FLUX: 166 / AP: 005
PREDICTIONS FOR 26 Oct 2013 10CM FLUX: 166 / AP: 011
PREDICTIONS FOR 27 Oct 2013 10CM FLUX: 161 / AP: 016
COMMENT: New beta region NOAA AR 11882 near the East limb produced one X flare, two
M flares, and one C flare during the past 24 hours. During the same period,
eight C flares were released by NOAA AR 11875 (beta-gamma-delta) and 11877
(beta-gamma). The X1.7 flare peaked at 08:01 UT on October 25, and caused a
Type II radio burst with estimated shock speed of 1240 km/s as observed by
the San Vito solar observatory. SDO/AIA observed a filament eruption in the
NE around 2:59 UT on October 25. In the next 48 hours, X flares are
possible, especially from NOAA AR 11882. There is a substantial risk of
halo CMEs and the warning condition for proton storms remains valid. In the
past 24 hours, solar wind has varied between about 300 and 350 km/s. In the
same period, the Interplanetary Magnetic Field has decreased from about 7
to 2 nT. A weak glancing blow from the CME from October 22 (4:36 UT) seems
to have happened around 4h UT on October 25, without any geomagnetic
effects. Strong CMEs were registered by LASCO C2 on October 24 (17:24 UT)
and October 25 (3:24 UT, related to the M2.9 flare; 4:48 UT, related to the
filament eruption; 8:24 UT, related to the X1.7 flare). Preliminary
analysis suggests that these CMEs will not be geo-effective. Geomagnetic
activity was at quiet levels (K Dourbes between 0 and 3; NOAA Kp between 0
and 1) during the past 24 hours. Quiet conditions (K Dourbes < 4) are
expected for October 25 and the first half of October 26. Active conditions
(K Dourbes = 4) with isolated minor storm intervals (K Dourbes = 5) are
possible in the second half of October 26 and on October 27, due to the
expected arrival of the CME from October 22 (observed by LASCO C2 at 21:20
UT).
TODAY'S ESTIMATED ISN : 097, BASED ON 11 STATIONS.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1134
BID: $OPDX.1134
October 28, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, KF5EYY, K6MM, K8GI, K8YSE, W8GEX & 60m News, AT International, DJ8NK, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, E21EIC, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK1QBT, IK8YFU, IV3PRK, OH2BN, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, and the VHF-DX-Portal (MMMonVHF) for the following DX information.

*** EDITOR'S SPECIAL NOTES (by Tedd, KB8NW): This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW DX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 18th-October, through Friday, 25th-October there were 229 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9X, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TI9, TJ, TK, TN, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP9, VR, VU, XE, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA. Operators Hrane/YT1AD, Andrey/RA9CKQ and Ashraf "Ash"/ KF5EYY (SWL 3V4-002) will be active as 3V7A, from the 3V8BB club station at the "Institute Superieur de L'Animation Pour la Jeunesse et la Culture" in Bir El Bay, Tunis, during the CQWW DX SSB Contest (October 26-27th) as a Multi-Single entry. QSL via LoTW or to LX1NO.

4L, GEORGIA. Operator Vaho, 4L8A, will be active in both the CQWW DX SSB (October 26-27th) and CQWW DX CW Contests (November 23-24th) as a Single-Op/Single-Band (15m) entry. QSL via K1BV or LoTW.

5H, TANZANIA. Jacques, HB9EYP, will once again be active (possibly as 5H3JJ - pending) from Zanzibar between November 2-9th. Activity will be QRP on 20-6 meters (possibly 40m) using an Elecraft KX3 with 10 watts into a Windom antenna from the beach. QSL via his home callsign, direct, by the Bureau or LoTW.

5J0, SAN ANDRES ISLAND (Updated Callsign). Members of the "DX Friends" will activate San Andres Island (NA-033) as 5J0R (not HK0R as announced last week) between November 1-10th. The updated list of operators mentioned are Alberto/EA1SA, Toni/EA5RM (Team Leader), Roberto/EA2RY, Manolo/EA7AJR, Jose/EA7KW, Fabrizio/IN3ZNR, Tony/F8ATS, Faber/HK6F, Bernard/F9IE, Roberto/ HK3CW, Valery/RG8K and Mike/RU1WN. Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are listed in OPDX.1132. QSL via EA5RM direct (see Web page). You can use the OQRS (see Web page) for direct and Bureau cards. Visit their Web page at: http://www.dxfriends.com/SanAndres2013

6V, SENEGAL. Robert, DL7VOA, will be active as 6V7D from Toubab Dialaw between November 29th and December 7th. Activity will be mainly on CW, with some SSB, on 40-10 meters. QSL via DL7VOA. ADDED NOTE: Please be advised to only QSL this operation to DL7VOA. A Russian group used this callsign back in March of 2011.

7P, LESOTHO. Wolfgang, DH3WO, will once again return to Lesotho for a brief operation as 7P8WO between December 22-24th. Activity will be holiday style (as time allows) on the HF bands. QSL via DH3WO, direct or by the Bureau.

7Z1, SAUDI ARABIA. Abdul, 7Z1CQ, will active during the CQ WW DX SSB Contest (October 26-27th) as a Single-Op/All-Band entry. QSL via LoTW. Visit his Web page at: http://7z1cq.com

9M2, WEST MALAYSIA. Members of the North of Peninsular Malaysia ARA Boys Contest n' DXers will be active as 9M2SM during the CQWW DX SSB Contest (October 26-27th) as a Multi-2 entry on 80-10 meters. QSL via 9M2GET. Operators mentioned are Hairil/9M2GET, Oja/9M2OUT, Han/9W2SBD, Mohamad/ 9W2SBL, Ahmad/9M2AGC and Syed/9M8SYA.

A7, QATAR (Update/Change). Club station of the Qatar Amateur Radio Society (A71A) will be active as A73A during the CQWW DX SSB Contest (October 26-27th) as a Multi-2 entry. QSL via A71A. Operators mentioned are A71A club members, Jan/OZ1ADL, Alex/OZ7AM and Arne/OZ4VW.

AH2, GUAM. Members of the Guam Contest Club will be active as AH2R during the CQWW DX SSB Contest (October 26-27th) as a Multi-Single entry. Operators mentioned are: Noriyuki/7N2JZT (NH2KO), Nozomu/JE8KKX (AH2K), Masahiro/JH3PRR (KH8B), Toshinobu/JI3ERV (NH2C), Toshimasa/WI3O and Ritsu/WX8M. QSL via LoTW or direct to JH7QXJ. PLEASE DO NOT QSL via the KH2 Bureau.

BV55, TAIWAN (Contest/Special Event). Members of the radio club station of the China Radio Association will be active as BV55D during the CQWW DX SSB Contest (October 26-27th) as a Multi-Single entry. This is a special event station to celebrate the 55th anniversary of Densen broadcasting company. Operators mentioned are Tang/BM2AAV, BM2LME, Eddie/BV2DD, Evan/BV2KS, Lee/BV2NT, Lee/BX2AB, Bill/BX3AC and Pro/BX4AN. QSL direct to: c/o C.R.A., P.O.Box 117-254, Taipei City, Taiwan. R.O.C. For more QSL info and the log, see: http://www.cra.org.tw/amateur/qsl_en.aspx http://www.ham.org.tw/specialcall/special_log.aspx?whatcall=BV55D

C3, ANDORRA. Members of the "Unio de Radioaficionats Andorrans" will be active as C37NL during the CQWW DX SSB Contest (October 26-27th) as a Multi-Op entry. Operators mentioned are Josep/C31AT, Josep/C31JM, Beli/C31KC, Michel/C31MO, Joan/C31US, Martinho/C31VM, Xavi/C32JK and Gerardo/EA3HCJ. QSL via the Bureau or direct to: Unio de Radioaficionats Andorrans, P.O. Box 1150, Andorra la Vela AD553, Andorra. Logs will be uploaded to LoTW soon.

C8, MOZAMBIQUE (Update). By the time you read this, the C82DX team will be QRT. John, K6MM, reported on Tuesday, October 22nd at 1332z: "Last day to get them in the log!....The DXpedition will end in less than 24 hours - on Wednesday, 23-October at daybreak local Mozambique time... ..Once again poor propagation, heavy winds and intermittent electrical problems hampered the operation yesterday, especially on 160M.....Good openings on 12M, 15M, and 20M helped push total QSOs to over 24,000..." QSL via the OQRS by ClubLog (Highly Recommended/Preferred Method) to receive a QSL either direct and by the Bureau. To QSL direct via the mail, send it to: C82DX, Box 333, Bethlehem, GA 30620 USA [Please do not send IRCs. See details on their Web page]. They will not confirm QSOs via the eQSL system. The C82DX Web page is at: http://c82dx.com

CASTLE NEWS. Members of the "Lupi della Majella Team" plan to activate possibly three castles on Sunday, October 27th, from Italy. Look for operators Augusto/I2JJR/6, Fiorello/IZ6YLM/p and Silvino/IW6NZY/p between 0730-1130z (depending on the WX) to be on 40 and 20 meters, possibly some other higher bands, on SSB with 2 stations from the following:
* Reference: IFF-175 - "Parco Regionale Sirente Velino"
* Reference: DCI-AQ001 / WCA-I00573 - Castle of Beffi
[and maybe]
* Reference: DCI-AQ002 / WCA-I00574 - Castle of Roccapreturo

CN2, MOROCCO. Jim, W7EJ, will once again be active as CN2R during the CQWW DX SSB Contest (October 26-17th) as a Single-Op/All-Band/High-Power entry. He will be here until November 30th. QSL via W7EJ.

CN2, MOROCCO. A Russian team is expected to be active as CN2AA during the CQWW DX SSB Contest (October 26-27th) as a Multi-Single entry. Operators mentioned are Oleg/R3FA, Dmitry/RA3ATX, Eugene/RK3AD, Andrei/RK7A, Yuri/RL3FT, Alex/RN2FA, Sergei/RU3RQ, Roman/RV3MA, Sergey/RX3APM, Dmitri/UA2FB, Vladimir/UA2FF and Babayan/UA3ASZ. QSL via UA2FM and LoTW.

CN3, MOROCCO. Operators Stefano/IK2QEI, Matteo/IK2SGC, Flavio/IK1SPR, Marco/IK2LFF, Manuel/IK3STG, Richard/N6KT, Ahmed/CN8WK and Saaid/CN8WW will be active as CN3A from Safi during the CQWW DX SSB Contest (October 26-27th) as a Multi-2 entry. QSL via LoTW or via IV3ZXQ. Visit their Web page at: http://www.facebook.com/pages/CN3A/112969535390789

CR3, MADEIRA. Members of the Madeira Contest Team will be active as CR3A during the CQWW DX SSB Contest (October 26-27th) as a Multi-? entry. Operators mentioned are Joe/CT3BD, Luis/CT3DL, Joe/CT3DZ, Luis/CT3EE, Duarte/CT3EN, Tiago/CT3KU, Jose/CT3KY and Jose/CT3NT (CT1BOH). QSL via LoTW or EA5GL.

D4, CAPE VERDE. Yuris, YL2GM, is now active as D44TYL from Sao Vicente Island (AF-086). Activity has been mainly 20 and 15 meters SSB. Length of stay is unknown. QSL via YL2GM.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
T6JR - Afghanistan; 2013 Operation

E2/HS, THAILAND. Look for the following Thai operators and stations to be in the CQWW SSB Contest (October 26-27th):
E21YDP - Operator Dej will be active as a Single-Op/Single-Band (15m) entry. QSL via E21YDP.
E20PFE - Operator Part will be active as a Single-Op/All-Band/Low-Power entry. QSL via E20PFE.
HS4DDQ - Operator Paul will be active as a Single-Op/All-Band/Low-Power entry. QSL via HS4DDQ.
E2E - Operators Nikorn/HS5NMF, Jack/HS1FVL, Nukool/HS7BHK, Don/E20MIO and Mike/E29BUQ will be active as a Multi-Op/High-Power entry. QSL via HS0ZFZ.
HS4AK - Operators Art/HS4LKW and E20OXX will be active as a Multi-Op entry. QSL via E20YLM.
HS5AC - Operators Jumsai/HS1NIV, Khun/HS1LCI, Surachart/E20QVD and Noppadol/HS5IGY will be active as a Multi-Op entry. QSL via HS1NIV.
HS4SSP - Operators Obby/HS4SSP, Ray/HS4RAY, Yut/HS4ESF and HS4SCM will be active as a Multi-Single/Low-Power entry. QSL via HS4RAY.

EA6, BALEARIC ISLANDS. Robert, S53R, will be active as EA6BF from Ibiza Island (EU-004) during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band entry. Outside the contest, he will sign EA6/S53R. QSL via S53R direct. NO BUREAU.

ED9, CEUTA AND MELILLA (On and Off again, On again!). Jorge, EA9LZ, has stepped forward to activate ED9Z from Ceuta during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/Single-Band (15m) entry. QSL via LoTW

or via EA5KB.

FS, ST. MARTIN (Reminder). Operators Randy/N0TG, Ron/AA4VK and Jeff/N1SNB will be active as FS/homecall from St. Martin (NA-105, WLOTA 0383) between October 24-31st. Activity will probably be like their PJ7 operation - a suitcase operation on 40-10 meters using CW and SSB, with wire antennas and 100 watts. The trio will be active as FS/N1SNB during the CQWW DX SSB Contest (October 26-27th). QSL "ALL" callsigns via AA4VK.

FT5Z, AMSTERDAM ISLAND (Press Release, Date October 21st): "A sea container filled with our equipment --- transceivers, amplifiers, antennas, wire and cable, connectors, baluns, bandpass filters, camp supplies, and other miscellaneous equipment -- is now on its way to New Zealand. There it will be loaded aboard our ship, the MV Braveheart. The Braveheart crew and our VK6 friends have our shopping lists for other needed materials and are procuring these items for us. These materials will all come together in January when the Braveheart and the FT5ZM team arrive in Fremantle, Australia.
Our network and logging team are in the last round of testing our system for the seamless uploading of our logs. Currently we can export 400 QSO's each hour from each of 10 PC's in approximately 500 msec. The log collection will be automatic, so there is no interruption of operator time. A zipped log file with 100,000 QSO's will be just over 600 Kb in size, saving time and money on satellite uploads. The process has been tested end to end, including uploading to ClubLog.
We are in the phase of the DXpedition where large expenses are coming at us rapidly. We've completed one down payment on our ship, we've had to purchase some equipment and shipping supplies, shipping and customs fees have been paid, our anchorage and per diem costs at Amsterdam Island are coming due, we will be seeing berthing and ship supply charges from Fremantle soon, and we have another ship payment due on December 1.
We are staying within our budgeted expenses, but contributions have been somewhat less than we had hoped. It now appears almost certain that the team members will have to increase their personal contribution from $10,000 per person to $12,500 per person as well as pay their own way to and from Fremantle, Australia. If you've contributed to the DXpedition, we thank you. If you've yet to help us, or if you can send some additional help our way, we can certainly use any financial support that you can give us.
Please continue to check our progress, our news updates, and photos on our website: <www.amsterdamdx.org> If, while you are there, you'd hit the 'Donate' tab, we'd really, really appreciate it.
Ralph ☐ K0IR"

HR, HONDURAS. Operators Dan/HR2DMR, HQ2DOM and Johnny/HQ2JCM will once again be active as HR2WW during the CQWW DX SSB Contest (October 26-27th), as a Multi-Singled/Low-Power entry. They will use monoband antennas. QSL via KD4POJ.

HS0, THAILAND. Operators Fred/K3ZO (HS0ZAR), Sam/SM3DYU (HS0ZDY), Stig/LA7JO (HS0ZGD), Tham/E21CJN, Tony/G4UAV (HS0ZDX), Peter/NO2R (HS0ZKX)

and possibly others will be active as HS0ZAR during the CQWW DX CW Contest (November 23-24th) as a Multi-Single or Multi-2 entry. QSL via K3ZO.

II7, ITALY (Lighthouse Op). Look for II8LH/7 to be active Monday, October 28th, at about 1600 (??? - could be localtime) from Basilicata - Torre del Faro or Scanzana (ITA-318 and BA-001 WAIL). QSL direct to IK8YFU. QSL Bureau to HB9FHZ.

IOTA NEWS.....
AF-019. Emilio, IZ1GAR, will be active as IG9W from Lampedusa Island [African Italy] (IIA AG-001, MIA MI-126, WLOTA 2312) during the CQWW DX CW Contest (November 23-24th) as a Single-Op/ Single-Band (40m) entry. Lampedusa counts a multiplier for Zone 33 Africa Italy for the CQWW DX rule, the island is located over the African continent platform. QSL via direct or by the Bureau.

EU-025. The II9K Contest Team will once again be active as II9K from Sicily Island during the CQWW DX SSB Contest (October 26-27th) as a Multi-Single entry. Operators mentioned are Giuseppe/ IT9HBT, Girolamo/IT9GNG, Rino/IT9FXY, Vincenzo/IT9ECQ, Sal/ IW9FRA, Mike/IF9ZWA and Domenico/IW9GTD. The II9K Contest Team will be active during the contest, testing their new setup and the stack antennas for 10m, this year with a little bit of ambition. QSL via IT9HBT. For more details, see: http://www.ii9k.it

OC-035. DX-World.net reports that Ralph, YJ0RK, will be active from Awei Island this weekend for CQWW DX SSB Contest. Ralph mentions that he will be returning to VK sooner than expected due to a failing weather window and an early predicted cyclone season. Therefore no activity from OC-111 is now planned. QSL via NR6M.

OC-157. A team of 8 operators will be active from the rare Banda Besar Island between November 10-15th. Callsign(s) have not been announced yet. Activity will be on 40-10 meters using CW and SSB. The operators mentioned are Joppy/YB8XM (Team Leader), Marthin/YB8VM, Danny/YC8VDT, Richard/YD8VSR, Agustinus/YD8VRA G. Saiya/YD8VRS, Fransicus/YC8VFB and Robert/YC0MVP. Look for more details to be forthcoming. Watch the following Blog page for updates at: http://oc157.blogspot.co.uk

OC-186. DX-World.net is reporting that Adhi, YB3MM, is making plans to activate Karimunjawa Island again as YB3MM/2 tentatively between November 9-10th. Activity will be on the HF bands using CW and SSB. QSL via IZ8CCW. Check out info about his last operation at: http://www.yb3mm.com/2013/07/karimunjawa-island2.html

OC-221. Joppy, YB8XM, is now active as YB8XM/P from Dulah Laut Island (in the Kai Islands IOTA Group) until October 27th. Activity will be on the HF bands using a G5RV antenna. QSL via YB9KU.

SA-035. (Update) A group of YL operators will be active as YW5RYL from Los Roques between November 7-10th. The current operators mentioned are Carolina/YV4AW, Maika/YY5ALO, Geraldine/YY2GAL, Alejendra/YY5AA, Laura/YY5OLA, Mary/YY5MCO and Yumayra/YY5YVR. Activity will be on 160-6 meters using CW, SSB and the Digital modes. The group will be using ClubLog during this operation. Their Web page is now active at: http://yw5ryl.hamradioyv.com

J7, DOMINICA. Walter, HB9MFM, will once again be active as J79WTA from the Tamarind Tree Hotel near Salisbury on Dominica (NA-101) between October 21st and December 21st. He will be joined by Dieter/HB9TPQ (J79DP) and Kurt/HB9BZG (J79KZ). Activity will be holiday style on 160-10 meters using SSB, RTTY and PSK. He will use an IC-7000 with an ACOM 1000 into a dipole 50m above sea level and Spider Beam. QSL via his home callsign, direct or by the Bureau.

KH7, HAWAII. Once again the members of the "Coconut Wireless Contest Club" (formerly AH6XX) will be active as KH7CW from Aiea, on the Island of Oahu (USI HI008S, WLOTA 1227, WW Loc. BL11bj, Honolulu county), Hawaii (OC-019) in the CQWW DX SSB Contest (October 26-27th) as a Multi-2 entry. Operators mentioned are: Tetsuo/AH7C, Katsu/JA1DXA, Tac/JE1FQV, Akira/JH1BUO, Soi/JH1ECG, Rich/K2WR and possibly others. QSL via LoTW, or direct to K2WR.

KH9, WAKE ISLAND (Update). The K9W Wake Island Management Team has announced on October 22nd on their Web page: "The Wake Management Team continues to work with the USAF to set rescheduled dates for this Com-memorative DXpedition. Once we have the new dates, we will post them here and through the normal Amateur Radio communication media. Thank you for your patience and understanding."

KP4, PUERTO RICO. Daniel, KP4BD, will be active as KP4BD from Las Piedras during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/Single-Band (40m) entry. QSL via NP3O.

KP4, PUERTO RICO. James, KH2RU, will be active as KH2RU/KP4 during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/Single-Band (TBD) entry. QSL via NP3O.

OH0, ALAND ISLAND. Waldemar, SM0TQX, will be active as OH0JFP during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/Single-Band (10m) entry. QSL via OH0JFP, by the Bureau or direct. NO eQSL.

OH0, ALAND ISLAND. Tomi, OH6EI, will be active once again as OH0Z during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via W0MM.

P3, CYPRUS. Operators Roli/LY4A, Jack/R2AA, Andy/RA4DX, Tony/RT9T, Sergey/RU9I, Max/RV3BA, Vadim/UA9SCX, Roman/UR0MC, Ruslan/UR3QCW, Victoria/UU6JR and Andy/YO3JR will be active as P3N during the CQWW DX SSB Contest (October 26-27th) as a Multi-Single entry. QSL via RW3RN.

P4, ARUBA (Cancelled). John, W2GD, who was expected to be active as P40W from Santa Cruz, Aruba (SA-036, WLOTA 0033), for the CQWW DX SSB Contest, had to cancel his operation due to an illness in his family.

P4, ARUBA. Andy, AE6Y, will be active as P49Y from Aruba (SA-036) during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via LoTW or AE6Y.

QSL INFO AND NEWS.....
V6G AND T8GM QSL STATUS. Gerben, PG5M, reported on October 20th, that he received the V6G and T8GM cards from the printer on October 19th. All direct requests received should be in the mail as of the 21st.

QSL RECEIVED VIA LoTW: 3A2MW, 3B8/G4BVY, 4K9W, 4U1ITU, 4Z1TL, 5W1SA, 5X1NH, 9M6XRO, 9A282TN, A35JP/H, A65BP, A92GE, BX5AA, C91R, CT8/DL4KG, CX2DK, DF2SD, DL2RMM, DL5MEV, DM5TS, EA5IDG, EC1DBO, EW1TZ, EY8MM, GP0PKT, HB0/HB9CVQ, HC8/G8OFQ, ID9Y, J6/G4BVY, J75KG, JA3HBF, JT1R, K1FWE, K7IA, K8MP, KG4HF, KH2L, KH2/N2NL, KL7RA, MC0SHL, MJ0ASP, MU0FAL, NH0J, N0HJZ, N7BV, OH1F, OH8A, OW75FOC, OX3XR, OZ0JX, OZ2PBS, P49X, PJ2/K5JP, SB6A, SM5J, SQ6PLH, SV9/SV2FPU, TM35CDXC, TZ6BB, V31AE, V51LZ, VA7ST, VK3EW, VU7KV, W1SRD, WW4LL, W7WW, XW4XR, XX9LT, YS1/NP3J, ZB2CN and ZP9MCE

QSLS RECEIVED VIA MAIL: 4J20RO, 5Z4/SM1TDE, 9X0PY, DL6DQW, EP3SMH, EU1A, EX2M, F6KFV, FK8CE, G3MGW, GZ5Y, HB9LCW, HB9TUD, IS0BRD, J69DS, JW/DL2JIM, JY9FC, KP2/NP3D, MJ0CFW, PA13KING, PJ2/IW1FC, T2YY, T8GM, UK8FF, V6G, VP2V/W9DR, XW0YJY, XZ1Z, Z320E and Z320G

QSLS RECEIVED VIA THE BUREAU: 1A0C, 3A/F4BKV, 5B/G4MKP, 5B75FOC, 5R8C, 9M4SLL, 9M6DXX, 9M6XRO, 9M8Z, 9U4U, CE0Y/SM6CUK, CN8RN, CY9M, FG/F5RYX, FG4NO, FG80J, FK8CP, FK8IK, FO5RH, FO8RZ, FR/F5UOW, FR1LB, FS/F6AUS, GO2HQ, G100C, HH2/HB9AMO, HK6NA, HK0NA, HS0ZEF, JW/F8DVD, JY5MM, K5D, MS0OXE, MX0LDG, OX3KQ, P29VCX, PJ4C, SV5/SM8C, TJ3FC, TJ9PF,TK1W, TO5G, S79UFF, V63ZM, VU3RWP, XL2I, XU7ATM, XV7SW, YB1KI, YF1AR and ZZ7HQ

RI1, ANTARCTICA. Mike, RW1AI, will be active as RI1ANT from Progress Base, Antarctica (IOTA AN-016), between December 15th and March 15th,

2015. Activity will be on all HF bands using dipoles and amp. QSL via RW1AI. Online log will be available at: http://www.qsl.net/ua1ake/logs

TC90, TURKEY (Update/Change). Operators Deniz/TA1CQ, Can/TA1CR, Leonardo/TA1FR, Tevfik/TA1HZ and Hakan/TA3HM will be active as TC90A during the CQWW DX SSB Contest (October 26-27th) as a Multi-Single/All-Band entry. QSL via TA1HZ. PLEASE NOTE: The TC90TC team has cancelled their Multi-Multi operation. It will be either a Single-Op/All-Band or Single-Band entry. The operator is to be named later. ADDED NOTE (Reminder). The special prefix TC90 is to celebrate the 90th anniversary of Turkey.

TU, COTE D'LVOIRE (Update to OPDX.1133). Operators Chris/F4WBN (ex-TL0A), Paul/F6EXV and Jan/DJ8NK, who will be active as TU5AX, TU5XV and TU5NK, respectively, for a solidarity radio operation which will take place between November 17-30th, now have a Web page active online at: http://www.premiumorange.com/tu2013

VE2, CANADA (Zone 2). Operator Yuri, VE3DZ, will once again be active as VE2IM from Sept-Iles, QC (Zone 2), during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band/High-Power. Yuri states that he will be there between October 23-19th. This is his 18th trip to Zone 2 since 1999. Activity before and after the contest will be on CW, SSB and RTTY, and all HF bands including the 30/17/12 meter bands. QSL via VE3DZ, direct, by the Bureau or LoTW.

VK9LL WRAP-UP REPORT. Luis, IV3PRK , reports [edited]: "Tomas, VK2CCC, wrote a great report 'VK9LL story 2013' with a lot of comments, technical info, links and nice pictures downloadable as a PDF file from this page of my website: http://www.iv3prk.it/vk9ll---2013.htm
(Sorry, he said his server is down)
Apart from having worked him or not, the document is very interesting for the comments on RX and TX antennas and useful to get some ideas for a successful low-band operation. We knew already the 160m dedication and effort of Tomas, but now we learn how much experience, preparation and technical skill is behind his DXpeditions. Enjoy reading it."

VK9M, MELLISH REEF (Update). A few items have been updated on the VK9MT Mellish Reef Web site <http://www.vk9mt.com>. The dates are now posted on the Web page. The team will sail aboard the yacht "Evohe" and plan to be active between March 28th and April 9th, 2014. Also, the VK9MT team has added two more operators - Luigi/IV3YER and Heye/DJ9RR. The current list of operators are now: Pista/HA5AO (Team Leader), Heye/DJ9RR, Luigi/IV3YER, Dave/K3EL, Glenn/KE4KY, Jacky/ZL3CW, George/HA5UK, Gene/K5GS, Luke/VK3HJ, and Les/W2LK (Co-Leader). Pilot stations are Ralph/W4HK (Chief Pilot - NA), Col/MM0NDX (EU), Stan/KH6CG (OC), Andre/V51B (AF), and Lee/ZL2AL (VK/ZL). Corporate sponsors are Elecraft and SteppIR. They have also added a bands/modes survey. You can provide them with your needs at: http://www.vk9mt.com/index.php?option=com_pollxt&Itemid=71
For more details and updates, visit the VK9MT Web page at: http://www.vk9mt.com

VR2, HONG KONG. Operators Alberto/IV3TAN, Andy/IK7YTT and Sai/VR2PX will be active as VR2PX during the CQWW DX SSB Contest (October 26-27th) as a Multi-Single entry. QSL via IV3TAN.

Z8, REPUBLIC OF SOUTH SUDAN (Press Release). Jarmo, OH2BN, sent out the following press release on October 23rd [edited]: "A multinational group of Dietmar/DL3DXX, Wayne/N7NG, Hans/PB2T, Olli/OH0XX, Martti/OH2BH, Pertti/OH2PM, Veijo/OH6KN and Tevfik/TA1HZ (Team Doctor) will be in Juba, South Sudan, from November 14-28th, 2013, and will activate Z81X with an emphasis on low bands, 160m and 80m. The period includes the CQWW CW contest with some single-band entries and low-band SSB focus during the contest weekend. Hosted by the Ministry of Posts and Telecommunications, the group led by Hans, PB2T, President of IARU R1, will conduct a series of workshops and establish a sound amateur radio spectrum management regime and related regulations. It will also introduce Amateur Radio to the Ministry of Education. Also participating in these efforts are two local amateurs; Massimo, Z81B (IZ0EGB), and Diya, Z81D (YI1DZ). This part of the program is supported by Yasme Foundation Inc.
The plan is to activate three FTDx3000 stations with amps, low-band verticals and beverage antennas. Two different radio locations may be used. The operation will be generator based.
The Z81X team will use their QRZ.com pages for providing further updates and recognizing their supporters, with Vlad, UA6JD as their webmaster.
Z81X Project Goodwill South Sudan is organized jointly by Radio Arcala, DX University, IARU Region 1 and Rock City Investments Co., and the equipment sponsor is Yaesu Musen Co. Ltd of Japan.
In support of the DX University, we will take note of specific relationships between pileup behavior and operator technique. Additional information will be available before the expedition begins.
The highest cost item is equipment transport, with courier service the only reliable means of transportation. The group welcomes support from individuals, clubs and foundations to offset some of the high equipment transport expenses. You may contact any of the group members for your potential support or use PayPal at Z81X QRZ.com.
QSL Z81X via OH0XX."

ZL, NEW ZEALAND. Members of the Quake Contesters Group will be active as ZL3X during the CQWW DX SSB Contest (October 26-27th) as a Multi-2/High-Power entry. QSL via ZL3PAH or LoTW. Operators mentioned are Mark/ZL3AB, Don/ZL3DMC, Byron/ZL3DXT, Geoff/ZL3GA, Chris/ZL3LF and Phil/ZL3PAH.

ZP8, PARAGUAY. Hugo, K2DER, will be active as ZP8T during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/Low-Power entry. QSL only direct (send an E-mail for QSL address to <k2der@...>). NO BUREAU, NO eQSL, NO LoTW and NO IRCs.

ZP8, PARAGUAY. Manuel, ZP8MCE, will be active during both CQWW DX SSB (October 26-27th) and CQWW DX CW Contests (November 23-24th) as a Single-Op/All-Band/Low-Power entry. QSL via EA5ZD.

ZS8, MARION ISLAND. Carson, ZS8C (ZR6CWI), posted the following on QRZ.com on October 22nd: "I have managed to move my radio into my office, making

HAM activities much simpler (I used to have it installed in our emergency base which can get a bit cold!). Recently I have started becoming more active on the air, and I am hoping to make a lot more contacts in the coming weeks and months. My preferred method of making contacts is to arrange a 'private' sked between a couple of HAMs. Please note that my signal is a bit weak due to my set-up, so you might have to listen very closely. Due to island rules, I cannot upgrade my antenna, so I am stuck with what I've got. If you would like to arrange a sked, please pop me an E-mail <zs8c@...>. I look forward to meeting as many HAMs as I can. Thank you to everyone who has made contact with me. It is always exciting meeting different people from around the world, which is one of the things I enjoy the most!" QSL via info on QRZ.com. PLEASE NOTE: Carson has a new mailing address: Carson McAfee, PO Box 1585, Allens Nek, 1737, Roodepoort, Johannesburg, S. Africa.

The following stations are expected to be active in the
CQ World Wide DX SSB Contest (October 26-27th, 2013)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2013 CQWW DX SSB Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3A - Gil, F4FET will be active as 3A/F4FET from Monaco on 11-12 November. He will be QRV on 40-10 metres SSB. QSL via home call, direct or bureau.
5H - Jacques, HB9EYP will be active holiday style as 5H3JJ from Zanzibar Island (AF-032) on 2-9 November. He will be QRV on 20-6 metres SSB and digital modes with 10 watts. QSL via home call, bureau preferred.
5W - 9M6XRO, W6SZN, ZL1GO and ZL3CW will stopping over Samoa (OC-097) on their way back from KH8 (www.n8a.eu http://www.n8a.eu) and will be active as 5W8A from 27 November to 2 December. QSL via ZL3CW.
6W - Rob, DL7VOA will be active holiday style as 6V7D from near Toubab Dialaw, Senegal from 29 November to 7 December. He will operate mainly CW with some SSB on 40-10 metres, typically during his evening and night hours. He will run 100 watts into vertical dipoles for 10-20m and ground planes for 40 and 30m. QSL via DL7VOA, direct or bureau. Please note that 6V7D is a reissued callsign, as it was used back in 2011 by a Russian team. [TNX DL7VOA]
C6 - C6ARU (N4UM), C6AUM (K4RUM) and C6AKQ (N4BP) will be active from Freeport, Grand Bahama (NA-080) from 19 November to 10 December. C6AUM and C6AKQ will operate mainly CW on 160-10 metres, while C6ARU will be mainly on digital modes on 30, 17 and 12 metres. Contest activity will include two single band entries in the CQ WW DX CW (C6AUM on 40m and C6AKQ on 80m), and a Multi-Single entry as C6AKQ for the ARRL 160 Meter (6-8 December). QSL via home calls. [TNX NG3K]
D4 - John, G4IRN will be active holiday style as D44TWQ from Boa Vista (AF-086), Cape Verde on 5-12 November. He will operate CW only with a focus on 30, 17 and 12 metres. QSL via G4IRN, direct or bureau, and LoTW. Logsearch on Club Log. [TNX NG3K]
F - Gil, F4FET (www.f4fet.net http://www.f4fet.net) will be active as F4FET/p from IOTA group EU-058 on 9-10 November. He will operate SSB on 40-10 metres from Sainte Marguerite Island (on 9 November, from 6 to 14 UTC) and Saint Honorat Island (on 10 November, from 8 to 15 UTC). QSL via home call, direct or bureau. [TNX rsgbiota.org http://rsgbiota.org]
FK - Freddy, F5IRO will be active as FK/F5IRO from Plum, New Caledonia

(OC-032) between 1 November and 1 March 2014. He plans to operate mainly CW with some PSK on 80-10 metres, running 100 watts into dipoles and long wire antennas. He will participate in the CQ WW DX CW Contest as TX5W along with FK8IK. QSL via F5IRO, direct or bureau. He will upload his log to Club Log and Lotw in March 2014. [TNX DX World]
FO - Heinz, DF1YP is active as FO/DF1YP from Moorea (OC-046), French Polynesia until 6 November. Look for him around 14252 kHz. QSL via home call, bureau preferred.
GD - Special event station GB1SOI will be operated by the Isle of Man Amateur Radio Society on 8-15 November to celebrate the construction and launching of the "Star of India" sailing ship 150 years ago. Particular activity times will be on 9-11 November from 16 to 23 UTC. QSL via the bureau.
HK0_sa - 5J0R is the special callsign issued to the 1-10 November DXpedition to San Andres Island (NA-033) [425DXN 1155]. Target frequencies are:
CW 1824, 3524, 7004, 10104, 14024, 18074, 21024, 24894, 28024
SSB 1845, 3780, 7065/7160, 14195, 18145, 21295, 24945, 28494
RTTY 7035, 10140, 14080, 18100, 21080, 24921, 28080
Announced frequencies for 6 metres are 50105 (CW) and 50115 (SSB). Team members include EA1SA, EA2RY, EA5RM, EA7AJR, EA7KW, F8ATS, F9IE, HK3CW, HK6F, IN3ZNR, RG8K and RU1WM. QSL via EA5RM. Logsearch and OQRS on www.dxfriends.com/ SanAndres2013/
J7 - Walter, HB9MFM is active as J79WTA from Dominica (NA-101) until 21 December. He expects to be QRV on 160-10 metres SSB, RTTY and PSK. QSL via home call, direct or bureau. Logsearch on Club Log. [TNX NG3K]
KH8 - 9M6XRO, JH3PRR, W6SZN, ZL1GO and ZL3CW will be active as W8A from Tutuila (OC-045), American Samoa on 12-22 November, and as N8A during the CQ WW DX CW Contest (M/2). They will be QRV on 160-10 metres, with a "significant effort on 160m" and a "focus on Europe for the high bands". CW will be their primary mode, with some SSB and RTTY possible. They "have decided to draw up a frequency plan which we will try to follow as closely as possible while avoiding mutual QRM with the other DXpeditions and their associated pile-ups":
CW 1811.5 3512 7016 10116 14035 18092 21035 24907 28035
SSB 1848 3803 7078/7167 14210 18165 21295 24975 28495
RTTY 3582 7043 10132 14092 18108 21092 24928 28092
North America frequency for 160m CW: 1821.5
North America frequency for 60m SSB: 3795
Japan frequency for 80m RTTY: 3525
QSL W8A and N8A via ZL3CW. The website for the DXpedition is at www.n8a.eu http://www.n8a.eu.
I - Look for Maurizio IT9BWD/p, Riccardo IT9CVO/p, Giuseppe IT9HBS/p, Giuseppe IW9CLF/p and possibly Alfio IT9EJW/p to be active from Vendicari Island (EU-166, IIA S-022) on 9 and 10 November. They plan to operate SSB and CW on 40-10 metres. QSL via home calls. [TNX IT9EJW]

JD1_oga- Takeshi, JA1UII will be active as JD1BON from Chichijima (AS-031), Ogasawara on 1-4 November. He will be QRV on 80-10 metres CW, SSB and RTTY. QSL via JA1UII, direct or bureau. [TNX OPDX Bulletin]

PA - Celebrating 200th anniversary of the establishment of the Sovereign Principality (later Kingdom) of the Netherlands, Fred, PA0FAW will be active as PG200NL on 2-29 November. He will be operate mainly CW, with some SSB and digital modes. QSL via home call, direct or bureau, and eQSL.

T33 - The 5-18 November T33A DXpedition to Banaba [425DXN 1169, www.t33a.com http://www.t33a.com] will use an e-Pilot. It looks at the T33A blog and collects comments and requests for the team that would normally be emailed to one of several pilots: click on the "e-Pilot Request Page" tab on http://banaba2013.wordpress. com/ http://banaba2013.wordpress.com/

The advance party will arrive in Tarawa on 31 October to pick up local provisions, get the container through customs and load the supplies onto the boat in preparation for the 3 November departure to Banaba. Team members include AA4FL, AD6E, DJ5IW, DL5EBE, DL6KVA, K3VN, K4ZLE, KD6XH, N1EMC, N6HC, N6HD, N7CQQ, N9NS, PY2PT, W2IJ, W6KK, WA1F, WA1S and WA6FGV.

"We have coordinated our band plan with N8A/5W8A", the team says. "There are also other DXpeditions that will be on at the same time, so band plans may be dynamic...".

Target frequencies for T33A are as follows:

5-7 November	8-18 November
CW 1817.5	CW 1817.5
3524	3518
7024	7030
10114	10125
14024	14040
18070	18098
21024	21040
24895	24920
28024	28040
SSB 3795	SSB 3792
7090/7160	7090/7180
14195	14195
18145	18128
21295	21260
24950	24950
28460	28460
RTTY 3575, JA 3525	RTTY 3575, JA 3525
7040 + / - QRM	
10140	10136
14080	14099
18100	18115
21080	21100
24922 + / - QRM	
28080	28099

T33A will use the advanced version of DXA, the satellite-linked
system that allows DXers to view the status and activities of a
DXpedition in near-real-time (http://dxa2.org/t33a/ http://dxa2.org/t33a/). Logsearch and
OQRS for direct and bureau cards on Club Log; traditional QSL
requests go via W2IJ. The T33A logs will be posted to LoTW
approximately 6 months after the conclusion of the DXpedition.
VK9M - The VK9MT DXpedition to Mellish Reef [425DXN 1169] is now
scheduled for 28 March to 9 April 2014. The sailing vessel "Evohe"
has been chartered, and two operators (Heye, DJ9RR and Luigi,
IV3YER) have been added to the on-island team. Ralph, W4HK will be
the Chief Pilot station, and "will consolidate information from
the global pilot team (KH6CG, V51B, MM0NDX and ZL2AL) for
satellite transmission to the on-reef team". Bookmark
http://vk9mt.com/ http://vk9mt.com/ for further information, updates and donations.
"Our budget is over $120,000(USD), not including operators'
expenses to travel to and from the port of departure", the
organizers say. "We hope the DX community reaches deeply into its
collective pockets to help offset this cost". [TNX K5GS]
XV - Take, JA6CNH as XV2CNH (1-9 November) and Toshi, JA3NHL as XV2NHL
(2-8 November) will be QRV on 160-6 metres CW, SSB and RTTY from
Ho Chi Minh City, Vietnam. QSL via home calls.
YB - Joppy, YB8XM will be on Pulau Dullah, near Kai Kecil Island
(OC-221), on 25-27 October "to provide training for new amatur
radio operators". Expect some activity as YB8XM/p while he is
there. [TNX JN6RZM]
YB - Adhi, YB3MM has plans to be active as YB3MM/2 from IOTA group
OC-186 (either Menjangan Besar Island or Karimunjawa Island) on
9-10 November. QSL information on qrz.com http://qrz.com. [TNX W2FB]
YB - Look for Joppy, YB8XM/p and other operators (YB8VM/p, YC0MVP/8,
YC8VDT/p, YC8VFB/p, YD8VRA/p, YD8VRS/p and YD8VSR/p) to be active
from Banda Besar Island (OC-157) on 10-15 November
(http://oc157.blogspot.com/ http://oc157.blogspot.com/). This IOTA group was activated
only
once back in 1995. Shu-san, JN6RZM (jn6rzm[@]nifty.com http://nifty.com) is
collecting Paypal donations to help providing a new generator.
[TNX JN6RZM]
YJ - Ralph, YJ0RK will be QRV from Awei Island (OC-035) for the CQ WW DX
SSB Contest. He says he "won't be activating OC-111 this year due
to a failing weather window and an early predicted cyclone season
which will force us to return to VK sooner than expected". QSL via
NR6M.
YJ - Look for YJ0AU (JA2AAU), YJ0CJ (JA2LSS), YJ0TE (JA2ATE) and YJ0ZS
(JA2ZS) to be active from the Iririki Island Resort, Port Vila
(OC-035), Vanuatu on 1-11 November. Plans are to operate CW, SSB
and digital modes on the HF bands and 6 metres. QSL YJ0ZS via
JA2ZS, all others via JA2ATE. [TNX DX World]
YV - A team of YL operators (YV4AW, YY2GAL, YY5AA, YY5ALO, YY5MCO,
YY5OLA and YY5YVR) will be active as YW5RYL from Los Roques
(SA-035) on 7-10 November. They plan to be QRV on 160-10 metres
SSB, CW and digital modes. QSL via YV5AJ, direct or bureau.

Logsearch and OQRS on Club Log. They have a website on
http://yw5ryl.hamradioyv.com/
Z8 - A multinational team (Dietmar DL3DXX, Wayne N7NG, Hans PB2T, Olli
OH0XX, Martti OH2BH, Pertti OH2PM, Veijo OH6KN and Tevfik TA1HZ)
will be in Juba, South Sudan on 14-28 November. They will be QRV
as Z81X with an emphasis on 160 and 80 metres. The plan is to
activate three stations with amplifiers, low-band verticals and
beverage antennas. The operation will be generator based, and two
different radio locations may be used. The period includes the CQ
WW DX CW Contest, with some single-band entries and low-band SSB
focus during the contest weekend. The highest cost item is
equipment transport, with courier service the only reliable means
of transportation. The group welcomes support from individuals,
clubs and foundations to offset some of the high equipment
transport expenses. Further information and updates will be posted
to www.qrz.com/db/Z81X http://www.qrz.com/db/Z81X. QSL via OH0XX.
Hosted by the Ministry of Posts and Telecommunications, the group
led by Hans, PB2T, President of IARU R1, will conduct a series
of workshops and establish a sound amateur radio spectrum manage-
ment regime and related regulations. It will also introduce Amateur
Radio to the Ministry of Education. Also participating in these
efforts are two local amateurs; Massimo, Z81B (IZ0EGB) and Diya,
Z81D (YI1DZ). This part of the program is supported by Yasme
Foundation Inc. [TNX OH2BN]
ZS8 - Carson, ZS8C on Marion Island has updated his qrz.com http://qrz.com page with
information about his operating habits. "Recently I have started
becoming more active on the air", he says, "and I am hoping to
make a lot more contacts in the coming weeks and months. My
preferred method of making contacts is to arrange a 'private' sked
between a couple of HAMs".

ANTARCTICA
- Slava RD3MX, Alex UA1PAW and Oleg ZS1ANF will be at Novo Runway,
Antarctica from November 2013 through March 2014. They plan to be QRV as
RI1ANR in their spare time, with a focus on the low bands. QSL via RK1PWA.
[TNX I1HYW]
- Mike, RW1AI will be active as RI1ANT from Mirny Station, Antarctica from
December 2013 through February 2015. QSL via RW1AI, direct or bureau.
Logsearch at www.qsl.net/ua1ake/logs/ http://www.qsl.net/ua1ake/logs/.
- Alex, RD1AV will again be active again as RI1ANC from Vostok Station,
Antarctica from 1 December 2013 to 1 February 2015. He will be QRV on all
bands CW, SSB and digital modes. QSL via RN1ON, direct or bureau. [TNX
RN1ON]

MAYOTTE & REUNION ---> Armin, DK9PY will be active holiday style as
FH/DK9PY from Mayotte (AF-027) on 4-11 November and as FR/DK9PY from
Reunion Island (AF-016) on 11-22 November. He will operate CW only on 40-10
metres; if conditions allow, Armin will also give 80 and 160 metres a try.
QSL via home call, direct or bureau.

CQ WW DX SSB CONTEST ---> The following stations have announced their participation in this year's event (26-27 October):

AMSTERDAM 2014 ---> In their latest press release, dated 21 October, the FT5ZM team reported that "a sea container filled with our equipment is now on its way to New Zealand to loaded aboard our ship, the MV Braveheart", while other needed items are being procured by "the Braveheart crew and our VK6 friends". These "materials will all come together in January when the Braveheart and the FT5ZM team arrive in Fremantle, Australia".
"We are in the phase of the DXpedition where large expenses are coming at us rapidly. We are staying within our budgeted expenses, but contributions have been somewhat less than we had hoped. It now appears almost certain that the team members will have to increase their personal contribution from $10,000 per person to $12,500 per person as well as pay their own way to and from Fremantle. If you've contributed to the DXpedition, we thank you. If you've yet to help us, or if you can send some additional help our way, we can certainly use any financial support that you can give us".
Donations are gratefully accepted at www.amsterdamdx.org http://www.amsterdamdx.org [TNX K0IR]

DXCC NEWS ---> T6JR (Afghanistan, 2013 operation) has been approved for DXCC credit. [TNX NC1L]

K9W ---> The K9W DXpedition to Wake Island has been on hold since 1 October [425DXN 1170]. On 22 October the Management team announced that they continue "to work with the USAF to set rescheduled dates for this Commemorative DXpedition. Once we have the new dates, we will post them on www.wake2013.org http://www.wake2013.org and through the normal Amateur Radio communication media.
Thank you for your patience and understanding".

QSL T6TM ---> Buzz, NI5DX is the new QSL manager for Tim, T6TM or past, current and future QSOs. "Tim has been in Afghanistan since 2011", The Daily DX reports, and "his plans call for him to remain in T6 land until December of 2014".

QSL VIA M0URX ---> With immediate effect, M0URX is the new QSL manager for 5B4AHJ and P3J. Other calls (5B50J, 5B/G3PMR, G3PMR and others) remain via 5B4AHJ. [TNX 5B4AHJ]

Propagation Forecast Bulletin 43 ARLP043
>From Tad Cook, K7RA
Seattle, WA October 25, 2013
To all radio amateurs

SB PROP ARL ARLP043
ARLP043 Propagation de K7RA

Solar activity is increasing, suggesting that perhaps now in Fall 2013 we are in the midst of a second peak in Cycle 24. We hope it sustains.

Sunspot numbers this week ran up all the way to 228, a level not seen in the past decade since October 27 through November 1, 2003 when the daily sunspot numbers were 238, 230, 330, 293, 266 and 277. Prior to that, on January 11, 2003 the daily sunspot number was 238.

Average daily sunspot numbers increased over 35 points to 162 (when compared to the previous seven day period, October 10-16).

Average daily solar flux increased over 13 points to 139.6.

Geomagnetic indices indicate a quiet geomagnetic field.

Predicted solar flux this week is 165 on October 25-27, then 160, 155, 145, 135, 130, and 115 on October 28 through November 2, 120 on November 3-5, 125 on November 6-10, 130 on November 11, 135 on November 12-13, then 130, 120, 115 and 120 on November 14-17, and 115 on November 18-20. Based on recurrence due to solar rotation, in 45 days flux values are predicted at 130.

Predicted planetary A index is 16, 12, 8 and 20 on October 25-28, 8 on October 29-30, 5 on October 31 through November 9, then 12, 15, 10 and 8 on November 10-13, 5 on November 14-16, then 10 and 8 on November 17-18. After November 18 everything looks very quiet (A index of 5) until 44-45 days out, when the prediction shows A index values of 12 and 15 on December 7-8.

Those predictions come from the United States Air Force Space Weather Squadron, and are made available to the public via NOAA.

See http://www.afweather.af.mil/units/spaceweatheroperations.asp.

This set of PDF slides gives a hint at some of the tools they use:

http://ccmc.gsfc.nasa.gov/RoR_WWW/workshops/2012/Thursday_pdf/smithro_ccmc2012.pdf.

As usual, OK1HH gives us his own predictions for geomagnetic activity. He sees quiet to active geomagnetic conditions on October 25, quiet to unsettled October 26, mostly quiet October 27, quiet to active October 28-29, mostly quiet October 30, quiet October 31 through November 3, mostly quiet November 4, quiet to active November 5, quiet to unsettled November 6, mostly quiet November 7, quiet to active November 8-12, quiet to unsettled November 13, quiet on November 14-19, and mostly quiet November 20. He does not expect any days with active to disturbed conditions.

Pete Markavage, WA2CWA of Sayreville, New Jersey reports great conditions on 10 meters this week, but using AM and FM instead of CW or SSB. Pete wrote, "Ten meters has been hot all week. During the late morning hours of October 22 I worked about 25 stations, all on AM, in a number of Eastern and Western European countries. AM power was about 90 watts into a 4 element tri-bander. In the late afternoon I worked a Japanese station on 10 FM direct with a 40 watt rig. On October 24 around 6:45 PM EDT, finally worked my first Japanese station on 10 AM. 6 meters has been dismal for openings here in the East, but 10 meter activity is making up for it."

A week ago we got this from Jeff Hartley, N8II in West Virginia, but not in time for last week's bulletin: "10 meter and 12 meter propagation has been up and down with the degree of disturbed conditions, but almost every day the Middle East and Southern EU are booming in on 10 meters here.

"I listened Wednesday October 16 until 1430Z and 10 never opened well to Europe, but that evening about 75 minutes past sunset I was able to work a weak JA on 10 meter CW, heard one more and worked another on 12 meter CW around 2400Z when the band seemed to be closing rapidly. Jimmy BX5AA (Taiwan) was S7 on 15 phone about 0010Z and easily logged, so it seemed the K index lowered as the day progressed. A day or two before 10 was wide open to Scandinavia around 1300-1400Z as well as several southern UA3 area stations worked on CW. Paths to Africa have been open very late into the day with TN2NS (Congo) loud at 2130Z on 10 phone and even later on 12 CW."

Chip Margelli, K7JA wrote (also last week): "From what I was able to hear in a brief tune around 10 meters this morning (October 18), it is widely open to Europe, the Middle East, and Africa. Nice signals were observed from OD5ZZ and OD5NJ, several 4X/4Z stations, SU8JOTA (Boy Scout Jamboree On The Air in Egypt!), and generally signals from all of Europe were excellent. F6KHM (0.5 W) and MM3FYA (5 Watts to an attic dipole) were nice copy this morning (October 18) around 1600 UTC.

"Last night, 18 October at 0158 UTC, I worked FK8CP on 50.110.6 MHz. Remi peaked about 579 and was in for at least a half hour. QSB was very heavy, almost like meteor scatter at times, but he also became steady, solid copy at times, too.

"It's nice to have some prop!

"I run 200 Watts to a 7-element LFA Yagi on 6 meters, and the same 200 Watts to a 7-element OP-DES Yagi on 10 meters."

Ganesh, VU2TS sends us this message from Karnataka: "Hello and Greetings from South India! I am the editor of Amateur Radio News of the Amateur Radio Societies of India - ARSI (http://www.arsi.info) and I wish to take this opportunity to thank you for your propagation bulletin which we are receiving regularly.

"With the sunspot activity quite low, the band conditions these days are poor - even though we are supposed to be experiencing the Solar Max, Hi!

"However, I wish to share with you my pet theory about amateurs ionizing the ionosphere. This weekend is the CQ WW DX SSB contest, and with something like 30 to 40,000 stations on the air at the same time, and some 30% of them using a kW or more, all the bands open up for long haul DX! (Remember HAARP?)

"Just listen to the bands this weekend - and you will be surprised at the unusual band openings! Feedback welcome. 73, Ganesh VU2TS."

That's right Ganesh, in order to feed the ionosphere we have to call, not just listen. It is part of the magic of radio.

Further evidence of the magic of radio is the fact that I am writing Friday's bulletin while using an airline Wi-Fi connection during a flight from Seattle to Washington D.C. Like all other basic in-flight amenities, such as snacks, it is quite expensive. Of course, back when snacks were free, I couldn't get an internet connection in the air.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for October 17 through 23 were 166, 154, 149, 117, 179, 228, and 141, with a mean of 162. 10.7 cm flux was 136.1, 139.9, 132.7, 133.4, 135.8, 146.3, and 152.7, with a mean of 139.6. Estimated planetary A indices were 9, 3, 3, 3, 2, 5, and 4, with a mean of 4.1. Estimated mid-latitude A indices were 10, 3, 3, 3, 2, 3, and 3, with a mean of 3.9.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31026
SIDC SOLAR BULLETIN 26 Oct 2013, 1310UT
SIDC FORECAST (valid from 1230UT, 26 Oct 2013 until 28 Oct 2013)
SOLAR FLARES : Major flares expected (X-class flares expected, probability >=50%)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 26 Oct 2013 10CM FLUX: 161 / AP: 011
PREDICTIONS FOR 27 Oct 2013 10CM FLUX: 161 / AP: 014
PREDICTIONS FOR 28 Oct 2013 10CM FLUX: 161 / AP: 028
COMMENT: There were one X flare, six M flares, and thirteen C flares on the Sun in
the past 24 hours. The X2.1 flare peaked at 15:03 UT on October 25 and was
associated with a radio Type II burst with an estimated shock speed of 2078
km/s at Sagamore Hill. All M and X flares and five C flares were produced
by beta-gamma-delta region NOAA AR 11882. Five C flares were released by
beta-gamma-delta region AR 11875, and one C flare each by AR 11869, AR
11874 and beta-gamma region AR 11877. Type II bursts were also registered
in association with the C2.3 flare released by AR 11875 peaking at 13:37 UT
on October 25 (estimated shock speed 1083 km/s by Sagamore Hill) and the
M1.5 flare released by AR 11882 peaking at 9:37 UT on October 26 (estimated
shock speed 1275 km/s by San Vito). In the next 48 hours, X flares are
possible, especially from NOAA AR 11882. There is a substantial risk of
halo CMEs and the warning condition for proton storms remains valid.
Several CMEs were ejected on October 25 and 26, among which two frontsided
halo CMEs. The first halo CME was first observed by LASCO C2 at 8:24 UT on
October 25 and was associated to the X1.7 flare. The second halo CME was
first observed by LASCO C2 at 15:12 UT on October 25 and was associated
with the X2.1 flare. Both CMEs are expected to arrive on October 28.
Geomagnetic activity was at quiet levels (K Dourbes between 0 and 3; NOAA
Kp between 0 and 2) during the past 24 hours. Active conditions (K Dourbes
= 4) are expected for the second half of October 26, due to the expected
arrival of the October 22 (M4.2) CME. Quiet conditions are expected on
October 27, and minor storm conditions are expected on October 27 due to
the expected merged arrival of several CMEs (among which the two halo CMEs
of October 25).
TODAY'S ESTIMATED ISN : 085, BASED ON 10 STATIONS.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31027
SIDC SOLAR BULLETIN 27 Oct 2013, 1210UT
SIDC FORECAST (valid from 1230UT, 27 Oct 2013 until 29 Oct 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 27 Oct 2013 10CM FLUX: 158 / AP: 006
PREDICTIONS FOR 28 Oct 2013 10CM FLUX: 160 / AP: 023
PREDICTIONS FOR 29 Oct 2013 10CM FLUX: 159 / AP: 023
COMMENT: There were two M flares and eleven C flares on the Sun in the past 24
hours. New region NOAA AR 11884 in the East produced an M3.1 flare peaking
at 19:27 UT on October 26 while beta-gamma-delta region AR 11882 released
an M1.0 flare peaking at 19:53 UT on October 26. The other flares were
produced by AR 11882, 11875, 11877 and 11873. In the next 48 hours, M
flares are expected, with a chance for X flares. LASCO C2 and STEREO COR2 A
and B observed several CMEs on October 26 and 27, among which a partial
halo CME first registered by LASCO C2 at 11:24 UT on October 26 (associated
with the M1.8 flare of 11:17 UT). This CME could deliver a glancing blow in
the second half of October 29. ACE observed a jump in the solar wind at
21:44 UT on October 26. Solar wind speed jumped from about 280 to 310 km/s,
while the Interplanetary Magnetic Field jumped from 4.5 to 6.5 nT. A smooth
decrease in the phi angle clearly shows rotation of the Interplanetary
Magnetic Field consistent with the flux rope of an ICME. This jump was
probably the result of the arrival of the October 22 (M4.2) CME. Phi jumped
from 110 to 270 degrees around 9h UT on October 27, probably indicating the
end of the (weak) ICME influence and return to nominal conditions, with
solar wind speed around 270 km/s and Interplanetary Magnetic Field around 2
nT. Geomagnetic activity was at quiet levels (K Dourbes between 0 and 2;
NOAA Kp between 0 and 1) during the past 24 hours. Quiet geomagnetic
conditions (K Dourbes < 4) are expected for the second half of October 27
and the first half of October 28. Active conditions with minor storm
intervals are possible on the second half of October 28 and the first half
of October 29, due to the expected joint arrival of several CMEs, mainly
from October 25. Active geomagnetic levels are possible in the second half
of October 29, due to a possible glancing blow by the partial halo CME of
October 26.
TODAY'S ESTIMATED ISN : 099, BASED ON 13 STATIONS.

PREDICTIONS FOR 30 Oct 2013 10CM FLUX: 175 / AP: 011
COMMENT: During the past 24 hours, the sun produced an X flare, two M flares and four C flares. Most flares originated from sunspot region Catania 16 (NOAA active region 11875), except for two C flares originating from Catania 18 (NOAA AR 1877) and NOAA AR 1873. The X1.0 flare peaked at 1:41 UT on October 28 and was associated with a Type II burst (estimated shock speed of 700 km/s by Culgoora). In the next 48 hours, M and X flares are likely to occur. LASCO C2 and STEREO COR2 A observed several CMEs on October 27 and 28, among which a halo CME first registered by LASCO C2 at 2:12 UT on October 28 (associated with the X1.0 flare, CME speed estimated at 590 km/s). Another CME first detected in LASCO C2 at 4:48 UT on October 28 was related to an M5 flare. Both CMEs are mainly westward oriented and could deliver a glancing blow in the second half of October 30. Solar wind speed measured by ACE is currently around 300 km/s, while the interplanetary magnetic field (IMF) reached a maximum of 7 nT during the past 24 hours. Current geomagnetic activity is at quiet levels (local K at Dourbes between 0 and 3; NOAA Kp between 0 and 1). Active to minor storm conditions are possible within the next 24 hours, due to the expected arrival of the CMEs of October 25. Active geomagnetic levels are possible in the second half of October 29 and October 30, due to a possible glancing blow by the partial halo CME of October 26 and a possible glancing blow related the two partial halo CMEs of October 28.

21763. Ohio/Penn DX Special Bulletin #1134.1

Yahoo group: DX-IS (2013)
Date: 2013-10-29 13:45:45 UTC
From: Tedd Mirgliotta (KB8NW)
Topic: 21763 Message: 21763

SB DX @ WW < KB8NW $OPDX.1134.1
Ohio/Penn DX Special Bulletin No. 1134.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1134.1
BID: $OPDX.1134.1
October 29, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network CX3AN and W8GEX for the following DX information.

KH9, WAKE ISLAND (Update/Scheduled - Press Release #6): "The Wake Atoll Commemorative DXpedition team has been approved for entry onto Wake Atoll. Our equipment is already on Wake and in safe storage awaiting our arrival. The 12-Operator team includes: Joe -AA4NN, John-K6MM, Craig-K9CT, Mike-K9NW, Ralph-K9ZO, Lou-N2TU, Jim-N9TK, Mark-NA6M, Dick-W3OA, Joe-W8GEX, Hal-W8HC, and Jerry-WB9Z.
The plan is for the team to assemble in Hawaii on 30-October, depart 01-November, arrive on 02-November and immediately erect antennas and set-up the stations. There will be two CW and two SSB stations on the air. The CW site will be located across from the Arrivals terminal and the SSB site will be housed in a "beach house" near downtown Wake.
We are planning on being QRV 03-November through 15-November (Wake time). If there are any changes, they will be posted on our website.
http://wake2013.org/pages/bandplan.html
Logs will be uploaded to ClubLog as time and internet access allows.
This is a commemorative DXpedition. Our prime objective is to honor the lives and contributions of the Forgotten 98 civilian contractors who lost their lives on Wake during WWII. Some of these men have yet to be identified. If you know any of the Forgotten 98 or their relatives, modern DNA testing may identify their remains and provide for a proper burial. Please take a moment to look through their names.
http://wake2013.org/pages/forgotten98.html
Wake Atoll is an active military base and access is extremely limited. The Team is most grateful to the United States Air Force for allowing this Commemoration to take place.
Also, Team wants to thank the DX community, including generous worldwide Foundations, Clubs, Individuals, Equipment manufacturers and outlets for their outstanding support of the Wake commemorative efforts. These DX-peditions are extremely expensive and could not be accomplished without the support of the entire DX community Visit the website to view our sponsors and make your personal donation. http://wake2013.org/pages/sponsors.html
Please note! A few other DXpeditions will be on the air during the Wake

operation. To avoid the dreaded "not in the log", please be sure which
DXpedition you are working! Our operators will announce the K9W callsign
often to help identify your contact.
Please check our website frequently for updates. http:/wake2013.org/
And don't forget to sign our guestbook!
73, K9W Wake Atoll Management Team"

XR0Y, EASTER ISLAND (Reminder). Operators Jose/CE0HYO, Gustavo/CX2AM,
Humberto/CX3AN, Gustavo/CX3CE, Mario/CX4CR, Gen/EA5HPX, Francisco/EA7FTR
and Carlos/LU2NI will be active as XR0YY from Hanga Roa, Easter Island,
between November 1-7th. Activity will be on 160-6 meters using CW, SSB
and the Digital modes. They will have 3 stations operating simultaneously.
QSL via EB7DX. They have a Web site available at:

PREDICTIONS FOR 31 Oct 2013 10CM FLUX: 150 / AP: 022
COMMENT: The sun produced four M flares and six C flares during the past 24 hours.
These flares originated from Catania sunspot regions 18 and 23
(respectively NOAA ARs 11877 and 11882). In the next 48 hours, M flares
are expected, with a slight chance for X flares. LASCO C2 observed a halo
CME at 15:24 UT on October 28. The CME is associated with the M4.4 flare
of 15:07 UT originating from NOAA AR 11882 and with a type II burst (shock
speed of 1855 km/s estimated at Sagamore Hill). This CME is partly Earth
directed and is expected to arrive around 12:00 UT on October 31. There is
a substantial risk for halo CMEs and the warning condition for proton
storms remains valid. Solar wind data measured by ACE indicate the arrival
of a small shock around 7:00 UT On October 29, probably related to the
arrival of CMEs of October 25. Solar wind speed increased from 300 to 350
km/s. The interplanetary magnetic field (IMF) reached a maximum magnitude
of 11 nT, with a Bz component varying between -10 and +10 nT. Current
geomagnetic activity is at quiet levels (local K at Dourbes between 0 and
3; NOAA Kp between 0 and 1). Active to minor storm conditions (K= 4 to 5)
are possible within the next 24 hours. Also active to minor storm levels
are possible in the second half of October 30, due to the arrival of CMEs
of October 28.
TODAY'S ESTIMATED ISN : 105, BASED ON 18 STATIONS.

The base prefix is CN. You won't find it on the cross-reference list
because both CN and 5C are still valid prefixes. You will find both at
http://www.arrl.org/international-call-sign-series

Not sure what you mean by "home prefix." Moroccan stations usually use CN as their prefixes. QRZ says 5C8M is Karl in Rabat, Morocco and to QSL via DL6FBL. QRZCQ gives the same manager.

The ARRL DXCC list (the paper booklet) has a section in the back with ITU prefixes. Also, you can find them on the web doing a search for "ITU prefixes." This has really come in handy for me when DXpeditions and other operations use unusual prefixes that aren't the usual ones for that country.

The only ones that confuse me are the French entities using TO, TX, etc. They could be in a lot of different areas.

Date: 2013-10-30 14:30:00 UTC
From: Paul Dunphy
Topic: 19749 Message: 21775

```
:Issued: 2013 Oct 30 1300 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31030
SIDC SOLAR BULLETIN 30 Oct 2013, 1310UT
SIDC FORECAST (valid from 1230UT, 30 Oct 2013 until 01 Nov 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 30 Oct 2013 10CM FLUX: 150 / AP: 014
PREDICTIONS FOR 31 Oct 2013 10CM FLUX: 148 / AP: 026
PREDICTIONS FOR 01 Nov 2013 10CM FLUX: 148 / AP: 003
COMMENT: The strongest solar event of the past 24 hours was an X2.3 flare peaking
around 21:54 UT on October 29. The X and 2 C flares originated from
Catania sunspot 16 (NOAA active region 11875), which is currently rotating
behind the west limb. The X flare was accompanied by a radio type II burst
observed at Culgoora and a CME detected in LASCO/C2 at 22:12 which is
mainly directed to the west and will probably not reach the Earth. In the
next 48 hours, M flares are expected, with a chance for X flares. The
strongest candidate region is Catania sunspot 16 (NOAA AR 11875), but also
Catania sunspot regions 29 and 25 (resp NOAA ARs 11884 and 11886) could be
sources of flaring activity. The proton flux measured by GOES is still
enhanced, but below the event threshold. The warning condition for proton
storms remains valid. Solar wind speed has increased to about 370 km/s as
observed by ACE. The interplanetary magnetic field (IMF) currently has a
stable magnitude near 10 nT, with a Bz component varying between -10 and +5
nT. Geomagnetic activity is quiet to unsettled (local K at Dourbes and
NOAA Kp between 0 and 3). Active to minor storm conditions (K= 4 to 5)
are possible within the next 48 hours, due to the arrival of the CMEs of
October 28.
TODAY'S ESTIMATED ISN : 105, BASED ON 17 STATIONS.

SOLAR INDICES FOR 29 Oct 2013
WOLF NUMBER CATANIA : 171
10CM SOLAR FLUX : 153
AK CHAMBON LA FORET : 013
AK WINGST : 007
ESTIMATED AP : 007
ESTIMATED ISN : 104, BASED ON 28 STATIONS.
```

I think there are probably rules (similar to the US guideline of KP for Caribbean territories and KH for those in the Pacific), but I don't think there is any way to tell where a TO or a TX prefix is other than reading it in a DX Bulletin. I believe Clipperton and the Australs, for example, could both use TX5DX.

I think that if you do a Google or Bing search for "DX countries" you'll find a list that is easily downlaoded and then parsed into an Excel spreadsheet.

If that doesn't work I have an Excel file I'd be glad to share with anyone who wants. It lists first by country and then by prefix.

21780. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-10-31 14:30:00 UTC
From: Paul Dunphy
Topic: 19749 Message: 21780

```
:Issued: 2013 Oct 31 1249 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31031
SIDC SOLAR BULLETIN 31 Oct 2013, 1210UT
SIDC FORECAST (valid from 1230UT, 31 Oct 2013 until 02 Nov 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 31 Oct 2013 10CM FLUX: 130 / AP: 015
PREDICTIONS FOR 01 Nov 2013 10CM FLUX: 125 / AP: 024
PREDICTIONS FOR 02 Nov 2013 10CM FLUX: 120 / AP: 003
COMMENT: There was only one C flare on the Sun during the past 24 hours, originating
from Catania sunspot region 29 (NOAA active region 11884). The X-ray
background level has been reduced to the B-level. For the next 48 hours, M
flares are expected. No Earth directed CMEs were observed. The proton flux
measured by GOES is currently decreasing. Solar wind speed reached a
maximum of 400 km/s as observed by ACE. The magnitude of the interplanetary
magnetic field (IMF) increased from 6 to 12 nT, mainly with a positive Bz
component. Geomagnetic activity is quiet to unsettled (local K at Dourbes
and NOAA Kp between 0 and 3). Unsettled to minor storm conditions (K= 3
to 5) are possible within the next 48 hours, due to weak effects of the
CMEs that erupted on October 28.
TODAY'S ESTIMATED ISN : 089, BASED ON 16 STATIONS.

SOLAR INDICES FOR 30 Oct 2013
WOLF NUMBER CATANIA : ///
10CM SOLAR FLUX : 142

21781. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-10-31 14:54:38 UTC
From: Frank T Brady
Topic: 21707 Message: 21781

I recently clicked the "unsubscribe" option at the end of the Report SIDC Ursigram email.
That was interprted as an unsubscribe from DX-IS altogether (I didn't confirm, so all is well).
Is there a way to unsubscribe from Report SIDC Ursigram only?

21782. [DX-IS] New Poll for DX-IS

Yahoo group: DX-IS (2013)
Date: 2013-10-31 15:09:06 UTC
From: <DX-IS@yahoogroups.com>
Topic: 21782 Message: 21782

Enter your vote today! A new poll has been created for the
DX-IS group:

The SIDC Ursigram message is sent to DX IS! daily at 14:30 UTC. Do you wish this to continue?

- Yes
- No

To vote, please visit the following web page:
http://groups.yahoo.com/group/DX-IS/surveys?id=3157754

Note: Please do not reply to this message. Poll votes are
not collected via email. To vote, you must go to the Yahoo! Groups
web site listed above.

Thanks!

21783. Do we keep the solar reports?

Yahoo group: DX-IS (2013)

You can't subscribe a Yahoo Group like "DX IS!" to another mailing list. In other words, RWC Belgium won't send the report to a distribution list, just an individual. I am subscribed to the SIDC Ursigram mailing list. At 14:30 UTC daily I have a program that whips through my inbox, extracts the latest SIDC Ursigram, and sends a copy to the "DX IS!" Yahoo group.

The Unsubscribe you are referring to will remove you from the entire list, not the SIDC Ursigram message. This propagation forecast message is all or nothing. I either send it to the entire list or not at all. I can't make it go to just a sub-set of the ~300 members.

If the majority wants to keep it, we will. If not, I'll disable it. I just created a poll where list member can vote. The voting will end on 7 Nov 2013.

73, Paul VE1DX (co-owner DX IS! List with N1DG)

I just love what Yahoo has done to their groups !!

When you tick off Yes or No, I do not see how you
submit the vote.

Anyway, a tempest in a teapot ... that's what the delete
key was invented for.

73, Dick, W1KSZ

IMO, anyone who wants to get those reports can sign up for them the
same way you did (right?). Reposting them here takes away the choice
for members of this group to not receive the reports, if they're not
interested.

This came up before and I did an informal poll. It seemed to me
that the vast majority wanted them. I decided this time to set up a
proper vote, and I'll do what the majority wants. As I said, it's all

or nothing. The original idea (by a former owner) was to try to get DX related bulletins and any other info on the Internet that would be useful to DXers here in a single place. The feeling was many members didn't want to subscribe to 10-15 different mailing lists. The downside is as you say . . . members can't decide individually on each message. I would create a filter that deletes anything with SIDC in the topic if I didn't want to see them.

On a somewhat related topic, if we remove all the automated messages, this place will become a wasteland . . . I don't know when you joined, but 10-15 years ago this list got 15-20 messages a day and had over 1000 members. It was as active as the QRZ.COM forums are today. Has the entire "DX IS!" list outlived its usefulness? Perhaps we need a poll on that.

First time I played seriously with the interface, Dick. I think you click Yes or No and then just go somewhere else on the page or log out. I agree there ought to be a "Submit" button or something but just voting and moving away from the page seems to register it. Last time I looked there were 7 votes.

I couldn’t vote on the Yahoo site..... I could make a selection, but can’t find a way to commit that selection.

In any case, I’d vote “Yes”.

It’s not like the reflector is running a big backlog of traffic.

To all radio amateurs

SB DX ARL ARLD044
ARLD044 DX news

This week's bulletin was made possible with information provided by N7QT, NC1L, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

EASTER ISLAND, CE0Y. A group of operators are QRV as XR0YY from Hanga Roa, IOTA SA-001, until November 7. Activity is on 160 to 6 meters using all modes. QSL direct via EB7DX.

CAPE VERDE, D4. John, G4IRN will be QRV as D44TWQ from Boa Vista Island, IOTA AF-086, from November 5 to 12. Activity is holiday style on the newer bands using CW. QSL to home call.

NIUE, E6. Look for JA1KJW, JA1JQY and JA8VE to be QRV as E6AK, E6AY and E6AA, respectively, from November 3 to 9. Activity will be on 80 to 10 meters using all modes. QSL to home calls.

SCOTLAND, GM. Special event station GM100RSGB will be QRV from November 6 to December 2 to celebrate the 100th anniversary of the RSGB. QSL via bureau.

SAN ANDRES AND PROVIDENCIA, HK0. A group of operators are QRV as 5J0R from San Andres Island, IOTA NA-033, until November 10. Activity is on 160 to 6 meters using CW, SSB and RTTY. QSL direct via EA5RM.

ANTARCTICA. Max, IA0MZ is QRV from Mario Zucchelli Station until February 2014. QSL via IW0EFA.

ITALY, I. Special event call sign II8IDXC is QRV until May 2015 during the International DX Convention 2015 in Paestrum. Activity is on the HF bands and 6 meters using all modes. QSL via IZ8EDJ.

SABA, ST. EUSTATIUS, PJ5. Rob, N7QT and Hugh, W4VAB will be QRV as PJ6/N7QT and PJ6/W4VAB, respectively, from Saba from November 7 to

17. Activity will be on 80 to 10 meters using CW, SSB, RTTY, PSK and JT65. QSL to home calls.

ANTARCTICA. Operators Oleg, UA1PBA, Alex, UA1PAW and Slava, UA1PAI are QRV as RI1ANR from Novo Runway until March 2014. Activity is on the HF bands with a focus on the low bands. QSL via RK1PWA.

POLAND, SP. Special event station SN640OKA is QRV until December 31 to celebrate the 640th anniversary of Ostroleka, a town in Mazovia. QSL via Bureau.

BANABA, T33. A group of operators will be QRV as T33A from Banaba Island, IOTA OC-018, from November 5 to 18. Activity will be on 160 to 10 meters using CW, SSB and RTTY with six stations active. QSL via W2IJ.

TURKEY, TA. Members of the TC Special Wireless Activity Team are QRV as TC301B until November 17 to celebrate 30 years of the Turkish Republic of Northern Cyprus, which is recognized only by Turkey. QSL via the bureau.

VIET NAM, XV. Toshi, JA3NHL and Take, JA6CNH will be QRV as XV2NHL and XV2CNH, respectively, from Ho Chi Minh City from November 2 to 8. Activity will be on 160 to 6 meters using CW, SSB and RTTY. QSL to home calls.

VANUATU, YJ. Operators Nob, JA2AAU, Iwao, JA2LSS, Iku, JA2ATE and Tug, JA2ZS are QRV as YJ0AU, YJ0CJ, YJ0TE and YJ0ZS, respectively, from Iririki Island, IOTA OC-035, until November 11. Activity is on the HF bands and 6 meters using CW, SSB and RTTY. QSL YJ0AU and YJ0CJ direct via JA2ATE, YJ0ZS via JA2ZS and YJ0TE via JA2ATE.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC Credit: Afghanistan, T6MH, 2012 and 2013 operations. If you had this contact rejected in a recent submission, send an email to bmoore@... to be placed on the list for an update to your record.

THIS WEEKEND ON THE RADIO. ARRL CW Sweepstakes Contest, North American Collegiate ARC CW Championship, NCCC Sprint, IPARC Contest, Ukrainian DX Contest, Himalayan Contest, IPARC Contest, High Speed Club CW Contest and the DARC 10-Meter Digital Contest are all on tap for this upcoming weekend. The ARS Spartan CW Sprint is scheduled for November 5. The QRP CW Fox Hunt is scheduled for November 6. Please see November QST, page 87, and the ARRL and WA7BNM contest web sites for details.

21795. NEW IRCs

Yahoo group: DX-IS (2013)
Date: 2013-11-01 01:21:43 UTC
From: Alan Scher
Topic: 21795 Message: 21795

Does anyone have any of the new style IRCs expiring in 2017 for sale?

Thanks & 73

Alan WD8PKF

21796. Report SIDC Ursigram

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31101
SIDC SOLAR BULLETIN 01 Nov 2013, 1211UT
SIDC FORECAST (valid from 1230UT, 01 Nov 2013 until 03 Nov 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 01 Nov 2013 10CM FLUX: 140 / AP: 009
PREDICTIONS FOR 02 Nov 2013 10CM FLUX: 140 / AP: 003
PREDICTIONS FOR 03 Nov 2013 10CM FLUX: 140 / AP: 006
COMMENT: The sun produced one M and seven C flares during the past 24 hours. Catania
sunspot region 18 (NOAA AR 11877) was responsible for the M1.9 flare
peaking at 13:51 UT on October 31. Most C flares originated from Catania
sunspot region 29 (NOAA AR 11884). During the next 48 hours, more C flaring
activity is expected with a slight chance for an M flare, especially from
Catania sunspot region 29 (NOAA AR 11884), which retains a beta-gamma-delta
configuration of its photospheric magnetic field. LASCO/C2 (at 18:12 UT on
October 31) and LASCO/C3 observed a mainly south directed CME, which will
at most only produce a glancing blow. Due to the low speed (CACTus
estimation 254 km/s), no effect on geomagnetic conditions is expected.
Solar wind parameters observed by ACE indicated the arrival of a weak
transient at 10:00 UTC on October 31, possibly related to the CME of 15:24
UT on October 28. A slight increase in solar wind speed, temperature and
density was measured. The magnitude of the interplanetary magnetic field
(IMF) went to 12 nT and is now stable around 5 nT. Current solar wind speed
is around 350 km/s. Geomagnetic activity is quiet to unsettled (local K at
Dourbes and NOAA Kp between 0 and 3), which is expected to remain so
within the next 48 hours.
TODAY'S ESTIMATED ISN : 085, BASED ON 08 STATIONS.

02 November 2013 A.R.I. DX Bulletin
No 1174
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5W - Hiro, JF1OCQ will be active as 5W7X from Apia, Samoa (OC-097) on 7-14 November. He plans to be QRV on 160-6 metres SSB and CW. QSL via home call. E-mail requests for bureau cards can be sent to jf1ocq[@]arrl.net http://arrl.net. [TNX NG3K]
CE0Z - Announced frequencies for the 8-20 November XR0ZR DXpedition to Juan Fernandez (SA-005) [425DXN 1148] are:
CW 1826 3526 7026 10106 14026 18076 21026 24896 28026
SSB 1840 3780 7060/7150 14150 18140 21270 24940 28470
RTTY 3590 7035 10142 14080 18100 21080 24920 28080
Plans are to operate also on 6 metres (50103 kHz CW/SSB and 50193 kHz EME) and 60 metres CW and SSB (5371.5). The team (DL6JGN, EA3AKY, IV3DSH, IW3SQY, IZ8GCE, PA3EWP, SP3DOI and WA7NB) will operate four stations. QSL via IV3DSH, direct or bureau, and LoTW after 6 months. Logsearch and OQRS on Club Log. Further information can be found at www.juanfernandez2013.com http://www.juanfernandez2013.com
JD1_oga- Toshi, JP1IOF will be active again as JD1BLC from Ogasawara (AS-031) on 7-15 November. He plans to be QRV on all bands and modes. QSL via JP1IOF (direct or bureau) and LoTW. Logsearch and OQRS on Club Log. [TNX DX World]
JT - Special event station JT50SSB is active until 6 November from Ulaanbaatar to celebrate the 50th anniversary of the first SSB QSO with Mongolia, made by Vladimir Vasilyevich Belousov (UA3CA) in 1963. The operators are JT1BB, JT1BO, JT1CS, JT1DA and Belousov's son, Andrey Vladimirovich (UA3ABR/JT1CA). QSL via UA3ABR.
KH9 - The K9W Commemorative DXpedition team (AA4NN, K6MM, K9CT, K9NW, K9ZO, N2TU, N9TK, NA6M, W3OA, W8GEX, W8HC and WB9Z) has been approved for entry onto Wake Atoll. The equipment is already on Wake and in safe storage awaiting their arrival: the plan is for the team to depart on 1 November, arrive on the 2nd and immediately erect antennas and set-up the stations. They plan to be QRV on 3-15 November (Wake time) with four stations on the following target frequencies:
CW 1826.5 3523 7023 10103 14023 18079 21023 24894 28023
SSB - 3790 7082 - 14185 18140 21285 24955 28485
RTTY - 3580 7035 10142 14080 18099 21080 24912 28080
Announced frequencies for 60m are 5405 (CW) and 5403.5 (SSB), while

on 6m K9W will use 50107 (CW and SSB).
Logs will be uploaded to Club Log as time and Internet access
allow. An OQRS for direct an bureau cards will be activated on
Club Log after the DXpedition ends. Traditional requests should be
sent direct to Wake Island DXpedition, P.O. Box 5005, Lake Wylie SC
29710, USA, or via bureau to AA4NN. Logs will be uploaded to LoTW
six months after the conclusion of the DXpedition. Bookmark
www.wake2013.org http://www.wake2013.org for further information and updates. [TNX W8GEX]
KP4 - KP4AO, the Arecibo Observatory Amateur Radio Club, will be QRV on
10 November from 14 UTC to 20 UTC to celebrate the observatory's
50th anniversary. Activity will be on 20 metres. QSL via W3HNK.
[TNX The Daily DX]
OZ - Once again Dirk, OZ/KH6DXX will be active from Romo Island
(EU-125) on 2-9 November. He will participate in the IPARC
(International Police Association Radio Club) SSB Contest on the
3rd. QSL via DF3XX, direct or bureau. [TNX rsgbiota.org http://rsgbiota.org]
PJ - Rob, N7QT and Hugh, W4VAB will be active as PJ6/N7QT and PJ6/W4VAB
from Saba (NA-145) on 7-17 November, and as PJ7/N7QT and PJ7/W4VAB
from Sint Maarten (NA-105) on 17-24 November. It will be a
"suitcase mini-DXpedition" with planned activity on 80-10 metres
CW, SSB and digital modes (RTTY, PSK and JT65). QSL via home
calls, direct or bureau, plus LoTW and eQSL. [TNX NG3K]
PY - Special event station ZV7O will be active on 15-16 November during
Fliporto 2013, the International Literary Festival of Pernambuco.
QSL via PY7JN. [TNX PY7ZZ]
TU - The website for the 17-30 November "solidarity radio operation"
from Cote d'Ivoire [425DXN 1172] is now up and running at
www.premiumorange.com/tu2013/ http://www.premiumorange.com/tu2013/ . Chris TU5AX, Paul
TU5XV and Jan
TU5NK plan to be QRV on 160-6 metres as follows:
CW 1826.5 3524 7024 10104 14024 18084 21024 24894 28024 50104
SSB - 3799 7070 - 14190 18150 21290 24950 28490 50150
DIGI - - 7050 10138 14080 18100 21080 24920 28080 -
Announced frequencies for 60m SSB are 5371.5/5403.5. QSL TU5AX via
F4WBN (direct/bureau, OQRS on Club Log), QSL TU5NK via DJ8NK
(direct/bureau and LoTW, OQRS on Club Log), QSL TU5XV via F6EXV
(direct/bureau and LoTW, OQRS on Club Log).
V5 - Klaus, DJ4SO be active again as V5/DJ4SO from Namibia from 7-8
November to 4 December. He plans to operate CW, digital modes and
some SSB on 160-6 metres. QSL via home call. [TNX The Daily DX]
VE - To commemorate the 250th anniversary of the Royal Proclamation of
1763, Canadian amateurs may use the following prefixes from 5
November to 5 December: VG for VA, VX for VE, XJ for VO, XK for VY.
VU7 - Krish W4VKU (VU2VKU) and other eight operators (namely Aravind
VU2ABS, Deepak VU2CDP, Nandu VU2NKS, Basappa VU2NXM, Pai VU2PAI,
Chandra VU2RCT, Chetan VU3DMP and YL operator Raji VU3CHM) will be
active as VU7AG from Agatti Island, Lakshadweep Islands (AS-011)
"for at least fourteen days" between 20 November and 10 December.
Another callsign (VU7KA) has been issued for demonstration
purposes on Kavaratti Island; it will be used when team members

make presentations to the local administration there "and educate
them on amateur radio".
Plans for VU7AG are to operate three high power stations on the
following target frequencies:
CW 1812 3512 7012 10112 14012 18082 21012 24902 28012
SSB - - 7095 - 14180 18155 21280 24955 28480
RTTY - - 7032 10142 14082 18092 21092 24922 28092
QSL via W4VKU, direct or bureau (logsearch and OQRS on Club Log).
Logs will be uploaded to LoTW approximately six months after the
conclusion of the DXpedition. Bookmark www.vu7ag.info http://www.vu7ag.info for further
information and updates.
XV - Special event callsign XV2V40J will be used by seven operators
(JA2TXR, JA3NHL, JA4AGA, JA6CNH, JA6QGF, JA8NF and JF1HJZ) on 2-24
November to commemorate the 40th anniversary of the establishment
of diplomatic relations between Japan and Vietnam. QSL via JF1HJZ.
YB - Budi, YF1AR (www.yf1ar.com http://www.yf1ar.com) will be active as YF1AR/4 from Sebesi
Island (OC-262) on 2-5 November. He will operate mainly SSB
running 100 watts into a vertical dipole for 20, 15 and 10 metres,
and a GP for 40 metres. QSL via N2OO. Logsearch on Club Log. [TNX
YF1AR]
YB - According to the expedition's blog (http://oc157.blogspot.com/
http://oc157.blogspot.com/),
YB8V is likely to be the callsign to be used on 10-15 November from
Banda Besar Island (OC-157) [425DXN 1173]. QSL via YB9BU, direct
only.
ZD9 - Bani van der Merwe, ZS1BM is part of the 59th overwintering team
on Gough Island (AF-030) that departed Cape Town on 5 September
aboard the MV S.A. Agulhas II. According to qrz.com http://qrz.com, he expects to
be QRV as ZD9G through August 2014. QSL via ZS1HF.

AFRICA TRIP ---> Carl, SM6CPY will be active holiday style as 5H3CJ from
Tanzania on 6-12 November and again on 18-26 November, and as 9X0PY from
Rwanda on 12-18 November. Dates are approximate. He plans to operate CW
only on 20, 15, 12 and 10 metres, "hopefully on 40 and 30 and possibly on 80
meters". QSLs via SM6CPY. [TNX The Daily DX]

CARIBBEAN TRIP ---> Mike, DF8AN will operate mainly CW as V26MN from
Antigua (NA-100) on 5-8 November, VP2MMN from Montserrat (NA-103) on 8-15
November and V4/DF8AN from St.Kitts (NA-104) on 15-19 November. QSL via
home call, direct or bureau. [TNX DX World]

**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

7O2A ---> This was a surprise activity by Dima, RA9USU (of 7O6T fame), who
operated from Socotra Island (AF-028), Yemen for the CQ WW DX SSB Contest.
QSL via UA3DX; logsearch and OQRS on Club Log. The operation has been

already approved for DXCC credit.

CYPRUS ---> "A large number of Cyprus stations have QSL mangers outside Cyprus. The Cyprus Amateur Radio Society's (CARS) QSL Bureau cannot deliver QSLs to these stations. Please ensure that the QSL Manager's callsign is written prominently on the card. Many cards are received from bureaux with the correct manager, but the cards still get delivered to CARS because the manager's call is not prominent". A list of Cyprus stations that have managers outside Cyprus can be found on www.cyhams.org/index.php http://www.cyhams.org/index.php: click on CARS Services ---> QSL Bureau Service ---> Incoming QSL cards - Foreign Amateurs & QSL Bureaux please read. [TNX 5B4AHJ]

DXCC NEWS ---> T6MH (Afghanistan, 2012 and 2013 operations) has been approved for DXCC credit. If you've had this rejected in a prior application, send a note to bmoore[@]arrl.org http://arrl.org to be placed on the list for an update to your record. Please note the submission date and/or reference number where the rejection was noted to expedite the search for any rejected QSOs. [TNX NC1L]

KOSOVO ---> Members of SHRAK, Kosovo's Amateur Radio Association (Z60A) and Finland's Radio Arcala (OH8X) have a joint project to operate from Albania, which is "still semi-rare on several bands". On 1-3 November, to "simulate the upcoming ZA expedition", the Kosovo team will operate Z60A on 14210, 21310 and 28510 kHz SSB. QSL via OH2BH. [TNX OH2BN]

QSL 5B4AHJ & P3J ---> M0URX is the new QSL manager for 5B4AHJ and P3J [425DXN 1173]. Older calls (5B50J, 5B/G3PMR, G3PMR and others) still go via 5B4AHJ. [TNX 5B4AHJ]

QSL ZS8C ---> "I have changed the address that the QSL cards get sent to", Carson, ZS8C (ZR6CWI) says on his qrz.com http://qrz.com page. The new address is Carson McAfee, P.O. Box 1585, Allens Nek, 1737, Roodepoort, Johannesburg, South Africa. Cards sent to the old address will be processed, and need not to be resubmitted. Carson adds that "cards can also be sent via the SARL QSL Bureau" and that "LoTW will be completed once I return to SA".

+ SILENT KEY + Guenter S. Hamacher, HP1XX (HP1XVH) passed away on 22 October. He was born in Cologne in 1931, and had quite an eventful, successful and varied life until he emigrated to Contadora Island (NA-072), Panama in 1982. An amateur radio operator for 25 years, he participated in or hosted a large number of contest operations. The last one was HP1WW by OH0XX for the CQ WW DX CW 2012, shortly before Guenter left the island and moved permanently to mainland Panama. He also conducted the Pacific Island Net for twenty years, providing valuable assistance to sailing boats.

ARLP044 Propagation de K7RA

ZCZC AP44
QST de W1AW
Propagation Forecast Bulletin 44 ARLP044
>From Tad Cook, K7RA
Seattle, WA November 1, 2013
To all radio amateurs

SB PROP ARL ARLP044
ARLP044 Propagation de K7RA

It's been a lively couple of weeks, with plenty of sunspots and great HF propagation. The average daily sunspot number for the week was 161.6, unchanged from last week's average of 162. Solar flux values were up quite a bit though, rising from 139.6 to 158.3, quite a healthy jump.

On October 26 the Penticton solar flux reading was 171.8, but NOAA downgraded it to 165, probably because the higher value was an outlier caused by solar events overloading the receivers at Penticton.

Just before ARRL CW Sweepstakes this weekend, predicted daily solar flux for the near term is 140 on November 1, 135 on November 2, 130 on November 3-4, 135 on November 5, 140 on November 6-8, then 105, 110, 120, 125, 130 and 135 on November 9-14, 140 on November 15-18, 145 on November 19, 150 on November 20-21, with flux values peaking at 155 on November 22-25, then dropping to a minimum of 105 on December 6.

Stable geomagnetic conditions are predicted for Sweepstakes weekend, with a predicted planetary A index at 5 on November 1-6, 8 on November 7-8, 5 on November 9, then 12, 15, 10 and 8 on November 10-13, 5 on November 14-25, 8 on November 26-27, 5 on November 28 through December 6, and 12, 15, 10 and 8 on December 7-10.

As October ended yesterday, we can now calculate our 3-month moving average of daily sunspot numbers. The average daily sunspot number for the three-month period centered on September, 2013 (including all daily numbers from August 1 through October 31, 2013) was 91.2, reflecting the recent uptick in solar activity.

So far in 2013 the averages are 73.6, 80.7, 85.2, 106.4, 106.4, 97.5, 85.6, 77.4 and 91.2.

The monthly averages for June through October 2013 were 80.2, 86.2, 90.2, 55 and 127.2. You can see that the month just ended was a very strong period.

You may recall in our last Propagation Forecast Bulletin ARLP043 that Ganesh, VU2TS joked (I think he was joking?) about the possibility that contesters might charge the ionosphere with some of the big antennas and power beamed skyward.

Apparently K9LA took this seriously enough to do the math, and his comments are quite interesting, and show us just how far-fetched this idea is.

Carl Luetzelschwab, K9LA wrote, "Recently a QST reader asked the same question. My response to him was that the power density needed to modify the E region is around 1 milliwatt per square meter (from 'Radio Techniques for Probing the Terrestrial Ionosphere,' Hunsucker, 1991). That translates to a huge ERP (effective radiated power). For example, the HF ionospheric modification facility (commonly called an ionospheric heater) at Tromso, Norway has an ERP of about 360 megawatts. Their transmitter puts out 1.4 megawatts and the gain of their antenna is 24 dBi, which results in about 3 milliwatts per square meter at 100 km.

"Now let's assume there are 1,000 contesters on the same band, each running 1 kilowatt into a 10 dBi antenna. Let's further assume they are all beaming to the same spot in the E region that's about 400 km down the road (in other words, they're all within an 800km diameter). And let's even further assume that all of these signals are on at the same instant of time and arrive at that spot in-phase. That works out to 0.08 milliwatts per square meter - which is still an order of magnitude less than needed. The F region is even worse, as the transmitted power density decreases due to the increased height.

"Thus I have a problem with the theory that many, many transmitted signals can enhance the ionosphere. I believe the bands are simply open more than we think, and a massive amount of activity (as in a contest) shows this. Note that 10-Meters was really good for several days before the contest - when the amount of people on was considerably less."

Thank you, Carl. Nice to see the numbers applied to this concept.

Solar activity made the news in the Los Angeles Times this week, concerning 28 solar flares in the previous week:

http://www.latimes.com/science/sciencenow/la-sci-sn-solar-flare-20131031,0,7996603.story#axzz2jOYy1d19.

And another news article about recent activity:

http://www.nbcnews.com/science/boisterous-sun-fires-third-huge-solar-flare-many-days-8C11480451.

Ted Leaf, K6HI sent us this:

http://www.nasa.gov/content/goddard/sun-emits-2nd-solar-flare-in-2-days/

Another L.A. Times piece, this time about an astronomer carrying on an old tradition, drawing sunspots by hand, sent to us by David Moore:

http://www.latimes.com/local/columnone/la-me-c1-mt-wilson-sun-spots-20131028-dto,0,4430093.htmlstory#axzz2jOYy1d19.

And here is an article about a magnetic storm a decade ago:

http://www.directionsmag.com/articles/the-magnetic-storm-of-halloween-2003/364078.

Mike Khokhlov, UA9CIR of Ekaterinburg in Asiatic Russia wrote, "We have just participated in the CQ WW SSB contest and with SF above 160 and A-index below 5 that was the propagation of a lifetime. Not sure if I will ever experience that in my life again when the 3 things coincide: high SF, low A and CQWW.

"We are now crossing fingers for the active region to return on the next lap. The CW leg is 4 weeks after the SSB. With the Sun's cycle of 27 days we have Hope."

Mike Treister, W9NY wrote, "Had such a marvelous time operating the CQ WW SSB contest just on 10 meters. Seems like at times the entire world was coming in at the same time, no matter which way my TH7 beam was pointed. I have not seen conditions this good on 10 meters in decades. Many stations around the world coming in to my northwest Indiana QTH S9 running only 10 watts. I noticed around sunset Saturday and Sunday signals from South American reaching me long path with my beam toward Japan, with that curious fluttering. Signals would be S9 long path and drop to S3-4 with my beam turned around to the south. Managed 1651 QSOs with 110 countries -- a real blast. Stations from the other side of the world such as India, Malaysia, Hong Kong, Taipei, all very clear and S9. I was running Japanese stations like they were next door. WOW. Hope these sunspots keep up for a while, and I am ready to check out 6 meters."

Peter Gambee, who I think may be K6TTD of Sacramento, California, wrote:

"Weren't some solar scientists saying that we had already passed the second peak of Cycle 24? Well, guess they blew that one.

"I've been licensed since the late 1970s, and have worked my share of DX as a novice during some decent solar cycles. Was QRT through most of Cycle 23, and during the first peak of the current cycle, so missed out on some decent DX.

"I was afraid I'd missed the boat on this cycle - until the end of September rolled around. During the past two weeks I've worked more DX, in more regions of the globe, than I have since I was first

licensed.

"In less than ten days I have logged over 50 DX contacts, on virtually every continent, most of them new ones for me.

"Here is one example of my recent stints on the air: BA8AG in Si Chiuan China, Z21DXI in Zimbabwe, ZS2I in South Africa, CN2PM in Morocco, YB9Y in Indonesia, DU3NQM in the Philippines - all in a single thirty minute stretch on October 23rd on 10 meter CW.

"Almost every pileup I dove into, I was successful on my first or second try. Lately, it has gone this way nearly every time I have sat down at the key and put out a call.

"My rig is an Elecraft K3-100, into a two element Yagi at 30 Feet. A decent setup, but no giant killer by any means. DXing ISN'T supposed to be this easy! I know I've been blessed by a sudden burst of sunspots, and big-time dumb luck. I'm thanking my lucky sunspots, knocking on wood and having an absolute BLAST.

"Assuming a decent response rate with my QSLs, I may be able to hit DXCC by the end of 2013.

"Here's hoping this 'second peak' holds out for another few months at least."

I felt comfortable guessing Peter's location by checking the FCC database because there are only a few hams named Gambee, but here is a report from Bob Foster. There are 40 licensees in the FCC database with that name, and actually I don't know what part of the world he is in. He sent this a week ago, plenty of time for me to find out what his callsign and location are, except I ran across his email just before filing this bulletin Friday morning.

Bob wrote, "On Sunday afternoon (10/20) I was able to work D44AC (Cape Verde) on 15M SSB. This type of a contact may be no big deal to the veteran, high powered DXers. However, I run a modest station: 70 W into a ground mounted Gap vertical. The fun thing about this Sun cycle is I have worked more African stations than ever before in my 43 year ham career. There also was far more CW and data activity heard on 10M than I recall for a long time.

"Hams with modest stations, do not be afraid to jump in when you hear DX. For whatever reason, I have been able to get through."

Thanks, Bob.

And for everyone who writes in, please let me know where you are located, and if you are a licensed ham, what your callsign is.

Scott Craig, WA4TTK of Nashville, Tennessee wrote a free program we have been using for many years to harvest the sunspot and solar flux numbers from this bulletin and display them in a Solar Data Plotting

Utility. You can download it, along with an updated data file here:

http://craigcentral.com/sol.asp

And finally, last week's bulletin was written aboard a Seattle to D.C. flight. This time, I am delayed in Olympia, Washington where I was attending an all night Halloween house party for dancers. Unfortunately, when I tried to leave around 3:00 AM, I found my clutch linkage had broken, so I came back to the house for internet access to finish the bulletin. The host said the best place to sit (not many power outlets in his old house) is at the edge of the dance floor. So here I am, pounding away on the laptop, feeling like a nerd and surrounded by dancers in a hot room with condensation dripping from the windows. I have my headphones on, so perhaps they think I am just planning the next DJ set.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for October 24 through 30 were 148, 148, 171, 206, 155, 171, and 132, with a mean of 161.6. 10.7 cm flux was 160.6, 161.4, 165, 166.9, 159.9, 152.6, and 141.9, with a mean of 158.3. Estimated planetary A indices were 3, 3, 3, 3, 3, 6, and 12, with a mean of 4.7. Estimated mid-latitude A indices were 2, 3, 3, 2, 2, 3, and 10, with a mean of 3.6.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31102
SIDC SOLAR BULLETIN 02 Nov 2013, 1211UT
SIDC FORECAST (valid from 1230UT, 02 Nov 2013 until 04 Nov 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 02 Nov 2013 10CM FLUX: 145 / AP: 006
PREDICTIONS FOR 03 Nov 2013 10CM FLUX: 145 / AP: 004
PREDICTIONS FOR 04 Nov 2013 10CM FLUX: 145 / AP: 005
COMMENT: The sun produced one M and three C flares during the past 24 hours.
Catania sunspot region 29 (NOAA AR 11884) was responsible for the M6.3
flare peaking at 19:46 UT on November 1. Also Catania sunspot region 28
(NOAA AR 11885) produced a C8.2 flare with a peak at 4:46 UT on November 2.
During the next 48 hours, more C flaring activity is expected with a
slight chance for an M flare. Two CMEs of which one full halo CME were
detected in coronographic imagery (LASCO/C2 as well as STEREO A and B), but
first analysis indicates both are backsided and originate from old NOAA AR
11875. The full halo CME was first seen in LASCO/C2 at 5:00 UT and the
second CME at 8:12 UT directed to the NW. Solar wind speed as observed
by ACE is around 350 km/s. The magnitude of the interplanetary magnetic
field (IMF) currently is stable near 5 nT. Geomagnetic activity is quiet
to unsettled (local K at Dourbes and NOAA Kp between 0 and 3), which is
expected to remain so within the next 48 hours.
TODAY'S ESTIMATED ISN : 069, BASED ON 02 STATIONS.

SIDC SOLAR BULLETIN 03 Nov 2013, 1211UT
SIDC FORECAST (valid from 1230UT, 03 Nov 2013 until 05 Nov 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 03 Nov 2013 10CM FLUX: 142 / AP: 009
PREDICTIONS FOR 04 Nov 2013 10CM FLUX: 148 / AP: 006
PREDICTIONS FOR 05 Nov 2013 10CM FLUX: 152 / AP: 007
COMMENT: The sun produced one M and six C flares during the past 24 hours. Catania
sunspot region 29 (NOAA AR 11884) was responsible for the M1.6 flare
peaking at 22:13 UT on November 2 and the M4.9 flare peaking at 5:16 UT on
November 3. Two C flares originated from new region NOAA AR 11890. During
the next 48 hours, more C flaring activity is expected with a chance for
an M flare. No Earth-directed CMEs were detected. The proton flux for
>10 MeV protons observed by GOES increased in the second half of November
2, but remained below the event threshold. A change in solar wind
parameters was observed from 22:00 UT on November 2; the solar wind speed
went to 400 km/s, while temperature also increased. Changes in magnetic
field and density were too small for a shock. The magnitude of the
interplanetary magnetic field (IMF) was maximally 7 nT and the Bz-
component was fluctuating between -5 and +5 nT. Geomagnetic activity is
quiet to unsettled (local K at Dourbes and NOAA Kp between 0 and 3),
which is expected to remain so within the next 48 hours. A small coronal
hole near +20 degrees latitude has reached the central meridian, which
might result in unsettled to active geomagnetic conditions from the end of
November 5 (UT time).

**** EDITOR'S COMMENT: If you were on Daylight Saving Time (DST), did you remember to turn your clock back an hour?
See below "Standard Time".

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 27th-October, through Sunday, 3rd-November there were 256 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3D2/r, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7O, 7P, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FO/a, FP, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2014 PACIFIC TOUR (Early Announcement). Operators Stan/AC8W, Ted/K8AQM, Brian/KG8CO, Charles/KN8R and Lee/N8LJ plan to activate two islands next year. Callsigns and QSL routes are yet to be determined. Activity will be on 160-10 meters using CW, SSB, RTTY and PSK. The scheduled islands are: Tonga (A3) - August 16-24th
Fiji (3D2) - August 25th and September 1st

3A, MONACO. Gil, F4FET, will be active as 3A/F4FET from November 11-12th. Activity will be on 40-10 meters using SSB. QSL via his home callsign, direct or by the Bureau.

5H, TANZANIA (Op Cancelled). Operators Fred, IK7JWX , informs OPDX that his major IOTA DXpedition to the Island of Zanzibar scheduled for April of 2014 is now cancelled "due to technical and logistical constraints".

5J0, SAN ANDRES ISLAND. Members of the "DX Friends" are now active from an Andres Island (NA-033) as 5J0R until November 10th. Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are listed in OPDX.1132. QSL via EA5RM direct (see Web page). You can use the OQRS (see Web page) for direct and Bureau cards. Visit their Web page at: http://www.dxfriends.com/SanAndres2013

5W, SAMOA. Hiro, JF1OCQ, will be active as 5W7X from Apia, capital of Samoa, between November 7-14th. Activity will be on 160-6 meters using CW and SSB. QSL via JF1OCQ, direct or by the Bureau (E-mail requests for Bureau QSLs can be sent to <jf1ocq@...>.

5Z, KENYA. Dani, EA4ATI, who was currently active as 5Z4T during the CQWW DX SSB Contest this past weekend, informs OPDX that he will be in Kenya for a couple more years and will be active as 5Z4/EA4ATI. He is using a Cobwebb antenna with a small amplifier and is active on 30/20/17/15/10 meters. He hopes to improve on his station and use the low bands in the future. His QSL Manager is EA4YK.

8P, BARBADOS. Operators Mike/KI1U (8P9IU), Mike/N1TA (8P9TA) and Bruce/K0BJ (8P9BJ) will be active from Barbados between December 9-16th. Their main activity will be the ARRL 10 meter Contest (December 14-15th) and will sign as 8P8T. QSL via KI1U. Prior to the contest, operators will be using their own callsigns.

9N, NEPAL. Toshi, JA8BMK, will once again be active as 9N7BM from Kathmandu and Nagalkot between November 8-28th. Activity will be holiday style on all HF bands using a FT-897D and IC-7000, Hex/Spider beam into a 600w amp. He states, "I will try to work USA on 80 and 160m if vertical antennas can be put up. QSL via JA8BMK, direct or by the Bureau.

AFRICAN TOUR. Carl, SM6CPY, will once again be active as 5H3CJ from Tanzania between November 6-12th and November 18-26th. Activity will be holiday style on most bands, but mostly CW on 20-10 meters listening up

25 kHz and operating with 100 watts, and possibly the lower bands depending on the antenna possibilities. Carl is also going to visit Rwanda during this period, and is expected to be active as 9X0PY between November 12-18th (tentative). His activity will be the same as his 9X operation. QSL both callsigns via his home callsign, direct or by the Bureau.

AFRICAN TOUR. Mathias, DJ2HD, will once again be active as V5/DJ2HD from Namibia between December 14th and January 18th (2014). This is just one part of his 4x4 trip through different countries. Activity will be holiday style on SSB and RTTY, but will also include a SSB entry in the DARC 10m Contest (January 14th). During this time frame, Mathias will also travel to and be active once again as 7P8DJ from Lesotho between December 22-24th. There are also plans to be active from South Africa (as ZS/DJ2HD) and one more country to be announced later, but no scheduled days have been provided. QSL all callsigns via his home callsign, direct or by the Bureau.

CARIBBEAN TOUR. Mike, DF8AN, will once again be active from the Caribbean. Activity will be during most of November. His scheduled operations and callsigns are as follows:
Antigua - V26MN between November 5-8th; IOTA NA-015;
WW. Grid FK97
Montserrat - VP2MMN between November 8-15th; IOTA NA-103;
WW. Grid FK86
St. Kitts & Nevis - V4/DF8AN between November 15-19th; IOTA NA-104
WW. Grid FK 87
Look for him to be on all HF bands, 160-6 meters. He operates mainly on CW using 100 watts using an Alinco DX70 into a long wire and dipole antennas. QSL via DF8AN, direct or by the QSL Bureau. ADDED NOTE FROM DF8AN: Mike informs OPDX readers [edited], "If anyone hears me on a frequency, and if anyone needs me on another frequency or mode, you can contact me via SMS (text message) on this cellular P H O N E N O.:
+491716232751
But please, no telephone calls. I will not answer any telephone call. If anyone wants a sked: send me a SMS with callsign and QRG and mode, and I will QSY if possible. But please accept that I am not on the air 24/7 around the clock. If you hear me (for example on 14 CW) and need me (for example on 18 SSB), send me SMS like this example: DL1ABC 18165. I will QSY as soon as possible to that new frequency. Please only short SMS. I have NO internet at my location and can NOT check my E-mails. I work only CW and SSB all bands include 6m. And PSE accept, that I am not there for amateur radio as a main reason. I work for the Civil Aviation Office and for that reason, I have to work some hours/day, hi... But if anyone hears me and needs me on another band - let me know."

CE0Y, EASTER ISLAND. Operators Jose/CE0HYO, Gustavo/CX2AM, Humberto/CX3AN, Gustavo/CX3CE, Mario/CX4CR, Gen/EA5HPX, Francisco/EA7FTR and Carlos/LU2NI are now active as XR0YY from Hanga Roa, Easter Island, until November 7th. Activity will be on 160-6 meters using CW, SSB and the Digital modes. They have 3 stations operating simultaneously. QSL via EB7DX. There Web site is available at: http://easterisland2013.com

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
7O2A - Yemen; 2013 Operation
T6MH - Afghanistan; 2012 and 2013 Operations (*)

*Note: If anyone had this contact rejected in a recent submission send an E-mail to <bmoore@...> to be placed on the list for an update to your record. Please be sure to note the submission date to help expedite the search for this QSO.

EA8, CANARY ISLANDS. Operators Andrea/IK1PMR and YL Claudia/PA3LEO will once again be active as EA8/homecall from Tenerife Island (AF-004) between November 26th and January 7th (2014). Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via their home callsigns, by the Bureau, direct, or E-mail requests for Bureau cards. For more details and updates, see: http://www.ik1pmr.com

EF8, CANARY ISLANDS. Luis, EA8AY, will use the special callsign EF8USA from Tenerife Island (IOTA AF-004, DIE S-012, WLOTA 1276, EAA TF) during the ARRL DX CW Contest (February 15-16th) as a Single-Op/All-band entry. QSL via W2GR. Visit his Web site at: http://www.ea8ay.com/ef8x2

EY, TAJIKISTAN. Nodir, EY8MM, from Dushanbe, will be active during the CQWW DX CW Contest (November 23-24th) as a Single-Op/Single-Band (160m) entry. QSL K1BV via direct, by the Bureau or LoTW. Check out his home page at: http://www.ey8mm.com

FR/TO2, REUNION ISLANDS (Reminder). Stef, F5UOW, will once again be active from Reunion Island (AF-016). He will sign as FR/F5UOW between October 31st and November 21st, but between November 3-17th, he will sign TO2R. There is a report that Alain, F8FUA, is with him. Activity will be mostly CW between 40-10 meters. QSL via F5UOW, direct or by the Bureau.

GU, GUERNSEY (EU-114). Dick, GU4CHY, will be active during the CQWW DX CW Contest (November 23-24th) as a Single-Op/Single-Band (10m)/High-Power entry. Dick states, "Planning on 10m but will switch to 15m if conditions seem poor on 10." QSL via his home callsign, direct (preferred) or by the Bureau (long QRX).

GU, GUERNSEY. Bob, GU4YOX, will be active during the CQWW DX CW Contest (November 23-24th) as a Single-Op/High-Power/Non-Assisted entry. QSL via GU4YOX, direct or LoTW.

IA0, ANTARCTICA. Gianni, I1HYW, from <www.waponline.it> provided the following [edited]: Max, IA0MZ, did start as promise to be QRV from Mario Zucchelli Station-Antarctica (WAP ITA-01) on Sunday evening, Oct. 20th. He will be there until Feb. 2014. This morning (October 29th), Max sent a message to remind the chasers a few simple rules in order to avoid loss of precious time when he is operating HF. Max wrote: "On my second day on air, I have experienced huge pile up where unfortunately (as usual), people do not rule; all calling on everyone, many people do not even respond when I came back to their calls ... I hope that, after the first few days, things will became better, but please try to understand that

I cut hours of my sleeping time to be on for EU and please do not duplicate
the QSOs on the same band, leave everyone the chance to work MZS!
For the American friends; I'll be here until early February 2014, but
unfortunately the time between 22:00 and 02:00 UTC (that are 11:00-15:00
hrs local time here) is almost taboo for me. As you can imagine, that
falls in the middle of daily activity ... but it does not mean anything,
just a snowy day in that window will allow me to be on air even if for
half an hour or so. The advice as always, is to give an eye to the cluster,
to avoid throwing valuable time; I always use the spot quote It will not
be gallant, but I'm sure it will help the chasers..... 73 from IA0MZ,
Massimo DIPAOLA @ Mario Zucchelli Station, Terra Nova Bay Antarctica
(UTC+13) S 74°41.655' E 164°06.839'"
According to Max's QRZ.com page, activity will be on 20/17/15/12 meters
SSB ONLY. He prefers the following suggested frequencies: 14333, 18125,
21230 and 24940 kHz. Suggested times are usually between 1700-1900z and
occasional between 0900-1030z. He posts: "NO CW - NO DIGI - NO SPLIT -
NO FILTERS - NO REAL TIME LOG - NO SCHEDS. THIS IS NOT A DX-EXPEDITION
BUT MAINLY A SCIENTIFIC EXPEDITION." QSL via IW0EFA, by the Bureau or
direct to: Gian Paolo Volpato, via Piave, 13 - 01100, Viterbo, Itlay.
Log will be uploaded to LoTW after his return to Italy. He does have a
FaceBook page at: https://www.facebook.com/II0MZ

IOTA NEWS.............
NA-189. Operators Benjamín/XE2AU, Juán Manue/XE2AI, Ismael/XE1AY,
Jorge/XE2AMS, Juán/XE2AY, David/XE1REW, Gustavo/XE1KKK and
Enrique/XE2AA will be active as XF1T from Cocinas Island
between March 14-17th, 2014. QSL via IT9EJW. An OQRS and
log search will be available on ClubLog after the DXpedition.

OC-109/ (Postponed/Update) John, YB5NOF, informs OPDX that the reason
OC-122/ for the postponement of OC-109 and OC-122, is the bad weather
OC-209/ conditions until January 2014 and no transportation to go there.
OC-210. He did mention that before OC-109 and OC-122, he will try to
activate Talaud Island (OC-209) and Sangihe Island (OC-210),
especially to Miangas on the borders of North Celebes, with
Ronny/YC8TXW and Jusuf/YC8TZR in May of 2014. Stay tuned for
updates! These operations will count towards the Nusantara
Indonesian Island Award: http://www.nusantaraaward.com
http://www.facebook.com/nusantaraaward

OC-157. (Update/Callsign) A team of 8 operators will be active as
YB8V from the rare Banda Besar Island between November 10-15th.
Activity will be on 40-10 meters using CW and SSB. The operators
mentioned are Joppy/YB8XM (Team Leader), Marthin/YB8VM, Danny/
YC8VDT, Richard/YD8VSR, Agustinus/YD8VRA, G. Saiya/YD8VRS,
Fransicus/YC8VFB and Robert/YC0MVP. Look for more details to
be forthcoming. Watch the following Blog page for updates at:
http://oc157.blogspot.co.uk

OC-262. As this is being typed, Budi, YF1AR, is expected to be active
as YF1AR/4 from Sebesi Island between November 1-5th. Activity

will be on 40-10 meters using mainly SSB, but some CW and
Digital modes. QSL via N2OO (see QRZ.com). For more details
and updates, see:
http://www.yf1ar.com/2013/10/yf1ar4-oc-262-sebesi-island.html

J6, ST. LUCIA (Press Release: 5th St. Lucia Buddies in the Caribbean
Suitcase DXpedition): "Travel plans are set for the fifth 'Buddies in the
Caribbean' (BIC) mini-DXpedition to St Lucia (J6). Eight operators, some
of whom have never experienced the 'other side' of a pileup, will be
operating from Chateau Devaux on the NE side of St. Lucia from December
1st through 9th, 2013.
This 'Suitcase DXpedition' will operate QRP to 100-watt radio stations
using backpackable Buddipole antennas to make contacts from the villa,
the surrounding mountains, and (of course) from St. Lucia's superb beaches.
The eight operators are Jerry/N9AW, Craig/NM4T, John/W5EXJ, Joe/K3JDB,
Rick/AA4W, Jim/W4QO, Chris/W6HFP, and Budd/W3FF (J68FF). Ops will preface
their own calls with 'J6/'.
Team members will operate several CW, SSB, and/or Digital Mode stations
on 160-10 meters from the villa while others make contacts with portable
set-ups from other J6 locations.
Per tradition, meeting and operating with local hams while on J6 is one
of our key goals.
QSO confirmation and QSLs will be available via LOTW, bureau or direct
via information on each operator's www.QRZ.com page."

J7, DOMINICA (Update/Change). Operators Charlie/K1XX, George/K5KG, Jim/
WI9WI and Gus/VO1MP will be active as J79XX, J75KG, J79WI and J79MP,
respectively, from Dominica (NA-101) between November 16-25th. The group
plans to also be in the CQWW DX CW Contest (November 23-24th) signing
J73A as a Multi-2 entry. Activity outside of the contest will be primarily
CW, with some time devoted to SSB and RTTY. QSL J75KG via K5KG, J79XX via
K1XX, J79WI via WI9WI, J79MP via VO1MP and J73A via WI9WI all with a
SASE only. NO Bureau QSLs.

J8, ST. VINCENT. Gerd, DL7VOG, will be active as J87GU from Union Island
(NA-025) between November 2-27th. Activity will be on 160-6 meters using
CW and RTTY (He states, "I will carry a microphone for 'emergency cases'
... If you need SSB let me know..." Gerd will be active in the Worked
All Europe (WAE) RTTY Contest (November 9-10th) and CQWW DX CW Contests
(November 23-24th). He will use an IC-706MK2G into an HF9VX for 80-6m
and an Inverted-L (15m fiberglass pole) for 160m. Gerd will also carry
a 500w amp. QSL via his home callsign, direct or by the Bureau. An OQRS
is also available on ClubLog for both Bureau and direct cards. For more
details and updates, see: http://www.dl7vog.de/index.html

JT50, MONGOLIA (Special Event). Look for special event station JT50SSB
to be active to celebrate the 50th anniversary for the first SSB QSO on
the amateur radio band from Mongolia. A Russian amateur radio operator
named Vladimir Vasilievich Belousov operated on the SSB mode from Mongolia
for the very frist time in 1963. Operators mentioned are Baatar/JT1BB,
Baldan/JT1BO, Bat-Erdene/JT1CS, Enkhbayar/JT1DA and Andrey Vladimirovich

Belousov/UA3ABR, son of Vladimir Vasilievich Belousov. Activity will be on the HF bands. QSL via UA3ABR.

KH2/NH2, GUAM. Dave, N2NL, will once again be active as NH2T from Guam (OC-026) during the CQWW DX CW Contest (November 23-24th) as a Single-Op/ All-Band/High-Power entry. Dave will be active (outside of contests) as KH2/N2NL and during all contests as NH2T. During the summer of 2013, Dave moved to a new hilltop QTH and continues to be active on 160-6 meters. He will be departing Guam in June 2014. QSL via LoTW or via W2YC. For more information, including a station description, you can visit his Blog Page at: http://www.n2nl.net

KH8 & 5W, AMERICAN SAMOA AND SAMOA. (Update to OPDX.1110/1114/1116). Operators John/9M6XRO, Aki/ZL1GO (JE4EKO), Masahiro/JH3PRR, Kip/W6SZN and Jacky/ZL3CW (F2CW/WE3B) will be active using the special event callsign W8A from the Turtle and Shark Lodge, Village of Vaitogi, on the southeast coast of Tutuila Island (OC-045, USI AS007S, WLOTA 4385) between November 12-22nd. QSL via ZL3CW. Activity will be on 160-10 meters with a significant effort on 160 meters and a focus on Europe for the high bands. CW will be the primary mode with some SSB and RTTY possible. Suggested frequencies are:
CW - 1811.5, 1821.5 (NA), 3512, 7016, 10116, 14035, 18092, 21035, 24907 and 28035 kHz
SSB - 1848, 3795 (NA), 3803, 7078/7167, 14210, 18165, 21295, 24975 and 28495 kHz
RTTY - 3525 (JA), 3582, 7043, 10132, 14092, 18108, 21092, 24928 and 28092 kHz
** See special notes on the Web page.....
Their location will be well south of Pago Pago to limit mountain low angle blockage. The callsign N8A will be used during the CQWW DX CW Contest (November 23-24th) as a Multi-2 entry. QSL route will also be ZL3CW. Four of the five operators plan to be active as 5W8A from Samoa after their activities on American Samoa between November 27th and December 2nd. Operators mentioned are 9M6XRO, W6SZN, ZL1GO and ZL3CW. QSL route is also ZL3CW. For more details and updates, watch the N8A Web page at:
http://www.n8a.eu
Also, watch their FaceBook page at:
https://www.facebook.com/N8a2013AmericanDXpedition

KH9, WAKE ISLAND. If you missed Specila Bulletin OPDX.1134.1, the "K9W Wake Atoll Commemorative DXpedition" has been rescheduled and should be on the air as you read this. Operation is scheduled to last until November 15th (Wake Island time). Suggested frequencies are:
CW - 1826.5, 3523, 5405, 7023, 10103, 14023, 18079, 21023, 24894 and 28023
SSB - 3790, 5403.5, 7082, 14185, 18140, 21285, 24955 and 28485
RTTY - 3580, 7035, 10142, 14080,18099, 21080, 24912 and 28080 kHz
6M - 50107/CW and 50107/SSB

An OQRS will be available by ClubLog (Highly Recommended). This is the preferred method to use for your QSL confirmation. After the DXpedition ends you can order either a direct or Bureau QSL card using the OQRS

online QSL service provided by ClubLog. For sending direct QSL requests, the mailing address is: Wake Island DXpedition, P.O. Box 5005, Lake Wylie, SC 29710 USA (See detail on their Web page). QSLing by the Bureau is via AA4NN. Logs will be posted on LoTW 6 months after the conclusion of the DXpedition. NO eQSL. For more details and updates, visit the K9W Web page at: http://www.wake2013.org

NP4, PUERTO RICO. Alfredo (Al), WP3C, will be active as NP4A during the CQWW DX CW Contest (November 23-24th) as a Single-Op/Single-Band (80m) entry. QSL via W3HNK.

OH0, ALAND ISLAND. Operator Tomi, OH6EI, will once again be active as OH0Z during the CQWW DX CW Contest (November 23-24th) as a Single-Op/ All-Band/High-Power entry. QSL via W0MM.

EA6/S53R QSLS. Ralph, K2PF, will handle QSLs for recent operation of EA6/S53R. Direct requests only. Log is on LoTW.

NEW QSL MANAGER. Alan, 5B4AHJ, informs that M0URX has taken over the QSL duties for 5B4AHJ and P3J. However, Alan states that he will continue to manage QSLs for the older callsigns: 5B50J, 5B/G3PMR, G3PMR & others. ADDED NOTE FROM ALAN: "May I remind your readers that a large number of Cyprus stations have QSL Mangers outside Cyprus. The CARS QSL Bureau cannot deliver QSLs to these stations. Please ensure that the QSL Manager's callsign is written prominently on the card. Many cards are

received from bureau with the correct manager, but the cards still get delivered to CARS because the manager's call is not prominent. The following page lists the Cyprus stations that have managers outside Cyprus <http://www.cyhams.org/index.php/en/cars-services/qsl-bureau-service/141-incoming-qsl-cards-foreign-amateurs-a-qsl-bureaux>.
Thanks! 73 Alan, 5B4AHJ"

NOT THE QSL MANAGER/ROUTE. Petr, OK1DOT, announced last week that RW6HS is not the QSL Manager for the following DX stations. Some stations do not exist or have other QSL Managers or the the station does not even know that their callsign is listed on the RW6HS Web site! Petr has contacted the below stations and their response was surprising: their QSL cards can be handled by themselves; My QSL Manager is not RW6HS! This information was gathered from QRZ.com and DX bulletins. Here is the list of stations: 4X0F, CE2EZE, CT1JSP, EA8/W4OI, EW1AR, JX7DFA, KP3EM, OD5NO, PR7CPK, SQ5OZH, TA1AZ, VK4SJP, VU2UR, YV5DEH and ZB2FK.

OLD QSL COLLECTION (Update). Jean Michel, F6AJA, wants to remind everyone to visit the Les Nouvelles DX (LNDX) Web page to see more than 11500 old QSL cards in several different albums/galleries. This site contains:
- The ten most wanted DXCC entities (2004 to 2012) with more than 300 QSLs
- At least one card for each 60 deleted DXCC countries (more than 1500+ QSLs)
- Nearest the totality of current prefixes, disappeared now (more than 4000+ QSLs)
- Album for stations from North Africa 1945-1962 (400+ QSLs)
- More than 900 QSLs from the Antarctic bases.
- Nearly 270 QSLs from the TAAF (Terres Australes and Antarctiques Francaises).
- More than 400 QSLs for the rare French Pacific Islands such as FK/C, FO/C, FO/A, FO/M, FO/C and FW
- Nearly 100 cards from Eparses Islands such as FR/B/E/G/J/T
- The FG, FM, FP, FS, FY stations from 1945 to 1969
- More than 1500 cards for the old timer with more than 130 countries before 1945.
- Cards from the French Department before 1945.
- At least one card from each of the states in the U.S. before 1945.

The URL address for the Web site is: http://LesNouvellesDX.free.fr
Some cards are still needed for the collection, and your participation is welcome. Please visit their site and give them your comments by sending an E-mail to: LesNouvellesDX@...

QSL 7O2A via UA3DX. Dima, RA9USU, was active from Socotra Island, Yemen, during the CQWW DX SSB Contest last weekend.

QSL B9/BY9GA via BA1DU for this past operation. B9/BY9GA has a log search on ClubLog and an OQRS system in place.

QSL STATUS. Fred, IK7JWX, informs OPDX that 90% of the QSLs from the following Italian places and operations have been sent via the Bureau. He states, "Knowing the long delays of the bureau, I am sure that you have already received these QSLs from 2008 to 2012: IQ7AF, IQ7AF/P, IK7JWX, IK7JWX/P, IP7W, IP7W/P, IR7ITA, IR7ITA/P, IO7DAI/P, IR7WFF/P, IE9/IQ7AF, and also for ZA0/IK7JWX, 5C2J, 5C2J/P, TS8P and PR2I. Therefore, if some QSLs have not arrived yet, send me an E-mail with all the data of QSO(s) and I will send a second QSL." Fred's E-mail address is: ik7jwx2003@...

QSL T30FL via AA4FL. This was the T33A team active from Betio, Tarawa, Republic of Kiribati.

QSL RECEIVED VIA LoTW: 4O/UA3RF/P, 5M2TT, 9G5TT, 9L1X, 9Y4D, AL1G, CE1UGE, CX9AU, EA6NB, FM5CD, IB9T, JA1YPA, JA2FSM, JA9APS, JH6UYB, JK1UVP, PA7JWC, PJ2T, PJ2/W5BOS, SM5CKV/P, TF2LL, TK5EP, TO2TT, TO5FM, TU2T, TX5D, VA7ST, VE3NLS, VE8EV, VU2NKS, YL2KF, YQ6A, ZL1BYZ and ZM4M

QSLS RECEIVED VIA MAIL: 7O6T, A34JP/H, CE3/UA4WHX, CP4BT, CT9/DJ8OG, HB0/DL2SBY, LU/UA4WHX, OA4/UA4WHX, OP2A, SU9VB, T8GM, UA4WHX/CX, V6G, ZA/UA4WHX and ZB2CN

QSLS RECEIVED VIA THE BUREAU: 4K9W, 5H3ME, 9Y4/DL7VOG, A35YZ, A6/DL9WVM, CG200I, CR3L, CT9/DK7YY, H44MS, JG8NQJ/JD1, PJ5/DL7VOG, SU1KM, TO7BC, V5/DK1CE, VU2HBC, XL2I, XM2I and ZK2C

S2, BANGLADESH (Update to OPDX.1117/1118/1131/1133 - Press Release #5). Project 2013 by the Mediterraneo DX Club (MDXC) announced October 29th, that the team will use the S21ZBB callsign during the CQWW DX CW Contest (November 23-24th) as a Multi-2 entry.

STANDARD TIME. Did you remember to change your clocks? Countries who observe Daylight Saving Time (DST), which took place on Sunday, March 10th, are now expected to move their "local clocks" backward 1 hour on Sunday, November 3rd, from 2:00 AM local time to 1:00 AM. In 2014, Daylight Saving Time (DST) will again go into effect on Sunday, March 9th, at 2:00 AM local time. For the history and details about ST and DST, as well as an interesting map of the world (showing the countries who observe DST), see: http://en.wikipedia.org/wiki/Standard_time
http://en.wikipedia.org/wiki/Daylight_saving_time
ADDED NOTE: Hopefully, all amateur radio operators know not to change their GMT/UTC/ZULU clocks. However, since most operators usually set their computers to local time, some may have to change their settings on "some" ham radio software (ex. logging, propagation, DXTelnet, etc..) programs.

T33, BANABA ISLAND (Reminder). The T33A DXpedition to Banaba Island (OC-018) is expected to be active this week between November 5-18th. Activity will be on 160-10 meters using CW, SSB and RTTY. They will have six stations on the air at two different sites. A OQRS by ClubLog will be available and will be the preferred method to use for your QSL confirmation. Logs will be posted to Logbook Of The World (LoTW) approximately 6 months after the conclusion of the DXpedition. Direct QSLs are via W2IJ. QSLs will also be available direct by the Bureau. For

more details, visit the T33A Web page at: http://www.t33a.com/index.htm
The T33A DXpedition's Blog page is at: http://banaba2013.wordpress.com
Also, the T33A team will be using DXA interface for their operation. DXA is an innovative Web site that allows DXers to view the status and activities of a DXpedition in near-real-time. Within a few minutes after making a contact with the DXpedition, the DXer is able to see a graphical listing of their contact. The DXA Web page for the T33A operation is located at: http://dxa2.org/t33a
ADDED NOTE: For one day only, on November 18th, look for David, N1EMC (Co-leader), to be active from Banaba Island as T33X. QSL via N1EMC direct.

UI2, KALININGRAD. Igor, UA2FZ, will be active as UI2K during the CQWW WPX SSB Contest (March 29-30th) as a Single-Op/All-Band entry. QSL via UA2FZ.

UP44, KAZAKHSTAN. Members of the "Kazakhstan Traveling Radio Amateurs Group", plan to activate the following references as UP44WFF between November 9-10th:
WFF/UNFF-030 - State natural Park «Medeo»
WMA/UNM-013 ☐ Moutain Makhnatka (2280m - Medeo) (New One)
WRA/UNR-048 - River Malaya Almatinka
KDA-G-06 - Medeo District
WW Loc. - MN83MD
Operators mentioned are Sergey/UN6GAO, Viktor/UN7GIT, Arthur/UN6QC and some young radio amateurs. Activity will be on 40m (7060-7100 kHz), 20m (14140-14180 & 14244 kHz), 15m (21200-21244 kHz) and 10m (28450-28540 kHz) +/- QRM. Modes will be CW and SSB, using a Kenwood TS-2000 and TS-590 into a multi-band Delta M0PLK (20-10m) and an Inv. Vee (40-10m). QSL via LoTW, by the Bureau, direct and <http://eqsl.kz/>. More details and info about diplomas are available at:
http://www.qrz.kz (RUS)
http://un-dx-news.ucoz.com/index/new_expedition/0-5 (ENG)

VK0H, HEARD ISLAND. It has been reported [on the Web page below] that the 2015 Cordell Heard Island Expedition Project's restructuring has been completed as of October 15th, and is grouped into three broad groups: Mountain Science, Environmental Science and Communication Science. A document, "HD_2015_Research_Program", has been completed describing the proposed projects for a 2015 expedition to Heard Island. The document will be released on 15th Nov. 2013. The Expedition's Organizer/Leader Dr. Robert Schmieder, KK6EK, will visit the Australian Antarctic Division (AAD) in Hobart, Tasmania, during Nov. 4-14th, to discuss the expedition, the scientific projects, and arrangements for transportation and onsite support. The goal is a collaborative effort between the AAD, Cordell Expeditions, and other institutions that have expressed interest in participating. For further information, please contact Dr. Schmieder at <schmieder@...>, and visit the expedition's Web site at:
http://www.heardisland.org

VU7, LAKSHADWEEP ISLANDS. Operators Aravind/VU2ABS (RTTY/CW), Deepak/VU2CDP (CW/SSB), Nandu/VU2NKS (RTTY), Basappa/VU2NXM (CW/SSB), Pai/VU2PAI (CW/SSB), Chandra/VU2RCT (SSB), YL Raji/VU3CHM (SSB), Chetan/VU3DMP (SSB) and Krish/W4VKU (Organizer - SSB/RTTY) have just been granted by the Ministry of Telecommunications & IT, Government of India, to activate Laccadive (Lakshadweep) Islands sometime between November 20th and December 10th. Exact dates are to be confirmed soon. The team plans to be active from Agatti Island (AS-011) with the callsign VU7AG. Given the short notice, the team is working hard in getting things organized and is looking to be active for at least fourteen days. The team would be operational in batches with three high power stations running CW, SSB and RTTY. Suggested frequencies are:
CW - 1812, 3512, 7012, 10112, 14012, 18082, 21012, 24902 and 28012 kHz
SSB - 7095, 14180, 18155, 21280, 24955 and 28480 kHz
RTTY - 7032, 10142, 14082, 18092, 21092, 24922 and 28092 kHz

SPECIAL NOTES:
* The VU band allocation in the 80m phone segment is very, very narrow. It was therefore decided by the team that there would be no 80m SSB operation.
** On 20m, they will listen higher up in the band. Especially while working General class hams in the U.S.

Another callsign has been issued for demonstration purposes on Kavaratti Island □ VU7KA. This would be used only briefly when team members make presentations to the local administration in Kavaratti and educate them on amateur radio. QSL Manager is Krish, W4VKU, direct or by the Bureau (see details on the Web page). An Online QSL Request System (OQRS) will be available for all your QSL requests. OQRS will be enabled soon after the expedition. For Logbook of The World (LoTW): QSOs would be uploaded to LoTW in approximately 6 months time. The following Web page has been setup, and contains bios of operators, QSL details, frequencies and a survey. Visit the VU7AG page at: http://www.vu7ag.info

XV2V40J, VIETNAM (Special Event). Operators Shim/JF1HJZ (XV3AA), Shoji/JA2TXR, Tack/JA3NHL, Ishida/JA4AGA, Takehara/JA6CNH, Megumu/JA6QGF and Hisao/JA8NF will activate special event callsign XV2V40J between now and November 24th. Activity is to commemoration 40 years of the Japan-Vietnam establishment of diplomatic relations. QSL via JF1HJZ.

XZ, MYANMAR (The third and final round of Myanmar 2013). Zorro, JH1AJT, and a group of operators will be on the air from Nay Pyi Taw again between November 15-26th. This will be the third and final run for 2013 from XZ-land. Proposed callsign is XZ1J this time, and they plan to set up three to four stations, run 24/7 on 160-10 meters using CW, SSB, and RTTY. Operators mentioned are Zorro/JH1AJT, Franz/DJ9ZB, JC/E20NKB, Champ/E21EIC, Katsu/JA1DXA, Jay/JA1TRC, David/K3LP, Paul/N6PSE, Peter/PP5XX, Rafael/PY2NDX and Kazu/VR2KF. QSL: OQRS preferable.

LATEST NEWS FROM KOSOVO, Z60A AND ALBANIA, ZA. Jarmo, OH2BN, sent out the following press release on November 1st [edited]: "During the recent CQWW activation of Kosovo, a project to activate neighboring Albania was

agreed jointly by members of SHRAK, Kosovo's Amateur Radio Association (Z60A) and Radio Arcala (OH8X) of Finland.
The team will be headed by Fehmi Bojniku/Z62FB and Martti Laine/OH2BH. They are seeking additional team members from USA and Japan. The operating location will be the coastal city of Durres - only a 3-hour drive from Kosovo's capital Pristina.
To simulate the upcoming ZA expedition, the Kosovo team will fire up Z60A for the first time this coming Friday (November 1) until Sunday (November 3) on the following SSB frequencies: 14210, 21310 and 28510 kHz, operating split frequency when needed. Special emphasis will be given to Japan and USA, with superb radio conditions hopefully lasting for this weekend.
The following persons - Vjollca/Z61VB, Driton/Z61DX and Fehmi/Z62FB - are heading the operations with their new hams participating. A special QSL card can be obtained via OH2BH.
This activity is supported by Emerald Hotel, Pristina.
<www.emeraldhotel.info/>
While Kosovo is expected to qualify for DXCC credit some time soon, Albania counts now and is still semi-rare on several bands.
In the recent CQWW SSB Contest, as many as four (4) Z6 stations partic-ipated in the event and their QSOs will soon be uploaded to LoTW."

ZD9, GOUGH ISLAND. Bani, ZS1BM, is expected to soon be active as ZD9G from Gough Island until August 2014. QSL via ZS1HF strictly: Pierre Tromp, P. O Box 151, Worcester 6849, South Africa. Watch QRZ.com for updates.

21805. DX Summit Snoops

Yahoo group: DX-IS (2013)
Date: 2013-11-04 01:46:49 UTC
From: Nelson Moyer
Topic: 21805 Message: 21805

I did an Amazon search for a product yesterday, and today an Amazon splash advertisement came up on DX Summit with the product I had researched. The product had nothing to do with amateur radio, since it is a toy I was considering for my grandson, and the splash ad is obviously targeted at me. Apparently, Google isn't the only BIG BROTHER snooping web searches. DX Summit is in cahoots with Amazon and who knows who else, to monitor our web searches and sell out callsigns. Nothing is private anymore. They have linked my name from Amazon to my callsign on DX Summit, and targeted with a splash ad. I guess I'll have to go back to the local packet cluster for DX spots. What a disappointment that a non-pecuniary rule doesn't apply to amateur radio activities in Finland. Think about this the next time you bring up DX Summit on your web browser.

Are there still RF based packet clusters? If so, I would take it yours would be associated with the EIDXA.

Many websites do this. They get paid to have those advertisements so you do not have to pay (or not as much). You will see recommendations based upon that search on various sites. I am still seeing one from about 3 weeks ago for the products, accessories for the product (assuming I bought it), etc.

The FCC rule about pecuniary interest pertains specifically to
amateur-operator-to-amateur-operator communication - it has nothing to
do with websites.

If you don't like to see the ads, I suggest you install AdBlock Plus -
https://adblockplus.org/

If you don't like Amazon recording your interests, don't shop at Amazon :)

That was the first thing that came to mind (doing business via Ham radio.) It always was a no-no in Canada and I assume most countries. However as Iain correctly points out, it is not amateur to amateur, so it probably falls into the same category as ads in magazines. Perhaps annoying, but legal and some like the ads.

Use a telnet client to connect to a traditional DX Cluster. There are dozens of them here:

http://www.dxcluster.info/telnet/index.php

May I suggest VE1DXI (ve1dxi.no-ip.ca:23) or VE7CC-1 (ve7cc.net:23)
. . . if you want a good telnet client try CC User:

http://www.ve7cc.net/

If you want a full featured DXing suite, try DX Labs:

http://www.dxlabsuite.com/

All of the software mentioned above is written by Hams, is advertisement free and it costs nothing!

Read the terms of service that you agreed to when you us yahoo. Gives them a right to follow every site you follow. On occasion i visit eBay. Can't get rid of them for at least 3 three weeks.....direct mail to my in-box. These "hits" do pay the bills, so we can enjoy the dx summit, and our groups. It's just something we have to put up with. I used to get lot's of ads for IE9......upgraded and they are now gone.

Use FireFox and Adblock Plus:

https://addons.mozilla.org/en-US/firefox/addon/adblock-plus/

But . . . be careful what you say on the Internet because it is ALL recorded somewhere by someone. I doubt if it is ever deleted. 5 years from now, someone might "remind" you of what you said in a casual conversation. That's the new reality (actually it's not new . . . we are just finding out how extensive it has been by every organization world wide.) :-(

The above paragraph could be considered political, but I assure all reading this it is not. All governments and large businesses snoop on our Internet traffic. A pox on ALL their houses! :-)

In the USA, the making money part refers to on-air activities. We are not to make any money for on-air activities. Otherwise, no one could make any equipment for radio amateurs and sell it to radio amateurs. That wouldn't make sense.

Same here. 20+ years ago if your XYL asked you to pick up a pizza on the way home (on a 2M repeater), everyone went berserk! Now you can tell them the name of the store, the price, and say you really like the special and everyone should buy there . . . no one cares. It's still illegal here in Canada, but there ain't anyone inside or outside the government able or willing to enforce Ham radio laws.

Sometimes I rack my brain trying to think how I could get in trouble . . . seems to me I can do anything as long as I stay within the Ham bands. Curse, swear, transmit oddball modes in the wrong sub-band, run 10KW, broadcast my political views, set up a swap-shop on 20M and say 50 KHz instead of $50, intentionally jam others for years, etc. Try to set up a net on top of the SSTV guys for fun. Sound silly? Tune across 20M and see . . .

One way to reduce the impact of those who snoop in your cookie jar, is to delete cookies after each internet session or after visiting each site (better). A junk folder for mail from those NOT in your contact list also helps.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31104
SIDC SOLAR BULLETIN 04 Nov 2013, 1111UT
SIDC FORECAST (valid from 1230UT, 04 Nov 2013 until 06 Nov 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 04 Nov 2013 10CM FLUX: 146 / AP: 008
PREDICTIONS FOR 05 Nov 2013 10CM FLUX: 148 / AP: 002
PREDICTIONS FOR 06 Nov 2013 10CM FLUX: 150 / AP: 004
COMMENT: Seven active regions were reported by NOAA today. Two of them (NOAA ARs
1884 and 1890) have beta-gamma configuration of the photospheric magnetic
field. NOAA AR 1884 (Catania number 29) somewhat decayed, although it still
may produce M-class flares. NOAA AR 1890 (no Catania number yet) has now
fully appeared from behind the east limb and may produce M-class flares as
well. Strong magnetic flux emergence in the NOAA AR 1887 (Catania number
30) will probably lead to increased flaring activity in this region,
although it still keeps beta configuration of the photospheric magnetic
field. M-class flares in this region are possible but still unlikely. Two
C-class flares were detected on the Sun in the past 24 hours, the strongest
one being the C9.9 flare peaking at 16:28 UT on November 3 in the NOAA AR
1890. The Earth is currently inside a slow (around 370 km/s) solar wind
flow with slightly elevated (around 6 nT) interplanetary magnetic field
magnitude. The geomagnetic conditions are quiet and are expected to remain
so.

From: Frank T Brady
Topic: 21818 Message: 21820

It just seems strange that 5J0R doesn't know about the K9W band plan -
it's idiotic for two dx expeditions to be stepping on one another.

Another case in point -
5J0R is on 30m this morning (very seldom giving his callsign) and he was
being spotted as k9w - not a single 5J0R spot. All of those guys
thought they had worked K9W.
Just sayin...

21821. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-11-05 15:30:01 UTC
From: Paul Dunphy
Topic: 19749 Message: 21821

```
:Issued: 2013 Nov 05 1252 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31105
SIDC SOLAR BULLETIN 05 Nov 2013, 1211UT
SIDC FORECAST (valid from 1230UT, 05 Nov 2013 until 07 Nov 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 05 Nov 2013 10CM FLUX: 148 / AP: 011
PREDICTIONS FOR 06 Nov 2013 10CM FLUX: 153 / AP: 009
PREDICTIONS FOR 07 Nov 2013 10CM FLUX: 155 / AP: 005
COMMENT: NOAA AR 1890 (no Catania number yet) produced today an M2.5 flare peaking
at 08:18 UT, and a C8.0 flare peaking at 11:58 UT. We expect the flaring
activity at the M-level, with a small chance for an X-class flare. A CME
was associated with the M2.5 flare, first appearing in the LASCO C2 field
of view at 08:24 UT. The data currently available do not allow yet to
measure the full angular width of the CME. However, STEREO and LASCO data
clearly show that the bulk of the material is ejected southward of the
ecliptic plane, so we do not expect the arrival of the corresponding
interplanetary disturbance at the Earth. The proton flux at energies above
10 MeV measured by GOES exhibited a small increase around 08:40 UT today,
probably associated with the M2.5 flare and corresponding CME. The proton
flux remains below the threshold, but we issue a warning condition for a
proton event. The Earth is currently inside a slow (around 360 km/s) solar
wind flow with average (around 4 nT) interplanetary magnetic field
magnitude. The geomagnetic conditions are quiet and are expected to remain
so.
TODAY'S ESTIMATED ISN : 089, BASED ON 04 STATIONS.

21822. RE: [DX-IS] 5J0R - K9W QRG conflict

Yahoo group: DX-IS (2013)
Date: 2013-11-05 15:38:58 UTC
From: KQ8M
Topic: 21818 Message: 21822

I agree there should have been some sort of cooperation.

The thing about the spots. Only takes one idiot to spot the wrong call and all of the lemmings follow suite. Even after signing his
call people were spotting as K9W.

Subject: Re: [DX-IS] 5J0R - K9W QRG conflict

It just seems strange that 5J0R doesn't know about the K9W band plan - it's idiotic for two dx expeditions to be stepping on one
another.

Another case in point -
5J0R is on 30m this morning (very seldom giving his callsign) and he was being spotted as k9w - not a single 5J0R spot. All of
those guys thought they had worked K9W.
Just sayin...

w0ecs is right. 5J0R guys are creating a great deal of confusion by not signing their call out. I heard them several times over past few days running for more than 15 minutes without signing their call once. QSL managers for K9W and 5J0R will for sure have fun sorting this out.

Hi Nick,

Simple to sort it out, "NIL" or Not in Log". How can it ever be
called a valid contact if the station does not even know who he worked or thinks
he worked. The QSL managers duty ends with the log check and there is no match,
return the card.

Now that, that is resolved, who gets the donation?

At least we have on-line logs these days. Sure beats waiting months
then getting a "NIL" !!

Most QSL Mgr keep logs, and answer cards forever. I'm still getting cards for 1993 and earlier expeditions. Remarkable even some via the bureau (I guess that means they don't need it much!)

Sometimes a tornado takes your roof and a few thousand QSLs or a creek becomes a river and QSLs float, fade and stick together. Add to that kids, dogs, and fires and some of us try to replace cards we once had. Insects think they are tasty and rodents use them for nests. We are most appreciative to the guys who preserve the logs and QSLs. Add in the forgetfulness of old age and the reduced income of retirement, and the bureau looks pretty good. Not all cards mailed to the DXCC Desk get returned either.

Remember those plastic boxes like they use in stores with the two piece flip tops are great in floods, but they hold water when the roof leaks or sprinklers go off. I speak from experience! All my QSLs (and antennae) from a dozen countries disappeared from my attic in a twister that came as part of hurricane Ike some years ago, luckily the logs were all in zip lock bags in metal cabinets and survived, so if you still need a VP1UR or VP2LGR card I still have some, and once or twice a year I get requests.

Just another perspective as why we need to preserve logs and old QSLs.

From: KQ8M
Topic: 21826 Message: 21830

If you mean by most a number around 60% then you may be correct. I was off the air between 1994 and 2007. During that time the 9band
work them all DXCC started. I had to go back in my old logs and attempt to locate QSL's and QSL managers. Throwing out the deceased
and unlocatable stations/managers, I found a good number of QSO's I had to mark as not worked as the logs were not available any
longer. Many of the BIG managers close logs after a period of time and make no attempt to find a good home for them.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31106
SIDC SOLAR BULLETIN 06 Nov 2013, 1211UT
SIDC FORECAST (valid from 1230UT, 06 Nov 2013 until 08 Nov 2013)
SOLAR FLARES : Major flares expected (X-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 06 Nov 2013 10CM FLUX: 151 / AP: 009
PREDICTIONS FOR 07 Nov 2013 10CM FLUX: 154 / AP: 005
PREDICTIONS FOR 08 Nov 2013 10CM FLUX: 157 / AP: 006
COMMENT: Since the X3.3 flare yesterday, the NOAA AR 1890 (no Catania number yet)
produced only C-class flares, the strongest one being the C8.6 flare
peaking at 08:51 UT today. Nevertheless, this active region still keeps the
beta-gamma-delta configuration of its photospheric magnetic field. We
expect further strong flaring from this region, primarily on the M-level.
Another X-class flare is also probable. Given that the NOAA AR 1890 is
approaching the solar central meridian, we maintain the warning condition
for a proton event. The Earth is currently inside a slow (around 350 km/s)
solar wind flow with average (around 5 nT) interplanetary magnetic field
magnitude. The geomagnetic conditions are quiet and are expected to remain
so.

It appears to me that the simple(?) solution for logs of either old Dx-Peditions or SK ops would be to upload them to LoTW. OK, so they would have to be computerized first, but that sounds like a wonderful pastime when the WX and DX are not cooperating. A club project?

Just my 2 cents...

73,

Phil/VE1BVD

SIDC FORECAST (valid from 1230UT, 07 Nov 2013 until 09 Nov 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Proton event expected (10 pfu at >10 MeV)
PREDICTIONS FOR 07 Nov 2013 10CM FLUX: 156 / AP: 016
PREDICTIONS FOR 08 Nov 2013 10CM FLUX: 157 / AP: 010
PREDICTIONS FOR 09 Nov 2013 10CM FLUX: 157 / AP: 006
COMMENT: Numerous C-class flares and three M-class flares were reported since
yesterday's bulletin, the strongest of them being the M3.8 flare peaking at
13:46 UT yesterday in the Catania sunspot group 35 (NOAA AR 1890). The
trailing part of this region (containing the delta sunspot) somewhat
decayed, although this active region still keeps the beta-gamma-delta
configuration of its photospheric magnetic field. We expect continuing
flaring activity on the M-level, with an X-class flare possible, but not
very likely. Due to the current high level of the proton flux and the
position of the Catania sunspot group 35 approaching the solar central
meridian, a proton event is probable. The solar wind speed is currently
low (around 360 km/s). However, the interplanetary magnetic field (IMF)
magnitude is elevated since the early hours of today (peak value 14 nT).
The currently available data does not yet allow us to conclude if this
increase is due to an interaction region with a faster flow or to an ICME.
The north-south IMF component reached -9 nT and stayed negative during
several hours, resulting in one interval of active geomagnetic conditions
(K = 4) as reported by Dourbes, IZMIRAN and NOAA. We expect unsettled to
active geomagnetic conditions in the coming hours.

DX Bulletin 45 ARLD045
>From ARRL Headquarters
Newington CT November 7, 2013
To all radio amateurs

SB DX ARL ARLD045
ARLD045 DX news

This week's bulletin was made possible with information provided by KX9X, NC1L, WP3R, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TANZANIA, 5H. Carl, SM6CPY is QRV as 5H3CJ until November 12. Activity is on the HF bands, with a preference for the higher bands, using only CW. QSL to home call.

SAMOA, 5W. Hiro, JF1OCQ is QRV as 5W7X from Apia, IOTA OC-097, until November 14. Activity is on the HF bands and 6 meters using CW and SSB. QSL to home call.

NEPAL, 9N. Toshi, JA8BMK is QRV as 9N7BM from Kathmandu and Nagalkot until November 28. Activity is holiday style on the HF bands. QSL to home call.

JUAN FERNANDEZ ISLANDS, CE0. A large group of operators are QRV as XR0ZR until November 20. Activity is on 160 to 6 meters, including 60 meters, using CW, SSB, RTTY and EME. QSL via IV3DSH.

REUNION ISLAND, FR. Stef, F5UOW is QRV as TO2R until November 17. Activity is on 40 to 10 meters using mostly CW. QSL to home call.

ST. VINCENT, J8. Gerd, DL7VOG is QRV as J87GU from Union Island, IOTA NA-025, until November 27. Activity is on 160 to 6 meters using CW and RTTY and possibly SSB. He will be active in the Worked All Europe RTTY contest and the upcoming CQ World Wide DX CW contest. QSL to home call.

HAWAII, KH6. Look for operators YT1AD, WD5COV and RZ3FW to be QRV as KH6/N9YU, KH6/WD5COV and KH6/N7AFW, respectively, from November 13 to 15. Activity will be on the HF bands. QSL to home calls.

AMERICAN SAMOA, KH8. A group of operators will be QRV using special event call sign W8A from the Village of Vaitogi on the coast of Tutuila Island, IOTA OC-045, from November 12 to 22. Activity will be on 160 to 10 meters using mainly CW with some SSB and RTTY. QSL via ZL3CW.

WAKE ISLAND, KH9. Station K9W is QRV until November 15. Activity is on 160 to 6 meters using CW, SSB and RTTY. QSL via OQRS.

PUERTO RICO, KP4. Special event station KP4AO will be QRV from the control room of the Arecibo Observatory on November 10 to commemorate the 50th anniversary of Radio Astronomy Science. Activity will be on 20 meters using SSB. QSL via operator's instructions.

LUXEMBOURG, LX. Helmut, DF7ZS will be QRV as LX7I in the Worked All Europe RTTY contest. QSL via operator's instructions.

NAMIBIA, V5. Klaus, DJ4SO is QRV as V5/DJ4SO until early December. Activity is on all HF bands, with the possible exception of 160 and 80 meters, using CW, RTTY, PSK and some SSB. He may also be active in the Worked All Europe RTTY contest and the upcoming CQ World Wide DX CW contest. QSL to home call.

VIET NAM, XV. Special event station XV2V40J is QRV until November 24 in commemoration of the establishment of diplomatic relations between Japan and Vietnam 40 years ago. Activity is on all bands and modes. QSL via JF1HJZ.

INDONESIA, YB. A group of operators will be QRV as YB8V from Banda Besar Island, IOTA OC-157, from November 10 to 15. Activity will be on 40 to 10 meters using CW and SSB. QSL via YB9AU.

TRISTAN da CUNHA and GOUGH ISLAND, ZD9. Bani, ZS1BM is QRV as ZD9G from Gough Island, IOTA AF-030, as a member of the 59th Winter Team and is here until August 2014. QSL via ZS1HF.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC Credit: Yemen, 7O2A, 2013 operation; Afghanistan, T6SM, Operations beginning August 14, 2012 to current.

THIS WEEKEND ON THE RADIO. The Worked All Europe RTTY DX Contest, 10-10 International Fall Digital Contest, Japan International DX Phone Contest, NCCC RTTY Sprint, QRP CW Fox Hunt, NCCC Sprint, SKCC Weekend CW Sprintathon, OK/OM DX CW Contest, Kentucky QSO Party, CQ-WE Contest and the EANET Sprint are all on tap for this upcoming weekend. The QRP CW Fox Hunt, RSGB 80-Meter Club SSB Sprint, NAQCC-EU Monthly CW Sprint and CWops Mini-CWT CW Test are scheduled for November 13. Please see November QST, page 87, and the ARRL and WA7BNM contest web sites for details.

I have been purposefully waiting the hear the DX sign recently as these current DXpeditions are close and signals are coming in in very similar intensity.
T33A and K9W in particular. Can't believe how strong these have both been on the high bands.
TX5RV didn't make it and 5J0R and XR0YY's paths are just too far south still.

Looking forward to XR0ZR, hoping to get them as high as on 15m but will be a stretch. (20m will be the band).

Good luck to all,

73, Lance - VK6DU

Paul,

Thanks for doing this. It's an automatic "one stop" source.
It helps answer the question: why is/was the band so dead.

I have received confirmation from one of the K9W operators that they did QSY from their announced QRG to 28007 to avoid the pile-up confusion for a while yesterday. When I was listening on 28007 I did not hear the usual frequent K9W identification, so I may have in fact missed them. Check ClubLog at http://www.wake2013.org/pages/log.html

I was an operator at 5J0R. I came back early. On one occasion that I recall on 20 mts, a was working a 5 to 10 up pile up. Then I heard more stations on a certain frecuency range and called some of their calls, hearing no response I quickly understood this was not "my" pile up, all I did was reverse the pileup and instead of saying 5 to 10 up I said 5 to 10 down.. easy solution and nobody complained. Its not like we purposely looked to stomp all over the Wake DXP.. that is ridiculous. Some people really need to get a life!

This morning it was T33A and K9W on 40 CW. T33A was on 7007 and K9W
was on 7013. The pileup from T33A was engulfing K9W. All the people
trying to hear K9W kept sending the usual "UP LID," evidently not
realizing that it was T33A's pileup they were hearing.

Oh well ... neither in log yet.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31108
SIDC SOLAR BULLETIN 08 Nov 2013, 1211UT
SIDC FORECAST (valid from 1230UT, 08 Nov 2013 until 10 Nov 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 08 Nov 2013 10CM FLUX: 153 / AP: 009
PREDICTIONS FOR 09 Nov 2013 10CM FLUX: 154 / AP: 004
PREDICTIONS FOR 10 Nov 2013 10CM FLUX: 154 / AP: 009
COMMENT: Catania sunspot group 35 (NOAA AR 1890) keeps the beta-gamma-delta
configuration of its photospheric magnetic field, although the delta-spot
got somewhat weaker. Catania sunspot group 32 (NOAA AR 1891) is reported to
have the beta-delta configuration of its photospheric magnetic field,
although the delta-spot seems to lose its penumbra during the M2.3 flare
peaking at 09:28 UT in this active region today. We expect flaring activity
on the M-level from these two active regions. An X-class flare is possible
in the Catania sunspot group 35 (NOAA AR 1890), but it is not very likely.
Due to the position of this group close to the solar central meridian, we
issue a warning condition for a proton event. The Earth is currently
inside a slow (around 390 km/s) solar wind flow with average (around 5 nT)
interplanetary magnetic field magnitude. The geomagnetic conditions are
quiet and are expected to remain so in the coming hours.
TODAY'S ESTIMATED ISN : 105, BASED ON 11 STATIONS.

21845. ARLP045 Propagation de K7RA

Yahoo group: DX-IS (2013)
Date: 2013-11-08 15:37:55 UTC
From: jjreisert@...
Topic: 6969 Message: 21845

SB PROP @ ARL $ARLP045
ARLP045 Propagation de K7RA

ZCZC AP45
QST de W1AW
Propagation Forecast Bulletin 45 ARLP045
>From Tad Cook, K7RA
Seattle, WA November 8, 2013
To all radio amateurs

SB PROP ARL ARLP045
ARLP045 Propagation de K7RA

Solar activity eased off over the past week, with average daily sunspot numbers declining nearly 30 points from 161.6 to 131.7, and average daily solar flux down over 12 points from 158.3 to 146. Geomagnetic indicators were quiet. Still, activity remains strong.

The last three days of the reporting week (November 4-6) had increasingly stronger sunspot numbers, all higher than the week's average. The same is true for solar flux values, each of the past few days with numbers higher than the average for the week.

Recently we noted a near-term peak in solar flux at 155 predicted for November 22-25, but now that peak has moved, and values predicted for those dates are 135-140.

A new short term peak is predicted for the next few days, at 150 on November 8, 155 on November 9, 160 on November 10, 155 on November 11-12, 150 on November 13, 140 on November 14-15, 135 on November 16, 130 on November 17-20, 135 on November 21-22, 140 on November 23-28, 145 on November 29 through December 1, 140 on December 2, and 135 on December 3-6.

Predicted planetary A index is 8 on November 8, 5 on November 9-10, 10 on November 11, 12 on November 12, 8 on November 13, 5 on November 14 through December 2, 8 on December 3-4, 5 on December 5-6 and then 8, 10, 8 and 8 on December 7-10.

F.K. Janda, OK1HH believes we should see mostly quiet geomagnetic conditions on November 8, quiet to unsettled November 9, mostly quiet November 10, active to disturbed November 11, quiet to active November 12, quiet to unsettled November 13, mostly quiet November 14, quiet November 15-18, mostly quiet November 19, quiet November 20-25, mostly quiet November 26, quiet to unsettled November 27, quiet to active November 28-29, quiet November 30, active to disturbed December 1, quiet to unsettled December 2, and quiet

December 3-4.

A week ago NASA put out a revised solar cycle prediction. You can read it at http://solarscience.msfc.nasa.gov/predict.shtml. The only difference was that the smoothed sunspot number maximum predicted for this cycle is 65 and in Summer 2013. The change is just one point - last month they thought it would be 66 in Fall 2013.

Why the prediction for last Summer? Because it is a smoothed sunspot number, and that is a value taken from an average over one year. We won't know the actual number until six months after the fact.

We heard from Bob Foster again this week. Turns out he is N9BGC of Waverly, Iowa, and on November 1 he wrote, "Last weekend was the hottest propagation I have heard on 10 meters and 15 meters in my 43 years as a ham. Signals were 5-9 from Kazakhstan to Japan. Hungary was 59 in the evening on 40 meters. Mine is a very modest station: A semi-vintage Kenwood 520SE running barefoot into a ground mounted Gap vertical antenna."

Jon Jones, N0JK of Lawrence, Kansas (EM28) reports that on October 31 he heard the VY0SNB beacon on 6 meters on 50.048 MHz at 1620 UTC. This beacon is located in Nunavut, between the northern tip of Quebec and Greenland. Jon says it was probably double-hop E-skip.

Jon also reported (in a message titled "10 Meters Hot") that back on October 22 he worked G1HPD on 10 meter SSB at 1810 UTC. He wrote, "We have recently moved - so I don't have any HF antennas up yet. I noted spots that 10 was hot to Europe, so I put a stock CB mag mount whip on the Weber 'Genesis' BBQ grill out on the patio. Used a MFJ tuner and 10 watts. G1HPD was hitting 20 over S-9 and gave me a '5x5' report. For good measure I also worked KG4WV Gitmo (Guantanamo Bay, Cuba) with 59 reports."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for October 31 through November 6 were 128, 95, 123, 143, 151, 134, and 148, with a mean of 131.7. 10.7 cm flux was 142.6, 145, 141.6, 143.5, 147.3, 148.5, and 153.5, with a mean of 146. Estimated planetary A indices were 6, 5, 3, 6, 5, 5, and 4, with a mean of 4.9. Estimated mid-latitude A indices were 6, 4, 3, 7, 4, 4, and 3, with a mean of 4.4.

Direttore Responsabile I2VGW

3B8 - Serge, UU5WW (www.3b8-uu5ww.com http://www.3b8-uu5ww.com) will be active holiday style as
3B8/UU5WW from Mauritius Island (AF-049) on 17-30 November. He will operate mainly CW on 80-10 metres running low power into simple antennas, and will take part in the CQ WW DX CW Contest. All of the QSOs will be confirmed via the bureau and LoTW. Direct cards should be sent to K2PF (OQRS on Club Log).
4S - Radio Society of Sri Lanka's special event station 4S0CGM will be active on 10-17 November for the 23rd Commonwealth Heads of Government Meeting that will be held in Colombo. QSL via bureau or direct to RSSL, P.O. Box 907, Colombo, Sri Lanka.
9H - Olaf DL4HG (9H3OG) and Holger DL5XAT (9H3TX) will be active from Malta (EU-023) on 17-25 November. They will participate in the CQ WW DX CW Contest as 9H3TX (M/2), and will concentrate on 30, 17 and 12 metres CW and RTTY outside the contest. QSL via home calls, direct and bureau.
9M6 - Once again Saty, JE1JKL will participate in the CQ WW DX CW Contest as 9M6NA (SOAB HP) from Labuan Island (OC-133), East Malaysia. QSL via home call, direct or bureau, and LoTW. Email requests for bureau cards can be sent to 9m6na[@]jsfc.org http://jsfc.org. [TNX NG3K]
DL - DK7LV, DL2VFR, DL2YBG, DL4BBH and DL7UXG will operate SSB and CW as DM50IOTA from Usedom Island (EU-129) on 15-18 November. QSL via bureau, or direct to DL2VFR. [TNX rsgbiota.org http://rsgbiota.org]
F - On 27 November 1923 Leon Deloy, 8AB from Nice (France) made the first two-way transatlantic QSO with Fred Schnell (1MO) in the USA. To celebrate the 90th anniversary of that event, F5KBM (Radio Club de Wimereux) will be active as TM8AB on 22-24 November. [TNX F8REF]
FG - Members of the FG4KI Radio Club (namely FG1PP, FG4NW, FG8NY and FG8OJ) will be active as TO0MT from Guadeloupe (NA-102) from 18 November to 1 December for the arrival of the solo transatlantic yachtrace "Mini Transat". QSL via LoTW and eQSL. [TNX NG3K]
FJ - Georg, DK7LX be active as FJ/DK7LX from St. Barthelemy (NA-146) from 16 November to 6 December. He will operate mainly CW and RTTY on 40-10 metres. QSL via home call. [TNX DX World]

FM - Dimitry, UT5UGR will be active as FM/KL7WA from Martinique
(NA-107) on 18-26 November. He will participate in the CQ WW DX CW
Contest as TO7A. QSL via UT5UGR. [TNX DX World]
FS - Once again John, K9EL will be active as FS/K9EL from St. Martin
(NA-105) on 19-28 November. He will be QRV on 160-10 metres and
will participate in the CQ WW CW Contest. QSL via home call. Daily
uploads to Club Log and LoTW are planned. [TNX OPDX Bulletin]
J8 - The new dates for the J88HL operation from St. Vincent (NA-109)
[425DXN 1163] are from 15 November to 1 December. A polish team
will have at least three stations active 24/7 on 160-10 metres CW,
SSB and RTTY, with a serious effort on the low bands. They will
also have equipment for 6 metres. QSL route to be announced;
logsearch and OQRS on Club Log. Bookmark http://j88hl.dxing.pl/ http://j88hl.dxing.pl/
for updates. [TNX SP6EQZ]
JA - Take, JI3DST will be active as JI3DST/1 from Shikine Island
(AS-008) on 21-25 November (40-10 metres mainly SSB and CW, with
some activity during the CQ WW DX CW Contest) and as JI3DST/6 from
Kuchino-Island (AS-049) from 28 December to 5 January (160-10
metres mainly SSB and CW). QSL via home call, bureau preferred.
[TNX JI3DST]
JD1_oga- Toshi, JP1IOF is active as JD1YBT from Chichijima (AS-031),
Ogasawara until 15 November. QSL via JP1IOF (direct or bureau) and
LoTW. Logsearch and OQRS on Club Log.
J7 - George K5KG (J75KG), Charlie K1XX (J79XX), Jim WI9WI (J79WI) and
Gus VO1MP (J79MP) will be active from Dominica (NA-101) on 16-25
November. They will participate in the CQ WW DX CW Contest as
J73A; outside the contest "some time will be devoted to SSB and
RTTY". QSL J73A via WI9WI (direct only), others via home call
(direct only). All logs will be uploaded to LoTW. [TNX NG3K]
OX - Henning, OZ1BII (www.oz1bii.dk http://www.oz1bii.dk) will be active again as XP2I from
Greenland (NA-018) on 21-24 November. He will operate CW only and
will participate in the CQWW DX CW Contest. QSL via OZ1BII, direct
or bureau, and LoTW. Logsearch on Club Log. [TNX NG3K]
P4 - Valery, R5GA will be active as P4/R5GA from Aruba (SA-036) on
16-26 November. He will operate mainly CW on 160-10 meters, with a
focus on 30, 17 and 12 metres. He will participate in the CQ WW DX
CW Contest as P40F. QSL via UA3DX. [TNX OPDX Bulletin]
PJ4 - W4PA, WF7T and N0AX will be active from Bonaire (SA-006) on 18-27
November. They will participate in the CW WW DX CW Contest as PJ4Q
(QSL via W4PA), while outside the contest they will concentrate on
160, 30, 17 and 12 metres. [TNX The Daily DX]
PY - Fabio, PP5BZ will be active as ZW5W from Santana de Fora Island
(SA-088) on 6-9 December. He will operate CW and SSB on 80-10
metres. QSL via PP5BZ. [TNX PT7WA]
PY0F - Andre, PP6ZZ/PY7CW will be back to Fernando de Noronha (SA-003)
on 11-26 November. He will be QRV as PY0FF, including an entry in
the CQ WW CW Contest. QSL via W9VA. [TNX The Daily DX]
S7 - Cesare, I0WDX will be active as S79WDX from La Digue (AF-024),
Seychelles on 12-23 November. He plans to be QRV on 160-6 metres.
QSL via I0WDX (direct only) and LoTW.

TA - TA2TX/0, TA0/LZ1NK, TA0/LZ1CNN, TA0/LZ2UW, TA0/LZ3YY, TA0/LZ3FN,
TA0/LZ3ND, and TA0/LZ5VK will operate SSB and CW from Bozcaada
(AS-099) on 19-25 November. They will participate in the CQ WW DX
CW Contest as TC0A (QSL via TA2TX or LZ1NK). They have a website
at http://tc3a.alle.bg/ http://tc3a.alle.bg/ [TNX NG3K]
UA - Look for R9OOO/0, RA1ZZ/0, RA3AV/0 and UA9KW/0 to be active from
the village of Batagai-Alyta, Yakutia in the rarest Russian
District YA-38 from 26 November to 3 December. They will be QRV on
80-10 metres CW and SSB. All of the QSOs will be confirmed
automatically via the bureau. The website for the Russian Districts
Award can be found at http://rdaward.org http://rdaward.org. [TNX DX World]
V4 - Andy, N2NT will be active as V47NT from St. Kitts (NA-104) on
17-26 November, and as V47T during the CQ WW DX CW Contest. QSL
for both callsigns via W2RQ. [TNX NG3K]
VP2V - Look for VP2V/N3DXX to be active from Tortola, British Virgin
Islands (NA-023) on 19-29 November, including an entry in the CQ
WW DX CW Contest. QSL via NR6M. [TNX NG3K]
VU - Special callsign AU2GIR will be used on 9-10 November by a team
operating from the Gir Forest National Park and Wildlife Sanctuary
in Gujarat, India. Look for activity on 28550, 21280, 21310,
14150, 14220, 7035, 7070 and 7150 kHz. See qrz.com http://qrz.com for QSL
information.
XE - A team of eight (namely Ismael XE1AY, Gustavo XE1KKK, David
XE1REW, Enrique XE2AA, Juan Manuel XE2AI, Jorge XE2AMS, Benjamin
XE2AU and Juan XE2AY) will be active as XF1T from Isla Cocinas
(NA-189) on 14-17 March 2014. QSL via IT9EJW; logsearch and OQRS
on Club Log. [TNX IT9EJW]
XV - Mats, SM6LRR (RM2D) will be active as XV2LRR from Vietnam from 29
November to 14 December. He will operate holiday style on 40-10
metres CW and SSB. Logsearch on Club Log, QSL via LoTW only ("with
some possible paper cards to be printed later", he says,
information will be published on qrz.com http://qrz.com "if and when available").
XZ - Zorro, JH1AJT and his group (DJ9ZB, E20NKB, E21EIC, JA1DXA,
JA1TRC, K3LP, N6PSE, PP5XX, PY2NDX and VR2KF) will be active as
XZ1J from Nay Pyi Taw, Myanmar on 15-26 November. They plan to set
up three to four stations, and operate CW, SSB and RTTY on 160-10
metres. This will be the third and final run for 2013 from XZ
land. Please use the OQRS provided by Club Log for QSLling.

Direttore Responsabile I2VGW

DXCC DEADLINE ---> The deadline for the 2013 DXCC Annual and Honor Roll
listings is approaching. In order to appear in these listings, your
submission must be postmarked by 31 December 2013. At present, there are
340 current Entities on the ARRL DXCC List; Honor Roll entry level is 331
current Entities. The listings will be published in the DXCC Yearbook,

available on line as part of the Digital version of "QST" for the month of August. Hard copies of the Yearbook can be purchased from DXCC for USD 8.00 (USA) and USD 12.00 (non-USA). Further information can be found on the ARRL's DXCC Blog page (www.arrl.org/dxcc-blog http://www.arrl.org/dxcc-blog)

DXCC NEWS ---> T6SM (Afghanistan, operations beginning 14 August 2012 to current) has been approved for DXCC credit. [TNX NC1L]

QSL GALLERY ---> The large collection of QSL cards on Les Nouvelles DX's web site has been updated. Sixteen different galleries include 11,547 cards for the ten Most Wanted DXCC Entities (2003-12), the 61 deleted DXCC Entities, obsolete prefixes, stations from Maghreb from 1945 to 1962, Allied Forces stations in Germany (1945-69), special stations commemorating ITU and IARU, Antarctic bases & TAAF (Terres Australes and Antarctiques Francaises), the various French DXCC island Entities in the Pacific Ocean, the Indian Ocean and the Americas (from 1945 to 1970), pre-1945 countries, French Departments and CONUS, plus a gallery for cards not accepted by DXCC. Your participation is encouraged - please visit www.LesNouvellesdx.fr http://www.LesNouvellesdx.fr
[TNX F6AJA]

QSL ZC4LI ---> Phil, G3SWH has uploaded to both LoTW and Club Log all the logs that he has been able to find for 5B4/G0LII, 5B4AHA, C4C, G0LII, G7G, G8G, M0ADU, MX0ADU and ZD8LII. Logsearches for these calls are available on www.g3swh.org.uk http://www.g3swh.org.uk. The late Steve Hodgson, ZC4LI was not an RSGB member, and
paper QSLs are only available direct (by traditional mail or via the OQRS facility on Phil's website). "I am still working on the log for ZC4LI", Phil says, "as it consists of several hundred individual files in a variety of different formats and it is taking a lot of time to convert it to a single format. It should be available in a few weeks time". [TNX G3SWH]

VK5CE IOTA ACTIVITY FOR 2014 ---> "Thoughts are now turning to 2014 activity", Craig VK5CE says. "Basically I should be able to do in 2014 what I have done in 2013 - namely a rare, remote and isolated IOTA by myself (similar to this year's OC-255) and a less rare but still wanted IOTA packaged into a DXpedition/family vacation (similar to this year's OC-261). It all depends on individual and club sponsorship to offset the costs. I'm letting people be involved in the decision making process by inviting everyone to visit http://vkiota.blogspot.com.au/ http://vkiota.blogspot.com.au/ "

YW5RYL ---> The 7-10 November activity from Los Roques (SA-035) [425DXN 1173] has been postponed until further notice owing to circumstances beyond the operators' control.

+ SILENT KEY + Andrei Stchislenok, NP3D/EW1AR (ex UC2AFZ, RC2AR, AA3BG and NC2N) passed away unexpectedly on 4 November at 55 years of age. First licensed in 1980, he operated from several countries, and took successfully part in many major contests.

21848. spotter

Yahoo group: DX-IS (2013)
Date: 2013-11-09 14:22:51 UTC
From: dale cole
Topic: 21848 Message: 21848

Someone once said they had a certain "heard-in" spotter filtered out. I did not write the procedure down. Anybody help?
Dale K8TS

21849. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-11-09 15:30:00 UTC
From: Paul Dunphy
Topic: 19749 Message: 21849

```
:Issued: 2013 Nov 09 1411 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31109
SIDC SOLAR BULLETIN 09 Nov 2013, 1411UT
SIDC FORECAST (valid from 1230UT, 09 Nov 2013 until 11 Nov 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 09 Nov 2013 10CM FLUX: 144 / AP: 022
PREDICTIONS FOR 10 Nov 2013 10CM FLUX: 144 / AP: 005
PREDICTIONS FOR 11 Nov 2013 10CM FLUX: 146 / AP: 004
COMMENT: Only three weak C-class flares were reported since the previous bulletin.
However, Catania sunspot group 35 (NOAA AR 1890) keeps the beta-gamma-delta
configuration of its photospheric magnetic field. We therefore expect the
flaring activity to continue on the M-level, with an X-class flare being
possible but unlikely. Due to the position of the Catania sunspot group 35
(NOAA AR 1890) right to the west of the solar central meridian, a warning
condition for a proton event is maintained. Currently the proton flux at
energies above 10 MeV is slowly growing, but this growth is most probably
due to earlier eastern hemisphere events and is not expected to lead to a
proton event. Since late November 8, the Earth is inside a region of
elevated interplanetary magnetic field (IMF) magnitude (up to 17 nT),
probably representing an ICME. The corresponding solar CME is not clear at
the moment. The solar wind speed remained low (around 400-450 km/s), so
only active (K = 4, Dourbes, IZMIRAN, NOAA) to minor storm (K = 5, IZMIRAN)
geomagnetic conditions were reported. Currently the solar wind speed
reaches 530 km/s, and the IMF magnitude is still increased (around 10 nT),
so active geomagnetic conditions are still possible.
TODAY'S ESTIMATED ISN : 077, BASED ON 15 STATIONS.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31110
SIDC SOLAR BULLETIN 10 Nov 2013, 1311UT
SIDC FORECAST (valid from 1230UT, 10 Nov 2013 until 12 Nov 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 10 Nov 2013 10CM FLUX: 150 / AP: 013
PREDICTIONS FOR 11 Nov 2013 10CM FLUX: 152 / AP: 003
PREDICTIONS FOR 12 Nov 2013 10CM FLUX: 156 / AP: 005
COMMENT: Catania sunspot group 35 (NOAA AR 1890) produced an X1.1 flare peaking at
05:14 UT today. The flare was accompanied by coronal dimmings and a post-
eruption arcade observed by SDO/AIA, indicating the eruption of a CME.
Regarding space coronagraphs, only the data from COR2 onboard STEREO A is
available at the moment of writing, and it confirms that the CME did take
place. However, the COR2 data does not allow us to evaluate the CME
propagation direction with a sufficient accuracy. It is clear that the bulk
of the CME material propagates southward of the ecliptic plane, but the
position of the source active region close to the solar central meridian
indicates that the CME might arrive at the Earth. We will update the
information on the CME direction when the SOHO/LASCO data becomes
available. Catania sunspot group 35 (NOAA AR 1890) keeps the beta-gamma-
delta configuration of its photospheric magnetic field, although the delta-
spot continues to weaken. We expect flaring activity at the M-level in this
group, with an X-class flare possible but unlikely. The position of the
group in the western solar hemisphere leads us to maintain the warning
condition for a proton event. The proton flux at energies above 10 MeV is
currently above the background (due to earlier eastern hemisphere events),
but it did not react to the above-mentioned CME/flare event and currently
remains below the proton event threshold. The Earth is currently inside a
fast (around 580 km/s) solar wind flow with average (around 5 nT)
interplanetary magnetic field (IMF) magnitude. The fast flow probably
originats from a small equatorial coronal hole that passed the solar
central meridian on November 7. Yesterday's interval of elevated IMF
magnitude (that led to active to minor storm geomagnetic conditions)
probably represents a small-scale transient at the interplanetary sector
boundary. Due to average values of the IMF magnitude, we expect quiet to
unsettled (K < 4) geomagnetic conditions in the coming hours.
TODAY'S ESTIMATED ISN : 077, BASED ON 15 STATIONS.

November 11, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q & W1AW, NA2U, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, W4DN, K8GI, K8YSE, W8GEX & 60m News, W9ILY, AT International, DK8JB & The DX News Letter, DL1SBF, DL3YM, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, G0DHZ, G3SWH, GU4YOX, I1HYW, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF) and VU2CDP for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 3rd-November, through Sunday, 10th-November there were 237 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9U, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0Y, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FO/a, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T33, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS (Reminder). Serge, UU5WW, will be active as 3B8/UU5WW from Mauritius Island between November 17-30th. Activity will be holiday style, mostly CW on 80-10 meters, and an entry in the CQWW DX CW Contest (November

23-24th). He states that he will use low power and simple antennas. There is a possibility of him trying 160m. QSL via K2PF (OQRS preferred). A Web site is now active at: http://www.3b8-uu5ww.com

3V, TUNISIA. Alex, G0DHZ, will be travelling to Tunis again, and he will be leaving QTH at midnight on November 17th for a 4 weeks stay. However, Alex was informed by Ashraf that the rules have been changed there, and activity during the week is NOT allowed any more, so the hotel activity will only be on the weekends. He will sign 3V8SS and plans to be on 80-10 meters, especially 30/17/12 meters, using CW and SSB. Also, look for activity in the contests. Here are a few of the suggested frequencies:
CW - 3514, 7020, 10110, 14020, 18090, 21020 and 24900 kHz
(he does have a sked on 14052)
SSB - 7117, 14220 and 21220 kHz
Alex also mentions, "Don't know about 160m, if possible I will do what I can..... I've been asked to look at some antenna repairs, and can only hope a weekday for that.... same QRG for 28/29m.......ref times looks like anytime after 10am UTC.....like before, I will take eQSL cards and Bureau ones as well as direct."

4S0, SRI LANKA. Members of Radio Society of Sri Lanka will be active using the special callsign 4S0CGM between now and November 30th. Activity is commemorating the "23rd Commonwealth Heads of Government Meeting" (CHOGM 2013) in Colombo. Activity will be on the HF bands. QSL via Bureau or direct to: RSSL, P.O. Box 907, Colombo, Sri Lanka.

4S, SRI LANKA. Sigi, DL7DF, will lead a team of operators to activate Sri Lanka (AS-003) next year between March 10-23rd. Operators mentioned are Manfred/DK1BT, Csaba/DH7KU, Tom/DJ6TF, Manfred/DK1BT, Georg/DK7LX, Wolf/DL4WK, Sigi/DL7DF, Juergen/DL7UFN, Frank/DL7UFR, Jan/SP3CYY and Leszek/SP3DOI. Pilot station for this DXpedition is Bernd, DF3CB. A callsign has not yet been announced. Activity will be on 160-6 meters using several stations, operating CW and SSB. One station will be exclusively dedicated to RTTY, PSK31 and SSTV. Equipment will consist of 4 transceivers (3 x K2, 1 x FT857D), 2 x 18 m lowband vertical, a delta-loop vertical for 40m, a delta-loop vertical for 30m, 2 spiderbeam for 20/17/15/12/10m, a 5 element yagi for 6m and some beverage antennas. QSL via DL7DF, direct or by the Bureau. They will upload the full logs of the DXpedition to LoTW within 6 months after the DXpedition. For more details and updates, visit: http://www.dl7df.com/4s7/index.php

4X, ISRAEL. Arthur, 4X4DZ, will be active as 4X2M during the CQWW DX CW Contest (November 23-24th) as a Single-Op/Single-Band (20m) entry. QSL via his home callsign.

5J0, SAN ANDRES ISLAND. By the time you read this, members of the "DX Friends" from San Andres Island (NA-033) as 5J0R should be going QRT. As of 0212z on November 10th, they made 70049 QSOs with 20509 Unique callsigns. QSL via EA5RM direct (see Web page). You can use the OQRS (see Web page) for direct and Bureau cards. Visit their Web page at: http://www.dxfriends.com/SanAndres2013

AH0, MARIANA ISLANDS. Operators Jussi-Pekka/OH6RX and Esa/OH7WV will be active as AH0K from Tinian Island, Northern Mariana Islands (OC-086), during the CQWW DX CW Contest (November 23-24th) as a Multi-2 entry. Activity outside the contest will be on the HF bands and possibly on the 6 meter band. QSL via OH6GDX.

B4, CHINA. Operators: Dale/BA4TB, Xu/BA8IK, He/BH4RQU and Tony/BH4SQE will active as B4TB during the CQWW DX CW Contest (November 23-24th) as a Multi-Single/High-Power entry. QSL via BA4TB.

FRENCH AFRICAN ISLAND TOUR (Reminder). Armin, DK9PY, who was active this past week as FH/DK9PY Mayotte Island (AF-027), will now be active from Reunion Island (AF-016) as FR/DK9PY between November 11-22nd. Activity will be mainly CW on 40-10 meters about 12 kHz from the lower edge of each band. There will be a focus on the 30/17/12 meter bands. If his location permits, Armin will also try 160 and 80 meters. QSL via his home callsign.

CN, MOROCCO. Andy, DL3YM, will be active as CN2YM from the QTH of Abdou, CN8VO, in Agadir, between November 18-24th. Activity will be on all HF bands CW only. Main focus of the operation will be an entry in the CQWW CW DX Contest (November 23-24th), probably as a Single-Op/All-Band/Low-Power/Assisted entry. QSL via DL3YM.

CN2, MOROCCO. Members of the "UA2F Contest Club" and Amateur Radio Club ROSTO (RL3A) will be active as CN2AA during the CQWW DX CW Contest (November 26-27th) as a Multi-Single entry. Operators mentioned are Dmitry/RA3ATX (CN2CO), Alex/RN2FA (CN2FA), Sergey/RX3APM (CN2PM), Dmitri/UA2FB (CN2FB), Victor/UA2FM (CN2TX) and Vladimir/UA2FF (CN2FF). QSL via UA2FM and LoTW. Look for activity before and after the contest by the operators using their own personal callsign.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
T6SM - Afghanistan; Operations beginning August 14, 2012, to current.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports: "This is a reminder to all DXCC program participants that the deadline for the 2013 calendar year ends on Tuesday December 31, 2013. In order to appear in the Annual Listing, published in the electronic version of the DXCC Yearbook, you must have your submission postmarked no later than December 31, 2013. Since the DXCC workload usually peaks around this time each year I recommend that applicants not wait until the last minute to get their submissions in. Besides being the heavy period for DXCC, keep in mind that it is also around the holidays so the post office can contribute to any delays in getting mail to DXCC." For more and complete details, see the DXCC Blog at: http://www.arrl.org/dxcc-blog

EF8, CANARY ISLANDS. Mauri, EA8CMX/OHBYS, will be active as EF8S during the CQWW DX CW Contest (November 23-24th) as a Single-Op/Single-Band (160m)/Low-Power entry. PLEASE NOTE: He may change to 80 or 40 meters, depending the conditions, or also Multi-Op operation. QSL via OH2BYS.

EF9, CEUTA AND MELILLA. Juan, EA5BM, will be active as EF9O during the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band/High-Power entry. QSL via EA5BM.

FM/TO7, MARTINIQUE. Dimitry, UT5UGR, will once again be active as FM/KL7WA from Martinique (NA-107) between November 18-26th. Activity is usually on all HF bands except 30/17/12m and the Digital modes. Look for him to be active during the CQWW DX CW Contest 9November 23-24th) signing as TO7A and as a Single-Op/All-Band entry. QSL both callsigns via UT5UGR.

FS, ST. MARTIN. Jules, FG1JD, will be active as FS/FG1JD from St. Martin between November 25-30th. Activity will be on 40/20/15 meters using CW, SSB and the Digital modes. QSL via his home callsign.

GU, GUERNSEY (Update). Bob, GU4YOX, will be active during the CQWW DX CW Contest (November 23-24th) as a Single-Op/Single-Band (20m)/High-Power/ Non-Assisted entry. QSL via GU4YOX, direct or LoTW.

HC, ECUADOR. Mau, IZ1DPS, is currently active as HC2IMP from Ecuador until May 1st, 2014, Activity has been on 17/12/10 meters CW this past week. QSL via IK2DUW.

IOTA NEWS.....
AF-018. Operator Raffaele, IH9YMC, will be active from Pantelleria Island (IIA TP-001, MIA MI-124, WW Loc. JM56XT), African Italy, during the CQWW DX CW Contest (November 23-24th) as a Single-Op/ Single-Band (??) entry. QSL via eQSL.

AS-008. Takeshi "TAKE", JI3DST, will be active as JI3DST/1 from Shikine Island (North Izu Island) between 0600z, November 21st and 0000z, November 25th. Activity will be on 40/30/20/17/15/12/10 meters using CW, SSB, FM, RTTY, PSK31 and JT65A. He will also be an entry in the CQWW DX CW Contest (November 23-24th). QSL via JI3DST (see QRZ.com for details). ADDED NOTE: In case of heavy rain or other conditions, the operation condition may vary.

AS-049. Takeshi "TAKE", JI3DST, will be active as JI3DST/6 from Kuchino Island (Tokara Island) between 0600z, December 28th and 0000z, January 5th (2014). Activity will be on 160/80/(75)/40/30/20/ 17/15/12/10 meters using CW, SSB, FM, RTTY, PSK31 and JT65A. QSL via JI3DST (see QRZ.com for details). ADDED NOTE: In case of heavy rain or other conditions, the operation condition may vary.

EU-129. Operators Matthias/DK7LV, Ric/DL2VFR, Klaus/DL2YBG, Friedrich/ DL4BBH and Klaus/DL7UXG will be active using the special call- sign DM50IOTA from Usedom Island between November 15-18th. QSL via DL2VFR, by the Bureau or direct.

OC-098. Andy, AB7FS/E51AND, and his XYL Kathy, who moved to Rarotonga Island (OC-013) this year, are planning an operation to Pukapuka Island (OC-098) sometime in August of 2014. Look for more details to be forthcoming.

OC-133. Saty, JE1JKL, will be active as 9M6NA from Labuan Island, East Malaysia, during the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band/High-Power entry. QSL via LoTW, or to JE1JKL, by the Bureao or direct. To see his station, visit: http://jsfc.org/je1jkl/9m6na.html

OC-157. Just a reminder that a team of 8 operators will be active as YB8V from the rare Banda Besar Island between November 10-15th. Activity will be on 80-10 meters using CW and SSB. The operators mentioned are Joppy/YB8XM (Team Leader), Marthin/YB8VM, Danny/ YC8VDT, Richard/YD8VSR, Agustinus/YD8VRA, G. Saiya/YD8VRS, Fransicus/YC8VFB and Robert/YC0MVP. Watch the following Blog page for updates at: http://oc157.blogspot.co.uk

SA-035. (Postponed) A group of YL operators that were expected to be active as YW5RYL from Los Roques between November 7-10th, had to postpone their DXpedition until further notice. For complete details, visit: http://yw5ryl.hamradioyv.com

SA-018. Members of the "Radio Club Provincial Llanquihue" (CE7LL) will be active as 3G7PM from Guafo Island between February 23-28th (2014). Operation is valid for Antarctic Challenge and must be counted as Chiloe Province. More details are forthcoming. For updates, see: http://www.ce7ll.cl

SA-088. Fabio, PP5BZ, will be active as ZW5W from Fora Island (DIB SC-10) between December 6-9th. Activity will be on 80-10 meters using CW and SSB. QSL via his home callsign.

JW, SVALBARD. Jon, LA8HGA, will once again be active as JW8HGA from Spitsbergen Island (EU-026, WLOTA 0125) between November 15-18th. Activity will be on 160-10 meters with an emphasis on the higher bands and mostly CW, but possibly some SSB. QSL via his home callsigns, direct or by the Bureau. Logs will be uploaded to LoTW.

KH6/KH7, HAWAII. Fred, NA2U, will be operating from Volcano on the Big Island between November 19-24th. Activity prior to CQWW DX CW Contest (November 23-24th), Fred will sign as KH6/NA2U and operate primarily on CW, with possibly some time devoted to SSB and RTTY. In the CQWW DX CW Contest, he will operate as KH7M. QSLs for KH6/NA2U are via LoTW or direct with SASE. QSLs for KH7M requested from U.S.A./Canada are direct to KH6ZM. QSLs for KH7M from all other countries to I0MWI direct. NO BUREAU CARDS.

KH8, AMERICAN SAMOA (Reminder). Bill, N6MW, is expected to be active here between November 11-21st. Callsign was never made public. Operators John/ 9M6XRO, Masa/JH3PRR, Kip/W6SZN, Aki/ZL1GO and Jacky/ZL3CW, will join Bill/ N6MW in an operation from the Turtle and Shark Lodge, Village of Vaitogi, on the southeast coast of Tutuila Island (OC-045, USI AS007S, WLOTA 4385) and using the special event callsign W8A between November 12-26th. For more details, see OPDX.1110/1114/1116/1135. Their operations will also include the CQWW DX CW Contest signing N8A as a Multi-2 entry. For more details and updates, watch the N8A Web page at: http://www.n8a.eu

Also, watch their FaceBook page at:
https://www.facebook.com/N8a2013AmericanDXpedition

KH9, WAKE ISLAND. The "K9W Wake Atoll Commemorative DXpedition"
continues to be active until November 15th (Wake Island time). The log
is being posted on the Web page below and on the ClubLog Web page at:
https://secure.clublog.org/charts/?c=K9W
The log shows as of 1752z, November 9th, that they have worked a total
of 66414 QSOs and 17236 Unique Callsigns. Breakdown is 36491/CW, 27384/SSB
and 2539/RTTY. Breakdown by Continent is 441/AF, 3/AN, 23113/AS, 15794/EU,
23532/NA, 2336/OC and 1195/SA.
An OQRS will be available by ClubLog (Highly Recommended). This is the
preferred method to use for your QSL confirmation. After the DXpedition
ends you can order either a direct or Bureau QSL card using the OQRS
online QSL service provided by ClubLog. For sending direct QSL requests,
the mailing address is: Wake Island DXpedition, P.O. Box 5005, Lake Wylie,
SC 29710 USA (See detail on their Web page). QSLing by the Bureau is via
AA4NN. Logs will be posted on LoTW 6 months after the conclusion of the
DXpedition. NO eQSL. For more details and updates, visit the K9W Web page
at: http://www.wake2013.org

NH2, GUAM (OC-026). Joel, KG6DX, will be active as NH2DX in the CQWW DX
CW Contest (November 23-24th) as a Single-Op/Single-Band (15m)/High-Power/
Assisted entry. QSL via NH2DX, CBA or QRZ.com address. NO Bureau QSLs.

NP2, U.S. VIRGIN ISLANDS. Yuriy, N2TTA, will once again be active from
here, but as NP2P during the CQWW DX CW Contest (November 23-24th) as a
Single-Op/All-Band/Low-Power entry. QSL via LoTW.

NP4, PUERTO RICO. Felipe, NP4Z, will be active during the CQWW DX CW
Contest (November 23-24th) as a Single-Op/All-Band entry. QSL via N4AO.

P3, CYPRUS. Stavros, 5B4AFM, will be active as P3Z during the CQWW DX CW
Contest (November 23-24th) as a Single-Op/Single-Band (??) entry. QSL via
LoTW and ClubLog (preferred).

PJ4, BONAIRE. Operators Scott/W4PA, Norman/WF7T and Ward/N0AX will be
active as PJ4Q from Bonaire Island (SA-006) between November 18-27th.
Activity will be on 160-10 meters, with a focus on 160/30/17/12 meters,
using CW and SSb. They will also be active during the CQWW DX CW Contest
(November 23-24th) as a Multi-2 entry. QSL via W4PA.

NOT THE QSL MANAGER/ROUTE (Update/Retraction). Last week we reported that Petr, OK1DOT, announced that RW6HS is not the QSL Manager for several listed DX stations in OPDX.1135. Since then, we now are reporting to disregard that information. It would seem that there is some kind of problem/feud between Petr, OK1DOT, and Vasiliy, RW6HS. Through certain sources, it has come to light that the list of stations mentioned refute the claims of OK1DOT, and even several of the stations have stated that RW6HS is their QSL Manager and are very pleased with his services. OPDX would expect when receiving information from the ham community that the details are being sent honestly and correctly, especially if the ham is well known. Apparently this was not the case.

Z21DXI ONLINE LOG (ClubLog). Tom, SP5UAF, reports: "For some years we had our own online log, but since the first Z21DXI activity in 2002 many new great HAM tools appeared. So after some emails with Mirek, SP5IXI, it was decided to upload all Z21DXI QSOs to the ClubLog. Thanks to G7VJR for all ClubLog fantastic tools and features. Z21DXI log is now available at ClubLog together with the OQRS tool (for bureau or direct cards). Log will be updated every few days.

<https://secure.clublog.org/logsearch/Z21DXI>"

ZC4LI LOG UPDATE. Phil, G3SWH, reports: "Just a quick note to let you know the current status of Steve, ZC4LI's, and current logs. I have uploaded to both LoTW and Club Log all the logs that I can find for: 5B4/G0LII, 5B4AHA, C4C, G0LII, G7G, G8G, M0ADU, MX0ADU and ZD8LII. There are log searches available for all these calls on my Web site: http://www.g3swh.org.uk
Steve was not an RSGB member and following the decision by the RSGB QSL Bureau not to process outgoing cards for non members, paper QSLs for this station are ONLY available DIRECT or via the OQRS facility on my Web site. I am still working on the log for ZC4LI as it consists of several hundred individual files in a variety of different formats and it is taking a lot of time to convert it to a single format. It should be available in a few weeks time. 73 for now....."

QSL RECEIVED VIA LoTW: C31BO, C82DX, CU6GT, CX2DK, FY5KE, K4L, LW0F, R863LC, TF3CY, TX5RV, VP9/DJ4EL and YT2T

QSLS RECEIVED VIA MAIL: 4S7YSG, 5U5U, 9H1SP, A52IVU, C37AC, PJ2/G3TXF, PJ4/G3TXF, TL0A, TT8/US3EZ, TT8TT, TU5DF, VU3RWP, XW0YJY, Z24EA and ZS6/OE1ZKC

QSLS RECEIVED VIA THE BUREAU: 3DA0VB, 4K0VB, 4L0B, 5H3VMB, 5R8VB, 5X1VB, 5Z4/UA4WHX, 7Q7VB, 9J2VB, 9U0VB, 9X0VB, C91VB, CR2X, D20VB, D60VB, EF1HQ, HG0X, HG2011N, HU2DX, J20VB, OD5/UA4WHX, ST2VB, V51VV and Z2/UA4WHX

RL110, EUROPEAN RUSSIA (Special Event). Look for special event station RL1110RAEM to be active between December 1-31st. Activity is to celebrate 110th anniversary of Ernst Krenkel (RAEM) a famous Soviet polar explorer. QSL Manager is RK3AW. QSL is OK via Bureau, eQSL, direct (please no "green stamps" - only new style IRCs). Sorry no LoTW. All direct requests without a contribution will be answered via Bureau. More details about the special event and Ernst Krenkel are available at: http://raem110.ru

T32, EAST KIRIBATI (Update). Members of the Russian Robinson Club's that will be active as T32RC between December 4-11th, announced this past week: "T32RC would like to announce our intention of participating in the ARRL 160 meter Contest occurring on December 6th thru December 8th, 2013. We have been able to acquire a 160 meter vertical antenna as well as beverage receiver antennas which we intend to deploy during our stay on Christmas Island. Our goal is to work as many North America stations as possible during the ARRL contest. Before and after the contest we will try to work those (ie. EU) that didn't have a chance to work us on 160 meters during the contest." Operators mentioned at this time are Tim/NL8F, Dick/N7RO, Dean/KW7XX, David/AH6HY and Paula/NX1P. QSL via N7RO, direct or by the Bureau. The OQRS on ClubLog will be available for direct and Bureau requests. T32RC will upload logs to LoTW within six months, or less, of going QRT. For more details and updates, visit: http://www.t32-2013.com
ADDED REMINDER: Tim, NL8F, will be on the island solo between November 27th and December 4th using his own T32 callsign of T32TM. Further instructions will be posted prior to Tim being active. QSL T32TM via K8NA, by

the Bureau or direct.

T33, BANABA ISLAND (Update). The T33A DXpedition to Banaba Island (OC-018) is now active until November 18th. Activity has been on 160-10 meters using CW, SSB and RTTY. They have six stations on the air at two different sites. A OQRS by ClubLog is available and will be the preferred method to use for your QSL confirmation. Logs will be posted to Logbook Of The World (LoTW) approximately 6 months after the conclusion of the DXpedition. Direct QSLs are via W2IJ. QSLs will also be available direct by the Bureau. The log shows as of 2217z, November 9th, that they have worked a total of 39106 QSOs and 12621 Unique Callsigns. Breakdown is 24358/CW, 13261/SSB and 1487/RTTY. Breakdown by Continent is 190/AF, 1/AN, 14805/AS, 7300/EU, 13715/NA, 2105/OC and 990/SA. For more details, visit the T33A Web page at: http://www.t33a.com/index.htm
The T33A DXpedition's Blog page is at: http://banaba2013.wordpress.com
PLEASE NOTE: DXA HAS BEEN SHUT DOWN AND WILL NO LONGER BE USED ON T33A. SATELLITE ISSUES . . . . .

T8, PALAU. Operators Toshiharu/JA3JND and Aki/JR3QFB are now active as T88ON and T88JH, respectively from "West Plaza By The Sea Hotel Rental Shack" on Palau Islands (OC-009) until November 12th. Activity will be on 80-10 meters using CW, SSB and RTTY. QSL via their home callsign.

TO0, GUADELOUPE (NA-102). Members of the FG4KI Radio Club will be active from Guadeloupe using the callsign TO0MT between November 18th and December 1st. Activity is taking place during the arrival of the Transatlantic Race "Mini Transat" - between Douarnenez, France, to Pointe a Pitre, Guadeloupe. Operators mentioned are François/FG4NW, Burt/FG8OJ, Jean/FG8NY and Philippe/FG1PP. QSL via eQSL and LoTW only.

V4, ST. KITTS. Operators Bernie/W3UR (Editor of The Daily DX, The Weekly DX and ARRL's How's DX?) and his Dad Tony/N3ME will be heading to St. Christopher Island (NA-104) sometime next year between late January and early February. Activity will be on 160-6 meters using CW, SSB and RTTY. Tony and Bernie will be active in their spare time, usually in the early morning and late afternoon/early evening time frame. Tony enjoys RTTY and SSB while Bernie prefer CW and 160 meters. Bernie states that more details will be forthcoming.

VK0, ANTARCTICA. Gerry, G3WIP, is now active as VK0GB from the Casey Base Station (WAP AUS-02) in the Antarctica until February 2014. Suggested frequencies are 7195, 14315, 18130 and 21300 kHz about 1730z and 0930z. For more info and updates, watch the Worldwide Antarctic Program (WAP) Web page at: http:// www.waponline.it

VP9, BERMUDA. Operators Kurt/W6PH and Bob/WA1Z will be active as VP9I from Ed/VP9GE's QTH on Bermuda (NA-005) during the CQWW DX CW Contest (November 23-24th) as a Multi-Single/Low-Power entry. QSL via LoTW or WW3S (see QRZ.com). Before the contest, they will be signing VP9/homecall starting late Wednesday November 20th as time permits. Activity will be on 160-10 meters using CW only. QSL non-contest QSOs via their home callsigns. WA1Z's log will also be uploaded to LoTW. W6PH's log will

not be on LoTW.

VU7, LAKSHADWEEP ISLANDS (Update to OPDX.1135). The team of operators planning to be active as VU7AG from Agatti Island (AS-011) sometime between November 20th and December 10th, have updated their suggested frequencies list to now include 80 meters SSB and RTTY operations. The updated suggested frequencies are:
CW - 1812, 3512, 7012, 10112, 14012, 18082, 21012, 24902 and 28012 kHz
SSB - 3680, 7095, 14180, 18155, 21280, 24955 and 28480 kHz
RTTY - 3584, 7032, 10142, 14082, 18092, 21092, 24922 and 28092 kHz

SPECIAL NOTES: They will always be operating split. Please listen to operator instructions carefully.
CW: 2-10 KHz up SSB: 5-15 KHz up RTTY: 2-10 KHz up

Another callsign has been issued for demonstration purposes on Kavaratti Island ☐ VU7KA. This would be used only briefly when team members make presentations to the local administration in Kavaratti and educate them on amateur radio. QSL Manager is Krish, W4VKU, direct or by the Bureau (see details on the Web page). An Online QSL Request System (OQRS) will be available for all your QSL requests. OQRS will be enabled soon after the expedition. For Logbook of The World (LoTW): QSOs would be uploaded to LoTW in approximately 6 months time. The following Web page has been set up, and contains bios of operators, QSL details, frequencies and a survey. Visit the VU7AG page at: http://www.vu7ag.info

XR0, JUAN FERNANDEZ. By the time you read this, operators Fabrizio/IW3SQY, Franco/IZ8GCE, Josep/EA3AKY, Art/WA7NB, Les/SP3DOI, Paolo/IV3DSH and Dino/CE3PG should be active as XR0ZR from Robinson Crusoe Island (SA-005, DICE ICE-004, WLOTA 0153, WWFF CEFF-003) until November 20th. Activity will be on 160-6 meters using CW, SSB and RTTY, with four stations on the air. QSL via IV3DSH, direct or by the Bureau. ClubLog's OQRS will be available (preferred QSLing). Log will be uploaded to LoTW after 6 months. For more details, visit the XR0ZR Web page or the following media links at:
Website : http://www.juanfernandez2013.com
FaceBook : https://www.facebook.com/groups/xr0zr/
Twitter : @xr0zr

XV, VIETNAM. Retu, OH4MDY (OX3RZ/XU7MDY/XV2MDY), will once again be active as XV2RZ from Southeast Vietnam between November 23rd and December 8th. Activity will be on 20-6 meters using the "normal modes" (CW and SSB). QSL only direct via OH4MDY with a SASE and 2 USDs. His log will be available online at: http://www.clublog.org

XV, VIETNAM. Mats, SM6LRR (RM2D), will be active as XV2LRR from Phan Tiet between November 29th and December 14th. Activity will be holiday style on 40-10 meters using CW and SSB. He will use a TS-590s with 100w into a vertical (40/30/15m) and Inverted Vee dipoles (20/17/12/10m). QSL is via LoTW only (possibly some cards may be printed at a future date).

XZ, MYANMAR (Remember). Zorro, JH1AJT, and a group of operators will be on the air from Nay Pyi Taw again between November 15-26th. This will be

the third and final run for 2013 from XZ-land. Proposed callsign is XZ1J this time, and they plan to set up three to four stations, run 24/7 on 160-10 meters using CW, SSB, and RTTY. QSL: OQRS preferable.

21852. RE: [DX-IS] 5J0R - K9W QRG conflict

Yahoo group: DX-IS (2013)
Date: 2013-11-11 08:28:06 UTC
From: Lance Martin
Topic: 21818 Message: 21852

Hey Roberto,

Can you contact the 5J0R guys and ask them to beam around for VK on the high bands every now and then? LP seemed to be working on 17/15m this morning around 2300z but it opens again around 1000z +.
Called a number of times this morning on 17m SSB but gave up after 15 minutes, I guess the piles are still high.

73, Lance – VK6DU

To: DX-IS@yahoogroups.com
Subject: Re: [DX-IS] 5J0R - K9W QRG conflict

☐
I was an operator at 5J0R. I came back early. On one occasion that I recall on 20 mts, a was working a 5 to 10 up pile up. Then I heard more stations on a certain frecuency range and called some of their calls, hearing no response I quickly understood this was not "my" pile up, all I did was reverse the pileup and instead of saying 5 to 10 up I said 5 to 10 down.. easy solution and nobody complained. Its not like we purposely looked to stomp all over the Wake DXP.. that is ridiculous. Some people really need to get a life!

I have received confirmation from one of the K9W operators that they did QSY
from their announced QRG to 28007 to avoid the pile-up confusion for a while
yesterday. When I was listening on 28007 I did not hear the usual frequent
K9W identification, so I may have in fact missed them. Check ClubLog at
http://www.wake2013.org/pages/log.html

Subject: RE: [DX-IS] 5J0R - K9W QRG conflict

I have been purposefully waiting the hear the DX sign recently as these
current DXpeditions are close and signals are coming in in very similar
intensity.

T33A and K9W in particular. Can’t believe how strong these have both been on the high bands.

TX5RV didn’t make it and 5J0R and XR0YY’s paths are just too far south still.

Looking forward to XR0ZR, hoping to get them as high as on 15m but will be a stretch. (20m will be the band).

Good luck to all,

73, Lance – VK6DU

At least we have on-line logs these days. Sure beats waiting months

then getting a "NIL" !!

73, Dick, W1KSZ

On Tue, Nov 5, 2013 at 5:38 PM, Bob <robertlarson@att.net<mailto:robertlarson@att.net>> wrote:

Hi Nick,

Simple to sort it out, "NIL" or Not in Log". How can it ever
be
called a valid contact if the station does not even know who he worked or
thinks
he worked. The QSL managers duty ends with the log check and there is no
match,
return the card.

Now that, that is resolved, who gets the donation?

Hey Roberto,

Can you contact the 5J0R guys and ask them to beam around for VK on the high bands every now and then? LP seemed to be working on 17/15m this morning around 2300z but it opens again around 1000z +.

Called a number of times this morning on 17m SSB but gave up after 15 minutes, I guess the piles are still high.

21854. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-11-11 15:30:01 UTC
From: Paul Dunphy
Topic: 19749 Message: 21854

```
:Issued: 2013 Nov 11 1417 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31111
SIDC SOLAR BULLETIN 11 Nov 2013, 1411UT
SIDC FORECAST (valid from 1230UT, 11 Nov 2013 until 13 Nov 2013)
SOLAR FLARES : Major flares expected (X-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 11 Nov 2013 10CM FLUX: 155 / AP: 016
PREDICTIONS FOR 12 Nov 2013 10CM FLUX: 157 / AP: 013
PREDICTIONS FOR 13 Nov 2013 10CM FLUX: 160 / AP: 018
COMMENT: The strongest flare in the past 24 hours was an M2.4 flare (peaked at 11:18
UT today) originating from the NOAA AR 1895, which just appeared from
behind the east solar limb. From the current data it is not possible to say
if the flare was associated with the CME. Two most complex sunspot groups,
at the moment, are NOAA AR 1895 situated close to the East solar limb which
produced M-class flare this morning and Catania sunspot group 35 (NOAA AR
1890) which retains the beta-gamma-delta configuration of its photospheric
magnetic field. Both active regions have the potential for producing
M-class flares and possibly also X-class flare. Since the Catania sunspot
group 35 (NOAA AR 1890) is situated in the western solar hemisphere we
maintain the warning condition for a proton event. The solar wind speed is
around 500 km/s and the interplanetary magnetic field (IMF) magnitude is
about 5 nT. We expect quiet to unsettled (K < 4) geomagnetic conditions in
the coming hours. The arrival of the halo CME which erupted on November 10
is expected on November 13 resulting in active to minor storm geomagnetic
conditions.
TODAY'S ESTIMATED ISN : 079, BASED ON 13 STATIONS.

SIDC SOLAR BULLETIN 12 Nov 2013, 1311UT
SIDC FORECAST (valid from 1230UT, 12 Nov 2013 until 14 Nov 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 12 Nov 2013 10CM FLUX: 164 / AP: 009
PREDICTIONS FOR 13 Nov 2013 10CM FLUX: 168 / AP: 017
PREDICTIONS FOR 14 Nov 2013 10CM FLUX: 172 / AP: 010
COMMENT: Since the CME-less M2.4 flare which peaked at 11:18 UT on November 11, only
six C-class flares were reported. We expect M-class flares and possibly but
not very probably X-class flares, in particular from the Catania sunspot
group 35 (NOAA AR 1890) and NOAA AR 1897. The Catania sunspot group 35
(NOAA AR 1890) is situated in the western solar hemisphere and still has
the beta-gamma-delta configuration of its photospheric magnetic field,
therefore we maintain the warning condition for a proton event. From the
currently available data it seems that the CME first observed in SOHO/LASCO
C2 field of view at about 08:48 UT on November 12, is possibly Earth-
oriented. This will be confirmed when more data will be available. The
solar wind speed is around 420 km/s and the interplanetary magnetic field
(IMF) magnitude is about 4 nT. We expect quiet geomagnetic conditions in
the coming hours and active geomagnetic conditions late on November 13 due
to arrival of the halo CME which erupted on November 10.

PREDICTIONS FOR 15 Nov 2013 10CM FLUX: 162 / AP: 008
COMMENT: The flaring activity during last 24 hours was on the C-class level. The
strongest flare observed was the C 9.8 flare (peaked at 23:08 UT on
November 12) originating from the NOAA AR 1897. We expect flaring of the
C-class and also M-class level, X-class flares are possible but not very
probable. Flaring is expected in particular from the Catania sunspot group
35 (NOAA AR 1890) and NOAA AR 1897. Due to the position of Catania sunspot
group 35 (NOAA AR 1890) we maintain the warning condition for a proton
event. The CME first observed in SOHO/LASCO C2 field of view at about 07:00
UT on November 12, will not arrive at the Earth. The Earth is currently
inside a slow solar wind flow with the speed of about 400 km/s. The
interplanetary magnetic field is stable with the magnitude of 4 nT. The
arrival of the fast solar wind stream from a low-latitude coronal hole in
the northern hemisphere which reached the central meridian today, is
expected late on November 16. The geomagnetic conditions are currently
quiet. We expect active geomagnetic conditions in the following hours due
to arrival of the halo CME which erupted on November 10.

From: Lance Martin
Topic: 21862 Message: 21862

Well you are not going to believe this, but, I still have not been able to make a QSO with XR0ZR!
I have probably only spent 1 hour calling so far collectively on 30/20/17/15m so early days yet.
Weak sigs (polar path), QRM/QRN and piles have made this one and incredible challenge.
Just need the polar caps to open properly.... Lots of east Coast VKs have gotten through, so the guys are doing a good job.

73, Lance - VK6DU

From: Lance Martin
Topic: 21818 Message: 21863

Robert this can happen very innocently.
This morning JD1YBT decide to park 2kcs down from XR0ZR (which I had already found challenging enough to hear with the QRN and Asian CBer on freq).
Then he decided to split, which made the JD1 pile (rather large JA pileup, JD1 is a very rare DXCC entity for Japan apparently) create some very heavy QRM within 1Kc of Juan Fernandez.

It happens, we have to deal with it…without complaining, which is one my biggest challenges… ☹
Apologies to all for putting up with my comments on the cluster… I really need to stop this…

☐
I was an operator at 5J0R. I came back early. On one occasion that I recall on 20 mts, a was working a 5 to 10 up pile up. Then I heard more stations on a certain frecuency range and called some of their calls, hearing no response I quickly understood this was not "my" pile up, all I did was reverse the pileup and instead of saying 5 to 10 up I said 5 to 10 down.. easy solution and nobody complained. Its not like we purposely looked to stomp all over the Wake DXP.. that is ridiculous. Some people really need to get a life!

I have received confirmation from one of the K9W operators that they did QSY
from their announced QRG to 28007 to avoid the pile-up confusion for a while
yesterday. When I was listening on 28007 I did not hear the usual frequent
K9W identification, so I may have in fact missed them. Check ClubLog at
http://www.wake2013.org/pages/log.html

I have been purposefully waiting the hear the DX sign recently as these current DXpeditions are close and signals are coming in in very similar intensity.

T33A and K9W in particular. Can’t believe how strong these have both been on the high bands.

TX5RV didn’t make it and 5J0R and XR0YY’s paths are just too far south still.

Looking forward to XR0ZR, hoping to get them as high as on 15m but will be a stretch. (20m will be the band).

Good luck to all,

73, Lance – VK6DU

Good luck Lance with the CE0Z. How has Wake Island been to work from VK? Probably about as easy as XR0ZR has been for the US to work, since it is a transequatorial path, as CE0 is for us. Got them for new band country on 30, 15, and 12, and for a new RTTY country. Only worked Wake on 12 and 15 but it was a new CW country. They seem to hear really well.

Hi John

Thanks for asking, K9W and T33A were both romping in here all over the shop. So after the piles had settled down over the first day, they were both relately easy to get.

Location and propagation really does make a difference.

I am guessing CE0Z for us, is like VU7, 4S or even VK9C from you not an easy gig.
Amsterdam is going to be interesting for you guys.

Good luck,

Hi All,

Wow what a difficult one – CE0Z along with CE0X have to be the 2 most difficult spots in the world from VK6. Chile it self is very hard to work also, after many years in\\on Ham Radio I only have a hand full of contacts from Chile. CE0Z is tucked away on the opposite side of Antarctica from VK6. It's a polar path and is usually not open.

I was very lucky and managed a contact on 20m CW with them (No idea how they heard me!) with a true RST of 529 !.. I also managed a contact on 15m SSB, they where even weaker here!

So its possible and I think the VK's that have not made it yet will get there before the week is out.

It been a great expedition so far .

Wake Island has been quite easy from here as Lance said, its on our door step.

Amsterdam Is will be interesting for me. It is not a true polar path for me as the beam heading is 126 degrees. Still, it is the further DXCC entity from my QTH, and will be a new one for me if I can get it. S2 and VU7 are both going to be on this month, and I need both, but they are polar paths and a very difficult area to work from my QTH, especially since I don't have a beam any longer. Still trying to fix that. Did get T33A on 40m this AM for a new band country.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31114
SIDC SOLAR BULLETIN 14 Nov 2013, 1211UT
SIDC FORECAST (valid from 1230UT, 14 Nov 2013 until 16 Nov 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 14 Nov 2013 10CM FLUX: 172 / AP: 008
PREDICTIONS FOR 15 Nov 2013 10CM FLUX: 174 / AP: 008
PREDICTIONS FOR 16 Nov 2013 10CM FLUX: 168 / AP: 017
COMMENT: The strongest flare observed during last 24 hours was a confined M1.4 flare
(peaked at 15:20 UT, on November 13), originating from the NOAA AR 1897. We
expect C-class and possibly M-class flares, while X-class flares are
possible but not very probable. Catania sunspot group 35 (NOAA AR 1890) is
at the moment close to the west solar limb, therefore, we maintain the
warning condition for a proton event during the following hours. The Earth
is still inside a slow solar wind flow with the speed of about 370 km/s.
The interplanetary magnetic field is stable with the magnitude of about 4
nT. The geomagnetic conditions are quiet and expected to remain so during
the following hours. We expect quiet to active geomagnetic conditions late
on November 16, due to arrival of a fast flow associated with the low-
latitude coronal hole in the northern hemisphere.

SB DX ARL ARLD046
ARLD046 DX news

This week's bulletin was made possible with information provided by N7QT, NC1L, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MAURITIUS, 3B8. Serge, UU5WW will be QRV as 3B8/UU5WW from November 17 to 30. Activity will be holiday style on 80 to 10 meters using mostly CW. This includes being an entry in the upcoming CQ World Wide DX CW contest. QSL via K2PF.

SWAZILAND, 3DA. A large group of operators will be QRV as 3DA0ET from November 18 to 27. Activity will be on 160 to 6 meters using CW, SSB and RTTY. This includes being an entry in the upcoming CQ World Wide DX CW contest. QSL via N7RO.

TOGO, 5V. Wim, ON6DX will be QRV as 5V7TH beginning November 18. Activity will be on 40 to 6 meters using CW, SSB and RTTY. His length of stay is unknown. QSL to home call.

CUBA, CO. Rey, CO6RD is QRV as CO0SS from Sancti Spiritus until the end of the year. Activity is on the HF bands. QSL direct via EA5GL.

GUADELOUPE, FG. Special event station TO0MT will be QRV from November 18 to December 1 to commemorate the 2013 Mini Transat, a transatlantic yacht race between the Canary Islands and Guadeloupe. QSL via operators' instructions.

ST. BARTHELEMY, FJ. Georg, DK7LX will be QRV as FJ/DK7LX until mid December. Activity is holiday style on the HF bands using mainly CW with some RTTY. QSL to home call.

DOMINICA, J7. George, K5KG, Jim, WI9WI, Gus, VO1MP and Charlie, K1XX will be QRV as J75KG, J79WI, J79MP and J79XX, respectively,

from November 16 to 25. Activity will be on the HF bands using primarily CW with some SSB and RTTY. They will be QRV as J73A in the upcoming CQ World Wide DX CW contest. QSL J73A via WI9WI and all others direct to home calls.

HAWAII, KH6. Fred, NA2U will be QRV as KH6/NA2U from Volcano on the Big Island from November 19 to 24. Activity will be on the HF bands using primarily CW with some SSB and RTTY. He will be QRV as KH7M in the upcoming CQ World Wide DX CW contest. US and Canada stations QSL KH7M direct via KH6ZM. All others QSL direct via I0MWI. QSL KH6/NA2U direct to home call.

LEBANON, OD. Sylvain, F5TLN is QRV as OD5/F5TLN until April 2014. Activity is on the HF bands. QSL direct to home call.

ST. MAARTEN, PJ7. Rob, N7QT and Hugh, W4VAB will be QRV as PJ7/N7QT and PJ7/W4VAB, respectively, from November 17 to 24. Activity will be on 80 to 10 meters using CW, SSB, RTTY, PSK and JT65. QSL to home calls.

BANGLADESH, S2. A large group of operators will be QRV as S21ZBC from November 16 to 22. Activity will be on the HF bands. They will also be active as S21ZBB in the upcoming CQ World Wide DX CW contest. QSL via IK2VUC.

COTE d'IVOIRE, TU. Chris, F4WBN, Paul, F6EXV and Jan, DJ8NK will be QRV as TU5AX, TU5XV and TU5NK, respectively, from November 17 to 30. Activity will be on 160 to 6 meters using CW, SSB and RTTY. QSL to home calls.

ANTARCTICA. Gerry, G3WIP is QRV as VK0GB from Casey Base Station until February 2014. Activity is on 40, 20, 17 and 15 meters using SSB between 1730 and 0930z. QSL to home call.

BURKINA FASO, XT. David, OK6DJ and Petr, OK1FCJ will be QRV as XT26DJ and XT2FCJ, respectively, from Ouagadougou from November 17 to 26. Activity will be on the HF bands using CW and SSB. QSL both calls via OK6DJ.

MYANMAR, XZ. A group of operators are QRV as XZ1J from Nay Pyi Taw until November 26. Activity is on 160 to 10 meters using CW, SSB and RTTY with three stations running continuously. QSL via operators' instructions.

SOUTH SUDAN, Z8. A group of operators are QRV as Z81X from Juba until November 28. Activity is on all bands using mainly CW and possibly SSB. This includes being an entry in the upcoming CQ World Wide DX CW contest. QSL via OH0XX.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC Credit: Wake Island, K9W, 2013 operation.

THIS WEEKEND ON THE RADIO. ARRL SSB Sweepstakes Contest, ARRL EME Contest, North American Collegiate ARC SSB Championship, NCCC RTTY Sprint, QRP CW Fox Hunt, NCCC Sprint, YO International 80-Meter PSK31 Contest, SARL Field Day Contest, LZ DX Contest, Feld Hell Sprint, All Austrian 160-Meter CW Contest, RSGB 2nd 1.8 MHz CW Contest, EPC BPSK63 QSO Party and the Homebrew and Oldtime Equipment CW Party will certainly keep contesters busy this upcoming weekend. The Run for the Bacon QRP CW Contest is scheduled for November 18. The QRP CW Fox Hunt is scheduled for November 20. Please see November QST, page 87, and the ARRL and WA7BNM contest web sites for details.

To all radio amateurs

SB PROP ARL ARLP046
ARLP046 Propagation de K7RA

Solar activity remains robust. Yesterday, Thursday, November 14 the daily sunspot number rose to 234, a number not seen since the last blast of the second peak of the previous solar cycle, exactly a decade ago.

Way back on October 27 through November 1, 2003 the daily sunspot numbers were 238, 230, 330, 293, 266, and 277. That was it. Nothing as high as a sunspot number of 234 since then.

But the average daily sunspot numbers over the past week declined from 131.7 to 126.1, less than six points. A few off days, November 9-11 contributed to the decline, but otherwise sunspot activity over the week was strong, beginning at 159 and 160 on November 7-8. The reporting week did not include yesterday's over-the-top sunspot number. That will show in next week's average.

Solar flux was up nearly eleven points, rising from an average of 146 on October 31 through November 6 to 156.9 in the recent period, November 7-13. The solar flux on Thursday, November 14 was 175.8.

The latest prediction shows solar flux at 175 on November 15-17, 170 on November 18-19, 165 on November 20-21, then 150, 145, 140 and 135 on November 22-25, 130 on November 26-27, 135 on November 28, 140 on November 29-30, 135 on December 1-3, 130 on December 4, 135 on December 5-6, then 130 and 135 on December 7-8 and 140 on December 9-10.

Predicted planetary A index is 8, 12 and 10 on November 15-17, 5 on November 18 through December 3, 8 on December 4, 5 on December 5, 12 on December 6, 10 on December 7-8, 5 on December 9-11 and 8 on December 12-13.

F.K. Janda, OK1HH of the Czech Propagation Interest Group sees the geomagnetic field as quiet on November 15-16, mostly quiet November

17-18, quiet to unsettled November 19-20, quiet again November 21-25, quiet to unsettled November 26-27, active to disturbed November 28, mostly quiet November 29-30, quiet to active December 1-2, mostly quiet December 3, quiet December 4, mostly quiet December 5, quiet to active December 6-8, and quiet December 9-11.

Conditions should be good for the ARRL SSB Sweepstakes Contest this weekend and probably also good for the CQ Worldwide CW DX Contest on the following weekend.

Thanks to Jason Warren, WA2LJW of New Paltz, New York, John Campbell, K4NFE of Huntsville, Alabama, Ron McCollum, W7GTF, way up in the North Cascades in icy Winthrop, Washington and others for the articles in the Wall Street Journal and Washington Post about weakening solar activity. We've heard a lot about this recently, and it seems like a good time to focus instead on the great conditions we have right now!

Terry Glass, N0YXE of Overland Park, Kansas has been excited to hear Japan on 10 meters with his 36 foot end-fed wire, but just as things are getting interesting, his radio is dead and back to the factory authorized service depot it goes.

Here in North America we hear about or even see Aurora Borealis, but down under it is Aurora Australis that appears in the Southern Hemisphere. Check this article about the sky lighting up in Australia:
http://www.theadvocate.com.au/story/1899448/star-struck-colour-show-lights-up-night-sky/?cs=87.

Jon Jones, N0JK of Lawrence, Kansas wrote: "A rare 6 meter F2 opening to the Caribbean and northern South America occurred Saturday morning November 9.

"I got up around 9:50 am CST (1550 UTC) after working the night shift and saw the DX cluster loaded up with 6 meter DX spots. I had just got a M2 loop up in the attic this week as a temporary antenna. Turned on the radio and FM5AN was hitting 40 dB over S-9 on 50.115 MHz! I worked him at 1556 UTC followed by a really loud P43A on 50.120 MHz at 1603 UTC. P43A said I was well over S-9 on the loop. Then packed up the car with the portable antenna and set up about a mile west. By the time I set up, the band was fading and P43A was dropping out at 1630 UTC. I heard K3PA in EM29 also working some of the DX.

"The opening was sparked by 'a gusty stream of solar wind is buffeting Earth's magnetic field, sparking auroras around both of our planet's poles on Nov. 9th.' - http://www.spaceweather.com. The K index was 4."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at, http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for November 7 through 13 were 159, 160, 95, 90, 104, 147, and 128, with a mean of 126.1. 10.7 cm flux was 148, 146, 148.1, 154.1, 163.7, 167.5, and 171, with a mean of 156.9. Estimated planetary A indices were 11, 4, 16, 10, 16, 2, and 3, with a mean of 8.9. Estimated mid-latitude A indices were 11, 3, 14, 9, 13, 2, and 2, with a mean of 7.7.

3DA - Announced frequencies for the 16-27 November 3DA0ET DXpedition to Swaziland [425DXN 1161] are:
CW 1825 3520 7018 10105 14018 18075 21018 24905 28018
SSB 3790 7085 14180 18145 21180 24960 28480
RTTY 3590 7035 10140 14080 18100 21080 24915 (JA 24922) 28080
A "DXpedition Hot-line" phone number (listed on www.swazidx.org http://www.swazidx.org, along with details about how 6m openings will be handled) has been enabled for sending SMS messages to the expedition pilot (ZS6WB) about any copy of the beacon which will be running 24/7 on 50.450 FM, and for sending any reports about RX of low-band activities. 3DA0ET will use five stations, one dedicated to RTTY. QSL via N7RO direct or bureau, and LoTW. Logsearch on Club Log. [TNX ZS6RJ]
4S - Radio Society of Sri Lanka's special event station 4S0CGM [425DXN 1175] is active to commemorating the 23rd Commonwealth Heads of Government Meeting (CHOGM) that is being held in Colombo. In addition, individual operators can append their suffix to special callsigns 4S5CGM, 4S6CGM and 4S7CGM, or append /CGM to their personal callsign during the month of November. [TNX 4S7JL]
4S - Peter, DC0KK will be active again as 4S7KKG from Sri Lanka (AS-003) from 17 November to 15 April 2014. He will operate mainly CW and digital modes. QSL via DC0KK, direct or bureau. Logsearch on Club Log.
9M2 - Once again Rich, PA0RRS will be active as 9M2MRS from Penang Island (AS-015) from 31 December until 3 February 2014. He will operate CW, RTTY and PSK on 40-10 metres. QSL via home call, direct or bureau, as well as LoTW and eQSL. [TNX PA0RRS]
D4 - The Monteverde Contest Team (http://d4c.cc/ http://d4c.cc/) will participate in the CQ WW DX CW Contest as a Multi-Multi entry from the D4C station on Sao Vicente (AF-086), Cape Verde. The team includes HB9CAT, IK2JUB, IK2NCJ, IT9BLB, K1RX, LY2IJ, OM2VL, OM3BH, OM3GI, OM3RM, YL2KL, YL3DQ, LB3HC and YL3DW. QSL via IZ4DPV (direct or bureau), LoTW and eQSL. [TNX IK1HJS]
FK - FK8RO is the callsign issued to Freddy, F5IRO for his activity from New Caledonia [425DXN 1173]. He will remain there through February 2014. QSL via F5IRO, direct or bureau. Freddy, along with FK8DD and FK8IK, will participate in the CQ WW DX CW Contest as

TX8B (QSL via FK8DD).
FS - Dave, WJ2O (www.wj2o.com http://www.wj2o.com) will be active as FS/WJ2O from St Martin (NA-105) on 20-29 November. He will operate CW only on 40-10 metres, and will participate in the CQ WW DX CW Contest. QSL via N2ZN. [TNX NG3K]
JW - LA8HGA will be active as JW8HGA from Spitsbergen (EU-026), Svalbard until 18 November. He will operate mainly CW on the HF bands. QSL via LA8HGA, direct or bureau, and LoTW. [TNX NG3K]
KP4 - Commemorating the 520th anniversary of the discovery of the island of Puerto Rico, three local amateur radio clubs will be QRV with special call signs: the Caribbean Amateur Radio Group as N4D (13-19 November), the Western Amateur Radio Group as W4D (17-24 November) and the Borinquen Amateur Radio Club as K4D (17-19 November). QSL for all callsigns via KP4TC. [TNX Southgate ARC]
P4 - Once again John, W2GD will activate P40W from Aruba (SA-036) for the CQWW DX CW Contest (23-24 November). He plans to be QRV on 160, 30, 17 and 12 meters CW before the contest, as time permits. QSL via LoTW or N2MM (direct only, as after 31 December 2013 no bureau requests will be honoured). [TNX NG3K]
PJ2 - Andy, W9NJY will be active as PJ2/W9NJY from Curacao (SA-099) on 19-25 November. He will operate CW on 160-10 metres. QSL via WD9DZV and LoTW. [TNX The Daily DX]
PJ7 - Dennis K2SX, Les W2LK and Andy K2LE will be active as PJ7/homecall from Sint Maarten on 19-26 November. QSL via home calls. They will participate in the CQ WW CW Contest as PJ7W (QSL via W2LK). [TNX NG3K]
S5 - Special event stations S506SLG and S506PMC are active until 5 January to promote the PMC Contest, sponsored by the Radio Club Slovenj Gradec (S59DCD). The International Association of Peace Messenger Cities was established in 1988 to recognize and encourage the role and responsibility cities have in creating a culture of peace. The PMC Contest, promoting contacts between stations located in the Peace Messenger Cities and the rest of the world, will be held from 12 UTC on 4 January 2014 until 12 UTC on the 5th. Complete details can be found at www.s59dcd.si/en10/ http://www.s59dcd.si/en10/
TY - Wim, ON6DX will be returning to Togo on 18 November and be active again as 5V7TH. He plans to be QRV on 40 and 30 metres CW, SSB and RTTY during his evenings. However, the main purpose of his trip is to go and operate from Benin. He has found "a nice QTH", Wim says, and will move there "when I have my TY1 callsign papers in my hands". His plans are to be QRV (http://dxpedition.be/Benin. html http://dxpedition.be/Benin.html)
on 40-6 metres SSB, CW and RTTY between 21 November and 3 December. QSL for both callsigns via ON6DX, direct or Bureau (OQRS on Club Log) and LoTW. [TNX NG3K]
V3 - Bob, K7YB will be active as V31YB from San Pedro, Ambergris Caye (NA-073), Belize on 20-25 November. He will operate holiday style on 40, 20, 10 and 6 metres SSB and CW, and will be active during the CQ WW DX CW Contest. QSL via home call. [TNX The Daily DX]
V4 - Bob, K5WA will be active as V4/K5WA (QSL via home call) from St.

Kitts (NA-104) on 20-27 November. He will be QRV on 160-10 metres CW, and will participate in the CQ WW CW Contest as V49J (QSL via W5JON and LoTW). [TNX NG3K]
V6 - Sho, JA7HMZ and Masa, JA7ZF will be active as as V63DX and V63ZF from Pohnpei (OC-010), Micronesia on 22-30 November. QSL via home calls. [TNX NG3K]
VU7 - The VU7AG frequency plans [425DXN 1174] "have been updated after carefully checking which other DXpeds are QRV around the same time as us", and are as follows:
CW 1812 3512 7012 10112 14012 18082 21012 24902 28012
SSB 3680 7095 14180 18155 21280 24955 28480
RTTY 3584 7032 10142 14082 18092 21092 24922 28092
There will be three stations running minimum 400w on all bands. VU7AG is expected to be QRV from Agatti, Lakshadweep Islands (AS-011) "for at least fourteen days" between 20 November and 10 December. Three pilot stations for the Americas have been added: N1UK (NA East Coast), KY6R (NA West Coast) and LU1FAM (Central and South America). QSL via W4VKU, direct or bureau (logsearch and OQRS on Club Log), and LoTW approximately six months after the conclusion of the DXpedition. Bookmark www.vu7ag.info http://www.vu7ag.info for further information and updates.
XV - Once again Retu, OH4MDY will be active as XV2RZ from Vietnam from 22 November to 8 December. He will be QRV on 20-6 metres CW and SSB. QSL via home call, direct only. Logsearch on Club Log. [TNX DX World]
XZ - The 15-26 November XZ1J expedition to Myanmar [425DXN 1175] now has a website at www.xz1j.org http://www.xz1j.org. Plans are for an 11-member team to operate CW, SSB and RTTY on 160-10 metres with three or four stations. Please use the OQRS provided by Club Log for QSLling.
YN - Mike, AJ9C will be active again as YN2CC from Nicaragua on 19-27 November. He will operate CW, SSB and RRTY on 160-6 metres, and will take part in the CQ WW DX CW Contest. QSL via home call and LoTW. [TNX The Daily DX]
ZD8 - Olof G0CKV (ZD8M), Oliver W6NV (ZD8W) and Jorma OH2KI (ZD8X) will be active from Ascension Island (AF-003) on 19-24 November. Their main activity will be during the CQ WW CW Contest as single-band entrants (on 40, 15 and 10 metres respectively). Before the contest they will be QRV on the HF bands and 6 metres. QSL via home calls. [TNX OPDX Bulletin]

ANTARCTICA ---> Gerry, VK0GB (aka G3WIP and VK4BGL) is a medical Practitioner stationed at Casey Station, Antarctica until February 2014. Plans are to sit around 7130, 14315, 18130, 21300 and maybe 28775 at 01.00, 09.30, 12.00 and 17.30 UTC ("but not every day", he says, as his job "always comes first, so I cannot promise too much").

CARIBBEAN TRIP ---> Pete, VE3IKV will be active as FJ/VA3RA (SSB and CW on the HF bands and 6m) from Saint Barthelemy (NA-146) on 21-25 November, including an entry in the CQ WW DX CW Contest on 10 metres. He will then move to Sint Maarten (NA-104) and be QRV on 10 and 6 metres as PJ7/VA3RA on 25-28 November. QSL via VE3IKV, direct only. [TNX The Daily DX]

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

425 DX NEWS MAGAZINE ---> The October 2013 issue is now available for download at www.425dxn.org/monthly/index. html http://www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

5J0R ---> The San Andres expedition's website has been updated with pictures and statistics from the recent operation. 5J0R made 80508 QSOs (33426 CW, 37033 SSB and 10049 RTTY) with 22704 unique callsigns in ten days. The OQRS for direct QSLs is up and running, bureau cards should be requestd through the dedicated OQRS when it is made available on the website (http://www.dxfriends.com/ SanAndres2013/index.php http://www.dxfriends.com/SanAndres2013/index.php).

DXCC NEWS ---> K9W (Wake Island, 2013 operation) has been approved for DXCC credit. [TNX NC1L]

IRON HAM CONTEST ---> Drawing inspiration from the Ironman Thriatlon races,the Araucaria DX Group sponsors the WW Iron Ham Contest, a competition that combines the main operating modes (Phone, CW and RTTY) into one single contest. The second edition will be held on 28-29 December (from 12 UTC on Saturday through 11:59 UTC on Sunday). The 24-hour contest is organized to have 8 hours of operation on each mode in periods no shorter than one hour. Complete details (look at this year's very special prize for the winners!) can be found at www.ironham.com.br http://www.ironham.com.br [TNX PY5EG]

THE BIG PICTURE... ---> "The Big Picture of Expedition Operating and the Direct Relationship to Anti-Social Pileup Behavior" is a 43-minute presentation by Rick, K6VVA. It "describes the problems and also solutions to the dysfunctional behavior we unfortunately hear in DX & IOTA pileups on the Amateur Radio bands these days". It can be found at http://youtu.be/svLlfrFA-1E http://youtu.be/svLlfrFA-1E [TNX K6VVA]

Z81X ---> The 14-28 November Z81X operation from South Sudan [425DXN 1173] will employ DX University's "Best Practices for DXpedition Operating". With the exception for 160 and 80 metres (1826.5 KHz and 3523 KHz), they will not pre-announce their operating frequencies, but will depend on "the modern Internet spotting networks". Near the end of the operation, they will use "a version of e-Pilot" in an effort "to work as many of the 'more deserving, but DX challenged' DXers as possible".
Z81X "will also look for conduct that is consistent - or inconsistent - with the 'Best Practices for Courteous and Efficient DXing' presented on the DX University Webpage" (go to www.dxuniversity.com http://www.dxuniversity.com, click on "DXing
Tools" and then on "Best Practices" in the drop-down menu). Be aware that they will "record many segments of the operation in stereo, pileup on one channel, Z81X on the other", and that "selected segments will be uploaded

to the DX University website to illustrate certain points".
As the activity will be running for two-weeks, SSB operation on the low bands will come during the second weekend. During the CQ WW DX CW Contest there may be as many as three single-band stations activated. QSL via OH0XX (OQRS on Club Log).

21875. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-11-16 15:30:00 UTC
From: Paul Dunphy
Topic: 19749 Message: 21875

```
:Issued: 2013 Nov 16 1449 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31116
SIDC SOLAR BULLETIN 16 Nov 2013, 1411UT
SIDC FORECAST (valid from 1230UT, 16 Nov 2013 until 18 Nov 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 16 Nov 2013 10CM FLUX: 178 / AP: 015
PREDICTIONS FOR 17 Nov 2013 10CM FLUX: 177 / AP: 011
PREDICTIONS FOR 18 Nov 2013 10CM FLUX: 176 / AP: 008
COMMENT: The strongest of two M-class flares observed during last 24 hours was M1.4
flare (peaked at 07:49 UT today) from the Catania sunspot group 41 (NOAA AR
1900). We expect C-class flares and M-class flares, in particular from
Catania sunspot groups 45, 41 and 38 (NOAA ARs 1897, 1900 and 1893,
respectively). The X-class flares are possible but not very probable. Earth
is currently inside of a fast flow with a speed of about 550 km/s. The fast
flow is associated with the low-latitude coronal hole in the northern
hemisphere. The interplanetary magnetic field magnitude is about 10 nT. The
geomagnetic conditions are quiet and expected to remain so during the
following hours.
TODAY'S ESTIMATED ISN : 130, BASED ON 09 STATIONS.

SOLAR INDICES FOR 15 Nov 2013

21876. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-11-17 15:30:00 UTC
From: Paul Dunphy
Topic: 19749 Message: 21876

```
:Issued: 2013 Nov 17 1257 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31117
SIDC SOLAR BULLETIN 17 Nov 2013, 1211UT
SIDC FORECAST (valid from 1230UT, 17 Nov 2013 until 19 Nov 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 17 Nov 2013 10CM FLUX: 172 / AP: 010
PREDICTIONS FOR 18 Nov 2013 10CM FLUX: 168 / AP: 007
PREDICTIONS FOR 19 Nov 2013 10CM FLUX: 164 / AP: 007
COMMENT: Solar activity was moderate during the past 24 hours, with a M1.0 flare
spotted in NOAA AR 1900 on Nov. 17, 0510 UT peak time. A C4.9 flare
occurred in NOAA AR 1893, on Nov. 17, 0801 UT (peak time). It was
accompanied by a CME observed by the STEREO COR2 coronagraphs. Based on
these observations (LASCO data are not yet available for this event) it
looks like the bulk of the CME will miss the Earth. A C8.6 flare occurred
on the East limb (N15) on Nov. 17, 0621 UT (peak time), but further
information is needed to assess the risk of future flares. We expect active
conditions (M flares possible) to prevail for the next 48 hours, with a
higher risk for NOAA ARs 1900, 1897, and 1893. Geomagnetic conditions are
expected to be mostly quiet for the next 48 hours. Current ACE observations
show that the Earth is still within the moderately fast solar wind stream
linked to a coronal hole, but the interplanetary magnetic field is now back
to very quiet and steady levels.
TODAY'S ESTIMATED ISN : 124, BASED ON 07 STATIONS.

November 18, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, K6VVA, K8GI, K8YSE, ND8X, NL8F, W8GEX & 60m News, AJ9C, N9AW, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, EA5RM, F5NQL, F6AJA & Les Nouvelles DX, FK8DD, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, OH2BH, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, S57S, Sixitalia Weekly, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF), YL1ZF and ZS6RJ for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 10th-November, through Sunday, 17th-November there were 236 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9X, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE0Y, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T33, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP8, VP8/h, VP9, VR, VU, XE, XU, XZ, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2/R, ROTUMA (Reminder). Operators Hrane/YT1AD, David/WD5COV, Wasiliy/ RW4NW, Sergey/ RZ3FW and Dragos/YU1AKV will be active as 3D2R between November 22-29th. QSL via YT1AD. The team will be active in the CQWW DX

CW Contest (November 23-24th) as a Multi-Single or Multi-2 with the 3D2R callsign. ADDED NOTE: The team above will be active from Fiji (3D2) before and after the 3D2R operation. Activity will take place between November 20-22th and November 29-December 4th. Operators will have their own personal Fiji callsign: YT1AD (3D2AD), WD5COV (3D2OV), RZ3FW (3D2FW) and RW4NW (3D2NW); QSL via their home callsigns.

3DA, SWAZILAND (Press Release) [edited]: "The 3DA0ET Dxpedition is due to get under-way late on the 16th November or on the 17th November, depending on if we have time to get any of the antennas up on the first day. As a new feature, we have installed a 'Dxpedition Hot-line' phone number which connects to our pilot. The number is listed on our Web site at: http://www.swazidx.org
The purpose of this hot-line is primarily for sending SMS messages about any copy on our new six meter beacon which will be running 24/7 on 50.450 MHz FM (primarily for Es as part of the Southern Africa Es beacon initiative), and for sending us any reports re RX of our low-band activities. Details about how we will handle any six meter openings are also on our Web site. The first of our team members arrives in South Africa on the 12th November, with the rest of the team assembling in ZS-land prior to departing for 3DA0ET by the morning of the 16th November. A reminder that we'll have a strong focus on RTTY with a 24/7 RTTY operation alongside our CW and SSB activity. We are also QRV in the CQ WW CW contest as an M2 effort. We're running 5 stations with 4 hexbeams, 3 mono-band verticals for 40, 80 and 160, dedicated low band RX antennas and a selection of dipoles. We hope to see you in the pile-ups!
..... Vy 73, Roger, ZS6RJ, on behalf of the 3DA0ET crew"

4L, GEORGIA. Operators Maxim/UR3CMA, Sergey/UT3UA, Andy/UU4JMG and Andi/UU0JM will be active as 4L0A from Obcha during the CQWW DX CW Contest (November 23-24th) as a Multi-? entry. QSL via LoTW.

4S, SIR LANKA. Peter, DC0KK, will once again be active as 4S7KKG from Moragalla, Sri Lanka (AS-003, WLOTA 0762), between November 17th and April 15th, 2014. Activity will be mainly on CW and the Digital modes. QSL via DC0KK, by the Bureau (preferred) or direct (see QRZ.com). LoTW on request. All QSLs for all QSOs will be sent via the QSL Bureau.

5B, CYPRUS. Tony, RT9T, will once again be active as 5B4ALB from Pachyammos (AS-004, MIA MCI-002, WLOTA 0051) between November 17-26th. Activity will be on all bands and modes. QSL via RT9T direct only. ADDED NOTE: Tony will be one of operators in the P3N team (Multi-Single) during the CQWW DX CW Contest.

5C, MOROCCO. Members of the URE Cartagena team will be active from the ARRAM HQ club station CN8MC in Rabat as 5C5T during the CQWW DX CW Contest (November 23-24th) as a Multi-Single/Low-Power entry. QSL via EA5YU, by the Spanish Bureau or direct. Operators mentioned are: Juan/EA5BLJ, Jose/EA5CP and Jose/EA5YU. The operators will be there between November 21-24th, and plan to be active outside of the contest on 80-10 meters using 100 watts, CW only.

5J0R QRT. Antonio, EA5RM, reports to OPDX [edited]: "After our return to home, the 5J0R Web site is being updated with pictures from the San Andres operation and new donors and sponsors. The OQRS is already working. Bureau QSL should be requested through the Bureau OQRS when available on our Web site. Thank you to all who did help us to reach our aim.... 73! EA5RM"

5R, MADAGASCAR (Reminder/Update). By the time you read this, Eric, F6ICX, will once again be active as 5R8IC from Saint Marie Island (AF-090) until December 15th. Activity will be holiday style operating CW, RTTY, and PSK63, and using a FT450 with 100 watts into various GPs or Inverted-Ls and a Hexbeam for 20-10 meters. There will be no online log 'during' his activity. QSL via his home callsign (QRZ.com). To see pictures of his previous activity and an online log search from ClubLog, go to: http://f6kbk.free.fr/activities/activite_om_rc/5r8ic/5r8ic.htm

8P, BARBADOS. Tom, W2SC, will be active as 8P5A during the CQWW DX CW Contest (November 23-24th) as Single-Op/All-Band/High-Power entry. QSL via LoTW or direct to NN1N.

9J, ZAMBIA. Niko, S53A, will once again be active as 9J3A from the Kafue National Park (WFF-9JFF-003, WWL KH35) between November 18-26th (approx). This is his sixth operation from Zambia. Activity will be mostly during the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band/Low-Power/Unassisted entry. His QSL Manager informs OPDX that Niko will also be active as 9J3A/m, before and maybe little after the contest, from the Land Rover (out just for the fun) with a small whip antenna and 5 watts. Activity will be on 80-10 meters (no 160m). QSL via S57S (not S53A, not S57A), direct, by the Bureau (a very long wait, see details on QRZ.com) or LoTW.

AH2, GUAM. Members of the Guam Contest Club will be active as AH2R during the CQWW DX CW Contest (November 23-24th) as a Multi-Single entry. Operators mentioned are: Noriyuki/7N2JZT (NH2KO), Nozomu/JE8KKX (AH2K), Hajime/KH0G, Toshinobu/JI3ERV (NH2C), Toshimasa/WI3O. QSL via LoTW or direct to JH7QXJ. PLEASE DO NOT QSL via the KH2 Bureau.

CARIBBEAN ACTIVITIES. Dave, WJ2O, has announced that he has booked three trips to the Caribbean over the next several months and plans to be active from the following:
November 20-29th: Saint Martin (FS); IOTA NA-105; Callsign FS/WJ2O; Low Power and whip antennas; 40-10 meters, CW only; and
he will be in the CQWW DX CW Contest (November 23-24th)
as a Single-Op/All-Band entry.

February 12-19th: Cayman Island (ZF); IOTA NA-016; Callsign pending;
Low Power vertical and wires; 160-10 meters, CW only;
and he will be in the ARRL International CW Contest
(February 15-16th) as a Single-Op/All-Band entry.

May 21-28th: Bonaire (PJ4); IOTA SA-006; Callsign pending; from
the PJ4G Contest Station; and he will be in the CQ
WPX CW Contest (May 24-25th) as a Single-Op/All-Band/
High-Power entry.

His QSL Manager is Ken, N2ZN, for all operations. For more details and updates, visit Dave's Web page at: http://www.WJ2O.com

CR3, MADEIRA ISLANDS. Jose, CT1BOH, will be using the special callsign CR3E during the CQWW DX CW Contest (November 23-24th) as a Single-Op/ All-Band entry. All QSOs will be uploaded into LoTW. QSL Manager, Joe, W3HNK. See his Web page and station at: http://www.qsl.net/ct1boh

CT9, MADEIRA ISLAND. Vadim, R9DX, will be active as CT9/R9DX during the CQWW DX CW Contest (November 23-24th) as a Single-Op/Single-Band (10m)/ Low-Power entry. QSL via R9DX.

DB50, GERMANY (Special Event). Look for special event station DB50FIRAC to be active between January 1st and December 31st, to celebrate the 50th anniversary of "Fédération Internationale des RadioAmateurs Cheminots". QSL via LoTW, by the Bureau or eQSL.

DXCC NEWS.....
* Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
K9W ☐ Wake Island; 2013 Operation

* WHY 5A1AL IS BEING REJECTED FOR DXCC? Sharon Taratula, Administrative Manager, states: "The DXCC Department hasn't received complete documentation for the 5A1AL operation. DXCC operations require the license of the operation, evidence of authorization for landing, and/or proof of transportation and/or entry. A landing permit is generally issued by a government agency, and grants the person or group permission to enter certain areas for purposes including the operation of an Amateur Radio station. Proof of transportation and/or entry may be a statement by a boat captain or aircraft pilot, certifying that the persons involved were transported to the entity in question."

E5, SOUTH COOK ISLANDS. Perrin, VK3XPT, is on holidays from the Cook Islands until November 23rd. Look for him to be active as E51XPT using his my FT-817, Alexloop Walkham, Miracle Whip and LNR EFT EndFedz for 40/20/10 meters. He will be staying on Rarotonga (OC-013), Aitutaki (OC-083) and Atiu Islands (OC-083). He states, "Keep an ear open for me on the usual QRP frequencies! (PS. I am not doing IOTA)." QSL via his home callsign.

EG5, SPAIN (Special Event). Operators Jose/EA5FL, Sal/EA5DY, Nando/EA5GVZ and Juan/EC5JC will activate special event station EG5MM on December 11th to celebrate "International Mountain Day" (See QRZ.com for details). QSL via EA5FL.

FIELD DAY RESULTS (2013) ARE POSTED. The 2013 ARRL Field Day Results are now posted at: http://www.arrl.org/results-database?event_id=47575

FJ, ST. BARTHELEMY. By the time you read this, Georg, DK7LX, should be active as FJ/DK7LX from St. Barthelemy (NA-146) until the beginning of December. Activity will be holiday style and mainly on CW, with some RTTY (no SSB). He will not participate in the CQWW DX CW Contest. QSL

via his home callsign, direct, by the Bureau or LoTW.

FY, FRENCH GUIANA. Operator Didier, FY5FY, will be active during the CQWW DX CW Contest (November 23-24th) as a Single-Op/Single-Band (15m)/Low-Power entry. QSL via FY5FY.

FY, FRENCH GUIANA. Larry, F6FVY, will be active as FY5KE during the CQ WW DX CW Contest (November 23-24th) as a Single-Op/Single-Band (10m) entry. QSL via FY5KE, by the Bureau, direct or LoTW.

HI, DOMINICAN REPUBLIC. Members of the Lomadeltoro Contest Team will be active as HI3A in the CQWW DX CW Contest (November 23-24th) as a Multi-Op entry. Operators mentioned are Julio/AD4Z, Ez/HI3EPR, Lorenzo/HI3LFE and Franky/HI3TT. QSL via ON4IQ or Lotw. Visi the Lomadeltoro Contest Team's Web page at: http://www.lomadeltoro.com

IOTA NEWS.....
AF-019. (Early Announcement) An international team of operators will be active as IG9Y from Lampedusa Island during the RSGB IOTA Contest (July 26-27th) as a Multi-Op entry. Look for more details to be forthcoming. QSL via ON4LG. An OQRS will be available for direct and Bureau cards. Visit their Web page at: http://ig9.ii9p.com

EU-012. Stewart, GM4AFF, will be active as GZ3F from the Shetland Islands during the CQWW DX CW Contest (November 23-24th) as Single-Op/All-Band entry. QSL via GM4FDM.

OC-108. (Reminder) By the time you read this, 9 operators will be active as YE5R from Anambas Island until November 20th. Activity will be on 80-10 meters using CW, SSB and RTTY. QSL via YB4IR.

SA-027. Jose, PU5IKE, will be active as ZW5AAA from Remedios Island (ARLHS BRA-137) between December 7-8th. Activity will be on 10 meters SSB. QSL via PU5IKE, via LoTW, direct (sase), eQSL or Bureau (QSLs from SWLs are welcome).

J6, ST. LUCIA (Press Release: 5th St. Lucia Buddies in the Caribbean Suitcase DXpedition) [edited]: "Travel plans are set for the fifth 'Buddies in the Caribbean' (BIC) mini-DXpedition to St Lucia (J6). Eight operators, some of whom have never experienced the 'other side' of a pileup, will be operating from Chateau Devaux on the NE side of St. Lucia from December 1st through 9th, 2013. This 'Suitcase DXpedition' will operate QRP to 100-watt radio stations using backpackable Buddipole antennas to make contacts from the villa, the surrounding mountains, and (of course) from St. Lucia's superb beaches. The eight operators are Jerry/N9AW, Craig/NM4T, John/W5EXJ, Joe/K3JDB, Rick/AA4W, Jim/W4QO, Chris/W6HFP, and Budd/W3FF (J68FF). Ops will preface their own calls with 'J6/'. Team members will operate several CW, SSB, and/or Digital Mode stations on 160-10 meters from the villa while others make contacts with portable set-ups from other J6 locations. Per tradition, meeting and operating with local hams while on J6 is one of our key goals. QSO confirmation and QSLs will be

available via LoTW, Bureau or direct via information on each operator's www.QRZ.com page."

J8, ST. VINCENT (Update). A team of Polish operators will be active as J88HL from St. Vincent Island (NA-025) between November 15th and December 2nd. Operators mentioned are Bob/SP2EBG, Jan/SP3CYY, Jurek/SP3GEM, Wlodek/SP6EQZ, Janusz/SP6IXF, Roman/SP9FOW and Wojciech/SP9PT. Activity will be on 160-6 meters with a focus on the lower bands, and using CW, SSB and RTTY. They will have at least three stations running 24 hours a day. Each one with a power amplifier. Suggested frequencies are:
CW - 1822.5, 3525, 7025, 10115, 14025, 18085, 21025, 24900, 28025 kHz
SSB - 1840, 3793, 7070/7165, 14265, 18125, 21273, 24970 and 28440 kHz
RTTY - 3585, 7045, 10138, 14090, 18101, 21090, 24915 and 28090 kHz
6m - 50105/CW and 50105/SSB

There will not be a team effort during the CQWW DX CW Contest, but possibly one operator will take part in the contest as a Single-Op/All-Band entry while the others operate outside the contest on the WARC bands or SSB and digital modes. QSL via SP3CYY, direct or by the Bureau. Using the OQRS is strongly recommended. For more details and updates, visit their Web Page at: http://j88hl.dxing.pl

KH8, AMERICAN SAMOA (Reminder). Operators John/9M6XRO, Masa/JH3PRR, Kip/W6SZN, Aki/ZL1GO and Jacky/ZL3CW, are now active from the Turtle and Shark Lodge, Village of Vaitogi, on the south-east coast of Tutuila Island (OC-045, USI AS007S, WLOTA 4385) and using the special event callsign W8A between now and November 26th. Activity will be on 160-10 meters using CW, SSB and RTTY. Suggested frequencies are available online at: http://www.n8a.eu/frequencies
Their operations will also include the CQWW DX CW Contest signing N8A as a Multi-2 entry. QSL via ZL3CW. For more details and updates, watch the N8A Web page at: http://www.n8a.eu
Also, watch their FaceBook page at:
https://www.facebook.com/N8a2013AmericanDXpedition

KH9, WAKE ISLAND. The "K9W Wake Atoll Commemorative DXpedition" is now QRT as of November 15th. Via their Web page: "The K9W DXpedition to Wake Atoll has now ended. All equipment has been taken off-line and prepared for shipment to the U.S. Final upload to ClubLog will take place within the next 24-48 hours. The K9W team wishes to thank the DXpedition community for their tremendous support. We put over 100,000 QSOs in the log from 186 discrete DXCC entities. The K9W operators are grateful for the opportunity to have honored the Forgotten 98 during our DXpedition. More photos and video footage will be posted to the website very soon.....
73 from Wake Atoll."
The log is posted on their Web page below and on the ClubLog Web page at: https://secure.clublog.org/charts/?c=K9W
The log shows as of 0725z, November 15th, that they have worked a total of 100015 QSOs and 23121 Unique Callsigns. Breakdown is 53757/CW, 38695/SSB and 7563/RTTY. Breakdown by Continent is 602/AF, 6/AN, 32311/AS, 26860/EU, 35314/NA, 3134/OC and 1788/SA.

An OQRS will be available by ClubLog (Highly Recommended). This is the preferred method to use for your QSL confirmation. After the DXpedition ends you can order either a direct or Bureau QSL card using the OQRS online QSL service provided by ClubLog. For sending direct QSL requests, the mailing address is: Wake Island DXpedition, P.O. Box 5005, Lake Wylie, SC 29710 USA (See detail on their Web page). QSLing by the Bureau is via AA4NN. Logs will be posted on LoTW 6 months after the conclusion of the DXpedition. NO eQSL. For more details and updates, visit the K9W Web page at: http://www.wake2013.org

LX, LUXEMBOURG. A team of operators will be active as LX7I during the CQWW DX CW Contest (November 23-24th) as a Multi-2 entry. QSL via LX2A. Operators mentioned are Mike/DF3VM, Frank/PA4N, Daniel/DL5SE, Rene/DL2JRM, Aurelio/PC5A, Ron/DL3BPC, Wolf/OE2VEL and Oliver/OE5OHO. Also, visit the following Web page at: http://www.lx2a.com

OC, PERU. Operators Bud/N7CW, Jim/K6ZH and Jack/OA4TT will be active as OC4CW during the CQWW DX CW Contest (November 23-24th). All QSOs will be uploaded to LoTW on their return to the USA or sooner. Direct or Bureau cards should be available via an OQRS. Look for more QSL information to follow on QRZ.com. Outside the contest, Bud will be active as OA4/N7CW from approximately November 16-21st. See QSL info on QRZ.com.

OD, LEBANON. Sylvain, F5TLN, who has been active as OD5/F5TLN since September, will be there until April 2014. Activity has been mainly on 15 meters SSB. QSL via his home callsign direct only. Visit his Web page at: http://f5tln.voila.net

J73A QSL MANAGGER UPDATE. George, K5KG, reports: "We have a last minute volunteer to handle the direct cards for J73A. It is Steve, KU9C."

QSL RECEIVED VIA LoTW: 7P8US, 9Q5MO, A61BK, DM5TI, DP0I, EA3EZD, EI3GC, ES9C, G0WRE, G7VJR, HG7T, HV0A, I8QJU, IO5O, IT9PQJ, J3/WX7E, KG4WV, KL7RA, KM4DR, KP2/K3CT, M0BJL, MM0AMW, NL7G, OE2E, OK1SL, OP4A, PA3DZM, PA8F, PI4DX, PY2CX, RG9A, V47JA, VK3TDX, VU2NXM and XV2JJ

QSLS RECEIVED VIA MAIL: 3B8DB, 3D2MP, 5Z4/EA4ATI, CE2MVF, CN2XN, DF7EF, DL6MHG, G100RSGB, GW100RSGB, HA0NAR, OY/DL3UB, OY9R, PJ6A, T48K and V63PR

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

R0, RUSSIA (NEW REGION TO BE ACTIVATED). Operators Vasily/RA1ZZ, Aleksandr/RA3AV, Natalia/R9OOO and Yuri/UA9KW will activate the last new Russian region for the Russian's District Award Program (RDA: YA-38 and very rare GRID LOC: PP57et) as homecall/0 between November 26th and December 3rd. The QTH is Batagay-Alyta, village in the north part of the republic of Sakha, Yakutia. Activity will be on 80-10 meters using CW and SSB. QSL via the Bureau. For more details, see: http://ya38.org/en

S2, BANGLADESH. By the time you read this, members of the Mediterraneo DX Club should be active as S21ZBC between November 16-22nd. Activity will be 160-10 meters using CW, SSB and RTTY. They plan to have 6 stations on the air. The team plans to be in the CQWW DX CW Contest (November 23-24th) as S21ZBB and as a Multi-2 entry. QSL Manager is Giuliano, IK2VUC; direct, by the Bureau or use the OQRS. LoTW files will be uploaded by the end of May 2014. For more info, see: http://www.mdxc.org/bangladesh2013

S9, SAO TOME AND PRINCIPE. Operators Giovanni/IK5BCM, Giuseppe/IK5CBE and Giovanni/IK5CRH will be active as S9TF from Principe Island (AF-044) between February 1-13th (2014). Activity will be on 80-10 meters using CW, SSB and RTTY. QSL via IK5CRH.

T32, EAST KIRIBATI (Update). Members of the Russian Robinson Club are expected to be active as T32RC between December 4-11th. Tim, NL8F (T32TM), who will be there before the T32RC crew arrives, informs OPDX on Saturday [edited]: "Hi Guys.... Well T32TM is ready to depart. All radios, amps, antennas and trinkets are packed and ready for things to start. I leave

Dutch Harbor, Alaska, in the morning Sunday at 10am local time heading to Seattle to take part in the North Pacific Fishing Trade show, and then depart to Honolulu on Sunday, the 23rd, spend a day or two catching up with some of the KH6 guys before departing on the 26th to Kiramati. I will then set up the radio equipment, and then it is on from the Captain Cook Hotel. Band conditions are great so will be operating the high bands during the day light and low bands at night. The rest of the crew T32RC are also almost packed up, and we have some very good antennas for the low bands with us, especially for the 160m contest and the rest of the time. Remember, this is not a huge DXpedition and any small amount of donation to the Web site <T32-2013.com> will be very much appreciated to help with the excess baggage costs of the antennas and radios. Thanks in advance. ......T32TM and T32RC crew Tim NL8F"

T33, BANABA ISLAND (Update). The T33A DXpedition to Banaba Island (OC-018) should be QRT by the time you read this (November 18th). The team has had problems all week trying upload their logs. They mentioned on November 16th that they will "attempt to upload the final files to Clublog on Monday before pushing off for Tarawa... but the Internet connection is very questionable at any time. If it fails we'll get it done in Tarawa hoping their Internet connections are better." The OQRS by ClubLog is available and will be the preferred method to use for your QSL confirmation. Logs will be posted to Logbook Of The World (LoTW) approximately 6 months after the conclusion of the DXpedition. Direct QSLs are via W2IJ. QSLs will also be available direct by the Bureau. The log shows (as of print time) as of 0917z, November 14th, that they have worked a total of 67967 QSOs and 19309 Unique Callsigns. Breakdown is 43200/CW, 20259/SSB and 4508/RTTY. Breakdown by Continent is 353/AF, 3/AN, 22865/AS, 14196/EU, 25661/NA, 3287/OC and 1602/SA. For more details, visit the T33A Web page at: http://www.t33a.com/index.htm
The T33A DXpedition's Blog page is at: http://banaba2013.wordpress.com

TF, ICELAND. Elmar, PD3EM, is now active as TF/PD3EM as he travels across the Southern part of Iceland until November 26th. He is using a Yaesu FT-450D into a HyEndFed (10-20-40m) on a Spiderbeam fiberglass mast. QSL via his home callsign. Visit his Web page at: http://www.pd3em.com

THE BIG PICTURE (Of Expedition Operating ...). With the unspeakable behavior by amateur radio operators over the last fews weeks trying to work the many DXpeditions on the air, Rick, K6VVA, (aka The Locust), well known IOTA DXer, has put together an interesting video. He writes to OPDX about the video, " 'The BIG PICTURE Of Expedition Operating And The Direct Relationship To Anti-Social Pileup Behavior' describes the problems and also solutions to the dysfunctional behavior we unfortunately hear in DX and IOTA Pileups on the Amateur Radio bands these days." The 45 minute video can be viewed at: http://youtu.be/svLlfrFA-1E

TM1, FRANCE. Members of the KOP team (The Provins ARC/F6KOP) will enter the CQWW DX CW Contest (November 23-24th) as TM1A in a Multi/Multi effort. Operators mentioned are Kenneth/OZ1IKY, Laurent/F5PBM, Francis/F5QF, Antoine/F5RAB, Mat/F5PED, Xavier/F5NTZ, Serge/F6DZS, Stephane/F5UOW,

Bruno/F5AGB, Bernard/F9IE, Tony/F8ATS, Bernard/F5LPY, Maurice/F5IYU and Maurice/F5NQL. QSL via F6KOP, French Ref Union Bureau only.

TO4, MARTINIQUE. Rich, M5RIC, will be active as TO4C from Martinique (NA-107, DIFO FM-001, WLOTA 1041, DDFM 97) between March 26th and April 1st. Activity is usually on 80-10 meters, especially 30/17/12 meters, using SSB and RTTY. He plans to participate during the CQWW WPX SSB Contest (March 29-30th) as a Single-Op/All Band entry. QSL via M0OXO.

TU, COTE D'LVOIRE (Reminder/Update). Operators Chris/F4WBN (ex-TL0A), Paul/F6EXV and Jan/DJ8NK will be active as TU5AX, TU5XV and TU5NK, respectively, for a solidarity radio operation which will take place between November 17-30th. Activity will be on SSB, CW and RTTY, with operations on 160-6 meters (including 60m). Suggested frequencies are:
CW - 1826.5, 3524, 7024, 10104, 14024, 18084, 21024, 24894 and 28024
SSB - 3799, 5371.5/5403.5, 7070, 14190, 18150, 2190, 24950 and 28490
RTTY - 7050, 10138, 14080, 18100, 21080, 24920 and 28080 kHz
6m - 50104/CW amd 50150/SSB

QSL via their home callsigns, by the Bureau, direct or the OQRS on Clublog. The logs for TU5NK and TU5XV will be posted on LoTW shortly after the DXpedition ends. Jan informs OPDX, "The 3 operators will support the club station TU2CI and will leave equipment behind (radios and antennas), install it and train the local operators to use it in order to revive the Abidjan radio club, and assist some local hams who have strongly suffered from the civil war that hit the country sometime ago." The group's Web page is available at: http://www.premiumorange.com/tu2013

TX5, NEW CALEDONIA (Update). Freddy, F5IRO, continues to be active as FK8RO from Plum, New Caledonia (OC-032, DIFO FK-001, WLOTA 1280, DDFM 988), until February 2014. Activity has been on 80-10 meters using mostly CW and some PSK, with a Elecraft K3 and dipoles and long wire antennas. Freddy will team up with Mic/FK8IK and Sam/FK8DD, in Noumea using the special callsign TX8B (confirmed as November 14th) for the CQWW DX CW Contest (November 23-24th). QSL TX8B via FK8DD: Box 3040 Noumea, 98846 New-Caledonia. Sometime after the contest, Freddy and Mic are looking into possibly activating some FK IOTAs. Look for details to be posted on QRZ.com and Freddy's Blog page at: http://j28ro.blogspot.com
Also, watch Sam's Web page at: http://www.corail.nc/FK8DD
QSL FK8RO via F5IRO, direct or by the Bureau. Logs will be uploaded to ClubLog and LoTW sometime in March 2014.

V4, ST. KITTS (Update). Tony, N3ME, reports on QRZ.com: "Originally licensed as V47AJ in 1999 and pleased to be returning to St. Kitts (NA-104) again on January 21, 2014, for a one month vacation and holiday style operation. Our son, Bernie (W3UR) and his wife, Becky, our daughter, Kristina, and her husband Dan will be with us for part of our vacation. We will use my Elecraft K3 on 160 through 10 meters via CW, RTTY and SSB with heavy emphasis on RTTY, and I plan to operate in the CQ WPX RTTY Contest in February. QSL via Bureau, direct (please include return envelope & postage), or LOTW. Please be patient, if QSLing direct as QSL will be

ordered upon return as we will take pictures for the card while in St. Kitts."

XR0, JUAN FERNANDEZ. The XR0ZR DXpedition continues from Robinson Crusoe Island (SA-005, DICE ICE-004, WLOTA 0153, WWFF CEFF-003) until November 20th. Activity has been on 160-6 meters using CW, SSB and RTTY. QSL via IV3DSH, direct or by the Bureau. ClubLog's OQRS is available (preferred QSLing). Log will be uploaded to LoTW after 6 months. The log shows as of 1106z, November 17th, that they have worked a total of 44743 QSOs and 14511 Unique Callsigns. Breakdown is 18148/CW, 22011/SSB, 4581/RTTY and 3/PSK. Breakdown by Continent is 192/AF, 2/AN, 7360/AS, 8848/EU, 26733/NA, 442/OC and 1166/SA. For more details, visit the XR0ZR Web page or the following media links at:
Website : http://www.juanfernandez2013.com
FaceBook : https://www.facebook.com/groups/xr0zr/
Twitter : @xr0zr

XT2/XT26, BURKINA FASO (Reminder). Operators David/OK6DJ and Petr/OK1FCJ will be active as XT26DJ and XT2FCJ between November 17-26th. Activity will be on 160-10 meters including the 30/17/12 meters using CW and SSB. They also will be in the CQWW DX CW Contest (November 23-24th) as XT2FCJ. Their set up will be Elecraft K3 and Kenwood TS-480 into a Spiderbeam antenna (20/15/10m - including the WARC), a vertical (40-10m), 80m dipole and LW for 160m. QSL via OK6DJ for both callsigns. QSL methods are: the ClubLog OQRS (for LoTW - confirmed every day), direct (minimum 2 USDs or new IRC (accepted IRC that expire in 2017; QSO confirmed to LoTW every day), OQRS by the Bureau, LoTW and eQSL (confirmed 6 months) and paper QSL via the Bureau (confirmed 12 months). Their Web page is now avilable, at: http://www.mdxc.org/burkinafaso2013

XV, VIETNAM. Ishida, JA4AGA, who is part of the XV2V40J team to commemor-ation 40 years of the Japan-Vietnam establishment of diplomatic relations (QSL via JF1HJZ), was heard active as XV2AG. He plans to be active until November 30th. QSL via his home callsign.

XZ, MYANMAR (Update). By the time you read this, Zorro, JH1AJT, and a group of operators should be on the air as XZ1J from Nay Pyi Taw until November 26th. This will be the third and final run for 2013 from XZ-land. They plan to set up three to four stations, run 24/7 on 160-10 meters using CW, SSB, and RTTY. QSL: OQRS preferable. The XZ1J Web site is available at: http://www.xz1j.org
One of the operators, Dave, K3LP, has also set up a Web page at: http://www.k3lp.com/xz1j_2013.htm
There is also a live streaming or recorded broadcast of the operation available at: http://www.ustream.tv/channel/jookgroo

YL95, LATVIA (Special Prefix). In honor of the 95th anniversary of the establishment of the Republic of Latvia in November and December 2013, members of the Latvian Contest Club will use the special prefix YL95. Expect YL95AIW, YL95AJA, YL95CI, YL95CW, YL95DQ, YL95DW, YL95GQT, YL95GY, YL95KF, YL95KL and YL95UI to be on the bands. For QSL info, follow the

operators' instructions, but in most of cases use LoTW, eQSL, by the Bureau or direct to their home callsign is OK.

YN, NICARAGUA (Update). Mike, AJ9C, will once again be active as YN2CC from Granada, Nicaragua, between November 19-27th. Activity will be on 160-6 meters using CW, SSB and RTTY. Also, Mike will be in the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or direct and by the Bureau to his home callsign. He will activate an OQRS on ClubLog.

Z8, SOUTH SUDAN (Press Release by OH2BH; dated November 12th) [edited]:
"THE Z81X GROUP IS DEPARTING TODAY, WEDNESDAY AT 1100 UTC -- The group consists of DL3DXX, N7NG, PB2T, OH0XX, OH2BH, OH2PM and OH6KN. Upon their arrival they will team up with Z81B and Z81D and start doing two projects simultaneously. They will set up their low-band antenna field and start a series of workshops for the government of South Sudan. At least on one station should be operational by late Friday evening. Their selected low-band operating frequencies are 1826.5 KHz and 3523 KHz. On the other house-hold bands 7 MHz thru 28 MHz you can find them at suitable portions of those bands. Check Internet spotting for current frequencies. As the operation will be running for two-weeks, SSB operation on low-bands will come on-line later during the stay □ specifically during the 2nd weekend with CQWW on CW. During the contest there may be as many as three single-band stations activated. OQRS is functional at Z81X at QRZ.com. All support for the high freight cost of the equipment will be highly appreciated.
Z81X via OH0XX."

ZL7, CHATHAM ISLAND. Franz, OE2SNL, will be active as ZL7/OE2SNL from Chatham Island (OC-038) between March 13-26th (2014). Activity will be on 80-10 meters, using CW and with a focus on RTTY. QSL via OE2SNL. For more QSL details, see <www.zl7.oe2snl.at> and/or <www.oe2snl.at>.

21878. RE: [DX-IS] XR0ZR via the poles

Yahoo group: DX-IS (2013)
Date: 2013-11-18 05:13:09 UTC
From: Lance Martin
Topic: 21862 Message: 21878

I guess most of you are sick of hearing XR0ZR on the bands by now...

Know that all VK6s are really struggling here with the lack of propagation to them.
When I consider that I didn't hear anything from CE0Z team in 2006, I guess I can count myself very fortunate to have one QSO this time.

Interestingly W6EL propagation software shows that 17m and 15m are the best possibilities and this has been the case!
The best signals that have come through so far are S5 on one occasion, mostly S3 or below long path, it seems the south pole refuses to be open when they are on air...

Someone did mention that XR0ZR had a hill to the south, but this hasn't been confirmed.....

I have a couple more opportunities around 1200z onwards to get an SSB QSO...

Good luck to all,

73, Lance - VK6DU

To: DX-IS@yahoogroups.com
Subject: Re: [DX-IS] XR0ZR via the poles

Amsterdam Is will be interesting for me. It is not a true polar path for me as the beam heading is 126 degrees. Still, it is the further DXCC entity from my QTH, and will be a new one for me if I can get it. S2 and VU7 are both going to be on this month, and I need both, but they are polar paths and a very difficult area to work from my QTH, especially since I don't have a beam any longer. Still trying to fix that. Did get T33A on 40m this AM for a new band country.

Subject: RE: [DX-IS] XR0ZR via the poles

Hi John
Thanks for asking, K9W and T33A were both romping in here all over the shop. So after the piles had settled down over the first day, they were both relately easy to get.
Location and propagation really does make a difference.
I am guessing CE0Z for us, is like VU7, 4S or even VK9C from you not an easy gig.
Amsterdam is going to be interesting for you guys.
Good luck,
73, Lance - VK6DU

Subject: Re: [DX-IS] XR0ZR via the poles

Good luck Lance with the CE0Z. How has Wake Island been to work from VK? Probably about as easy as XR0ZR has been for the US to work, since it is a transequatorial path, as CE0 is for us. Got them for new band country on 30, 15, and 12, and for a new RTTY country. Only worked Wake on 12 and 15 but it was a new CW country. They seem to hear really well.

Subject: [DX-IS] XR0ZR via the poles

Well you are not going to believe this, but, I still have not been able to make a QSO with XR0ZR!
I have probably only spent 1 hour calling so far collectively on 30/20/17/15m so early days yet.
Weak sigs (polar path), QRM/QRN and piles have made this one and incredible challenge.
Just need the polar caps to open properly.... Lots of east Coast VKs have gotten through, so the guys are doing a good job.

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1137.1
BID: $OPDX.1137.1
November 18, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX
Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet
Clusters Network OH2BH, OH2BN and JA1TRC for the following DX information.

XZ1J (Press Release). XZ1J - Update Nov. 17, 2013:
The XZ1J Team members are operating from two Camp Site locations about
300' apart; CW Camp and SSB Camp.
The SSB Camp has two stations; one with a Spider Beam covering all bands
and the 2nd station is using 1/4 vertical antennas for 12, 17 and 40 meters.
The CW Camp has three stations; the 1st station has a Tri-Band Beam (10,
15 & 20) and the 2nd station is using 1/4 verticals for 40, 30, 17 and
12 meters plus an Inverted L for 160 Meters (abt 80 vertical and 47'
hortizonal). The third station is mainly used for 30 meter CW and 20
meter RTTY when time permits.
Our efforts on 160 meters started last night and ended this morning
around 6:00 AM with many QSO's in the log. We'll be on 160 and/or 80
meters all night; sunset to sunrise.
During our second day, we had to move the SSB Camp site to reduce the
S9 noise level from a local power line. The new location has minimum QRN.
This evening, we'll update our Operating Frequency Chart to eliminate
some of the interference with several other DX-peditions. This data will
be updated to the http://www.xz1j.org/ website and http://www.k3lp.com/xz1j_2013.htm
Both Zorro and Jay have our team working hard to get the QSO's in the
log. QSLing is via Zorro's QTH or http://www.qrz.com/ for XZ1J.
73's..... XZ1J Team

Z81X JUBA, SOUTH SUDAN (Two Press Releases).....

NEWS FROM SOUTH SUDAN, SUNDAY 17-NOV-2013

What a wonderful occasion it was when twenty-one Ministry of Telecommuni-
cation and Postal Services administrators, led by Director General Meshack
Madol Yol, arrived for a full-day Amateur Radio training session organized
by International Amateur Radio Union (IARU) R1 and Radio Arcalas Mission
Goodwill South Sudan. The session was conducted by Hans, PB2T, IARU R1
President together with Wayne, N7NG and Martti, OH2BH. The memorable

occasion took place at the European Union compound in the capital Juba.
A joint working group was formed and the day was capped with the interview
by local broadcasters in the nation's capital.
The program is sponsored by IARU R1, ARRL, EUDXF, DX University and
YASME Foundation. The next day and with some 600 QSOs under his belt,
Hans departed to resume his subsequent duties at ITU in Geneva.
The low-band operation also got underway for the first night with no
receiving antennas but 160M and 80M verticals gave a good start, with a
full footprint for the United States and the first 50 JA station logged
on the first shot indicating the same for the Far East. Now both directions
are also covered by beverages. It is now expected that 160, 80 and 30M will
be active every night on CW for the next six days and then providing an
80M SSB toward the weekend.
The team of Dietmar, DL3DXX; Wayne, N7NG; Pertti, OH2PM; Olli, OH0XX,
Martti, OH2BH and Veijo, OH6KN with valuable support from Diay, Z81D and
Massimo, Z81B are at the controls.
They use three Yaesu FTdx3000s with no interaction between the bands
in operation. Yaesu is their radio provider while Acom and Italian SPE
amps are employed on the low bands.
With the low-band QSO total now exceeding 2000, it is also noted that
both nights were different with regard to the overall propagation profile.
Therefore one bad night may be followed by a good night, requiring a sharp
ear and great patience. So far the split is Europe 67%, NA 19% and ASIA 13%.
Logs are now uploaded at ClubLog for first two days along with Z81X
QSOs of May. 2013 at www.qrz.com/db/Z81X.

18-NOV-2013

LAST NIGHT AT Z81X

It may be interesting to note that some infrastructure is still missing
in the Republic of South Sudan. There is no electricity grid or running
water in the capital. Also, the postal system is not yet established and
many issues need to be improvised. Getting fuel for the generator is an
arduous task and more recently fuel has been in short supply in the whole
country.
There was to be enough fuel for the generator but running it was ruled
out suddenly. It was 3AM just at the peak of low-band action when elec-
tricity was switched off, leaving the operators and the pileup idling.
This happened when the going neared its climax.
So, negotiations are underway and we kindly ask for your understanding.
Sometimes these basic services are taken for granted. The team are cramped
in three small huts with all their belongings, including the radios, but
hopefully we will soon gain access to larger premises as promised initially.
It is extremely hot and thunderstorms are expected to bother us during
the week; hence lightning arrestors are mounted on all cables. No equipment
or men are lost in the process and all radio gear remains in good shape.
The antenna farm is soon complete and we just need more fuel to keep
running. Why don't we go to the petrol station? We have not seen one with
a supply of diesel fuel.

In life, things are relative --- and in DX even more so. Hopefully see you tonight!

Team at Z81X

SIDC SOLAR BULLETIN 18 Nov 2013, 1111UT
SIDC FORECAST (valid from 1230UT, 18 Nov 2013 until 20 Nov 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 18 Nov 2013 10CM FLUX: 168 / AP: 007
PREDICTIONS FOR 19 Nov 2013 10CM FLUX: 164 / AP: 007
PREDICTIONS FOR 20 Nov 2013 10CM FLUX: 162 / AP: 007
COMMENT: The risk for an isolated M class flare still exists from NOAA ARs 1893 and
1897, but C flares are more likely to occur in the coming 48 hours, from
these regions and ARs 1899 and 1900. The past 24 hours were rather low in
terms of flaring activity, with only moderate C class flares. We expect
quiet geomagnetic conditions to prevail for the next 48 hours. Current
interplanetary conditions are quiet.

21881. FT5Z Propagation to Central US

Yahoo group: DX-IS (2013)
Date: 2013-11-19 00:44:57 UTC
From: John Geiger
Topic: 21881 Message: 21881

I am thinking of getting a 15m Moxon antenna soon, mainly for a few DXpeditions I need as I can't find much else I can afford right now that wouldn't require a heavier duty rotor as well (more $$$). For those of you with the propagation prediction programs, will there be much of an opening between W5 land and FT5Z next january? 15m is one of my favorite bands, and I have worked quite a few DXPeditions and tougher paths on it.

John AF5CC

PREDICTIONS FOR 21 Nov 2013 10CM FLUX: 155 / AP: 007
COMMENT: NOAA AR 1893 produced an X1.0 flare on Nov. 19, peaking at 1026 UT. It was
accompanied by a metric type II burst, and an EUV coronal wave. A CME was
associated with this event, as observed by COR2 A, but only one image is
available and its speed is currently unknown. A preliminary analysis, which
will be updated as new information comes in, makes this event unlikely to
be geoeffective. Currently there is no consequence on the proton flux, but
a rise in coming hours is not impossible. We foresee active conditions to
prevail for the next 48 hours, with risk of M flares from NOAA ARs 1893 and
1897. NOAA AR 1893 developed a delta configuration (which probably explains
the X flare of this morning), and an isolated X class flare is not
excluded. Until further analysis is performed on the CME linked to the X
class flare of this morning, we expect quiet geomagnetic conditions to
prevail for the next 48 hours. A CME spotted on the South-East limb on Nov.
19, around 0430 UT (LASCO C2) appears to be backsided. Current
interplanetary conditions as measured by the ACE spacecraft are very quiet.

Try using more power, bigger antennas and a little higher SSN in the
setup to see if there's a chance, then listen anyway. The predictions
are averages and sometimes we get lucky! :-)

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31120
SIDC SOLAR BULLETIN 20 Nov 2013, 1211UT
SIDC FORECAST (valid from 1230UT, 20 Nov 2013 until 22 Nov 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 20 Nov 2013 10CM FLUX: 145 / AP: 005
PREDICTIONS FOR 21 Nov 2013 10CM FLUX: 140 / AP: 007
PREDICTIONS FOR 22 Nov 2013 10CM FLUX: 140 / AP: 007
COMMENT: Solar activity has been rather moderate during the past 24 hours, with only
weak C class flares since the X class event of yesterday. The 10 MeV proton
flux rose sharply soon after the flare but did not cross the event
threshold. Active conditions are expected for the next 48 hours, with still
a risk for an isolated M class flare from NOAA AR 1893, and to a lesser
extent NOAA AR 1897. We expect quiet geomagnetic conditions to prevail
for the next 48 hours. The CME associated with the X1.0 flare of Nov. 19 is
not expected to be geoeffective. Current ACE measurements reveal quiet
interplanetary conditions.
TODAY'S ESTIMATED ISN : 059, BASED ON 13 STATIONS.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31121
SIDC SOLAR BULLETIN 21 Nov 2013, 1211UT
SIDC FORECAST (valid from 1230UT, 21 Nov 2013 until 23 Nov 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 21 Nov 2013 10CM FLUX: 140 / AP: 001
PREDICTIONS FOR 22 Nov 2013 10CM FLUX: 138 / AP: 001
PREDICTIONS FOR 23 Nov 2013 10CM FLUX: 138 / AP: 001
COMMENT: NOAA AR 1893 produced a M1.2 flare on November 21, peaking at 1111 UT. Very
few information is currently available on this event, but it seems that,
besides a weak type III burst no other radio emission is associated with
it. Coronagraphic observations are not yet available, but SDO data hint at
a CME signature. Owing to the position of AR 1893 on the west limb, a CME,
if confirmed, would very likely not be geoeffective. We foresee mostly
eruptive conditions for the next 48 hours, with C class flares possible
from NOAA ARs 1893, 1897 and 1899. A small sunspot group emerged north of
AR 1899, but it is too soon to evaluate its flaring capacity for the
forecast period. An extra isolated M flare is not completely excluded from
NOAA AR 1893 before it rotates behind the west limb. We expect quiet
geomagnetic conditions for the next 48 hours. All CMEs observed in the past
24 hours appear to be non geoeffective, including a partial halo CME,
observed by LASCO on Nov. 21 at 0125 UT (backside event).
TODAY'S ESTIMATED ISN : 051, BASED ON 08 STATIONS.

QST de W1AW
DX Bulletin 47 ARLD047
>From ARRL Headquarters
Newington CT November 21, 2013
To all radio amateurs

SB DX ARL ARLD047
ARLD047 DX news

This week's bulletin was made possible with information provided by KX9X, NC1L, RA1ZZ, VU2DSI, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

BARBADOS, 8P. Tom, W2SC is QRV as 8P5A in the CQ World Wide DX CW contest as an All Band entry. QSL via NN1N.

ZAMBIA, 9J. Niko, S53A is QRV as 9J3A from the Kafue National Park until November 26. This includes an entry in the CQ World Wide DX CW contest as a Single Op/All Band/Low Power entry. Before and after the contest, he will also be operating mobile with QRP power. QSL via S57S.

EAST MALAYSIA, 9M6. Saty, JE1JKL is QRV as 9M6NA from Labuan, IOTA OC-133. Activity is on all bands. He will also be active in the CQ World Wide DX CW contest. QSL to home call.

CHINA, BY. Operators Dale, BA4TB, Xu, BA8IK, He, BH4RQU and Tony, BH4SQE will be QRV as B4TB as a Multi Operator entry in the CQ World Wide DX CW contest. QSL via BA4TB.

URUGUAY, CX. Jorge, CX6VM plans to be QRV as CW5W in the CQ World Wide DX CW contest as a Single Band entry on 10 meters. QSL via operator's instructions.

CAPE VERDE, D4. Members of the Monteverde Contest Team will be QRV as D4C in the CQ World Wide DX CW contest as a Multi/Multi entry. QSL via IZ4DPV.

TAJIKISTAN, EY. Nodir, EY8MM will be QRV from Dushanbe on 160 meters in the CQ World Wide DX CW contest. QSL via K1BV.

LEBANON, OD. In celebration of the 70th anniversary of Lebanon's independence, Lebanese stations may use the special prefix OD70

until the end of November.

EASTERN KIRIBATI, T32. Tim, NL8F will be QRV as T32TM from Kiritimati, IOTA OC-024, from November 26 to December 11. After this activity, he will be active with the T32RRC team. QSL T32TM via K8NA.

PALAU, T8. Masashi, JL1FUQ is QRV as T88GJ until November 24. Activity is on 20 to 6 meters using SSB with some RTTY and PSK as his work schedule permits. QSL to home call.

TURKEY, TA. Operators TA2TX, LZ1NK, LZ1CNN, LZ2UW, LZ3YY, LZ3FN, LZ3ND and LZ5VK are QRV as TA0/home calls from Bozcaada Island, IOTA AS-099. Activity is on the HF bands using CW and SSB. They will be active as TC0A in the CQ World Wide DX CW contest. QSL TC0A via TA2TX and all others to home calls.

BENIN, TY. Wim, ON6DX is QRV as TY1TT until December 3. Activity is on 40 to 6 meters using CW, SSB and RTTY. QSL to home call.

ASIATIC RUSSIA, UA0. Operators Vasily, RA1ZZ, Aleksandr, RA3AV, Natalia, R9OOO and Yuri, UA9KW will be QRV as home calls/0 from Batagay-Alyta, a village in the north part of the republic of Sakha, Yakutia. Activity will be on 80 to 10 meters using CW and SSB. QSL via bureau.

MICRONESIA, V6. Sho, JA7HMZ and Masa, JA7ZF are QRV as V63DX and V63ZF, respectively, from Kolonia, Pohnpei Island, IOTA OC-010, until November 30. Activity is on 40 meters and higher using all modes, including SSTV and JT65. They plan to be an entry in the CQ World Wide DX CW contest as well. QSL direct to home calls.

INDIA, VU. Special event station AU2JCB is QRV until December 10 to commemorate the birth of Indian scientist Acharya Jagadish Chandra Bose. Activity is on 80, 40, 20, 15, 10 and 6 meters using SSB with FM on 10 and 6 meters. QSL direct via VU2DSI.

LAKSHADWEEP ISLAND, VU7. A large group of operators are QRV as VU7AG from Laccadive, IOTA AS-011, until December 10. Activity is on 160 to 10 meters using CW, SSB and RTTY. QSL via W4VKU.

NICARAGUA, YN. Mike, AJ9C is QRV as YN2CC until November 27. Activity is on 160 to 6 meters using CW, SSB and RTTY. He will be active in the CQ World Wide DX CW contest as a Single Op/All Band/Low Power entry. QSL to home call.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC Credit: Prince Edward and Marion Island, ZS8C and ZS8Z, Current operation for 2013 through May 2014.

THIS WEEKEND ON THE RADIO. The CQ Worldwide DX CW Contest, NCCC RTTY Sprint, QRP CW Fox Hunt and the NCCC Sprint are all on tap for this upcoming weekend. The SKCC CW Sprint, QRP CW Fox Hunt and

CWops Mini-CWT Test are all scheduled for November 27. Please see November QST, page 87, and the ARRL and WA7BNM contest web sites for details.

21890. Cluster OK again

Yahoo group: DX-IS (2013)
Date: 2013-11-22 03:19:28 UTC
From: Paul M Dunphy
Topic: 21890 Message: 21890

Those who use the VE1DXI DX Cluster node (ve1dxi.no-ip.ca:23) may have noticed it was sporadically off and on today, with a 2-4 hour outage around 19:00 -- 03:00 UTC. This was due to prolonged and intermittent Internet connectivity problems with my ISP. This has been fixed and VE1DXI is back on line.

Sorry for the inconvenience . . . I try for 24/7 service, but some things are beyond my control.

73, Paul VE1DX

21891. Re: [DX-IS] Cluster OK again

Paul,

I tried to add your cluster to my Logger32 cluster list (remote host: ve1dxi.no-ip.ca:23, port: 599), but when I tried to connect I received a telnet socked error 11004, valid name, no data record of requested type. Are my entries correct? Thanks.

Ken

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31122
SIDC SOLAR BULLETIN 22 Nov 2013, 1111UT
SIDC FORECAST (valid from 1230UT, 22 Nov 2013 until 24 Nov 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 22 Nov 2013 10CM FLUX: 140 / AP: 001
PREDICTIONS FOR 23 Nov 2013 10CM FLUX: 135 / AP: 001
PREDICTIONS FOR 24 Nov 2013 10CM FLUX: 135 / AP: 001
COMMENT: Solar activity is expected to be at most eruptive for the next 48
hours with risk for C class flares from NOAA ARs 1897 and 1899. The M flare
of Nov. 21 was associated with a CME, but it does not appear to be
geoeffective. Quiet geomagnetic conditions are expected for the next 48
hours. Current interplanetary conditions are very quiet.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW DX CW Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 16th-November, through Friday, 22nd-November there were 229 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9X, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, F, FG, FJ, FK, FM, FO, FP, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T30, T33, T7, TA, TF, TG, TI, TJ, TK, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VR, VU, VU7, XE, XT, XU, XX9, XZ, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS ISLAND. Operators Johnny/SM6JBC and Jan/SM6GOR are once again active from Mauritius Island (AF-049) as 3B8JB and 3B8/SM6GOR, respectively, until December 16th. Activity will be on 20-10 meters, possibly 30 meters (lots of interference from electronic devices). Look for Johnny to be on SSB, PSK31 and PSK63, and Jan will operate mainly on CW. They will use a R7 GP and test some loop antennas as well. QSL via their home callsigns.

3W, VIETNAM. Eddy, XV1X, will be active as 3W1T from Hanoi during the CQWW DX CW Contest (November 23-24th) as a Single-Op/Single-Band (10m)/ High-Power entry. He states, "mainly 10m for North America: Short Path 0000z-0130z and Long Path 1300-1500z". QSL via RW6HS.

6Y, JAMAICA. "The Daily DX" reports that a group of operators from Russia and Kazakhstan are now active as 6Y7W from Jamaica (NA-097). The group will be in the CQWW DX CW Contest (November 23-24th) as a Multi-Op entry. QSL via UA8DX.

6Y, JAMAICA. Valery, UN7LZ, is now active as 6Y5/UN7LZ from Jamaica (NA-097) until November 30th. Activity has been mostly on 80/40/15/10 meters CW. QSL via his home callsign.

7P, LESOTHO. There have been some reports stating that Bernie, ZS4TX, is now active as 7P8Z from Lesotho until November 30th. This is NOT true according to Bernie. He informs OPDX, "It was only a one day [afternoon] operation to make use of a rare late season 6m opening we had to Europe for 2 days in a row. I worked about 50 Southern EU stations in the 2 hour opening. I am back in ZS4. Lesotho is only a 120km drive from here." QSL via ZS4TX.

AFRICAN TOUR (Update). Wim, ON6DX (ex-ON4CIT), who was active as 5V7TH this past week from Togo (Grid Square JJ06rf), was expected to be active from Benin this coming week. However, it was reported on "DX-World.net" that Wim made it to Coutenou, Benin, to collect his TY1 callsign and papers, but when he arrived at the ATRPT building to collect them, he had NO luck. Apparently, the building burned down a week ago, so he had to submit another application. It will take 1 or 2 weeks (Africa time) to process.

AFRICAN TOUR (Update). Operators Mathias/DJ2HD and Ulmar/DK1CE will once again be active as V5/DJ2HD and V5/DK1CE from Namibia between December 14th and January 18th (2014). This is just one part of their 4x4 trip through different African countries. Activity will be holiday style on CW, SSB and RTTY, but will also include a SSB entry in the DARC 10m Contest (January 14th). During this time frame, Mathias and Ulmar will also travel to and be active as 7P8DJ and 7P8CE, respectively, from Lesotho between December 22-24th. Their plans also include to be active from South Africa (as ZS/DJ2HD and ZS/DK1CE) and one more country to be announced later, but no scheduled days have been provided. QSL all call-signs via their home callsigns, direct or by the Bureau.

AH0, MARIANA ISLANDS. Members of the Saipan BBQ Contest Club will be active as AH0BT during the CQWW DX CW Contest (November 23-24th) as a Multi-2 entry. QSL via 7L1FPU, direct, by the Bureau or LoTW. PLEASE DO

NOT QSL via the KH0 Bureau. Operators mentioned are Kuny/7L1FPU (W1FPU), Moto/JE1NDE (W1NDE), Mac/JJ2QXI (K2QXI), Hiroyuki/JG7PSJ (KW2X) and Tomo/KI6LAO.

AU2, INDIA (Special Event). Look for special event station AU2JCB to be active between November 22nd and December 10th. Activity will be on 80-6 meters SSB, SSTV, PSK and FM. Suggested frequencies are (depending on the propagation): 3710, 7040, 7150, 14220, 14250, 14310, 21280, 21310, 28490, 28510 and 28545 kHz. FM mode: 50800, 51500 and 29700 kHz. If higher bands are open, operations will be on those bands. The operator will be Surabhi, VU2DSI. QSL direct (with 2 IRCs) to VU2DSI. Operations are to celebrate the 155th anniversary of the birth (November 30th) of Sir Jagadeesh Chandra Bose, India's great scientist and inventor who they consider the "Father of Wireless Communication". For more details, see the following Web page at: http://www.qsl.net/vu2msy/JCBOSE.htm

CN2, MOROCCO. Jim, W7EJ, will once again be active as CN2R during the CQWW DX CW Contest (November 23-24th) as a Single-Op/Single-Band (15m)/High-Power entry. He will be here until November 30th. QSL via W7EJ.

CO, CUBA. Frank, CO2IR, will be active from Cuba (NA-015, WW Loc. EL83tc) during the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Bands/QRP entry. QSL via direct to EB7DX as listed on QRZ.com.

CR3/CT9, MADEIRA ISLANDS. The CR3L contest station in Santana on Madeira Island (AF-014) will be activated during the CQWW DX CW Contest (November 23-24th) as a Multi-2 entry. Operators mentioned are Ulf/DL5AXX, Frank/DL8WAA, Ulrich/DJ2YA, Tom/DL5LYM, Arno/DL1CW, Falk/DK7YY, Rudolf/DM2XO and Lars/DF1LON. QSL CR3L via DJ6QT. Activity by the operators outside of the contest signing /CT9, please QSL via their home callsign. Visit the CR3L Santana, Madeira Island, Web page at: http://www.cq3l.de

D4, CAPE VERDE. Girts, YL2KL, is now active as D44TLL from Sao Vicente Island (AF-086) until November 30th. Activity has been mainly 30 meters CW. QSL D44TLL via YL2KL. ADDED NOTE: Girts is part of the D4C CQWW DX CW Contest team (Multi-Op entry).

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
ZS8C and ZS8Z ☐ Prince Edward & Marion Islands; Current operation for 2013 through May 2014.
Please Note: Bill states, "2 student hams are expected to join in upon completion of their licensing, which will make it four (4) operators. I'll update this approval when I have more information."

E7, BOSNIA-HERZEGOVINA. Operators Richard/9A1TT, Chris/9A5K, Ranko/E70R, Vlado/E70T, Zoran/E76C, Zeljko/E77C, Braco/E77DX, Rob/E77E and Radomir/E77W will be active as E7DX during the CQWW DX CW Contest (November 23-24th) as a Multi-Single entry. QSL via E77E. For more info on their contest station, see: http://www.e7dx.com

EF6, BALEARIC ISLANDS. Bernd, VK2IA, will be active as EF6B from Ibiza Island (EU-004), QTH and station of Josep, EA6BF, during the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band entry. QSL via LoTW.

EF8, CANARY ISLANDS. Heijo, DJ1OJ, will be active as EF8O from the Canary Islands (AF-004) during the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band entry. QSL via DJ1OJ.

EY, TAJIKISTAN (Cancelled). Nodir, EY8MM, from Dushanbe, who was expected to be active during the CQWW DX CW Contest weekend, has cancelled his activity because of the flu.

FR, REUNION. By the time yo read this, Jean-Pierre, F5AHO, will be active as FR/F5AHO from Reunion Island (AF-016) until December 4th. Activity will be on 20/17/15/10 meters using SSB and the Digital modes. QSL via F5AHO, by the Bureau or direct.

GJ/MJ0, JERSEY. Mat, MJ0ASP (aka-F5SHQ), will be active as GJ2A during the ARRL DX CW Contest (February 15-16th) as a Single-Op/All-Band entry. QSL via the LoTW.

HC1, ECUADOR. Operators Tom/K3WT, Bill/W0OR and Ron/N0AT will be active as HC1WDT during the CQWW DX CW Contest (November 23-24th) as a Multi-Single entry. QSL via N0AT, or via ClubLog or LoTW. Operators will be active outside of the contest as HC1/homecall. QSL portable callsigns via their home callsigns.

HC2, ECUADOR. Sergey, R4WAA, is now active as HC2TWA until November 27th. Activity will be on 40-10 meters and include the CQWW DX CW Contest (November 23-24th) as a Single-Op/Single-Band (??) entry. QSL via his home callsign.

HC2/HD2, ECUADOR. Yuri, VE3DZ, will be active as HC2TDZ between now and November 25th. Activity will include the CQWW DX CW Contest (November 23-24th), possibly signing HD2T in the Contest, as a Single-Op/All-Band/ High-Power entry. QSL via VE3DZ.

HQ2, HONDURAS. Dan, HR2DMR, will be active as HQ2W during the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band/Low-Power entry. QSL via KD4POJ.

IOTA NEWS.....
AF-032. The 5I0DX callsign has been applied for the 2014 DXpedition to Zanzibar Island. The arrival of the license is expected at the end of November. Once it is official, details and a Web page will be announced. The DXpedition will also be a humanitarian operation with donations of medicines to the "Italy Day Hospital". QSL via IK7JWX.

AS-024. Kenji, JA4GXS, plans to activate two islands in this IOTA island during the first two weeks of December as JA4GXS/6.
Look for him to activate:
Hateruma Island (WLOTA 0497); December 5-6th
Yonaguni Island (WLOTA 1035); December 8-9th

Activity will be on 40/30/20/17/15 meters using CW and SSB.
QSL via his home callsign, direct or by the Bureau.

IW9, ITALY. Look for IW9FRA to be active from Sicily (EU-025, IIA SC-001, MIA MI-107, WLOTA 1362) during the CQWW DX CW Contest (November 23-24th) as a Multi-Single entry. They will be using a new antenna set up improvement for the contest. Operators mentioned are Serafino/IT9CKA, Antonio/IT9DSA and Sal/IW9FRA. QSL via IW9FRA.

K9W WAKE ISLAND UPDATE (60m). Joe, W8GEX, who was one of the operators of the K9W DXpedition, reports: "Sorry to report but as you know 60m was not very good for us. Thanks for all the reports on email, but I only got two in the log: KH2L and K7CA. I was very disappointed as I had hoped for a lot of 60m Q's. I was only able to read your email after my shift was over. On this note I do want to thank everyone for the QSO's on all the other bands. My equipment was a K3 to a Inverted Vee. The radio and antenna worked great, but I had a solid S9 to 15 over noise level most of the time. On channel 5, we had the radar which is very loud in the Pacific. My noise may have been generated from the island power plant located about 1000 feet away. Thanks for all your efforts in getting up late at night and listening for my signal. I understand as I have done it myself many times."

KH8, AMERICAN SAMOA (Update). By the time you read this, the W8A team will be active as N8A for the CQWW DX CW Contest (November 23-24th) and be active as a Multi-2 entry. After the contest the team will switch back to W8A and be active until November 26th, before heading to Samoa (5W). From Samoa, some of the operators will be active as 5W8A. Activity should be on 160-10 meters using CW, SSB and RTTY. Suggested frequencies are available online at: http://www.n8a.eu/frequencies
QSL all callsigns via ZL3CW. For more details and updates, watch the N8A Web page at: http://www.n8a.eu
Also, watch their FaceBook page at:
https://www.facebook.com/N8a2013AmericanDXpedition

LY7, LITHUANIA. Members of the Kaunas University of Technology will be active as LY7A during the CQWW DX CW Contest (November 23-24th) as a Multi/Multi entry. QSL via the LoTW.

MZ, SCOTLAND. Ian, G3WVG, will be active as MZ5B from Eshaness, Shetland Island (EU-012, IOSA SH01, SCOTIA SI11, ARLHS SCO-075, BARLS A3838, WLH GM-026, WLOTA LH-0867, WAB HU27) during CQWW DX CW Contest (November 23-24th) as a Single-Op/Single-Band (80m) entry. QSL via LoTW or to G3TXF, direct or by the Bureau.

OH0, ALAND ISLAND. Operators Jukka, OH6LI, will be active as OH0V from Aland Island (EU-002) during the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band entry. QSL via OH6V or LoTW (preferred). For a view on the antennas, see several OH0V videos on Youtube.com.

P3, CYPRUS. Operators Jack/R2AA, Oleg/R7LP, Dmitry/RT5K, Tony/RT9T, Vladimir/RV1CC, Oleg/UA9CDV, Mike/UA9CTT, Ruslan/UA9ONJ and Mikhail/

UA9PM will be active as P3N during the CQWW DX CW Contest (November
23-24th) as a Multi-Single entry. QSL via RW3RN.

QSLS RECEIVED VIA THE BUREAU: 3A/EA1DVY, 3B8/EA3BT, 5P4MG, 9X0R, AO8GLH, C21TI, C36CT, C37N, CO2IZ, CU3HQ, DL5ANT, DR1A, E4X, E74A, EA6AFR, EA6AM, EA6AR, EA6BB, EA6OM, EA6SA, EA6TS, EA6TT, EA6ZS, EA8AF, EA8AHM, EA8AJY, EA8BZH, EA8CBJ, EA8CEQ, EA8CNR, EA8CQN, EA8CVA, EA8CYR, EA8CYQ, EA8CZT, EA8DX, EA8EU, EA8GP, EA8KL, EA8LP, EA8LS, EA8MT, EA8PE, EA8TG, EA8TL, EA8VD, EA8YT, EB6ADS, EC8AFM, ED8DD, EF8AKN, EF8FLH, HI7/EA7AAW, HK0/DL5YWM, OE12M, OX/OK1JST, PJ7PT, S04R, S57DX, SV9/EA1SA, ST0R, UA1CE, KH6ND, V21ZG, VP6T and ZF2LC

S2, BANGLADESH. Just a reminder that the members of the Mediterraneo DX Club signing as S21ZBC will be active as S21ZBB during the CQWW DX CW Contest (November 23-24th) as a Multi-2 entry. The S21ZBC/S21ZBB will be active until November 26th. QSL Manager is Giuliano, IK2VUC; direct, by the Bureau or use the OQRS. LoTW files will be uploaded by the end of May 2014. For more info, see: http://www.mdxc.org/bangladesh2013

S7, SEYCHELLES. Igor, UA3DJY, will be active as S79ACR from Mahe Island (AF-024) for one month beginning mid-December. Activity will be holiday style on the HF bands. QSL via his home callsign.

T30, WEST KIRIBATI (Correction/Reminder). Operators Ted/JF1CCH and Kazu/JA1FUF will be active as T30TS and T30KN from West Kiribati between November 28th and December 4th. Activity will be on the HF bands (all mostly 40-10m) and possibly 6m, using CW, SSB, RTTY and PSK. Ted will operate mainly on CW and SSB, while Kazu will operate mainly RTTY and PSK. They will use 100 watts into a dipole. QSL via their home callsign, direct, by the Bureau and eQSL. NO LoTW.

V5, NAMIBIA. Dietmar, DL3DXX, will be active as V5/DL3DXX between December 24th and January 8th. Activity will be on 160-10 meters using CW and SSB. QSL via DL3DXX.

V5, NAMIBIA. Ulmar, DK1CE, will be active as V5/DK1CE between December 31st and January 6th. Activity will be holiday style on 160-10 meters using CW. QSL via DH3WO.

VE2/VC2, CANADA (Zone). Marko, N5ZO, is now active as N5ZO/VE2 from Canadians' CQ Zone 2 until November 25th. He is expected to be in the CQWW DX CW Contest (November 23-24th) as VC2R. QSL N5ZO/VE2 via OH0XX and VC2R via VE2IM, both either via the RAC QSL Bureau or LoTW.

VK6, AUSTRALIA. Kevin, VK6LW, will be active during the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band entry. QSL via VK6IR.

VP2V, BRITISH VIRGIN ISLANDS. Ted, SP3IPB, is once again active as VP2V/SP3IPB from British Virgin Islands (NA-023) possibly until November 30th. Bands and modes of activity were not provided. QSL via his home callsign.

VU2, INDIA. Prasad, VU2PTT, will be active during the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band/High-Power entry. QSL via the LoTW, by the Bureau or direct using the info on QRZ.com.

VU7, LAKSHADWEEP ISLANDS (Update). A team of operators are now active as VU7AG from Agatti Island (AS-011) until December 10th. Activity will be on 160-10 meters using CW, SSB and RTTY. Suggested frequencies listed in OPDX.1136. The pilot stations have been announced: Stan/KH6CG (Chief Pilot + Asia/OC), Gary/DF2RG (EU), Luc/LU1FAM (Central & South America), Mark/N1UK (NA East Coast) and Rich/KY6R (NA West Coast). They also have an ePilot on their Web site through which DXers can get in touch with them. The Propagation page now includes custom propagation charts thanks to Stu, K6TU, and his wonderful propagation service.
Another callsign has been issued for demonstration purposes on Kavaratti Island VU7KA. This would be used only briefly when team members make presentations to the local administration in Kavaratti and educate them on amateur radio. QSL Manager is Krish, W4VKU, direct or by the Bureau (see details on the Web page). An Online QSL Request System (OQRS) will be available for all your QSL requests. OQRS will be enabled soon after the expedition. For Logbook of The World (LoTW): QSOs would be uploaded to LoTW in approximately 6 months time. The following Web page has been set up and contains bios of operators, QSL details, frequencies and a survey. Visit the VU7AG page at: http://www.vu7ag.info

XZ, MYANMAR (Update). Activity by XZ1J continues from Nay Pyi Taw until November 26th. As this was being written on November 22nd, the log shows 38919 QSOs with 13676 unique callsigns. Breakdown is 21158/CW and 17761/SSB. Remember, this will be the third and final run for 2013 from XZ-land. They plan to set up three to four stations, run 24/7 on 160-10 meters using CW, SSB, and RTTY. QSL: OQRS preferable. The XZ1J Web site is available at: http://www.xz1j.org
One of the operators, Dave, K3LP, has also set up a Web page at: http://www.k3lp.com/xz1j_2013.htm
There is also a live streaming or recorded broadcast of the operation available at: http://www.ustream.tv/channel/jookgroo

Z6, KOSOVO. Marijan, S56A, will be active as Z6/S56A from Gracanica during the CQWW DX CW Contest(November 23-24th) as a Single-Op/All-Band/Low-Power entry. He states that he has improved wire multiband antennas. QSL via his home callsign.

Z6, KOSOVO. Pekka, OH2TA, will be active as Z60WW during the CQWW DX CW Contest (November 23-24th) as Single-Op/Single-Band (15m) entry. QSL via OH2BH.

Z8, SOUTH SUDAN (Press Release). Received by Jarmo, OH2BN, from Juba, South Sudan, on November 21st: "LIFE ENTERS ROUTINE PHASE AT Z81X IN SOUTH SUDAN -- As it is still the end of the rainy season on the Equator in

Africa, members of the gang at Z81X have been spared many potential problems. With only a few rain showers experienced, main outdoor activities were completed in record time, and no rain or mud is bothering further efforts. But even more important, mosquitos spreading malaria are few and far between. However, team members use mosquito nets --- to keep out mosquitos during the night hours.
Agreement was reached on power, and night time juice is now available with extra compensation agreed for the cost of fuel. Also, with some private space added, life is now so much better than at the outset.
Regarding the radio mission, initial low-band (160 and 80M) targets - 1500 and 2500 QSOs respectively - are exceeded with a total of 933 USA and 595 JA QSOs on those two bands, but every effort will be made to push the numbers even higher tonight before contest traffic takes over all bands on CW.
During the contest weekend, the team will have two dedicated stations with a focus on 80 and 40M SSB and the still much needed 30 and 17/12M. Keep an eye on those bands as the Z81X crew will keep running there DXpedition style.
The CQWW CW contest will see the team making three (3) single-band entries for your Zone 34 multiplier pleasure:
Z81R by OH2PM on 10M, via OH2BH
Z81X by OH0XX on 15M, via OH0XX
Z81Z by DL3DXX on 40M, via K4ZW
As these efforts are only semi-serious, you shouldn't be surprised to see one of the Z8s appear on other bands as well.
There will be pictures available of this operation on the Z81X QRZ.com page later today.
Following the weekend, site tear down will start on Monday and the team will be heading home on Tuesday.
Best regards from the newest African country, the Republic of South Sudan."

ZF, CAYMAN ISLANDS. Operators John/K6AM, Paul/N4PN and Gerald/K5YAA will active as ZF1A from Grand Cayman Island (NA-016, WLOTA LH-1042) during the CQWW DX CW Contest (November 23-24th) as a Multi-Single entry. QSL via K6AM, direct, by the W6 Bureau or LoTW.

ZV0F, FERNANDO DE NORONHA. By the time you read this, Juan-Pablo, LU8FAU, should be active as ZV0FWA from Fernando de Noronha (SA-003, WLOTA HL-1208) until November 25th. Activity will be limited, but mainly on 10 meters SSB between 1900-0400z. Watch around 28466 kHz. QSL only direct to LU8FAU. For updates and more details, visit:
http://www.lu8fau.com.ar/noticias/dxpedition-fernandodenoronha-py0f-sa-003

The following stations are expected to be active in the
CQ World Wide DX CW Contest (November 23-24th, 2013)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2013 CQWW DX CW Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

No 1177
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

EA8 - Look for Andrea, EA8/IK1PMR (www.ik1pmr.com http://www.google.com/url?q=http%3A%2F%2Fwww.ik1pmr.com&sa=D&sntz=1&usg=AFQjCNGlRUcm1OBCMZc-0kakr5Fp59J4qQ) and Claudia, EA8/PA3LEO to be active from Tenerife, Canary Islands (AF-004) from 26 November to 7 January 2014. They will operate CW, RTTY and SSB on the HF bands and 6 metres. QSL via home calls, direct or bureau. [TNX NG3K]
J6 - The Buddies in the Caribbean DXpedition group, which specializes in 100 watt or less low power radios and the Buddipole portable antenna systems, will be active from St Lucia (NA-108) on 1-9 December. There will be fixed operations (160-10 metres CW, SSB and digital modes), as well as portable operations from various points on the island. The operators will be W3FF (J68FF), J6/AA4W, J6/K3JDB, J6/N9AW, J6/NM4T, J6/W4QO, J6/W5EXJ and J6/W6HFP. QSL via home calls and LoTW. [TNX N9AW]
JA - Look for Kenji, JA4GXS to be active as JA4GXS/6 from Hateruma Island (AS-024) on 5-6 December and from Yonaguni Island (AS-024) on 8-9 December. he will operate CW and SSB on 40, 30, 20, 17, and 15 metres. QSL via home call, direct or bureau. [TNX rsgbiota.org http://www.google.com/url?q=http%3A%2F%2Frsgbiota.org&sa=D&sntz=1&usg=AFQjCNGabUuB1cH_HJGRDaFTolu7ODDR0g]
OD - To celebrate the 70th anniversary of Lebanon's independence, Lebanese stations may use the special prefix OD70 until the end of November. [TNX Daily DX]
PY - Jose, PU5IKE will be active as ZW5AAA from Ilha dos Remedios (SA-027) on 7-8 December. He plans to operate SSB on 10 metres. QSL via home call (direct or bureau), LoTW and eQSL.
S9 - John IK5BCM, Beppe IK5CBE and John IK5CRH will be active as S9TF from Principe Island (AF-044) on 1-12 February 2014. They will have three stations with amplifiers, one 5-band Spiderbeam, two 6-band verticals and wire dipoles for 40 and 80 metres. QSL via IK5CRH, direct or bureau, plus LoTW and eQSL. Logsearch on Club Log. They have a website at http://gmiross.wix.com/ principe-is-2014
T30 - Ted, JF1CCH (T30TS, mainly CW with some SSB and RTTY) and Kazu, JA1FUF (T30KN, mainly PSK31 and RTTY) will be active from Tarawa, Western Kiribati (OC-017) from 28 November to 4 December. They plan to be QRV on 40-10 metres running 100 watts into dipoles. QSL via home calls, direct or bureau, and eQSL. [TNX NG3K]

T32 - Tim, NL8F will be active as T32TM from Kiritimati/Christmas Island
(OC-024) from 27 November to 4 December, when he will be joined by
other operators (David AH6HY, Dick N7RO, Paula NX1P and Dean
KW7XX). A second station will be set up and operations will
continue until 10 December using the callsign T32RC. Suggested
frequencies are:
CW 1825 3525 7025 10110 14025 18072 21025 24892 28025 kHz
SSB 1840 3790 7085 - 14190 18140 21295 24945 28440 kHz
RTTY 1838 3588 7040 10140 14080 18102 21092 24920 28082 kHz
On Top Band, T32RC will participate in the ARRL 160 Meter Contest
(6-8 December), outside the contest they will concentrate on the
working the rest of the world. QSL T32TM via K8NA. QSL T32RC via
N7RO (OQRS on Club Log) and LoTW. Further information can be found
at http://t32-2013.com/ http://www.google.com/url?q=http%3A%2F%2Ft32-2013.com%2F&sa=D&sntz
=1&usg=AFQjCNFxkrsXZQUp21HX_fbjenRwfITmcg
TY - Wim, ON6DX was not able to collect his TY licence [425DXN 1176],
as the building where Benin's Transitory Authority for the
Regulation of Posts and Telecommunications is located was damaged
by a fire that broke out in the night between 7 and 8 November.
Wim has had to make a new application, which he says "is going to
take or two weeks (Africa time)". For the time being, Wim is still
active as 5V7TH from Togo.
UR - Special Ukrainian stations EM110RAEM (QSL via UT7UT), EN110RAEM
(QSL via UT5UIA) and EO110RAEM (QSL via US5ID) will be active on
1-31 December to commemorate the 100th anniversary of the birth of
Ernst T. Krenkel (RAEM). [TNX UT7UT]
V6 - Haru, JA1XGI will be active as V63XG from Chuuk (OC-011),
Micronesia on 4-12 December. He will be QRV on 160-10 metres CW,
SSB and RTTY, with a focus on Europe on the low bands. He will
participate in the ARRL 160 Meter Contest (6-8 December). QSL via
home call, direct or bureau (logsearch and OQRS on Clublog).
Further information at http://island.geocities.jp/ v63xg/index.htm http://www.google.com/u
rl?q=http%3A%2F%2Fisland.geocities.jp%2Fv63xg%2Findex.htm&sa=D&sntz=1&usg=AFQjCNF-tZgZ83Dl
5guYrnrz9AWfQoJvLA
VP8 - Mick, G1EUZ will be active as VP8BTU from the Falkland Islands
(SA-002) between 25 November and 25 May 2014. QSL via home call
and LoTW.
VU - Special callsign AU2JCB will be in use from 22 November to 10
December t celebrate the birthdate of Indian physicist and radio
pioneer Jagadish Chandra Bose. Look for activity on 3710, 7040,
7150, 14220, 14250, 14310, 21280, 21310, 21350, 28545, 28510 kHz,
plus 6 and 10m FM on 50800, 51500 and 29700 kHz. QSL direct to
VU2DSI. [TNX NG3K]
VU7 - The VU7AG DXpedition from Agatti, Lakshadweep Islands (AS-011)
[425DXN 1176] started on 20 November around 12.55 UTC on 12 metres
SSB. W4VKU, VU2ABS and VU2RCT will be joined by VU2NKS and VU2NXM
on 23 November, and by VU2PAI and VU3DMP on the 26th. The
remaining operators will follow for the last week of activity.
The correct frequency plans are as follows:
CW 1824 3524 7024 10104 14024 18074 21024 24894 28024

SSB - 3680 7095 - 14180 18145 21280 24945 28480
RTTY - 3584 7044 10142 14084 18104 21084 24922 28084
The pilots now include KH6CG (Chief Pilot + Asia & Oceania), DF2RG (Europe), N1UK (NA East Coast), KY6R (NA West Coast) and LU1FAM (Central and South America). You can get in touch with them via the Contact page on the expedition's website. There is also an e-Pilot (a contact form for DXers to write to the island team).
The propagation page now includes custom propagation charts thanks to K6TU. QSL via W4VKU (logsearch and OQRS for direct and bureau cards on Club Log), and LoTW approximately six months after the conclusion of the DXpedition. Bookmark www.vu7ag.info http://www.google.com/url?q=http%3A%2F%2Fwww.vu7ag.info&sa=D&sntz=1&usg=AFQjCNFAt9Av6-I0u-_io28oW_YNVC2pTw for further information and updates.
W - Mike, N1OKL will be active holiday style from Dauphin Island (NA-213) on 24-29 November. He will operate SSB and RTTY. QSL via home call, direct or bureau. [TNX rgsbiota.org http://www.google.com/url?q=http%3A%2F%2Frgsbiota.org&sa=D&sntz=1&usg=AFQjCNEmSITFeZFOdaiM9TBFsqoQGT-KHQ]
Z8 - During the contest weekend, the Z81X team will have two dedicated stations with a focus on 80 and 40m SSB and the still much needed 30, 17 and 12m. The CQ WW DX CW contest will see the team making three single-band entries: Z81R by OH2PM on 10m (QSL via OH2BH), Z81X by OH0XX on 15m (QSL via OH0XX) and Z81Z by DL3DXX on 40m (QSL via K4ZW). However, "as these efforts are only semi-serious, you shouldn't be surprised to see one of the Z8s appear on other bands as well". Site teardown will start on 25 November, and the team will be heading home on the 26th. [TNX OH2BN]

9Q ---> On 11 November, after three years of negotiations, the local
Regulatory Authority for Post and Telecommunications officially authorized
the Amateur Radio Association of the Democratic Republic of Congo (ARAC) to
use 9Q0AR (club station callsign) and 9Q0HQ (special event callsign). [TNX
DX World]

DXCC NEWS ---> ZS8C and ZS8Z (Prince Edward & Marion Islans, current
operations for 2013 through May 2014) have been approved for DXCC credit.
"Two student hams are expected to join in upon completion of their
licensing, which will make it four (4) operators. I'll update this approval
when I have more information". [TNX NC1L]

+ SILENT KEYS + Nerio Baratta, IK4MRH passed away about three weeks ago.
Emigrated to Thailand for more than twenty years, he was active as

HS0/IK4MRH from Phuket Island (AS-053). Back in 1997 he also participated in the first IOTA operation (HS9AL) from Koh Tarutao (AS-126). [TNX I4LCK] Stew Woodward, K4SMX, passed away on 16 November at 65 years of age. "He was a member of the famous 1979 1S1DX expedition, which attempted to land on Amboyna Cay in the Spratly Islands and was fired upon by military forces there" [TNX The Daily DX]

QST de W1AW
Propagation Forecast Bulletin 47 ARLP047
>From Tad Cook, K7RA
Seattle, WA November 22, 2013
To all radio amateurs

SB PROP ARL ARLP047
ARLP047 Propagation de K7RA

Sunspot numbers made a profound leap over the past week, with the sunspot number on November 15 reaching 272, then 282 on November 17. This is a record for the current solar cycle, and this level of activity has not been observed for over a decade. Unfortunately the sunspot number declined rapidly since then, falling below 100.

You can check in the ARRL Propagation Bulletin archives to see what activity at this level and higher was like over a decade ago.

Go to http://arrl.org/w1aw-bulletins-archive-propagation and check out (in reverse order) bulletins 44 and 45 in 2003, 35 in 2002, 32 in 2002, 19 in 2002, 56 in 2001, 40 in 2001, 38 in 2001, 26 in 2001, 14 and 15 in 2001, 29 and 30 in 2000, 20 and 21 in 2000, 14 in 2000, 46 and 47 in 1999, 27 in 1999, and prior to that there was no sunspot number higher than we saw this week since Cycle 22. The last several days with zero sunspots prior to this period are detailed in bulletins 2 and 3 in 1998.

Note that for many of those periods, planetary A index was quite high. So the negative effects of all that high solar activity were geomagnetic storms.

Solar activity was national news this week, and this link has plenty of information about solar flares:
http://www.nbcnews.com/science/sun-fires-powerful-solar-flare-triggering-radio-blackout-2D11623878
.

The heightened activity caused 10 meters to virtually explode, with the band full of signals from around the world.

Average daily sunspot numbers rose more than 67 points from 126.1 to 193.3, while average daily solar flux rose 10 points, from 156.9 to 166.9.

The latest prediction has solar flux at 135 on November 22-23, 130 on November 24-28, 140 on November 29-30, 135 on December 1-3, 130 on December 4, 135 on December 5-6, 130 and 135 on December 7-8, 140 on December 9-10, 135 on December 11-14 and 140 on December 15-18. Predicted values then bottom out at 115 on December 23-24, again on December 28-29, then jumping from 115 again on January 3-4 to 140 on January 5. This is a month and a half from now, so predictive value is dubious. But let's check that again in 2014.

Predicted planetary A index is 5 on November 22 through December 3, then 8, 5 and 12 on December 4-6, 10 on December 7-8, 5 on December 9-11, then 8 on December 12-13, and 5 on December 14-30.

OK1HH in Prague predicts geomagnetic activity will be quiet on November 22-25, quiet to unsettled November 26, quiet to active November 27, quiet to unsettled November 28, quiet November 29-30, active to disturbed December 1, mostly quiet December 2-3, quiet to unsettled December 4, mostly quiet December 5, quiet to active December 6-8, quiet December 9-12, active to disturbed December 13, quiet to unsettled December 14, quiet December 15-18.

Scott Bidstrup, TI3/W7RI in Costa Rica reported back on November 9, "Today was terrific. Worked dozens of Ukrainian and Eastern European stations this morning on 10 meter PSK with 30 watts into a 5/8 wave vertical. Band conditions were superb, and even now as I write this, more than an hour after sunset, I'm still seeing a few W5 stations, plus JA, VK and ZL on my waterfall, with the ZL stations the strongest."

On November 15 Scott wrote (note this was just before this week's sunspot number peak) "Looking at the current solar magnetograms, it looks like the southern hemisphere spots are becoming fewer but bigger and more intensely magnetized, which, as I understand it, is typical of early post-peak activity. On the other hand, the current imagery and the STEREO B imagery suggest there is a lot more southern hemisphere activity at the moment than there has been lately, so maybe we'll have some good conditions for awhile. I note that the 304a emission has been on an upward trend for some time, and shortwave X-ray has been active too, and is continuing to go up. Good news, at least for as long as it lasts.

"I've been on 10 meter PSK a lot lately, and have noticed that the waterfall isn't as crowded in the last few days as it has been (a week ago, it looked like 20 meters), and signals have generally been a bit weaker, in spite of the rise in solar activity of the last few days. As before, it's been mostly low latitudes. My friends on 6 meters report to me that they've never seen the trans-equatorial openings into Brazil and Argentina as active as now, and we had the Mother Of All F2 Openings into North America about a week ago (and several smaller ones since). The whole continent was accessible, and my friends are all telling me they worked a dozen or more new grid squares. The only working 6 meter radio I have is FM only, and I

didn't hear a peep on 52.525 MHz through the whole thing."

On November 15, N0JK wrote, "On November 10, EA8DBM worked FK8CP at 0055 UTC. This was likely a 'transpolar long path' over 20,000 km. 10 meters has been in good shape all week. Many have worked K9W, T33A and XR0ZR."

Also on November 15, Jim Henderson, KF7E wrote (about solar activity speculation and a second peak), "I don't know how high it will go, but I felt way back before the last peak that this would be the case. Interesting to see it when so many focus on the weakening field."

"We have better (and more) instruments this peak, so it will be educational. I still believe in Mausumi Dikpati's work (Boulder CO) showing a last gasp before a few lackluster cycles. But most of us will consider ourselves very lucky to be active on HF for the next peak to see which prediction is closest."

Dikpati, many will recall, around 2006 predicted a much stronger Cycle 24, as noted in this outdated Wikipedia entry: http://en.wikipedia.org/wiki/Mausumi_Dikpati .

Also see: http://www.hao.ucar.edu/Public/about/Staff/dikpati/. Also see http://www.universetoday.com/71029/the-suns-conveyor-belt-may-lengthen-solar-cycles/. There is also http://www.ias.ac.in/jaa/marjun2008/JAA03.pdf .

KD7DCR of Whitehall, Montana (high in the Rockies in DN35, and way off the grid) wrote on November 17: "After I read this week's report about that F2 (?) opening on 6 meters on Nov 10, I wondered if that is what I saw back on Oct 27.

"I was working the contest on that date (probably CQ Worldwide SSB DX) and decided to check 6 meters. There were no signals seen on the band scope around 0230 UTC. I called twice: W5BE in EM16 (Ponca City, Oklahoma) came back and gave me a 5/7, then KE5JXC came back with a 5/5 from EL39 (Kaplan, Louisiana), a new one! I heard some partials after this, but nothing worked. On my end, signals were low but clean and clear - I gave 5/3s. I had the amp on with a KW going out to a 7 el M2 at 48 feet. I have never experienced F2, that I know of, on 6 meters.

"I have been checking DX Maps for the E's MUF display - some days there are many, many, E's shown, mostly low value - but some are going above 50 for short windows of time, and then back below it. Our winter E's may be more robust this year than in the past."

Patrick Dyer, WA5IYX in EL09ql wrote (about 6 meter F2 propagation on November 9), "The unexpectedly high F2 MUF from a rather minor amount of geomagnetic activity at the right time of the year with enough solar flux gave perhaps the first morning 50-MHz paths from

here to the Caribbean of this poor Cycle 24. (During the peaks of Cycle 21-23 such paths from North America during 'the season' were often near-daily events for some.) A Sept 2011 (magnetic-storm induced) event in the afternoon did drive the MUFs into Ch A2 NTSC video see http://www.youtube.com/watch?v=vBBxYEQZJz0

"http://giro.uml.edu/IonogramMovies/ shows the 1600z Nov 9 foF2 for Austin, TX reaching near 15 MHz, falling back to 10 MHz within three hours while those at Boulder/Idaho never saw those enhanced levels (of course, high foF2s nearly overhead do me little good).

"I am a bit surprised that some North American transcontinental 6m F2 didn't occur during all this. From my 1988 notes of reports on the old 28.885-MHz net there were mid-November dates with the solar fluxes in the 150-180 range where 50-MHz F2 paths WERE reported from VE1/W1 to W6.

Nov 9, 2013, time is UTC 1518 39.600 police, US n.e. accents (and other unID 35s and 37s) 1530 33.420 WQIN663 FL Orlando (first assumed Es, but now I wonder!) 1537 50.115 FG8OJ Guadeloupe Island (2530.6 mi) http://fg8oj.com/ 1542 50.120 P43A Aruba (2177.0 mi) 1546 55.250 NTSC Ch A2 video - assumed Es from Mexico (61.25, 67.25 also in) but with 50-MHz F2 going on I had no time to investigate it with TV tuner(s) - could have been mixed with F2 backscatter signals 1548 50.052 V44KAI/B St. Kitts (2413.9 mi) 1557 50.130 PJ4NX Bonaire (2284.3 mi) 1603 50.115 FM5AN Martinique (2589.9 mi) 1608 50.062 KP3FT/B PR Ponce (10 w beacon) 1613 50.113 NP3IR PR OROCOVIS (2176.6 mi) http://www.np3ir.com 50-MHz out c. 1625 - the rest of day was very anticlimactic here

"50-MHz F2 to Puerto Rico is about as short as it usually gets in that direction from here (though I have had the Dominican Republic that way in the prior, better, Solar Cycles). The lack of any super strong 6m F2 backscatter on Nov 9 would imply that the MUF did not likely get into Ch A2 from here. It had been hoped that the enhanced F2 zone(s) would survive long enough to produce 50-MHz Pacific paths for here, but it all had quickly collapsed well before local noon for this area."

Thanks, Patrick!

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for November 14 through 20 were 234, 272, 213, 282, 144, 113, and 95, with a mean of 193.3. 10.7 cm flux was 175.8, 177.9, 174.5, 177, 163.3, 152.9, and 147, with a mean of 166.9. Estimated planetary A indices were 2, 8, 9, 6, 3, 3, and 4, with a mean of 5. Estimated mid-latitude A indices were 2, 6, 11, 5, 2, 3, and 3, with a mean of 4.6.

PREDICTIONS FOR 24 Nov 2013 10CM FLUX: 135 / AP: 007
PREDICTIONS FOR 25 Nov 2013 10CM FLUX: 130 / AP: 010
COMMENT: NOAA AR 1904, located north of AR 1899 produced a M1.1 flare on
Nov. 23, peaking at 0232 UT. There is no indication of a CME associated to
that event. This region is likely to maintain a moderate level of flaring
activity in the next 48 hours, essentially C flares, with a fair chance for
an isolated M class event, due to its proximity with AR 1899. Active
conditions are therefore foreseen for the next 48 hours. Quiet to unsettled
geomagnetic conditions are currently observed at planetary and local level
(Dourbes). ACE measurements show some slight excursions of the Bz component
of the interplanetary magnetic field down to -10 nT. This weak disturbance
is probably linked to a sector boundary crossing, that occurred late on
Nov. 22. We expect mostly quiet conditions for the next 48 hours.
TODAY'S ESTIMATED ISN : 030, BASED ON 04 STATIONS.

SIDC URSIGRAM 31124
SIDC SOLAR BULLETIN 24 Nov 2013, 1211UT
SIDC FORECAST (valid from 1230UT, 24 Nov 2013 until 26 Nov 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 24 Nov 2013 10CM FLUX: 127 / AP: 005
PREDICTIONS FOR 25 Nov 2013 10CM FLUX: 125 / AP: 007
PREDICTIONS FOR 26 Nov 2013 10CM FLUX: 125 / AP: 011
COMMENT: Solar activity was moderate in the past 24 hours, with NOAA AR
1904 producing a M1.0 flare on Nov. 23, 1257 UT peak time, and numerous C
flares. This region should keep during the next 48 hours the same level of
activity consisting on C flares and a chance for an isolated M class event.
In the meanwhile, NOAA AR 1905, close to the East limb is likely to produce
C class flares during the same period. Active conditions are therefore
expected. Quiet geomagnetic conditions are expected for the next 48 hours.
A slight increase to unsettled conditions with an isolated period of active
conditions is possible by the end of Nov. 26 as a small coronal hole in the
northern hemisphere becomes geoeffective.

21900. XZ1J RTTY???

Yahoo group: DX-IS (2013)
Date: 2013-11-25 00:54:44 UTC
From: <kb1jzu@...>
Topic: 21900 Message: 21900

Iain N6ML congratulations on getting them on 15M Rtty.

I honesty don't know what they are thinking. Last night they did 30M RTTY catching just the west coast/ mid of NA, and tonight started with 30 again and the 17M to 15M LP. Champ should know better!

All of these are dead shut in the NE USA when they started. They have some good numbers growing for EU & Asia but only a handful for NA and I bet zip from the east.

Got them on 2 modes and 5 bands but no RTTY (ATNO). I hope they don't end up pulling another A5A for us back here.

73 Bob

PREDICTIONS FOR 26 Nov 2013 10CM FLUX: 122 / AP: 007
PREDICTIONS FOR 27 Nov 2013 10CM FLUX: 122 / AP: 007
COMMENT: NOAA AR 1904 was responsible for most flaring activity yesterday,
on November 24. Seven C-flares were attributed to this active region which
is located in the NE. We expect a similar behaviour: C-flares and the
possibility of an isolated M-flare. The solar wind speed is between 300 and
350 km/s. The total interplanetary magnetic field (IMF) is below 5 nT. This
results in quiet geomagnetic conditions with the Kp and local K of Dourbes
below 4. The small coronal hole (20 degrees N, front boundary around 20
degrees W, 10 degrees wide) might introduce a geomagnetic disturbance
limited in strength and in time from late November 26 onwards.

Good luck, Bob! They're apparently on 20m RTTY now (1540Z), but I don't hear them. I guess they had some problem with their microKeyer interface, which may have set their RTTY operations back a bit - they were trying to get the Kenwood TS-590 to work using its internal USB audio. Glad they did get something working in the end - it was a new one on RTTY for me.

Nothing here, either. I think 15m around now would be better, at
least for the East coast. It doesn't help that the flux is dropping
like a rock. All we can do is listen and hope we get a propagation
window. I'm not optimistic, but it's possible. They were workable on
other modes, so it can be done if the sun cooperates!

Iain/Paul Thanks
I worked the call this morning on 20 @ 12:23. They went off shortly after that. If it wasn't a slim (don't think it was) then they were still having problems. I have a couple Digi keyers which work flawlessly. But I did trade my micro keyer for one of them...it was just to complicated for my taste (doubles the settings due to phone). They have popped up on 20 for EU this morning, Paul, so with a little luck they will be on ~ 0-2Z which should be wide open for the east coast. Good luck...

PS What a great month!!!!!!! I have had more DX fun in Nov. than in any month since I was licensed! Always a new DX or a New band to work....Need a rest! LOL

I'm with you Paul. With the SFI dropping it looks bad for us on high latitude east coast/eastern midwest. I tried for a short time
on 15 for the VU7 but they were so weak I lost them fast. That part of the world is tough from here.

Thanks Tim
Doing a bit better than my CW count of 63.... But I'm working on it.. just hope I don't die before I get any kind of proficiency.
Later,
Bob

Yippeeeee! # 315 RTTY only 25 left (LOL)

Can't wait to see that picture of a model 28 on top of one of those BS7 platforms.

Don't laugh we all have goals.

Thanks

Iain/Paul Thanks
I worked the call this morning on 20 @ 12:23. They went off shortly after that. If it wasn't a slim (don't think it was) then they were still having problems. I have a couple Digi keyers which work flawlessly. But I did trade my micro keyer for one of them...it was just to complicated for my taste (doubles the settings due to phone). They have popped up

on 20 for EU this morning, Paul, so with a little luck they will be on ~ 0-2Z which should be wide open for the east coast. Good luck...

PS What a great month!!!!!!! I have had more DX fun in Nov. than in any month since I was licensed! Always a new DX or a New band to work....Need a rest! LOL

Nothing here, either. I think 15m around now would be better, at
least for the East coast. It doesn't help that the flux is dropping
like a rock. All we can do is listen and hope we get a propagation
window. I'm not optimistic, but it's possible. They were workable on

other modes, so it can be done if the sun cooperates!

21910. Disappearing S2 logbook QSO

Yahoo group: DX-IS (2013)
Date: 2013-11-25 17:53:12 UTC
From: Brian Alsop
Topic: 21910 Message: 21910

A few days ago the online log showed a 12M S21ZBC contact for me in the log.

Today it is gone.

Anybody else experiencing disappearing QSO's?

To: clublog@...

Hi all,

I re-ran a report today for John G3WKL (it's actually one that used to be available in the 'About' page, but become intractable when database got big). It's a quick look at the proportion of different modes being used on the air:

http://g7vjr.org/2013/11/what-percentage-of-qsos-are-cw/

Hope it's of interest!

This is perplexing. You would think that new uploads would be
incremental and previously uploaded contacts would still be there.

Well done Tom!

I did manage to get them on RTTY, one lucky QSO.

Even though I am very grateful to get through to XR0ZR on two modes, after 4 days searching I missed them on RTTY, they just seemed to give up in the end...though I must admit there were very narrow windows of openings so the chances were always going to be very remote at best....

The logs are all fine in S2. Uploading to Clublog is the issue and they made a mistake in uploading the complete new log instead of an incremental.

Don't worry, they'll sort it out.

From: KQ8M
Topic: 21922 Message: 21922

Has anyone noticed 40M being a bit weird the past few days?

I was at the K8AZ contest station Saturday and an hour and a half before sunset they were hearing the S2 but couldn't work them but
did work a UN. Then an hour later I was tuning 40 there and BY5CD was s9, SP, and no one calling him. I called and worked with one
call. Everyone there were surprised. I had to keep listening and convince myself it wasn't 6Y5CD.

Last night, VU7AG was on 40 RTTY and was s5 - 6 here a half hour before sunset. When I saw my call on the screen I fell out of my
chair and he actually had to call me again.

Now if only XZ and S2 show up. I know, I'm greedy.

Hi Tim

What the UN was on? Was that 4U1UN? I still need that on SSB.

I am a bit better situated for S2 and VU7, they are close DX for us VKs.

Wasn't 10m hoping last Saturday! NA LP and EU LP were open at the same time which is the first time I have ever heard that on 10m (and it was late at night).

Been struggling with TU here, I know Jan, Paul and Chris are doing their best, it's just propagation... did manage a couple of QSOs on 20m, so at least that's something.

GL, guys!

Lance,

I believe 4U1UN is still off the air, due to building remodeling. No idea when (or if) it will be back on the air. hopefully soon.

4U1ITU was on during the CQ WW CW contest. I know there was at least one other 4U call on, but I don't think it was one that counted as a DXCC entity.

4U1VIC counts as Austria for DXCC (but as a separate entity for WAE,
and CQ DX Marathon). 4U1GSC counts as Italy.

I think Tim meant UN as in the prefix for Kazakhstan, though...

4U0WFP for the World Food Program was on for the CQWW and was on 40m the other night. It counts as Italy. I can use the 4U0 prefix for my CW WPX honor roll, though.

4U1VIC counts as Austria for DXCC (but as a separate entity for WAE, and CQ DX Marathon). 4U1GSC counts as Italy.

I think Tim meant UN as in the prefix for Kazakhstan, though...

You are correct Iain. Kazakhstan, UN, is what I was referring to. Usually pretty difficult from here especially 1 1/2 hours before
sunset on 40 with EU between us and them.

Lance, you guys down under sure have it rough. The countries we consider easy pickings are rare for you guys and because expeditions
go for rate and not areas you guys get left out.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31127
SIDC SOLAR BULLETIN 27 Nov 2013, 1311UT
SIDC FORECAST (valid from 1230UT, 27 Nov 2013 until 29 Nov 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 27 Nov 2013 10CM FLUX: 116 / AP: 002
PREDICTIONS FOR 28 Nov 2013 10CM FLUX: 118 / AP: 007
PREDICTIONS FOR 29 Nov 2013 10CM FLUX: 120 / AP: 007
COMMENT: Solar activity has been low, no C-class flares in past 24 hours.
The activity levels are expected to increase while a recurring active
region rotates over the eastern limb. There was a partial halo CME seen at
02:15 UT by LASCO-C2 after a data gap, apparently originating in a filament
eruption over the western limb. Part of the material is backsided and the
bulk of the CME is directed towards the south, so most likely the Earth
will not be affected. Solar wind speed is currently at 300 km/s with
interplanetary magnetic field intensity at 6 nT. Geomagnetic conditions are
quiet and expected to remain so.
TODAY'S ESTIMATED ISN : 054, BASED ON 13 STATIONS.

Thanks Bob,

I will have to drop him a line to see if I can work him myself. I was just saying how odd it was that the UN was so load 1 ½ hours before sunset and NO pileup. Especially east coast. And from here in Ohio it is difficult to break the EU and East coast walls to places like that.

From: <kb1jzu@...>
Topic: 21922 Message: 21932

Tim breaking an EU wall (east) or a JA wall (west) is no picnic for any of us. Most good DX operations play the openings and call for continents some even by region in NA. I usually don't even try if there are no NA spots no matter how strong they are. I just sit and wait till we are given a turn.....saves on the power bill!
Agree on 40. Had no trouble with VU7AG on 40 or 30 the other day....unfortunately the high band opening have gotten really short or non existent.
Bob

4U1VIC counts as Austria for DXCC (but as a separate entity for WAE, and CQ DX Marathon).
4U1GSC counts as Italy.

I think Tim meant UN as in the prefix for Kazakhstan, though...

21933. ARLP048 Propagation de K7RA

Yahoo group: DX-IS (2013)
Date: 2013-11-27 16:37:38 UTC
From: jjreisert@...
Topic: 7476 Message: 21933

SB PROP @ ARL $ARLP048
ARLP048 Propagation de K7RA

ZCZC AP48
QST de W1AW
Propagation Forecast Bulletin 48 ARLP048
>From Tad Cook, K7RA
Seattle, WA November 27, 2013
To all radio amateurs

SB PROP ARL ARLP048
ARLP048 Propagation de K7RA

Because of the Thanksgiving holiday tomorrow, we have a shortened bulletin two days early, and another one will follow on Monday, December 2 which will contain the data for our regular reporting week, which is November 21-27.

But being one day short of a full week of data, we can see that so far, the average sunspot number for November 21-26 fell 131.8 points to 61.5, and average daily solar flux declined from 166.9 to 130.2. We all hope it comes back. Those numbers are compared to the previous seven days reported in last week's bulletin, November 14-20.

The latest prediction has solar flux at 120 on November 27-30, 125 on December 1-2, 130 and 140 on December 3-4, 150 on December 5-6, 155 on December 7, 165 on December 8-14, then 160, 155 and 145 on December 15-17 and 140 on December 18-19. Predicted planetary A index is 8 on November 27, 5 on November 28 through December 3, 10 and 5 on December 4-5, then 15, 15 and 12 on December 6-8, 5 on December 9-12, 10 and 8 on December 13-14, and 5 on December 15-21.

Jon Jones, N0JK of Lawrence, Kansas reported: "I corresponded with Pat, WA5IYX about the November 9, 2013 opening.

"The November 9, 2013 6 meter F2 opening for North America to the Caribbean and northern South America was unique as it is probably the first morning F2 opening of Solar Cycle 24. There were a number of these 'morning F2' openings in Solar Cycles 22 and 23. Most frequent in the late fall and winter months, and often after or during a geomagnetic storm. Pat, WA5IYX reminded me of a much bigger opening like this on November 8-9, 1991. I recall working Africa, Central and South America in the morning, followed by Hawaii then Australia in the afternoon on 6 meters. The 2013 opening dissipated before moving west to the South Pacific.

"Pat's log of the November, 1991 event can be found at,
http://www.qsl.net/wa5iyx/11081091.txt

"As for recent HF propagation, 10 meters was very good Sunday in the ARRL Sweepstakes. Rare sections such as Northwest Territories (VE8EV), Alaska, Canadian Maritime (VY2ZM), Puerto Rico and Virgin Islands were loud."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Yea, I still need them 10, 12 and 80. They don’t seem to be doing much CW so it makes very hard with the weak signals. As it is I could tell they were in there on 80 the other night but not good enough to do anything about.

Tim breaking an EU wall (east) or a JA wall (west) is no picnic for any of us. Most good DX operations play the openings and call for continents some even by region in NA. I usually don't even try if there are no NA spots no matter how strong they are. I just sit and wait till we are given a turn.....saves on the power bill!

Agree on 40. Had no trouble with VU7AG on 40 or 30 the other day....unfortunately the high band opening have gotten really short or non existent.

Bob

---In DX-IS@yahoogroups.com, <kq8m@...> wrote:

Thanks Bob,

I will have to drop him a line to see if I can work him myself. I was just saying how odd it was that the UN was so load 1 ½ hours before sunset and NO pileup. Especially east coast. And from here in Ohio it is difficult to break the EU and East coast walls to places like that.

SB DX ARL ARLD048
ARLD048 DX news

This week's bulletin was made possible with information provided by NC1L, the Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MAURITIUS, 3B8. Operators Johnny, SM6JBC and Jan, SM6GOR are QRV as 3B8JB and 3B8/SM6GOR, respectively, until December 16. Activity is on 20 to 10 meters and possibly 30 meters using CW, SSB, PSK31 and PKS63. QSL to home calls.

JAMAICA, 6Y. Valery, UN7LZ is QRV as 6Y5/UN7LZ until November 30. Activity is mostly on 80, 40, 15 and 10 meters using CW. QSL to home call.

CAPE VERDE, D4. Keith, G3TTC is QRV as D44TUE from Sao Vicente, IOTA AF-086, until November 30. Afterwards, he will be QRV from Santiago Island, IOTA AF-005, on December 1 and 2. Activity will be on 20 and 17 meters using SSB. QSL to home call.

CANARY ISLANDS, EA8. Andrea, IK1PMR and Claudia, PA3LEO are QRV as EA8/home calls until January 7. Activity is on the HF bands and 6 meters using CW, SSB and RTTY. QSL to home calls.

REUNION ISLAND, FR. Jean-Pierre, F5AHO is QRV as FR5/F5AHO until December 4. Activity is on 20 to 10 meters using SSB and various digital modes. QSL to home call.

ST. LUCIA, J6. Operators W3FF, AA4W, K3JDB, N9AW, NM4T, W4QO, W5EXJ and W6HFP will be QRV as J68FF and J6/home calls, respectively, from December 1 to 9. Activity will be on 160 to 10 meters using CW, SSB and various digital modes. QSL to home calls.

WESTERN KIRIBATI, T30. Operators Ted, JF1CCH and Kazu, JA1FUF are QRV as T30TS and T30KN, respectively, until December 4. Activity is

on 40 to 10 meters, and possibly 6 meters, using CW, SSB, RTTY and PSK. QSL to home calls.

SOMALIA, T5. Roger is QRV as 6O0LA and has been active on 20 meters using CW around 1640 to 1730z. QSL via LA4GHA.

MICRONESIA, V6. Haru, JA1XGI will be QRV as V63XG from December 4 to 12. Activity will be on 160 to 10 meters using CW, SSB and RTTY. This includes and entry in the upcoming ARRL 160 Meter contest. QSL to home call.

AUSTRALIA, VK. Special event station VK2013TDF is QRV until the end of the year to commemorates the Tour de Freedom cycling event being held between Esperance and Perth. QSL via operators' instructions.

BRITISH VIRGIN ISLANDS, VP2V. Ted, SP3IPB is QRV as VP2V/SP3IPB until November 30. QSL to home call.

LAKSHADWEEP ISLAND, VU7. A large group of operators are QRV as VU7AG from Agatti Island, IOTA AS-011, until December 10. Activity is on 160 to 10 meters using CW, SSB and RTTY. In addition, VU7KA is QRV from Kavaratti Island briefly during demonstration purposes for the local administration. QSL both calls via W4VKU.

ALBANIA, ZA. Peter, DL4KM is QRV as ZA/DL4KM. Activity is on the HF bands. His length of stay is unknown. QSL to home call.

ASCENSION ISLAND, ZD8. A group of operators will be QRV as ZD8UW from Green Mountain from December 2 to 6. Activity will be on 40 to 10 meters using CW and SSB and possibly WSPR. QSL via M0OXO.

THIS WEEKEND ON THE RADIO. The QRP ARCI Topband Sprint, RSGB 80-Meter Club CW Sprint, QRP CW Fox Hunt, NCCC Sprint, Feld Hell Sprint and the SARL Digital Contest are all on tap for the next few days and upcoming weekend. The ARS Spartan CW Sprint is scheduled for December 3. Please see November QST, page 87, December QST, page 66 and the ARRL and WA7BNM contest web sites for details.

21941. RE: [DX-IS] 40M Weird - Tough spots to contact around the world - PY7ZZ

Yahoo group: DX-IS (2013)
Date: 2013-11-29 06:35:21 UTC
From: Lance Martin
Topic: 21941 Message: 21941

Hi Tim

Thanks for the empathy.

Everyone has a tough spot to contact around the world and usually that is somewhere over the north/south pole (and especially non equatorial locations). For some folk it's better than others. For us in VK6 the tough spot is all of South America and eastern Caribbean including up through east Canada/West Atlantic. (which does not include East Coast USA, with the exception of the very north east coast USA).

4U1UN is in New York and when the east coast is open LP to us, this should be doable, what makes it difficult is the window of operation.

Anyway some good news, I contacted PY7ZZ this morning on 30m CW. Now this is a rare event!! Very fluttery sigs but got a 559 exchange with Fred via the south pole. This would have been a short path communique, quite grey line but lots of sunshine in between...
It was such a delight to make the QSO. We are both avid DXers who are active daily but very, very rarely hear each other.
It's such a thrill for us when the south pole does open and always a pleasure to hear anything in South America/Caribbean/East Canada/NE USA areas.

73, Lance - VK6DU

You are correct Iain. Kazakhstan, UN, is what I was referring to. Usually pretty difficult from here especially 1 1/2 hours before sunset on 40 with EU between us and them.

Lance, you guys down under sure have it rough. The countries we consider easy pickings are rare for you guys and because expeditions go for rate and not areas you guys get left out.

4U1VIC counts as Austria for DXCC (but as a separate entity for WAE, and CQ DX Marathon).
4U1GSC counts as Italy.

I think Tim meant UN as in the prefix for Kazakhstan, though...

but did work a UN. Then an hour later I was tuning 40 there and BY5CD was s9, SP, and no one calling him. I called and worked with one call. Everyone there were surprised. I had to keep listening and convince myself it wasn't 6Y5CD.

21942. J6 operation

Yahoo group: DX-IS (2013)
Date: 2013-11-29 06:50:34 UTC
From: Lance Martin
Topic: 21942 Message: 21942

Hi Guys

Very much looking forward to;

ST. LUCIA, J6. Operators W3FF, AA4W, K3JDB, N9AW, NM4T, W4QO, W5EXJ and W6HFP will be QRV as J68FF and J6/home calls, respectively, from December 1 to 9. Activity will be on 160 to 10 meters using CW, SSB and various digital modes. QSL to home calls.

Even though the SFI has come down a bit, the south pole has been opening, so there is a chance for us VK6s. And you guessed it, need them on 12/10m.

...ah, I am not as confident now that I see it's a buddipole DXpedition.....fingers crossed.

Good luck to all,

73, Lance - VK6DU

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31129
SIDC SOLAR BULLETIN 29 Nov 2013, 1211UT
SIDC FORECAST (valid from 1230UT, 29 Nov 2013 until 01 Dec 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 29 Nov 2013 10CM FLUX: 136 / AP: 007
PREDICTIONS FOR 30 Nov 2013 10CM FLUX: 139 / AP: 010
PREDICTIONS FOR 01 Dec 2013 10CM FLUX: 139 / AP: 007
COMMENT: NOAA AR 1907 and 1908 were responsible for the C-flaring activity
today November 29 and yesterday, November 28. We expect more C-flares. NOAA
AR 1909 is also in the running for C-flaring activity. Solar wind speed
is below 300 km/s. The slow wind carries an average total interplanetary
magnetic field (IMF) below 10nT. The earth entered another sector causing
unsettled geomagnetic conditions on the planetary level (Kp=3). Further we
expect quiet geomagnetic conditions for the rest of the UT day. Tomorrow,
November 30, a glancing blow of the filament eruption of November 27 is
possible.
TODAY'S ESTIMATED ISN : 074, BASED ON 05 STATIONS.

**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3A - Special callsign 3A60ARM will be in use on 1-31 December to celebrate the 60th anniversary of the Association des Radioamateurs de Monaco (ARM). QSL via bureau only. [TNX Les Nouvelles DX]
9L - Ivo, 9A3A is now active as 9L1A from Sierra Leone "for more than three months". He logged 2000+ QSOs during the CQ WW DX CW Contest, and is now working "on antennas improvements". 9L1A is a reissued callsign, QSL for the current operation is via 9A2AA (direct or bureau). [TNX 9A2AA]
D4 - Keith, G3TTC will be active as D44TUE from Cape Verde until 2 December. He will be on Sao Vicente (AF-086) until 30 November, and on Sao Tiago (AF-005) on 1-2 December. Look for him around 14260 and 18128 kHz. QSL via G3TTC, direct or bureau. [TNX The Daily DX]
E6 - Alan, VK4WR (E6RQ) and Graeme, VK4FI (E6SG) will be active from Niue (OC-040) on 7-17 December. They will concentrate on 6 metres, with some activity on the HF bands (40-10 metres) using a dipole and 100 watts. QSL both calls via VK4FI. [TNX OPDX Bulletin]
FK - Freddy, FK8RO (F5IRO) will be active as FK8RO/p from Ouvea Island (OC-033) on 9-13 December. He plans to be QRV on 40-10 metres CW with wire antennas. QSL via QSL via F5IRO, direct or bureau. [TNX DX World]
FM - Jim, F5MCC will be active as FM/F5MCC from Martinique (NA-107) on 3-21 December. He will operate CW and SSB on 40-10 metres. QSL via home call, bureau preferred. [TNX NG3K]
JD1_mt - Take, JG8NQJ will be back on Minami Torishima (OC-073) in mid-December. Usually he works at the local weather station for six weeks at a time, and operates mainly CW as JG8NQJ/JD1 in his spare time. QSL via JG8NQJ (bureau) or JA8CJY (direct).
JW - Once again Erik, LA2US will be active as JW2US from Bear Island (EU-027) for six months, starting in December through May 2014. He will operate mainly CW in his spare time. QSL via LA2US, direct or bureau, plus LoTW and eQSL.
OE - Jun JH4RHF, Roberto IK2PGM and Antonello IT9YVO will be active from 4U1VIC, the Vienna International Centre Amateur Radio Club, from 29 November to 1 December. QSL direct or bureau. [TNX DX

Coffee]
SP - Special station SN18PPM (the suffix stands for "Ponizej Poziomu Morza", i.e. below sea level) will be active from 29 November to 2 December from the village of Raczki Elblaskie, the lowest point of Poland (1.8 metres b.s.l.). QSL via SP4EOO.
TY - Wim, ON6DX hopes to collect his TY licence [425DXN 1177] "by the end of the week", which however is too late as he will go back home on 2 December. Therefore he will remain active as 5V7TH from Togo, with plans to return and operate from Benin "in early 2014". [TNX DX World]
UA - Special callsigns R1980M (operated by R5AX) and R1980L (operated by RX1CQ), commemorating the Moscow 1980 Summer Olympics, will be active until 7 February 2014. A very large number of other special event callsigns will be in use between 1 January and 31 March 2014 to celebrate the XXII Olympic Winter Games and the XI Paralympic Winter Games to be held in Sochi. See http://ok2014.ru/ http://ok2014.ru/ for further information, including details on various awards.
UA - Several special event stations (R110RAEM, RA110RAEM, RB110RAEM, RC110RAEM, RD110RAEM, RG110RAEM, RJ110RAEM, RK110RAEM, RL110RAEM, RM110RAEM, RN110RAEM, RO110RAEM, RQ110RAEM, RR110RAEM, RS110RAEM, RT110RAEM, RU110RAEM, RV110RAEM, RW110RAEM, RX110RAEM, RY110RAEM, RZ110RAEM) are expected to be QRV on 1-31 December to commemorate the 100th anniversary of the birth of Ernst T. Krenkel, the legendary RAEM. Information on the relevant award, QSL routes and logsearch can be found at http://raem110.ru/
ZD8 - G3VFC, G3ZAY, M0BLF, M0VFC and M1BXF will be active as ZD8UW from Ascension Island (AF-003) on 2-6 December. They will operate mainly SSB and CW on 40-10 metres, with possibly some activity on 6 metres and WSPR . Logsearch on Club Log, QSL via M0OXO (OQRS for direct and bureau cards on www.m0oxo.com http://www.m0oxo.com) and LoTW. [TNX G3ZAY]
ZF - Curt, N0OK will be active as ZF2OK from Grand Cayman Island (NA-016) on 1-8 December. He will operate holiday style on 20, 17, 15 and 10 metres mostly RTTY. QSL via home call.

21946. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-11-30 15:30:00 UTC
From: Paul Dunphy
Topic: 19749 Message: 21946

```
:Issued: 2013 Nov 30 1245 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31130
SIDC SOLAR BULLETIN 30 Nov 2013, 1211UT
SIDC FORECAST (valid from 1230UT, 30 Nov 2013 until 02 Dec 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 30 Nov 2013 10CM FLUX: 131 / AP: 013
PREDICTIONS FOR 01 Dec 2013 10CM FLUX: 130 / AP: 008
PREDICTIONS FOR 02 Dec 2013 10CM FLUX: 129 / AP: 007
COMMENT: NOAA AR 1907 produced the only C-flare of yesterday November 30.
We forecast a probability for C-flares slightly above 50%. A partial halo
CME was detected by CACTus. The CME appeared in the field of view of
SOHO/LASCO C2 around 19:00, November 29. There was no clear on disk
signature of the eruption. We can assume that the CME is back sided. The
solar wind speed increased to 350 km/s. The total interplanetary magnetic
field (IMF) shows also an increase since yesterday. The solar wind
structure passing near the L1 point can be possibly linked to the northern
coronal hole that passed the central meridian on November 24. The plasma
pressure although was not strong enough to cause a geomagnetic disturbance.
Similar for the z-component of the IMF which was not strongly negative. The
planetary Kp stayed below 4. We expect quiet geomagnetic conditions with
K lower than 4.
TODAY'S ESTIMATED ISN : 074, BASED ON 14 STATIONS.

SOLAR INDICES FOR 29 Nov 2013
WOLF NUMBER CATANIA : ///
10CM SOLAR FLUX : 129
AK CHAMBON LA FORET : 015
AK WINGST : 008
ESTIMATED AP : 008
ESTIMATED ISN : 071, BASED ON 11 STATIONS.

21947. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-12-01 15:30:00 UTC
From: Paul Dunphy
Topic: 19749 Message: 21947

```
:Issued: 2013 Dec 01 1201 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31201
SIDC SOLAR BULLETIN 01 Dec 2013, 1212UT
SIDC FORECAST (valid from 1230UT, 01 Dec 2013 until 03 Dec 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 01 Dec 2013 10CM FLUX: 132 / AP: 015
PREDICTIONS FOR 02 Dec 2013 10CM FLUX: 132 / AP: 007
PREDICTIONS FOR 03 Dec 2013 10CM FLUX: 132 / AP: 007
COMMENT: NOAA AR 1907 was responsible for the several B-flares and the 1
C-flare on November 30. We expect that the flaring situation stays as it
is: a chance of 50% for C-flares, 20% for an isolated M-flare and almost
zero chance for X-flares. A partial halo CME was detected on November 30
coming into the field of view of SOHO/LASCO C2 around 14:00 UT in the SE.
No on disk signature could be linked to this event. STEREO B EUI 195
indicates some flaring activity and a mass ejection around that time from a
region near the centre of the STEREO B solar images. This CME is determined
as back-sided. The solar wind speed has reached 500 km/s since late
November 30. The z-component of the interplanetary magnetic field (IMF) was
mainly negative resulting in a planetary and local (Dourbes) K-index of 4
late November 30. We expect the solar wind speed to decrease gradually. We
expect quiet geomagnetic conditions with possible unsettled conditions
(K=3) for the remaining part of December 1.
TODAY'S ESTIMATED ISN : 084, BASED ON 15 STATIONS.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 24th-November, through Sunday, 1st-December there were 239 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3D2/r, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9X, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T30, T32, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP9, VR, VU, VU7, XE, XT, XU, XX9, XZ, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZF, ZL, ZL7, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3A60, MONACO. Members of the Monaco Ham Radio Society (ARM) will celebrate their 60th anniversary by signing 3A60ARM between now and December 31st. Activity will be on all bands and modes. QSL via the Bureau (preferred).

A special QSL card to confirm all contacts will be sent after March 2014 via bureau. For QSLs direct (SAE + 2 US dollars, NO IRC ending 31 December 2013). NO eQSL, NO LoTW. Log will be posted (ASAP) on ClubLog.

6V, SENEGAL. Just a reminder that Robert, DL7VOA, is now active as 6V7D from Toubab Dialaw until December 7th. Activity will be mainly on CW, with some SSB, on 40-10 meters. QSL via DL7VOA. ADDED NOTE: Please be advised to only QSL this operation to DL7VOA. A Russian group used this callsign back in March of 2011.

6Y, JAMAICA. Lester, W8YCM, is currently on his annual trip to Negril, Jamaica (NA-097), and will be active as 6Y5/W8YCM until the new year. Activity will be mostly 17 meters using SSB. QSL via his home callsign.

8P, BARBADOS. Peter, G0KOK, is currently active as 8P9CC from Barbados until the middle of December (about two weeks). This is his annual trip there. He uses a FT897D into a dipole antenna. QSL via G0KOK.

9L, SIERRA LEONE. Ivo, 9A3A, is now active as 9L1A from Sierra Leone for at least until February, but he informs OPDX "most likely I will extend my stay until end of May 2014". Activity will be mainly CW, some SSB, on 40-10 meters with wire verticals mounted on a Spiderbeam pole, but he will try to install a 5 band Spiderbeam if Ivo can find a suitable position and mast. His rig is a K3 plus RM 300w amplifier. QSL via 9A2AA.

CARIBBEAN TOUR (Update). As mentioned last week, Ted, SP3IPB, is once again active as VP2V/SP3IPB from British Virgin Islands (NA-023) and is travelling with his wife Agnieszka, SQ3WN, on a yacht for the next three weeks. He informs OPDX that his VP2V/SP3IPB is good for the next 3 years and has rented a Bitter End Saba Rock Virgin Gorda bungalow. Activity will be on 40/30/20 meters using CW and SSB. He is using a TS-50 into fishing rod GP wire antennas. He also tells OPDX that he will be back on Montserrat about January 15th, and active as VP2MTK. QSL via his home callsign.

EA8, CANARY ISLANDS. Christophe, ON6ZQ, is now active as EA8/ON6ZQ/p from Isla de Gran Canaria (AF-004, DIE S-005, WLOTA 0969, WWFF EAFF-078) until December 7th. Activity will be holiday style on all the HF bands, depending on the propagation. QSL via his home callsign, direct or by the Bureau. Visit his Web site at: http://www.on6zq.be

FM, MARTINIQUE. Jim, F5MCC, will be active as FM/F5MCC from Martinique Island (NA-107, DIFO FM-001, WLOTA 1041, DDFM 97) between December 3-21st. Activity will be on 40-10 meters using CW and SSB. QSL via the Bureau to his home callsign. Jim will also activate 4 lighthouses on the island.

FR, REUNION ISLAND. Mike, F5PLC, is currently active as FR/F5PLC from Reunion Island. The length of his stay is not known. Activity will be on the HF bands using a KX1 with 7m vertical on a fishing-rod. QSL via his home callsign, direct or by the REF Bureau.

FS, ST. MARTIN (Early Announcement). John, K9EL, will once again activate FS/K9EL from St. Martin (NA-105, DIFO FS-001, WLOTA 0383, WW Loc. FK88) between June 8-27th (2014). Activity is usually on 160-10 meters using CW, SSB and possibly RTTY. Daily uploads to ClubLog and LoTW are planned. QSL via his home callsign.

FT5Z, AMSTERDAM ISLAND (Update/Press Release - Our Equipment Has Arrived In New Zealand): Col, MM0NDX, posted on the FT5ZM Web page (November 26th) [edited]: "Our sea container loaded with our pallets of equipment has arrived in New Zealand. The container had been unloaded and its contents placed in a bonded customs warehouse. It is ready for transportation by truck to the port of Tauranga.
The Braveheart will return from a mission to Raoul Island on December 6th, and be prepared to load our cargo shortly thereafter. Between December 9th and 14th the ship will be provisioned, undergo routine maintenance, and a main engine oil change. The Braveheart staff will fill our shopping list and put all dry provisions aboard the vessel.
The ship□s crew will have been at sea or working for a long time, so they will take a vacation during the week of the 15th to the 21st. On December 23rd the Braveheart will take on fuel. On the 24th fresh produce (eggs, milk, fruits, vegetables) will be put aboard. The crew will spend Christmas day with their families.
On December 26th, at 1400 the Braveheart will depart Tauranga via New Zealand's North Cape, cross the Tasman Sea south of Tasmania, cross the Great Australian Bight past Albany, and then sail north up the western coast of Australia to Fremantle. This is a 3440 nautical mile voyage that will take 17 days.
The Braveheart is scheduled to enter the port of Fremantle on Monday, January 13th. The vessel will take on fuel and provisions on January 14th. She will clear customs and depart for Amsterdam Island on January 15th with our 14 team members and lots of radio equipment aboard."

IOTA NEWS.....
OC-033. Freddy, F5IRO, will be active as FK8RO/P from Ouvea Island between December 9-13th. Activity will be on 40-10 meters, mainly CW and and some PSK, with a Elecraft K3 and dipoles and long wire antennas. QSL via F5IRO. Look for details to be posted on QRZ.com and Freddy's Blog page at: http://j28ro.blogspot.com

SA-088. (Update) Fabio, PP5BZ, will be active as ZW5W from Santana de Fora Island (DIB SC-10) between December 6-9th. Activity will be on 80-10 meters using CW, SSB and possibly RTTY. QSL via his home callsign, direct or by the Bureau.

ISWL CALLSIGNS (For December). The following ISWL club callsigns will be used throughout the month of December 2013:
GX4BJC/A - Operated from Near Bude in Cornwall, by Mike, M0SMJ. (/A WAB Square SS20 - England, and IOTA EU-005).
MX1SWL/A - Operated from Walton on the Naze, in Essex, by Herbie, G6XOU. (/A WAB Square TM22 - England; IOTA EU-005 and WLOTA LH-1841).

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual operator. The I.S.W.L. is a member of the European PSK Club. All QSL info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>. NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see <www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for their awards.

J6, ST. LUCIA. By the time you read this, the 5th St. Lucia Buddies in the Caribbean Suitcase DXpedition should be active until December 9th. Eight operators will be operating from Chateau Devaux on the NE side of St. Lucia. This 'Suitcase DXpedition' will operate QRP to 100-watt radio stations using backpackable Buddipole antennas to make contacts from the villa, the surrounding mountains, and (of course) from St. Lucia's superb beaches. The eight operators are Jerry/N9AW, Craig/NM4T, John/W5EXJ, Joe/K3JDB, Rick/AA4W, Jim/W4QO, Chris/W6HFP, and Budd/W3FF (J68FF). The operators will sign with their own callsign with 'J6/'. With several station on the air, operations will be on CW, SSB, and/or Digital Modes on 160-10 meters from the villa while others make contacts with portable set-ups from other J6 locations. QSO confirmation and QSLs will be available via LoTW, Bureau or direct via information on each operator's QRZ.com page.

JD1, MINAMI TORISHIMA. Take, JG8NQJ, will once again be active as JG8NQJ/JD1 from Marcus Island in the Minami Torishima (OC-073, JCG 10007) group between December 16th and March 18th (2014). He is usually there to work on the island's weather station. Activity will be limited to his spare time. He will be mainly on 17 meters but also on 15/12/10 meters CW. QSL via JA8CJY, by the Bureau or direct to: Susumu 'Sin' Sanada, 5-17, 5-4, Shin-Ei, Toyohira, Sapporo 004, Japan. Online log is available at: http://dx.qsl.net/cgi-bin/logform.cgi?jd1-jg8nqj

JW, SVALBARD. Alex, PY2SEX/DL1NX, informs OPDX that he expects to be active from Svalbard (EU-026) during Christmas (December 24-25th) for only two days, but will be there for 7 days. Activity will be on all HF bands, as well as 6 meters, using mainly CW, but with some SSB. It sounds like he will spend a lot of time of the lower bands because now in Svalbard there is no daylight until the end of January. He believes that the lower bands will be easier to work and easier to make some DX, of course if no Aurora comes up. He states, "I'm going there exactly to try to watch the Aurora,..... so if Aurora happens, no QSOs, I will be happy anyway. :) " He will try to upload his log to ClubLog and LoTW if possible, and if there is an InterNet connection. Callsign has not yet been issued, but could be JW/DL1NX (not JW/PY2SEX because Brazil does not have an agreement with Norway) or possibly a JW*** callsign. QSL via DL1NX with SAE and a valid IRC or 2 green stamps.

JW, SVALBARD. Erik, LA2US, will once again be active as JW2US on Bear Island (EU-027) for a 6 months period between December 2013 through May 2014. He states, "Again, this is not a Dxpedition - I'll be on the air as time and work schedule permit. Last time I worked 80% SSB - this time I'll mostly work CW. Contact confirmation will be uploaded to eQSL and LoTW. QSL via Bureau will be answered after June 2014." Equipment is a

FTDX5000MP into a Carolina Windom 80-10m antenna.

PJ2, CURACAO. Jeff, K8ND, was once again active from Curacao Island (SA-099, WLOTA LH-0942) to activate the Signal Point Station (PJ2T) as PJ2/K8ND, this past week/weekend, but will be leaving early Monday morning, December 2nd. However, he informs OPDX that he will be returning in January for the CQWW 160M CW Contest with Jim, W8WTS. Jeff also mentioned to OPDX to look for the following stations (at PJ2T):
* Marty, PJ2/K2PLF - Will be there until Thursday, December 5th. He has been on all sort of bands on CW, and is trying to get RTTY set up.
* Mike, PJ2/VE7ACY (also RW0CN) - Will be there until Tuesday, December 3rd. He has been on all bands, on CW (mostly) and SSB.
* A "fresh crew" will operate the ARRL 10 Meter Contest during the weekend of December 14-15th. Operators Mark/N5OT, Dave/W6DR, Yin/N9YS, Mike/NT6X and Geoff/W0CG will mostly arrive on December 11th. While Anders, SM4KYN, will be arriving December 15th.

PJ7, SINT MAARTEN. Tom, AA9A, will once again be active as PJ7AA from Sint Maarten (NA-105) between February 22nd and March 16th (2014). He informs OPDX that this is his yearly trip to Simpson Bay, and his activity will be on 40-10 meters using CW and SSB. Tom mentions, "I may be able to spend a few hours in the ARRL SSB Contest (March 2-3rd) like last year. We have family there that week and have time planned with them so contest time is very limited." Operations will be with 100 watts with a K3 and Buddipole. QSL via AA9A or LoTW.

CY0P QSL CARD STATUS. Murray, WA4DAN, reports: "The CY0P QSL cards have arrived and Gary, VE1RGB, reports that the QSL process has begun. Please be patient as we have received thousands of requests to date. The CY0P cards will be worth the wait. There are eight (8) different, full-color photo cards that really capture the essence of Sable Island. Rick, AI5P, did an outstanding job with his professional photography techniques that made these beautiful cards possible."

HL1ZCF QSLS. Ron, W3PV, reports: "I have just concluded my operation from Seoul as HL1ZCF and QSLs may be sent direct to my W3PV address (PO Box 3003, Boynton Beach, FL 33424), by the Bureau, via LoTW or eQSL.

IRC NEWS (UK). The UK Post office has confirmed that IRCs will not be sold in the UK. However, they are under an international obligation to redeem an IRC, provided that it is in date and stamped in the correct position by the issuing Country.

IRC NEWS (World). Just a reminder that time is running out to redeem your Nairobi model IRCs because they will expire on December 31st.

K2QXI/KH0 via JJ2QXI. Mack, JJ2QXI/K2QXI, states, "I will accept SASE/SAE + sufficient postage/IRC/GSs, via the Bureau and via E-mail. For details, please see K2QXI on the QRZ.com."

QSL RECEIVED VIA LoTW: 3DA0ET, 6W2SC, 7K1CPT, BG8UPA, C31BO, C6AUM, CE7PGO, DK1MAX, DK6IM, DM5BB, EA1GHA, F5FLU, FS/K9EL, G0HDB, G3UAS, G7SSE, HA5VZ, HB9ACA, HP1IBF, HR2DMR, HZ1PS, J5UAP, J79WI, JA1SKE, JA8COE, JE1HRC, JE4CIL, JH0INP, JM1XCW, JN3SAC, KL7RA, LU4ECN, OD5PY, PA1BR, PY2PRB, PY2TIM, PY4OY, R6JY, SP6NVN, SQ3JPA, UD3T, UR1MI, UX3IW, V31MA, VA7ST, VE4DXR, VE7ON, SE2K, YE5R, YO5NY and YR1A

QSLS RECEIVED VIA MAIL: 6V7Q, 9X0ZM, E6AK, E6AY, E51AAR, ER5LL, K4YT/3B9, SV5PFC, T01A, TI5W, TM0SM, UK8ZC, Z21DXI and ZS8C

QSLS RECEIVED VIA THE BUREAU: 3B7C, 3DA0PW, 5X1NH, 8Q7UY, 9H3XV, 9M2CNC, CT3/DF8AA, CT3FT, EA9/EC7DZZ, ES9BLJ, EA9BO, EA9CD, EA9PD, EA9PY, FM/KL7WA, KP2ZZ, P29NI, S79K, SV5/DL7YS, T32C, TF/M0BLF, TK/DL1RTL, TO7A, VK9X/G6AY, ZD8RH and ZQ2EO

T32, EAST KIRIBATI (Reminder). Tim, NL8F, is currently active as T32TM from Christmas Island (OC-024) until December 4th. After the 4th, a team of operators will join Tim, and the group will then use the callsign T32RC until December 11th. Activity is to celebrate the 12th anniversary of the Russian Robinson Club. Look for operations to be on 160-10 meters using CW, SSB and RTTY. The T32RC team plans to be in the ARRL 160 Meter Contest (December 6-8th). QSL via ClubLog's OQRS (preferred) or LoTW (6 months after operation). Also QSL via N7RO, direct or by the Bureau. No eQSL. QSL T32TN via K8NA, direct or by the Bureau. For more details and updates, visit: http://www.t32-2013.com

V5, NAMIBIA (Update). Operators Uwe/DL9NDS and Ewald/DJ2BQ will once again be active as V5/homecall from Namibia between Janaury 2-18th. Activity will probably be on all bands 160-10 meters using CW, SSB and RTTY, but with a focus on 160/80/40m and RTTY. QSL via their home callsign (see QRZ.com).

V6, MICRONESIA. Haru, JA1XGI will once again be active as V63XG from Weno Island, Chuuk Islands (OC-011), between December 4-12th. Activity will be on 160-10 meters, including the 30/17/12m, using CW, SSB and RTTY. His operation will be focused on Europe on the lower bands (160/80m). He also plans to be in the ARRL 160 Meter Contest (December 6-8th). QSL via his home callsign, direct or by the Bureau. An OQRS will be available on ClubLog. For more details and updates, visit his Web page or Blog at:
http://island.geocities.jp/v63xg/index.htm
http://ja1xgidxvacation.blogspot.com

VK9M, MELLISH REEF (Update From Press Release #4). Team Mellish 2014 sent out a press release (#4) on November 30th. Excerpts from the release state, "Many activities are underway as planning continues for the Mellish Reef DXpedition scheduled for March 28, 2014, to April 9, 2014."
The team is happy to announce that Mike Shapiro, WA6O, joined the team. Mike, originally from Moscow, Russia, has lived in the USA for the past 22 years. First licensed as UA3AIW, he operated mostly from UK3ABF, UK3ACL, and other club stations in Moscow. In 1998, he received AD6GY and WA6O in 1999. He's a member of Northern California Contest Club, and 40m captain in N6RO contest team.
Also, joining the Pilot Team as the South American pilot Luciano Sampaio De Souza, PT7WA. Luciano entered ham radio in 1966, his first call was PY7VNY, and in 1977 he received PT7WA. He operates CW/SSB and has worked all but one DXCC entity on CW, the elusive P5. Luciano is also an IOTA enthusiast having over 975 islands confirmed. He is also the QSL Manager for several DXpeditions.
Many have asked, including the ARRL and most all major sponsors: "Do you have landing permission?" They have written approval to land on Mellish Reef from the Australian government. In July, they contacted the appropriate agency and asked for permission to use the reef. After about 5 weeks, and a few rounds of "Questions and Answers", the agency concluded (in writing) that they do not need a permit.
Signing on as a corporate sponsor is <FoldingAntennas.Com> whose "folding (hex) beam antenna" will join their antenna lineup. They are also happy to have both Elecraft and SteppIR as corporate sponsors.

They mention that they began actively raising funds in October. The team is honored to have received significant recognition from: The Northern California DX Foundation (NCDXF), Oceania DX Group ☐ Australia (ODXG), International DX Association (INDEXA), The Mediterraneo DX Association (MDXA), The Carolina DX Association (CDXA), Chiltern DX Association (CDXA), The German DX Foundation (GDXF), The European DX Foundation (EUDXF), The Lone Star DX Association (LSDXA), Southwest Ohio DX Association (SODXA), Northern California DX Club (NCDXC), and other organizations. They also began receiving assistance from individual DXers. With a total budget of 127,000(USDs), they certainly appreciate the recognition and look forward to hear from interested DXers, especially those that need Mellish Reef for an "All Time New One". Donations are welcomed through the Web site <vk9mt.com> or by check / money order in US dollars to: Mellish Reef 2014 DX-pedition, Gene Spinelli, Treasurer, PO Box 189, Divide, CO, USA 80814. For their friends outside the USA please use PayPal or E-mail for wire transfer instructions at: info@...
Also, for additional information about the DXpedition, please send E-mail to the above address.
The complete text of press release #4 will not be on their Web page until on or about December 8th, because their Webmaster is on holiday and does not have Internet access.

VP5, TURKS AND CAICOS. Steve, VE3OC, will be active as VP5/VE3OC from the Island of Providenciales (NA-002) between December 19-26th. Activity will be limited (between scuba dives) and holiday style. His equipment consists of an Icom IC-7000, Buddiepole antenna, Lithium-Ion battery for portable use on the beach and cliff sides. He will try his best to load log via eQSL. NO QSLs via the Bureau. If you would like an actual QSL card, please QSL direct via VE3OC (address on QRZ.com) with 5 USDs to cover postage and printing.

VU7, LAKSHADWEEP ISLANDS (Update). Operators active as VU7AG from Agatti Island (AS-011) will continue until December 10th. Activity will be on 160-10 meters using CW, SSB and RTTY. Remember, another callsign has been issued for demonstration purposes on Kavaratti Island VU7KA. This would be used only briefly when team members make presentations to the local administration in Kavaratti and educate them on amateur radio. QSL Manager is Krish, W4VKU, direct or by the Bureau (see details on the Web page). An Online QSL Request System (OQRS) will be available for all your QSL requests. OQRS will be enabled soon after the DXpedition. For Logbook of The World (LoTW): QSOs would be uploaded to LoTW in approximately 6 months time. The VU7AG Web page, with QSL details and frequencies is available at: http://www.vu7ag.info

XU, CAMBODIA. John, KF0RQ, will once again be active as XU7ACQ from Phnom Penh between February 25th and March 21st. Activity will be holiday style (he is there to visit his daughter and family) on 40-10 meters using SSB and the Digital modes (RTTY/PSK31). He informs OPDX that he will be using a broadband 5 band Hex beam at 35 feet for 20-10 meters and a trapped vertical for 40m. John is still looking for South Dakota and

Delaware QSOs for his WAS from XU. QSL via KF0RQ. Online log search is available at ClubLog.

XV, VIETNAM. Just a reminder that Mats, SM6LRR (RM2D), is now active as XV2LRR from Phan Tiet until December 14th. Activity will be holiday style on 40-10 meters using CW and SSB. He will use a TS-590s with 100w into a vertical (40/30/15m) and Inverted Vee dipoles (20/17/12/10m). QSL is via LoTW only (possibly some cards may be printed at a future date).

YN, NICARAGUA. Scott, K7ZO, will once again be active as YN5ZO between December 11-18th. Activity will be on 20-10 meters, using SSB and possibly RTTY. He plans to be in the ARRL 10M Contest (December 14-15th) as a Single-Op/Mode-SSB/High-Power entry. Antenna is a Spiderbeam for 20-10m. QSL via K7ZO and LoTW.

Z8, SOUTH SUDAN (Press Release from Juba, dated November 25th). Martti, OH2BH, writes [edited]: "LIFE IS GOOD IN SOUTH SUDAN AFTER CONTEST WEEKEND -- Now that the CQWW CW contest is over, life is getting back to normal in this African Republic. The two local hosts, Z81B and Z81D, have embarked on trips abroad, leaving the Missionary team in charge of wrapping up their duties before heading home tomorrow Tuesday.
As a thunderstorm hit the area yesterday at dawn, there went their beverages for the night. The wires were running outside the guarded area and thus there was no way to repair them last night. Apologies for last night with no RX antennas and with high atmospheric noise which left many calling in vain... So, with a fresh mind the team has now repaired the western beverage and will reappear tonight still with three stations - 160, 80 and 30M.
The contest effort on four bands resulted in 9000 QSOs. Kindly follow the individual QRZ.com sites for Z81R and Z81Z for further QSLing instructions. The plan is to have ClubLog updated before 0000 UTC tonight.
The team is healthy and in high spirits but also looking forward to returning home for a reunion with their dear ones ahead of a well deserved Christmas Season.
The team will depart tomorrow at 1500 UTC flying to Nairobi, Kenya, and back to Europe. Diya, Z81D, is left with an 80M vertical plus a new FTdx3000 and Acom 1000 to boost his activity on all bands but specifically on 80M. DX will be plentiful from South Sudan."

ZD8, ASCENSION ISLAND (AF-003). Five members of the Cambridge University Wireless Society will be active as ZD8UW from Green Mountain on Ascension Island between December 2-6th. Activity will be on the HF bands, 40-10 meters including the 30/17/12 using CW and SSB. Operators mentioned are: Terry/G3VFC, Martin/G3ZAY, Dominic/M0BLF, Robert/M0VFC and Gavin/M1BXF. They will be operating with Elecraft K3s. They won□t have internet access at the QTH, but logs should be uploaded roughly daily to Clublog. The logs will also go on LoTW once they return home, but they can't apply for the LoTW certificate in advance as they won't be collecting their radio licence until they get to Ascension. QSL will be via M0OXO.
For updates, watch: http://www.g6uw.org/dxpeditions/zd8uw

ZS7, ANTARCTICA. Operators Adam/ZS7V and Philip/ZS7PHM are now at the
South African National Antarctic Exploration (Sanae) IV Base Antarctica
(AN-016, WAP ZAF-03) until the end of February 2014. Activity will be on
the HF bands. Watch 15 and 20 meters. QSL via ZS1HF. For updates, watch
the WAP Web Page at:
http://www.waponline.it/NewsInformation/tabid/225/Default.aspx

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31202
SIDC SOLAR BULLETIN 02 Dec 2013, 1312UT
SIDC FORECAST (valid from 1230UT, 02 Dec 2013 until 04 Dec 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 02 Dec 2013 10CM FLUX: 131 / AP: 008
PREDICTIONS FOR 03 Dec 2013 10CM FLUX: 131 / AP: 010
PREDICTIONS FOR 04 Dec 2013 10CM FLUX: 131 / AP: 007
COMMENT: Flaring activity was yesterday, December 1 and up to this moment
today, December 2 limited to the C-level. The probability for C-flares is
around 60%, for M-flares around 10% and almost no chance for X-flares. The
candidates to populate the flare-club are NOAA AR 1907, 1908 and 1909.
Geomagnetic conditions were quiet: K<3. This was due to a positive
z-component of the interplanetary magnetic field (IMF). The IMF has
although a relatively high value around 10nT. If the z-component turns
negative, unsettled conditions are possible. The solar wind speed is
decreasing. A coronal hole will approach the central meridian tomorrow.

Propagation Forecast Bulletin 49 ARLP049
>From Tad Cook, K7RA
Seattle, WA December 2, 2013
To all radio amateurs

SB PROP ARL ARLP049
ARLP049 Propagation de K7RA

This is a catch-up bulletin released Monday morning after the Thanksgiving Holiday.

We had quite an active week on November 14-20, and today we are reporting the numbers for the following week, November 21-27, and beyond.

Average daily sunspot numbers fell from 193.3 in the earlier period to 63.6 in the latter, and in the four days since then, November 28 through December 1, the average daily sunspot number rose to 100.3.

Average daily solar flux was also off, from 166.9 in the earlier period to 130 in the latter, then in the following four days the average solar flux was 130.8.

Geomagnetic indices were quiet, except that on November 29 through December 1 the planetary A index was 8, 9 and 10. Still, these are very moderate numbers, indicating conditions were slightly unsettled.

Predicted solar flux is 130 on December 2, 135 on December 3-4, then 140, 145, 140, 135 and 140 on December 5-9, 165 on December 9-14, then 160, 155 and 145 on December 15-17, 140 on December 18-19, 135 on December 20, and 130 on December 21-24.

Predicted planetary A index is 15 on December 2, 10 on December 3, 5 on December 4-5, 8 on December 6, 12 on December 7-8, 8 on December 9, 5 on December 10-12, then 10 and 8 on December 13-14, 5 on December 15-21, then 8, 10 and 8 on December 22-24, and 5 on December 25-30.

Now that November is over, let's look at sunspot number averages. Our 3-month moving average is up following increased activity, and we now know the 3-month average centered on October (including all

data from September 1 through November 30.) The three month moving average of daily sunspot numbers centered on January through October is 73.6, 80.7, 85.2, 106.4, 106.4, 97.5, 85.6, 77.4, 91.2 and 102.9.

The monthly averages of daily sunspot numbers for June through November 2013 were 80.2, 86.2, 90.2, 55, 127.2 and 125.7.

For those interested in whether recent activity is part of a second double peak in this cycle, the earlier peak at the end of 2011 had monthly averages for September through December of 106.4, 123.6, 133.1 and 106.4.

On November 27, Dean Lewis, W9WGV of Palatine, Illinois sent this report about the fun he had on 10 meters during the CQ Worldwide CW DX Contest, with a very simple indoor antenna: "Last weekend's 10 meter propagation was amazing; I worked three JAs; two on 10 meters, one on 15 meters; this may not sound like any great shakes to most, but being 'CC&R-challenged,' I run 10 watts from an Icom 703 to a carefully pruned indoor end-fed 40 meter half-wave wire (full wave on 20 meters, three half-waves on 15 meters, two full waves on 10 meters with no feedline or RF ground, and a very simple small matching device). The signals were all well over S9 and no QSB; no fills, no repeats, no errors. Also worked a number of European stations, Niger, the Caribbean, and South America, plus KH6 and KL7. 10 was like the low end of 40 meters on a Winter night. Don't remember when last I had to use the 500-cycle CW filter on 10 meter, but I did on Saturday and Sunday."

Dan Bates, N5TM of Katy, Texas also enjoyed 10 meters during the CQ Worldwide CW weekend: "I've never seen 10 meters with stations all the way up to 28.160 as was the case on Sunday morning of the CQWW. Propagation opened to the Far East late in the contest and my last two Qs were to China and East Malaysia on 15 meters." Dan also has restricted antenna space and operates very low profile.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for November 21 through 27 were 85, 51, 65, 69, 52, 47, and 76, with a mean of 63.6. 10.7 cm flux was 141.2, 142.8, 135.6, 127.1, 119.1, 115.5, and 129, with a mean of 130. Estimated planetary A indices were 3, 3, 8, 2, 2, 2, and 2, with a mean of 3.1. Estimated mid-latitude A indices were 1, 2, 6, 2, 2, 2, and 2, with a mean of 2.4.

21951. VU7AG 10m this morning

Yahoo group: DX-IS (2013)
Date: 2013-12-03 14:08:18 UTC
From: KQ8M
Topic: 21951 Message: 21951

So, I get up this morning. Get a shower, take my meds and head over to the computer. There is VU7 spotted on 10. YESSSS I need them
and it looks like he is working my area. I fire up the rig and the amp. Start calling and arrgghhh no output power. I take the amp
out of line. The rig is driving fine. Bring amp back I can tune it to 4w out with 100w in. I have proper plate voltage. Alas no
plate current. I start cussing and swearing as one should to get things working again and no joy. So I sit back and relegate myself
to hours of calling with 100w and probably not working them. Losing prop long before I have a chance. Hey he just worked this guy up
away from the major pile. Let me try there. After several Kili Quebec Mexicos he says KQ8M 59. Needless to say it took a couple
minutes to pick myself up off the floor and log him. Can't believe I had luck on my side for once.

That does it, I'm getting rid of the amplifier! I heard him as well but was plagued by all the cat calls on his frequency and the, I am sure well intentioned "up" callers. I thought he called once but due to the high volume of qrm was never sure.

Anyway congratulations!

Topic: 21951 Message: 21956

Congrats Tim

Same here. Got up, noticed they were spotted in EU, and since the band shouldn't have opened to the East Coast for another hour I didn't hold much hope...

Turned on the rig anyway to see if I could hear anything and he was booming in here and just start calling for outside Europe! Third call, it was done. (but with the amp working)

Another 8 bander done.

Bob

PREDICTIONS FOR 06 Dec 2013 10CM FLUX: 140 / AP: 007
COMMENT: Two C-class flares occurred this morning. A C6.8 flare was
observed at 00:56 UT on the east limb near the location where AR 1895 and
1897 are expected to return. AR 1897 produced M-class flares during its
previous rotation. A C4.7 flare occurred in AR 1907 on the west limb,
peaking at 04:58 UT. This flare was associated with a CME observed in
SOHO/LASCO and STEREO-A/COR2 around 06:00 UT after a data gap. This CME is
not earth-directed. Geomagnetic conditions are currently at quiet
levels (KDourbes = 2). We expect possible unsettled conditions on December
7 due to the arrival of a fast wind stream originating from a coronal hole
that passed the central meridian today.

21958. Rx antennas

Yahoo group: DX-IS (2013)
Date: 2013-12-04 19:56:57 UTC
From: Brian Alsop
Topic: 21958 Message: 21958

RX antennas are supposed to help, right?

Put up my a 540'beverage (have had several in the past, worked great) to be greeted by an S5 wail on 160M.

It shows up as broadband with multiple carriers every 200 Hz.

Unplugging the cable modem fixes. Not the solution I was after.
Tin foil over the modem does nothing. Unplugging all cables leading to modem does nothing. Not the typical switching power supply problem signature.

Beverage wise, everything else checks out. TDR of cable leading to beverage OK. You can even see the reflection off the end of the unterminated beverage.

Shorting the coax at the antenna end shows no noise.

Seems to be impossible to get our provider (TWC) to act on it. They want to spend 24 to 72 hours to monitor modem performance and packets. I predict it will show no problems....

They haven't a clue about the universe of RF or RFI.

Does somebody have a rational explanation of how this trash is internally generated at 1.8 MHz within the modem?

Brian, it doesn't matter where it is generated, or how - if it gets out into your house wiring, then it will be radiated. I believe the solutionis the sameas for a switching power supply - you need filtering, either on the DX line between modem and power supply, or (easiest) between the power supply and the wall. Corcom and Qualtek make lots of different models of AC line filters to handle both differential and common mode..

Hi Pete,

The thing is that it developed this recently. Last Feb, I had a cable modem replaced due to RFI. Sniffed out with AM BC radio. AM radio next to the new unit was quiet. Now that same unit cable modem sounds like a buzz saw in the radio. So it may have HAD appropriate filtering. Evidently it does not now.

Subject: [DX-IS] Rx antennas

RX antennas are supposed to help, right?

Put up my a 540'beverage (have had several in the past, worked great) to be greeted by an S5 wail on 160M.

It shows up as broadband with multiple carriers every 200 Hz.

Unplugging the cable modem fixes. Not the solution I was after.
Tin foil over the modem does nothing. Unplugging all cables leading to modem does nothing. Not the typical switching power supply problem signature.

Beverage wise, everything else checks out. TDR of cable leading to beverage OK. You can even see the reflection off the end of the unterminated beverage.

Shorting the coax at the antenna end shows no noise.

Seems to be impossible to get our provider (TWC) to act on it. They want to spend 24 to 72 hours to monitor modem performance and packets. I predict it will show no problems....

They haven't a clue about the universe of RF or RFI.

Does somebody have a rational explanation of how this trash is internally generated at 1.8 MHz within the modem?

21963. XR0ZR Received LOTW

Yahoo group: DX-IS (2013)
Date: 2013-12-05 13:50:43 UTC
From: KQ8M
Topic: 21963 Message: 21963

Christmas came a bit early this year.

I awoke and went down stairs. Opened my browser and loaded LOTW and to my surprise; 5 tiny confirmations. XR0ZR.

However, I believe the Grinch has my K9W confirmations. Even with OQRS and a donation he is trying to spoil my Christmas! You're a
mean one, Mr. Grinch!

Tim
Both received here via Lotw...may just be a timing issue.
Don't know what their early release criteria is.
Bob

Hi Tim,

K9W was confirmed here yesterday via LoTW and the XR0ZR ones were
there this AM. As Bob KB1ZJU says, it is likely a timing issue.

If you don't hear anything in a few days, perhaps email the
manager. It appears they are uploading some or all of the QSOs to LoTW.
Some operations do stager the uploads in time based on who donated,
etc. Since you uses OQRS and made a donation (same procedure I used),
you should be A-OK. I didn't note their QSO count, but if they are
70-90K, which is normal for such a DXpediton, maybe they are uploading
the logs in smaller chunks to take the load off the LoTW server.

Too much speculation and guessing on my part! Betcha your QSLs
will be there in a day or two.

I did OQRS for K9W on Nov-18 also, and have not yet received LotW confirmations.

I don't think I did OQRS for XR0ZR (and none there either, but none expected).

I did not chase XR0ZR but I do know based on other operations by friends / members of a local DX group who are often DX-pedition operators, that those who donate to the DX-pedition receive some priority in LOTW and OQRS verification. I also know that the LOTW uploads for those who donate are done first with the remainder uploaded in ten thousand contact blocks. Those who do not donate can expect a six month delay in their LOTW confirmation; such is the current thinking / philosophy of the groups involved in the high cost DX-peditions .

Bottom line; if you supported the DX-pedition, they will support you with priority LOTW confirmation(s). OQRS is a donation/support after the fact but because of costs, work involved, and other factors, you may not receive a card right away. Indeed, when you consider some of these expeditions have more than 100 thousand QSOs to confirm, LOTW is the easiest to do with just an upload, printing tens of thousand cards and mailing them is going to take a while even if the computer logs and database look-up is considerably faster there is human interaction on every one.

Merry Christmas Tim. If you don’t have a K9W LOTW confirmation soon, let me know, email direct. Don’t know if I can get it done for you but I can try. I know that 123 of the 40M SSB QSOs uploaded to LOTW were mode mismatched but that was corrected yesterday.

Christmas came a bit early this year.

I awoke and went down stairs. Opened my browser and loaded LOTW and to my surprise; 5 tiny confirmations. XR0ZR.

However, I believe the Grinch has my K9W confirmations. Even with OQRS and a donation he is trying to spoil my Christmas! You’re a mean one, Mr. Grinch!

Thank you for what you said, Gary.

I understand and concur with everything you said. I hope you nor anyone else takes my saying the Grinch has my LOTW confirmations as an insult on the crew as it was meant as a play on Christmas and the Grinch. Hi hi

First I know these things take time. I am more than happy and grateful for the people that planned, operated and handle all of the logistics of this and every DXpedition. Without all of that effort these would not be available.

I appreciate your offer, Gary but I am sure something will come through sooner or later.

Merry Christmas to you and your family also.

Ahhhh…Well that
rules out the date pattern unless it’s reverse. Hi hi I
hope it comes before the end of the year. I would like to do
one more app before then. I do have countries to submit but
would be nice to add them to the total. Oh well, either way
they will come.

Hi
Tim,

K9W was confirmed here
yesterday via LoTW and the XR0ZR ones were there this AM. As
Bob KB1ZJU says, it is likely a timing
issue.

If you
don't hear anything in a few days, perhaps email the
manager. It appears they are uploading some or all of the
QSOs to
LoTW.
Some
operations do stager the uploads in time based on who
donated, etc. Since you uses OQRS and made a donation (same
procedure
I used), you should be A-OK. I
didn't note their QSO count, but if they are 70-90K,
which is normal for such a DXpediton, maybe
they are uploading the logs in smaller chunks
to take the load off the LoTW server.

Too much speculation and guessing on my part!
Betcha your QSLs will be there in a day or two.

73, Paul VE1DX

ARLD049 DX news

ZCZC AE49
QST de W1AW
DX Bulletin 49 ARLD049
>From ARRL Headquarters
Newington CT December 5, 2013
To all radio amateurs

SB DX ARL ARLD049
ARLD049 DX news

This week's bulletin was made possible with information provided by KI1U, NC1L, the Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MONACO, 3A. Special event station 3A60ARM is QRV during the month of December in celebration of the 60th anniversary of the Association des Radioamateurs de Monaco. QSL via bureau.

SENEGAL, 6W. Mark, AA1AC plans to be QRV as 6W/AA1AC from Somone from December 8 to 14. QSL to home call.

BARBADOS, 8P. Look for Mike, KI1U, Mike, N1TA and Bruce, K0BJ to be QRV as 8P9IU, 8P9TA and 8P9BJ, respectively, from December 9 to 16. Activity will be on 160 to 2 meters including 60 meters and straight keys, using CW, SSB and RTTY. They may also be active on Satellite SO-50. They will be QRV as 8P8T in the upcoming ARRL 10 Meter contest. QSL all calls via KI1U.

CHILE, CE. A group of operators are QRV as XR150CBS during the month of December to commemorate the 150th Anniversary of the Santiago Fire Department. Activity is on all HF bands using SSB and various digital modes. QSL via XQ7UP.

NIUE, E6. Operators Alan, VK4WR and Graeme, VK4FI will be QRV as E6RQ and E6SG, respectively, from December 7 to 17. Activity will be on 40 to 6 meters, with an eye towards good sporadic-E and TEP propagation into Asia. QSL both calls direct via VK4FI.

NEW CALEDONIA, FK. Freddy, F5IRO will be QRV as FK8RO from Ouvea Island, IOTA OC-033, from December 9 to 13. Activity will be on 40 to 10 meters using CW. QSL to home call.

NORTHERN IRELAND, GI. Special event station GI100RSGB is QRV until the end of 2013 during the final leg in the RSGB's centennial celebrations. Activity is on all bands and modes. QSL via M0VFC.

DJIBOUTI, J2. Christian, F5MBF is QRV as J28NC for another two years. He is active on 80 to 10 meters using CW and SSB. QSL via F5RQQ.

BULGARIA, LZ. Members of the Radio Club Blagovestnik are QRV as LZ867MWB during December to honor St Mihail Voin. QSL via LZ1KCP.

CURACAO, PJ2. Jeff, K8ND plans to be QRV as PJ2T in the ARRL 160 Meter contest. QSL direct via W3HNK.

EASTERN KIRIBATI, T32. A group of operators are QRV as T32RC from Christmas Island, IOTA OC-024, until December 11. Activity is on 160 to 10 meters using CW, SSB and RTTY. This includes an entry in the ARRL 160 Meter contest. QSL via N7RO.

MICRONESIA, V6. Haru, JA1XGI is QRV as V63XG from Chuuk, IOTA OC-011, until December 12. Activity is on 160 to 10 meters using CW, SSB and RTTY. This includes an entry in the ARRL 160 Meter contest. QSL to home call.

VIET NAM, XV. Mats, is QRV as XV2LRR from Phan Tiet until December 14. Activity is holiday style on 40 to 10 meters using CW and SSB. QSL via LoTW.

ROMANIA, YO. Special event station YP95GU is QRV until the end of 2013 to commemorate the 1918 unification of Transylvania, Banat, Crisana and Maramures into Romania. Activity is on 40, 20 and 15 meters using CW and SSB. QSL via bureau.

THIS WEEKEND ON THE RADIO. The ARRL 160-Meter CW Contest, NCCC RTTY Sprint, QRP CW Fox Hunt, NCCC Sprint, TARA RTTY Melee, Wake-Up. QRP CW Sprint, SKCC Weekend CW Sprintathon, VU International DX Contest, TOPS Activity CW Contest, EPC Ukraine DX BPSK63 Contest, AWA Bruce Kelley 1929 CW QSO Party, 10-Meter RTTY Contest and the CQC Great Colorado Snowshoe CW Run will certainly keep contesters busy this upcoming weekend. The QRP CW Fox Hunt, CWops Mini-CWT Test and NAQCC Straight Key/Bug CW Sprint are all scheduled for December 11. Please see December QST, page 66 and the ARRL and WA7BNM contest web sites for details.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31206
SIDC SOLAR BULLETIN 06 Dec 2013, 1212UT
SIDC FORECAST (valid from 1230UT, 06 Dec 2013 until 08 Dec 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 06 Dec 2013 10CM FLUX: 150 / AP: 007
PREDICTIONS FOR 07 Dec 2013 10CM FLUX: 152 / AP: 018
PREDICTIONS FOR 08 Dec 2013 10CM FLUX: 153 / AP: 011
COMMENT: The GOES X-ray background radiation is at the C-level. Several
C-class flares were observed during the past 24h, mainly in NOAA AR 1909
and in the returning regions on the east limb. We expect more C-flares,
especially from these east limb regions, with a small chance for an M-class
flare. A large scale filament eruption was observed on December 04,
starting from 11:00 UT. This resulted in a slow CME, mainly oriented
towards the north. Another filament erupted in AR 1909 around 21 UT on
December 5th. While there is a gap in LASCO data, COR2-A images clearly
show the associated slow CME. The activity on the east limb also resulted
in several CMEs towards the SE (as seen from LASCO). We expect unsettled
to active conditions (up to K=4) on December 7 due to the arrival of a
coronal hole high speed wind stream. This coronal hole, which seems to have
increased in size in the last 24h, passed the central meridian on December
4. Afterwards, geomagnetic conditions should return to quiet conditions
until December 9th when Earth may feel the influence from the ICME
associated with the filament eruption in AR 1909. A glancing blow from the
east limb CMEs is also possible.
TODAY'S ESTIMATED ISN : 065, BASED ON 14 STATIONS.

Hi Iain,

Just checked and mine have shown also. Now to submit to LOTW.

Slowly but surely I am cutting in to the amount of cards I need to send in for credit. I still have probably 300 cards to send in.
Just hard to do when they have already returned my updates to K8QM and not me.

Oops ... hope K8QM is friendly ;)

I noticed, after sending my last email, that K9W is my 300th entity confirmed in LotW, from 311 worked over the last 5 years or so. Pretty good return! I've pretty much abandoned paper cards at this point, although I'll probably have to send one to 5A1AL (my only remaining unconfirmed entity).

21982. RE: [DX-IS] XR0ZR Received LOTW

Yahoo group: DX-IS (2013)
Date: 2013-12-06 17:24:39 UTC
From: KQ8M
Topic: 21963 Message: 21982

That's cool, Iain. I have no clue how many I have. So many were sent in many years ago that they don't even show in LOTW other than
the country code and a default date. I have noticed that some of those unknowns have been replaced with newer LOTW versions but
those weren't actually what was applied originally. Doesn't matter, as long as they have it.

73,
Tim Herrick, KQ8M
Charter Member North Coast Contesters

Oops ... hope K8QM is friendly ;)

I noticed, after sending my last email, that K9W is my 300th entity confirmed in LotW, from 311 worked over the last 5 years or so.
Pretty good return! I've pretty much abandoned paper cards at this point, although I'll probably have to send one to 5A1AL (my only
remaining unconfirmed entity).

73,

~iain / N6ML

07 December 2013 A.R.I. DX Bulletin
No 1179
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

1A - An activity from the Sovereign Military Order of Malta (SMOM) is being organized to take place on 2-7 January. Further information is expected in due course. [TNX DX Coffee]
8P - KI1U (8P9IU), N1TA (8P9TA) and K0BJ (8P9BJ) will be active from Barbados (NA-021) on 9-16 December. They will participate in the ARRL 10 Meter Contest as 8P8T (QSL via KI1U). [TNX NG3K]
A3 - Klaus, DK1AX and Heidi, DK1MA will be active holiday style as A35AX from Tongatapu (OC-049) and Vava'u (OC-064), Fiji from 24 February to 7 March. They will operate CW, SSB and RTTY. QSL preferably through the OQRS provided by Club Log. [TNX NG3K]
A9 - Celebrating "Manama, Capital of Arab Tourism", A92AA and A93LT are active as A91MCAT from the capital city of Bahrein until 31 December. QSL via IZ8CLM.
OZ - Ric, DL2VFR will be active from Romo Island (EU-125) during the New Year holidays. He will operate CW as OU1RAEM on 28-31 December (QSL via DF5LW, direct or bureau) and as OZ/DL2VFR on 1-3 January (QSL via home call, direct or bureau). [TNX rsgbiota.org http://rsgbiota.org]
PJ2 - Once again Jeff, K8ND will be active from the Signal Point contest station on Curacao (SA-099) on 6-8 December for the ARRL 160 Meter Contest and on 17-29 January 2014 for the CQ WW 160-Meter CW Contest. QSL PJ2/K8ND via home call and LoTW, QSL PJ2T via W3HNK and LoTW.
PJ7 - Nigel, G3TXF will be active as PJ7/G3TXF from Sint Maarten until 11 December. He operates CW only with a focus on 30, 17 and 12 metres. QSL via G3TXF (OQRS on Club Log) and LoTW.
PY - Jose, PU5IKE will be active as ZV5WZZ (not ZW5AAA) from Ilha dos Remedios (SA-027) on 7-8 December. He plans to operate SSB on 10 metres. QSL via home call (direct or bureau) and LoTW. [TNX PT7WA]
S7 - Igor, UA3DJY will be active as S79ACR from Mahe (AF-024), Seychelles for one month between mid-December and mid-January. QSL via home call. [TNX DX World]
SP - Slawek, SQ1KSM and Weronika, SQ1KSL will be active as HF1ZIMA and SN1ZIMA on 12-22 December. Other stations participating in the "Welcome Winter" (zima in Polish) award are 3Z3ZIMA, HF3ZIMA, SN0ZIMA, SN3ZIMA and SN5ZIMA. Further information on qrz.com http://qrz.com
UA_ssh - Celebrating the 20th anniversary of the Russian Robinson Club,

Alex RW3RN and Oleg UA3HK/ZS1OIN will be active as RI20ANT from
Bellingshausen Station on King George Island, South Shetlands
(AN-010) on 17-31 December. Main activity will be on 20 metres (on
or around 14160 kHz) SSB and CW. QSL via RW3RN. [TNX UA9OBA]
W - Once again Joe, K5KUA will be active as K5KUA/5 from Galveston
Island (NA-143) from 26 December to 1 January. He usually operates
CW only on 40-10 metres. QSL via home call, direct or bureau.
Logsearch on Club Log. [TNX rsgbiota.org http://rsgbiota.org]
W - Celebrating the ARRL's centennial year, the Maxim Memorial Station
in Newington (W1AW) will also use the callsign W100AW during 2014.
When used from regional Centennial conventions and during the IARU
HF Championship, W100AW will have portable designators as
appropriate. Contacts with W100AW will be worth 100 points in the
ARRL Centennial QSO Party (see below).
YB - Look for Budi YF1AR/8 and Imam YB4IR/8 to be active from Pulau
Kisar, part of the Terselatan Islands in the wider Maluku Barat
Daya Islands group (OC-272, new one for IOTA) on 21-25 December.
They will have two transceivers running 100 watts on 40-10 metres
SSB, CW and the digital modes. QSL YF1AR/8 via N2OO (logsearch
On Club Log and OQRS on http://df3cb.com/oqrs/n2oo/ http://df3cb.com/oqrs/n2oo/), QSL
YB4IR/4
via home call (OQRS on Club Log). Further information at
www.yf1ar.com/2013/12/kisar- island-oc-272-new-iota.html
http://www.yf1ar.com/2013/12/kisar-island-oc-272-new-iota.html [TNX YF1AR]
YN - Scott, K7ZO will be active once again as YN5Z from Nicaragua on
11-18 December. He will be QRV on 20-10 metres, and will
participate in the ARRL 10 Meter Contest. QSL via K7ZO and LoTW.
[TNX NG3K]
ZD7 - Daniel, ZS1BBT expects to arrive on St. Helena Island (AF-022) on
11 December, and to remain there for twelve days. He plans to be
QRV from the school station. [TNX The Daily DX]

Direttore Responsabile I2VGW

ARRL 10 METER CONTEST ---> Object of the contest is for amateurs around the
world to work as many stations as possible on the 10m band. This year's
event will be held on 14-15 December. Complete details can be found at
www.arrl.org/10-meter http://www.arrl.org/10-meter

ARRL CENTENNIAL QSO PARTY ---> In conjunction with the 100th anniversary of
the ARRL, the ARRL Centennial QSO Party is a year-long operating event
(from 00.00 UTC on 1 January through 23.59 UTC on 31 December 2014) in
which participants can accumulate points (all ARRL members and appointees,
elected officials, HQ staff and W1AW are worth points) and earn awards.
W1AW will be on the air from every state (at least twice) and most US
territories, and it will be easy to work WAS solely by contacting W1AW

portable operations. Complete information can be found at
www.arrl.org/centennial-qso- party http://www.arrl.org/centennial-qso-party.

QSL 5B4AHY ---> Norman, 5B4AIE has taken over the QSL duties for David
Bunn, 5B4AHY, who became SK on 20 November. [TNX 5B4AHJ]

QSL ZC4LI ---> Phil, G3SWH has "at last finished importing all the hundreds
of individual log files into a single file and uploaded it to both Club Log
and LoTW". He has been able to recover some 312,000 QSOs, but "it is
obvious that there are a number of log files missing". Check the on line
log before requesting QSLs (www.g3swh.org.uk/zc4li.html
http://www.g3swh.org.uk/zc4li.html). Also, please note
that "following a decision by the RSGB QSL bureau not to process outgoing
cards for non members, paper QSLs for this station are only available
direct. OQRS is much preferred. Replies to QSL requests received so far
will be mailed within the next few days". [TNX G3SWH]

QSL VIA ZL3CW ---> Jacky "is in the process of moving in to a new home on
December 19th", The Daily DX reports. His new mailing address is: Jacky
Calvo, PO Box 88, Waihi Beach 3642, New Zealand. Mail sent to his old
address will be redirected for one year. ZL3CW is the QSL manager for the
recent N8A, W8A and 5W8A DXpeditions.

VK9MT ---> Many activities are underway as planning continues for the VK9MT
DXpedition to Mellish Reef (28 March-9 April 2014) [425DXN #1173]. The
latest Press Release (30 November) reports that Mike WA6O has joined the
operating team, and Luciano PT7WA has been added as the pilot station for
South America. "We have written approval to land on Mellish Reef from the
Australian government", the team says. As for fundraising, "significant
recognition" has been received from a number of organizations, and "we also
began receiving assistance from individual DXers". With a total budget of
around 127,000 USD, the team looks forward "to hearing from interested
DXers, especially those that need Mellish Reef for an All Time New One".
Donations are welcomed through the website (www.vk9mt.com http://www.vk9mt.com, to be
updated on
or about 8 December). [TNX K5GS]

YOTA ---> The Youngsters On The Air (YOTA) group will be operate several
special callsigns through the end of December: EA7URA/YOTA, EI0YOTA,
ES5YOTA, ES9YOTA, LY5YOTA, OH2YOTA, OK2YOTA, OM9YOTA, OM13YOTA, ON4YOTA,
PA6YOTA, S513YOTA, SN0YOTA, SH9YOTA, YO0YOTA, YL13YOTA and YL2013YOTA.
Information on the relevant awards (free of charge) can be found at
www.ham-yota.com http://www.ham-yota.com. [TNX ON9CFG]

+ SILENT KEYS + Dr. Carlos Eduardo Levy Vazquez (XE1YK) passed away at 62
years of age. He served as president of the Federacion Mexicana de Radio
Expermentadores (Mexico's IARU member society) on 2004-2008, and operated
twice from Revillagigedo (1973 and 2007).
Other recently reported Silent Keys include William H. Harper (K9IW), Kevin
M. Bunin (K4PG/C6APG), Carlo Orfella (IK1QQQ) and Alberto Urano Silva
(LU1DZ), originator and founding member of the Grupo Argentino de CW.

---------- ---------- ----------

QSLs received direct or through managers: 3B8/G0TSM, 4S7TRG, 4S7VG, 4U1ITU, 5H1DX (AF-063), 6V1A (AF-045), 6V7Q, 6Y5WJ, 7P8GF, 7X2ARA, 8R1A, 9L1BTB, 9M2/OK1CZ, 9M2IDJ, 9M4DX, 9X0ZM, A71A, A92HK, BA7KW, CY9M, E51AAR, E51NOU, E6AK, E6AY, EK2GO, ER5LL, EU3AR, FO/KH0PR (OC-062, OC-094, OC-114, OC-131, OC-238), FO/UT6UD, FW5JJ, HB0/DL2SBY, HH5/KC0W, HQ3W, HQ8D, HQ8S, HZ1BW, J28NC, J8/W6HGF, J85K, JD1BOI, JG8NQJ/JD1, JT1CO, JW8HGA, JY9FC, K4YT/3B9, KG4HF, OD5ET, OD5NJ, PQ5M (SA-027), RI1ANU, SV5PFC, T46C (NA-204), T6T, TI5W, TM0SM, UK8ZC, V73AX, VP2V/W9DR, YB9GV/P (OC-150), YB9KA (OC-150), YC9IPY, YF1AR/6 (OC-245), YF1AR/9 (OC-275), YN2PX, YS1/AI5P, Z21DXI, Z81Z, ZA20QA, ZS8C.

21985. ARLP050 Propagation de K7RA

Yahoo group: DX-IS (2013)
Date: 2013-12-06 22:57:25 UTC
From: jjreisert@...
Topic: 7715 Message: 21985

SB PROP @ ARL $ARLP050
ARLP050 Propagation de K7RA

ZCZC AP50
QST de W1AW
Propagation Forecast Bulletin 50 ARLP050
>From Tad Cook, K7RA
Seattle, WA December 6, 2013
To all radio amateurs

SB PROP ARL ARLP050
ARLP050 Propagation de K7RA

Due to the Thanksgiving holiday in the United States (Canada celebrates the same holiday on the second Monday in October, same as Columbus Day in the United States) we had a short bulletin on Wednesday last week, and a catch-up bulletin on Monday morning, December 2.

If you missed it, you can read it online at http://www.arrl.org/w1aw-bulletins-archive/ARLP049/2013 and see last week's early bulletin at http://www.arrl.org/w1aw-bulletins-archive/ARLP048/2013 .

Solar activity bounced back this week, with average daily sunspot numbers increasing from 63.6 to 102.9, and average daily solar flux from 130 to 132.9. There were no periods of disruptive geomagnetic activity, although November 30 and December 1 were slightly unsettled. There was another uptick in activity yesterday, December 5, when the solar flux readings at Penticton were 157 at 1800 UTC, 149.6 at 2000 UTC and 156 at 2200 UTC. The daily reading at 2000 UTC (local noon in British Columbia) is always the official solar flux value for the day. The sunspot number for December 5 was 103, up from 98 the day before.

Predicted solar flux for December 6-7 is 155, on December 8-9 it is 150, then 145 on December 10-11, 135 on December 13-14, 130 on December 15-16, 135 on December 17, 130 on December 18-19, 125 and 130 on December 20-21, 125 on December 22-23, 130 on December 24-26, and 125 on December 27-28.

There is an odd solar flux peak at 165 predicted for January 8, but this seems to be a remnant of a prediction from November 25 through December 1, when there were many days in mid-December, late December and early January with solar flux predicted at 160-165. On December 2 these predictions were radically revised downward, with the exception of January 8. From November 25 to December 1 the solar

flux prediction was 165 for January 4-10, but starting on December 2 that prediction was revised to solar flux at 130 on January 4-7 and 135 on January 9-10 and 130 on January 11-12, with January 8 standing alone at 165.

You can see these changes at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html, at least for a few weeks.

Predicted planetary A index is 8 on December 6, 12 on December 7-8, 5 on December 9-12, then 10 and 8 on December 13-14, 5 on December 15-25, then 12, 10, 8, 12 and 10 on December 26-30.

OK1HH sends his geomagnetic prediction from the Czech Republic. He sees quiet to unsettled conditions December 6-7, mostly quiet December 8-11, active to disturbed December 12, quiet December 13-14, mostly quiet December 15, quiet to unsettled December 16, quiet December 17-18, quiet to unsettled December 19, quiet December 20-24, mostly quiet December 25, quiet to unsettled December 26, quiet to active December 27, quiet December 28, mostly quiet December 29, and quiet on December 30-31.

NASA released a new Solar Cycle Prediction, but nothing has changed except the date: http://solarscience.msfc.nasa.gov/predict.shtml

Actually the information seems a bit dated, but of course they are dealing with smoothed sunspot numbers, which are immune to daily variations. The smoothed sunspot number is an average for an entire year, so we are always six months behind in knowing the latest real smoothed number. Go to http://www.swpc.noaa.gov/weekly/pdf/prf1992.pdf and note the numbers for January through April 2013 on page 18. This report is over a month old, but at that time the April 2013 value was the latest known smoothed number. Each month after that incorporates progressively less real sunspot data and more predicted numbers.

But also note that in this table they show the current cycle peaking in April and May of 2014. So we may not be at the peak for this cycle after all.

Larry Godek, W0OGH of Gilbert, Arizona sent this: "I was listening on Tuesday afternoon (December 3) for VU7AG, weakly on SSB and then with a polar sound later in the PM. Had called him a couple times on CW early on with no response but the frequency was crowded with people all over the place hearing him apparently. Working on the bench and listening at the same time, kinda. Well the signal seemed to be getting stronger and after donning the headset I could not hear as many stations calling him as before but he was working a lot of 7-land and 0 call area stations. I tuned around up and down about 2 KHz from his frequency but couldn't hear any of the stations he was calling.

"Then I heard a good loud 7-land station go back to him with the exchange. I quickly zero beat him and when the VU7 stood by I gave him a quick call. He came back to a W0, so I called him again and he came back with my call. That was at 2151:30 on December 3 on 14.030 MHz. That was really the only time during all of his operating that I really heard him well enough to make a contact. I had heard him on SSB but getting into that fray with only 100 watts and a low 4 element Yagi doesn't get me many contacts against the multi-KW and 100ft plus stacked beam stations.

"Then at 2301 I worked JA3HAW and at 2304Z I worked JH0KZQ on 29.6 MHz FM. I've worked Europe and South America on 29.6 FM, but it's been many a year since I even heard a JA on that frequency. I thought I heard some Russian stations as well but not knowing the language it was hard to tell where they were from. Then today, December 4 at almost the exact same time I worked the JA3 and JH0 stations, again on 29.6. They were calling CQ DX. I didn't hear them go back to any other station before the path was lost.

"BTW, I have heard nothing of the VU7 again since yesterday although I hear lots of other stations working him."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for November 28 through December 4 were 100, 95, 102, 104, 124, 97, and 98, with a mean of 102.9. 10.7 cm flux was 132.9, 128.5, 131.2, 130.5, 133.7, 135.7, and 138, with a mean of 132.9. Estimated planetary A indices were 2, 8, 9, 10, 2, 7, and 4, with a mean of 6. Estimated mid-latitude A indices were 1, 6, 7, 7, 1, 6, and 3, with a mean of 4.4.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31207
SIDC SOLAR BULLETIN 07 Dec 2013, 1212UT
SIDC FORECAST (valid from 1230UT, 07 Dec 2013 until 09 Dec 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 07 Dec 2013 10CM FLUX: 155 / AP: 011
PREDICTIONS FOR 08 Dec 2013 10CM FLUX: 155 / AP: 011
PREDICTIONS FOR 09 Dec 2013 10CM FLUX: 153 / AP: 007
COMMENT: NOAA AR 1909 produced an M1.2-flare peaking at 07:29UT. A plasma
eruption was seen in this neighbourhood on December 5 around 21UT. An
unstable filament in the neighbourhood of an active region is a recipe of
disaster. The curve for the background X-ray radiation is situated near
the top/bottom of the B/C level. The chances for more M-flares are around
30%. The fast stream linked with the coronal hole that approached the
central meridian on December 3 might arrive late today and introduce
unsettled/active conditions: K=3 up to 4. The filament eruption on
December 5, around 21UT might have a glancing blow. There is no data of
SOHO/LASCO at that time. The amount of available STEREO A data is also
limited. A first estimate gives a speed of around 500 km/s. The shock might
arrive late on December 9.

21987. Why (and How) You Should Urge the FCC to Reject the ARRL's Symbol Rate Petition

Yahoo group: DX-IS (2013)
Date: 2013-12-07 20:33:14 UTC
From: Dave AA6YQ
Topic: 21987 Message: 21987

The ARRL has filed a petition with the FCC to replace the current symbol rate limits with a bandwidth limit. If accepted, digital
modes as wide as 2800 hertz would become legal for use by US hams on HF bands. Pactor 3, which is legal under the current symbol
rate limit, is 2200 hertz wide.

If the ARRL☐s petition were accepted, automatic (unattended) digital mode stations currently using Pactor 3 could be upgraded to
wider modes. Many automatic stations lack the ability to forego transmitting on a busy frequency, and thus interfere with ongoing
QSOs. If automatic stations are permitted to use modes with bandwidths up to 2800 hertz, the incidence of this interference will
increase significantly.

While US-based automatic stations using digital modes wider than 500 hertz are restricted to specified sub-bands (e.g. 10,140 ☐
10,150, 14,095 ☐ 14,099, 14,101-14,112, 21,090 ☐ 21,100, 24,925 ☐ 24930), these frequencies are shared with QSOs between live
operators. Furthermore, the WinLink network now claims that its automatic stations are actually under the control of the remote
stations that invoke them, and are therefore no longer restricted to these sub-bands. This network now advertises US-based automatic
stations running Pactor 3 outside the automatic sub-bands ☐ automatic stations that could be upgraded to 2800 hertz modes if the
ARRL Petition is accepted.

Allowing automatic stations to use wider digital modes without first taking steps to reduce the interference they cause to ongoing
QSOs is a recipe for increased conflict and ill will ☐ the opposite of what☐s needed. In the interest of continued innovation, we
should allow the use of wider digital modes on HF bands ☐ but in a manner that reduces interference and conflict, rather than making
it worse as the ARRL☐s petition would do.

I therefore urge you to oppose the ARRL☐s petition by filing comments with the FCC before December 17. Don AA5AU has provided
instructions for doing so:

<http://aa5au.com/fcc/how-to-comment.html>

21988. RE: [DX-IS] Why (and How) You Should Urge the FCC to Reject the ARRL's Symbol Rate Petition

Yahoo group: DX-IS (2013)
Date: 2013-12-07 23:39:58 UTC
From: Ron Notarius W3WN
Topic: 21987 Message: 21988

Warning: Long reply

With all due respect to Dave, I respectfully DISAGREE that everyone should arbitrarily urge the FCC to reject this petition.

First and foremost. IT IS NOT requesting that the current "symbol rate limits" be replaced with a "bandwidth limit". That is patently false.

The two are both parts of the petition, true. but they are two separate line items.

Let's take the bandwidth limit first.

What are the current rules? See FCC 97.3030(f)(2). A "non-phone emission" can't exceed the bandwidth of "a communications quality phone emission". In plain English: On HF, a digital signal can't exceed the bandwidth of an SSB transmission. which is roughly 3 kHz.

What is the ARRL proposing? That the language of 97.303(f)(2) be changed to a read that the maximum bandwidth would be 2.8 kHz. Not much of a change there. if anything, the rules become clearer. And what's wrong with that?

So, about the data rate.

Again, refer to 97.303(f), sub paragraphs (3) and (4) - which refer to the maximum baud rates permitted, in the current allocated digital sub-bands. Where (f)(3) is invoked, the maximum rate is 300 baud. Where (f)(4) is invoked, the maximum rate is 1200 baud.

These limitations date back to the days when most digital communications (excluding CW, of course) was RTTY (Baudot) and ASCII. an emerging technology like PSK-31 wasn't even on the horizon yet. The non-Amateur world was still using 2400 & 9600 baud modems over telephone lines.

I think it's fair to say that things have changed. Except for the Amateur Service rules.

Am I the only person who thinks that permitting US Amateurs to use faster data rates on HF than 300 & 1200 baud is a bad thing?

OK, so Dave is worried about automated stations. I'm not saying that he's necessarily wrong. But IMHO, opposing this petition outright doesn't address the issues he raises.

For one thing, he's concerned about automated stations using modes "with bandwidths up to 2800 hertz". Well, if you read the rules. you'd know that that IS ALREADY PERMITTED. Opposing the petition WILL NOT change that.

FCC rules, as Dave mentions, are already under regulatory restriction. If the problems with the WinLink network are as severe as he claims, then they need to be addressed. clarify the rules to remove the loophole he alleges that they use, for one thing. But don't prevent the rest of us from upgrading to more efficient modes because you're afraid of what someone else MIGHT do.

In short, IMHO, the issue of abuse of the rules by certain operators of certain automated stations and their related networks is NOT directly related to this petition.

Am I entirely happy with the entire petition? No. And I will address this when I make my comments.

But I'm not going to advocate outright rejection of the petition because someone else is afraid of something else entirely.

Subject: [DX-IS] Why (and How) You Should Urge the FCC to Reject the ARRL's Symbol Rate Petition

The ARRL has filed a petition with the FCC to replace the current symbol rate limits with a bandwidth limit. If accepted, digital modes as wide as 2800 hertz would become legal for use by US hams on HF bands. Pactor 3, which is legal under the current symbol rate limit, is 2200 hertz wide.

If the ARRL's petition were accepted, automatic (unattended) digital mode stations currently using Pactor 3 could be upgraded to wider modes. Many automatic stations lack the ability to forego transmitting on a busy frequency, and thus interfere with ongoing QSOs. If automatic stations are permitted to use modes with bandwidths up to 2800 hertz, the incidence of this interference will increase significantly.

While US-based automatic stations using digital modes wider than 500 hertz are restricted to specified sub-bands (e.g. 10,140 - 10,150, 14,095 - 14,099, 14,101-14,112, 21,090 - 21,100, 24,925 - 24930), these frequencies are shared with QSOs between live operators. Furthermore, the WinLink network now claims that its automatic stations are actually under the control of the remote stations that invoke them, and are therefore no longer restricted to these sub-bands. This network now advertises US-based automatic stations running Pactor 3 outside the automatic sub-bands - automatic

stations that could be upgraded to 2800 hertz modes if the
ARRL Petition is accepted.

Allowing automatic stations to use wider digital modes without first taking
steps to reduce the interference they cause to ongoing
QSOs is a recipe for increased conflict and ill will - the opposite of
what's needed. In the interest of continued innovation, we
should allow the use of wider digital modes on HF bands - but in a manner
that reduces interference and conflict, rather than making
it worse as the ARRL's petition would do.

I therefore urge you to oppose the ARRL's petition by filing comments with
the FCC before December 17. Don AA5AU has provided
instructions for doing so:

Subject: RE: [DX-IS] Why (and How) You Should Urge the FCC to Reject the ARRL's Symbol Rate Petition

Warning: Long reply

With all due respect to Dave, I respectfully DISAGREE that everyone should arbitrarily urge the FCC to reject this petition.

First and foremost… IT IS NOT requesting that the current “symbol rate limits” be replaced with a “bandwidth limit”. That is
patently false.

The two are both parts of the petition, true… but they are two separate line items.

Let’s take the bandwidth limit first.

What are the current rules? See FCC 97.3030(f)(2). A “non-phone emission” can’t exceed the bandwidth of “a communications quality
phone emission”. In plain English: On HF, a digital signal can’t exceed the bandwidth of an SSB transmission… which is roughly 3
kHz.

What is the ARRL proposing? That the language of 97.303(f)(2) be changed to a read that the maximum bandwidth would be 2.8 kHz.
Not much of a change there… if anything, the rules become clearer.

>>>At present, the 300 baud symbol rate restriction on HF means that there is little incentive to deploy HF digital modes with
bandwidths greater than 2200 hertz. Eliminating the 300 baud restriction and allowing 2800 hertz digital modes, as the ARRL petition
proposes, would result in the use of 2800 hertz digital modes on HF.

And what’s wrong with that?

>>>The ARRL’s petition would allow automatic stations to employ these 2800 hertz digital modes, significantly increasing the
interference these stations already cause to ongoing QSOs.

OK, so Dave is worried about automated stations. I’m not saying that he’s necessarily wrong. But IMHO, opposing this petition
outright doesn’t address the issues he raises.

For one thing, he’s concerned about automated stations using modes “with bandwidths up to 2800 hertz”. Well, if you read the rules…
you’d know that that IS ALREADY PERMITTED. Opposing the petition WILL NOT change that.

>>>With the HF symbol rate limited to 300 baud, there is no incentive for automatic stations to switch to modes wider than Pactor 3
because such modes cannot convey information more rapidly. The ARRL’s petition would eliminate the symbol rate restriction, enabling
wider modes that do convey information more rapidly. Automatic stations would adopt these wider-and-faster modes, increasing the
incidence of interference to ongoing QSOs.

So in short, you're arguing that your fear of automatic stations and what they might do is why you don't want the baud rate limit for all US amateurs dropped.

While I agree that you have some cause for concern, I disagree that this reason and this reason alone should be enough to retain a speed of 300 baud for most HF digital signals. There are other, better ways to accomplish that.

Subject: RE: [DX-IS] Why (and How) You Should Urge the FCC to Reject the ARRL's Symbol Rate Petition

Warning: Long reply

With all due respect to Dave, I respectfully DISAGREE that everyone should arbitrarily urge the FCC to reject this petition.

First and foremost. IT IS NOT requesting that the current "symbol rate limits" be replaced with a "bandwidth limit". That is patently false.

The two are both parts of the petition, true. but they are two separate line items.

Let's take the bandwidth limit first.

What are the current rules? See FCC 97.3030(f)(2). A "non-phone emission" can't exceed the bandwidth of "a communications quality phone emission". In plain English: On HF, a digital signal can't exceed the bandwidth of an SSB transmission. which is roughly 3 kHz.

What is the ARRL proposing? That the language of 97.303(f)(2) be changed to a read that the maximum bandwidth would be 2.8 kHz. Not much of a change there. if anything, the rules become clearer.

>>>At present, the 300 baud symbol rate restriction on HF means that there is little incentive to deploy HF digital modes with bandwidths greater than 2200 hertz. Eliminating the 300 baud restriction and allowing 2800 hertz digital modes, as the ARRL petition proposes, would result in the use of 2800 hertz digital modes on HF.

And what's wrong with that?

>>>The ARRL's petition would allow automatic stations to employ these 2800 hertz digital modes, significantly increasing the interference these stations already cause to ongoing QSOs.

OK, so Dave is worried about automated stations. I'm not saying that he's necessarily wrong. But IMHO, opposing this petition outright doesn't address the issues he raises.

For one thing, he's concerned about automated stations using modes "with bandwidths up to 2800 hertz". Well, if you read the rules. you'd know that that IS ALREADY PERMITTED. Opposing the petition WILL NOT change that.

>>>With the HF symbol rate limited to 300 baud, there is no incentive for automatic stations to switch to modes wider than Pactor 3 because such modes cannot convey information more rapidly. The ARRL's petition would eliminate the symbol rate restriction, enabling wider modes that do convey information more rapidly. I agree that the 300 baud symbol rate limitation should be raised, Steve, but this should be accomplished without making the
“interference from automatic stations” situation worse – as the ARRL’s petition would do if accepted.

The “interference from automatic stations” problem has been denied, ignored, and slow-rolled for years; the two-step approach you
suggest below would continue this pattern. Automatic stations should not be permitted to use faster digital modes until an effective
means of reducing their interference to ongoing QSOs has been instituted.

Subject: Re: [digitalradio] Why (and How) You Should Urge the FCC to Reject the ARRL's Symbol Rate Petition

Dave the ARRL petition if approved would allow
many waveforms to be utilized by U.S. Amateurs
for applications beyond just unattended message
traffic servers and the use of the new PACTOR IV
waveforms. Many existing non-proprietary
waveforms and of course those not yet developed
and their potential applications are limited by
the ridiculous and outdated FCC 300 baud symbol rate limitation.

Dave your effort to obstruct this much needed
change to the FCC rules for an improved Amateur
Radio Service HF capability is a bit misguided
from my perspective. The better approach with
respect to your concerns and efforts would be to
file your own petition with the FCC to mandate
that all unattended automatic servers provide
busy channel detection with the demonstrated
ability to detect any waveform that is legal for
use under the FCC rules. I would think everyone
would back such a rule making effort on your part
100%, just as I think everyone should back

RM-11708 as initiated by the ARRL 100%.

So the symbol rate is not what you are opposing but that the unattended stations are not being held responsible for interference to
those already on a frequency. Then maybe you should file a petition with the FCC to start enforcing this rule for ALL stations not
just attended stations. That or petition the ARRL to have the interference aspect added to their petition or another ARRL petition
filed.

PREDICTIONS FOR 10 Dec 2013 10CM FLUX: 157 / AP: 014
COMMENT: The X-ray curve is situated near the top/bottom of the B/C-level.
C-flares are very likely, the probability for M-flares is around 20%. The
December 7 M1.2 flare (07:29UT peak time) from NOAA AR 1909 was associated
with a CME. CACTus determined it as a (partial) halo CME with a speed
around 900 km/s. The bulk of the plasma is ejected under the ecliptic
plane. The side of the CME may impact the Earth. This glancing blow can
possibly arrive late December 9, early December 10 and may result in
geomagnetic disturbances. Late December 7, a co-rotating interaction
region (CIR) arrived. The density increased gradually together with the
magnetic field. The z-component fluctuated strongly, even to -25nT which
resulted in a planetary K of 6 and 5 and local K Dourbes of 5 and 4 early
December 8. Following the density increase and slow decrease, the solar
wind speed increased gradually. The CIR and fast solar wind is possibly
linked with the coronal hole which reached the central meridian on December
3. A shock is visible on ACE data on December 8, 7:30UT: the solar wind
speed increased from 500 km/s to around 650 km/s, the temperature, density
and magnetic field dropped. This fast reverse shock is possibly linked with
the filament eruption of December 5. The geomagnetic impact will be limited
and smaller compared to the CIR because of the drop in magnetic field
strength. Bz rotated from negative (-5nT<Bz<0) to positive values now.

Dave, I'm sorry, but I simply don't agree that raising or eliminating the "symbol rate limit" will ipso facto mean that interference from automatic stations will increase.

The solution for THAT problem is to address THAT problem. Not keep the "state of the art" for Amateur Radio digital communications under the thumb of regulations from the early 1980's.

Your opposition sounds like someone opposed to raising the speed limit on an Interstate highway from 55 MPH solely because you're afraid that a double-load tractor trailer will travel faster.

Pure and simple: Automatic stations are supposed to be limited to specific portions of the digital sub-bands. If they are straying from there, as was implied in the QRZ.COM forum thread that you also posted to, then close the loophole that's being used. That has nothing to do with the baud rate.

But I do want to thank you for one thing. You gave me great reasons to write an "op-ed" piece for my club newsletter, to accompany the information on the NPRM, as to why people are wrongly opposing the proposal.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

1A, SOVEREIGN MILITARY ORDER OF MALTA. The "DXCOFFEE" Web page is reporting that activity from 1A is planned between January 2-7th (2014). Look for more details to be forthcoming.

5V, TOGO. Philippe, F5MVB, is planning to be active as 5V7MP from Togo next year. Look for more details to be forthcoming in January.

5X, UGANDA. If you missed Alan, G3XAQ, as 5X1XA from the capital city of Kampala, he is expected to return again and be active between February 25th and March 16th (2014). Activity will be CW only. He will also be in the RSGB Commonwealth Contest (March 8-9th). QSL 5X1XA via G3SWH.

8P, BARBADOS (Reminder). Operators Mike/KI1U (8P9IU), Mike/N1TA (8P9TA) and Bruce/K0BJ (8P9BJ) will be active from Barbados between December 9-16th. Their main activity will be the ARRL 10 meter Contest (December 14-15th) and will sign as 8P8T. QSL via KI1U. Prior to the contest, operators will be using their own callsigns.

9H, MALTA. Leo, DJ7PR, is once again active as 9H3YQ from Malta (EU-023) until December 11th. Activity is holiday style and has been mostly 40 meters CW this past week. However, Leo informs OPDX, "My antenna is a small vertical for all bands built up on my balcony and I only work CW. With 100 watts and CW, it works perfect. Also for DX. My working hours are mostly in the evening which means 1700-2300 GMT and mostly 20m and 40m. I don't think it is a good time for USA. I also try 10m between 0900 and 1200 GMT if the band is open." QSL via his home callsign.

9Q, DEM. REPUBLIC OF CONGO. Earlier in the week there were a few reports stating that after 3 years of negotiations with the Congolese government and official approval from the Ministry of Telecom (ARPTC) the national club station 9Q0AR and its special callsign 9Q0HQ were finally given permission to operate again. This would be great and also the first legal activity from 9Q-land in several years. On QRZ.com (under 9Q0AR) it suggests to listen on 21310 kHz between 1000-1400z.

A3, TONGA. Operators Klaus-Dieter/DK1AX and his XYL Heidi/DK1MA will be active as A35AX on a holiday style DXpedition from Tongatapu Island (OC-049) and Vava'u Island (OC-064) between February 24th and March 7th (2014). Activity will be on CW, SSB and RTTY. QSL via the OQRS on ClubLog.

CT8, AZORES. Siegfried, DF9WB, is now active as CT8/DF9WB from (EU-009) until December 18th. Activity has been on 20/15/10 meters SSB. QSL via his home callsign, direct or by the Bureau.

HK0, SAN ANDRES. Tim, LW9EOC, will be active as HK0/LW9EOC from San Andres Island between April 18-25th (2014). Activity will be on 80-10 meters using CW and SSB. QSL via LW9EOC.

INDEXA NEWS (PRESS RELEASE #2 - Additional Support For The Amsterdam Island DXpedition): "Hello fellow DXers and INDEXA Members: The officers of the International DX Association, INDEXA, have agreed to send an additional donation of 2,500.00 USDs to the Amsterdam Island, FT5ZM, DXpedition team. INDEXA's financial support for this DXpedition has now grown to 10,000.00 USDs. Our membership of worldwide DXers has been generous to us this year with donations. Thus, INDEXA felt further support to the FT5ZM team was appropriate.
It is now just over one month before this international team of DXpedi-

tioners leaves home for many weeks of DXpeditioning from a harsh environment. All of this to give out a new DXCC entity or band country to DXers worldwide. Certainly many will send in a contribution with their QSL card or required OQRS contributions, but the team could certainly use additional funding now.
INDEXA would like to thank our members for supporting us this year. We hope our DXpedition support has added to your DXCC account this year and other DXpeditions that are planned next year.
Support INDEXA via the web at <www.indexa.org> and your membership supports many annual DXpeditions to rare locations.
Regards, INDEXA Officers:
Gary Dixon, K4MQG, President
John Scott, K8YC, Vice President
Dick Williams, W3OA, Secretary-Treasurer
Bill Jennings, W4UNP"

IOTA NEWS.....
EU-125. (Reminder) Ric, DL2VFR, will be active as OU1RAEM from Romo Island (DIA NS-001), Wadden Sea National Park (WWFF OZFF-004) between December 28-31st. Activity will be on the HF bands, mainly CW and include an entry in the RAEM Contest (December 29th). QSL via DF5LW, direct or by the Bureau. Also, QSLs will be sent automatically by the Bureau. PLEASE NOTE: Ric will also continue to be active between January 1-3rd, but as OZ/DL2VFR. This activity will be a CW only operation. For more details, see: http://www.iota-expedition.com

OC-150. Burkhard, DL3KZA, is now active as YB9/DL3KZA from Lombok Island. Length of stay is not known. Activity has been on 20/15 meters SSB. QSL via his home callsign, direct or by the Bureau.

OC-272. Operators Budi/YF1AR, Imam/YF4IR and Joppy/YB8XM will be active from Kisar Island in the Barat Daya Islands IOTA Group between December 21-25th. Look for the following callsigns:
YF1AR/8 - Radio Yaesu FT-450D with tuner FC-707 power 100W; antennas vertical Dipole 40m band and HB9CV 20/15/10m
YB4IR/8 - Radio Kenwood FT-950 power 100W; antennas G5RV 40m band and Yagi Mini Multi 20/17/15/12/10m
YB8XM/p - Radio Yaesu FT-845 power 100W; antennas Spiderbeam 20/17/15/12/10m
Activity will be on 40-10 meters using CW, SSB and Digital.
A special QSL card design for DXpedition will be issued. QSL YF1AR/8 via N2OO. QSL YB4IR/4 via his home callsign (see QRZ.com), by the OQRS, LoTW and QSL Bureau. QSL YB8XM/p via his home callsign (see QRZ.com). Donations are excepted via the PayPal account of <yf1ar@...>. Visit their Web site at: http://www.yf1ar.com/2013/12/kisar-island-oc-272-new-iota.html

SA-008. The Santana de Fora Island ZW5W operation was cancelled this past weekend due to bad weather. No word on when or if it will

be rescheduled.

CE, CHILE. Roberto (Bob), YV5IAL, will be active as CE2/YV5IAL from Chile between January 2-30th (2014). He plans to operate PSK31 daily on 14070.15 and occasionally on 10, 15 and 40 meters (PSK31 and SSB). QSL via his home callign, direct or by the Bureau.

E6, NIUE (Reminder). By the time you read this, operators Alan/VK4WR and Graeme/VK4FI will once again be active as E6RQ and E6SG, respectively, from the Coral Gardens Motel, Alofi, Niue (OC-040), until December 17th. Activity will be on the HF bands. Alan informs OPDX [edited], "Our operation is primarily for 6 meters as we are going in the middle of the southern hemisphere sporadic E season. Hopefully, there will also be TEP into Asia and who knows what else on the magic band. We will have some HF, am taking an OCF dipole for 40 through 10 meters and plan to have a play in the ARRL 10meter Contest. 100 Watts only." QSL both callsigns via VK4FI.

FO/A, AUSTRAL ISLANDS. A group of six operators from the UK will operate from the Island of Raivavae in the Australs (OC-114) between March 20th and April 1st (2014). Activity will be on all bands using CW, SSB and RTTY. The operators are Don/G3BJ, Chris/G3SVL, Nigel/G3TXF, David/G3WGN, Don/G3XTT, Hilary/G4JKS and Justin/G4TSH. They plan to run up to three stations, each consisting of a K3 plus amplifier. Antennas will consist of various vertical systems on the beach. The team will upload logs to Clublog, and bandwidth permitting, will also be uploading to LoTW as the DXpedition progresses. QSL will be handled by G3TXF and requests can be made directly or via the Clublog OQRS facility. After the DXpedition most members of the team will be attending the International DX Convention at Visalia. A Web site will be launched with further details once the callsign and other details are confirmed.

J3, GRENADA. Bob, G3PJT, will once again be active as J34G from Grenada (NA-024, WLOTA 0718) between March 3-10th (2014). Activity will probably be holiday style using a K2 w/100 watts and vertical antennas. He plans to also be in the RSGB's Commonwealth Contest (March 8-9th). Look for him outside of the contest, especially on 80 and 30 meters. QSL via his home callsign.

JW, SVALBARD (Update to OPDX.1139/Callsign). Alex, PY2SEX/DL1NX, informs OPDX that he just got permission from Norwegian Post Communication Authority to use his home callsign as LA/PY2SEX and JW/PY2SEX. So look for Alex to be active from Svalbard (EU-026) during Christmas (December 24-25th) for only those two days as JW/PY2SEX. QSL via DL1NX with SAE and a valid IRC or 2 green stamps.

LCL QSO PARTY. The Amateur Radio Lighthouse Society (ARLHS) invites you to participate in the ARLHS's annual "Lighthouse Christmas Lights 2013 QSO Party" which is held between 0001z, December 21st (7:00 PM EST, Dec. 20th) and 2359z, January 1st, 2014. Rules, operating guidelines, logging requirements, and prizes can be found at: http://arlhs.com/LCL-2013.html

NEW AMATEUR RADIO VIDEO. A new educational video about Amateur Radio is now available free to view and share. It is found here: http://youtu.be/ivUMIADFSDw
"It has been created for anyone who wishes to encourage youth and adults to explore the world of Ham Radio, and it also can be found on the home page of the project website at <www.RadioQRV.com>. Thank you for your consideration. 73, Mike (Did not provide his callsign)"

HK1/CO8ZZ QSL ROUTE. Raúl, CO8ZZ, reports: "I'm just back home from Colombia...!!! I had the great privilege to be active as operator from HK1NA MM effort during CQWW on CW, thanks to a kind invitation from Jorge/HK1R. At the same time, I made several QSOs as HK1/CO8ZZ, the QSL via for those contacts are my manager DK1WI, who is already printing the cards."

T33A LOG/QSOS UPDATE. The T33A team has just compiled the final logs from the island and uploaded them to Clublog on November 29th. This upload does not reflect corrections that are presently being made via the inquiries sent to the QSL Manager. The QSL Manager is working to clear all the inquiries and then will upload that new file upon com-

pletion. He expects to clear all inquires by mid to late December and will upload that file. To those with missing calls or possible busted calls, they'd recommend patience prior to making an OQRS request and allow the QSL Manager to complete the inquiries that he receives. Please visit Clublog occasionally to see if the corrections have been implemented for those with inquiries. The E-mail for contacting the QSL Manager (W2IJ) is <Banaba2013@outlook.com>. To all with questions please forward your concerns to that E-mail address. He has now begun to respond to those inquiries. The QSLs won't be ready for at least 6-8 weeks.

ZC4LI UPDATE. Phil, G3SWH, reports: "I've at last finished importing all the hundreds of individual log files into a single file and uploaded it to both ClubLog and LoTW. I'm afraid that it is obvious that there are a number of log files missing, although I have managed to recover some 312,000 QSOs. The QSO data that is available is fully searchable at: http://www.g3swh.org.uk/zc4li.html
PLEASE check the online log before requesting QSLs, as I will be unable to confirm any QSOs that are not in the log. Also, please note that, following a decision by the RSGB QSL Bureau not to process outgoing cards for non members, paper QSLs for this station are *ONLY* available DIRECT. OQRS is much preferred. Replies to QSL requests received so far will be mailed within the next few days.
73 for now.... Phil Whitchurch, G3SWH and AD5YS"

QSL RECEIVED VIA LoTW: 4U1ITU, 9X0NH, A41OO, C6AUM, DL1BKI, E7DX, EA8/RW3DO, EB5CS, ES9C, F4BKV, G8NEO, J79XBI, JA1CQK, JA1HGY, JA7BWT, JA8BNP, JI1CPN, JR1EMO, K9W, KH6/N2A, KH8/N7AFW, M0CNP, MM0DHQ, OA4/N7CW, RT6A, UA1AJW, US4EX, XR0ZR, XT26DJ, XV2LRR, YB3MM/2, YT5CT, ZC4LI, ZF2EZ and ZM90DX

RADIO ARCALA LANDSCAPE IS ONE SHORT (Press Release dated December 6th). Jarmo, OH2BN, reports: "While driving to the Arctic region north of the city of Oulu at 65degrees North, you will now find the wintry landscape more naked than before. Something is missing from the landscape, a reflection of the challenges facing the stormy and icy North. Sorrow has descended on the population of the village of Arkala.
It was the recent storm Oskari creating gusts of up to 68 knots (78MPH) that not only knocked down the massive 330ft (100m) 40+ ton 160/80M array but also left 200,000 homes in Finland without electricity. The mammoth structure collapsed peacefully, not hitting any of the other six towers, not hurting people or damaging buildings.
As professional engineering efforts had up to now ensured the survival of this 5-year old structure, inspectors are busy trying to evaluate the cause of the failure. It is suspected that automation designed to enable

the array to find its most comfortable position in high winds somehow locked up and caused the structure to corkscrew. Consequently the giant crumbled down on its on base just like the WTC building in those other sad years.
But life goes on at Radio Arcala at OH8X and you may soon hear Santa Claus from the North of Finland bringing you the joy of Christmas in the form of OF9X, beaming over the North Pole on 20 meters and capitalizing on the famous Polar Path during the Holiday Season.
Thank you for your interest in Radio Arcala and many of its unforgettable endeavors. In summary, we would like to share with you this short poem and these consoling words of wisdom from the late Professor Hugh Cassidy, WA6AUD: 'The grief we feel we cannot tell. A sad day it was as our tower fell.'" A picture is available in the HTML format version of the OPDX at: http://www.papays.com/BoyResting2.jpg
Also, visit the Radio Arcala Web page for possible updates and pictures of the tower before it fell at: http://www.radioarcala.com

RI20, SOUTH SHETLAND ISLANDS. To celebrate the 20th anniversary of the Russian Robinson Club (RRC), RRC club members/operators Alexander/RW3RN (RRC #256??) and Oleg/UA3HK/ZS1OIN (RRC #349) will be active as RI20ANT from the Russian Antarctic station "Bellingshausen" on the Island of King George (AN-010) between December 17-31st. Activity will be mainly on 20 meters using CW and SSB. Equipment is a Yaesu FT-1000MP transceiver and an all band antenna. QSL via RW3RN. At the Bellingshausen station, the beacon RI1ANG works around the clock on frequency 14101 kHz. If the beacon is heard, you can then callsign RI20ANT on frequency 14160 kHz ± QRM. For more information about the Russian Bellingshausen station, read the article written by its chief Oleg Neruchev (RI1ANU) "Antarctica, 58th RAE" in the journal "Radio" issue number 10 dated 11/2013 at: http://www.radio.ru
QSOs with RI20ANT count for the "Russian Robinson Club - 20 years" Jubilee Diploma and are worth 3 points (repeatable on different bands), and count for the rule of having one mandatory contact with the main jubilee callsign R20RRC. Those who did not make the contact with R20RRC have a chance to make it before the end of the year with RI20ANT. Rules for the RRC-20 diploma can be seen on <http://www.robinsons.ru/>.

T32, EAST KIRIBATI (Update). The T32RC is currently active from Christmas Island (OC-024) until December 11th. Activity is to celebrate the 12th anniversary of the Russian Robinson Club. Operations are on 160-10 meters using CW, SSB and RTTY. QSL via ClubLog's OQRS (preferred) or LoTW (6 months after operation). Also QSL via N7RO, direct or by the Bureau. No eQSL. For more details and updates, visit: http://www.t32-2013.com

W100, UNITED STATES (Special Event). A special ARRL bulletin (ARLX013) reports: "The FCC has authorized the Maxim Memorial Station W1AW to also use the call sign W100AW during 2014, the ARRL's centennial year. Contacts made from the Maxim Memorial Station in Newington, from regional Centennial conventions, and during the IARU HF Championship will use W100AW, with portable designators as appropriate. The "W1AW WAS" operations throughout 2014 from each of the 50 states will use W1AW, not W100AW.

Bulletins and code practice transmissions during 2014 also will still use W1AW. Contacts with W100AW will be worth 100 points in the ARRL Centennial QSO Party. To help kick off the ARRL Centennial, special W100AW activity will begin at 0500 UTC on January 1, 2014 (midnight in Newington), and will include participation in ARRL's Straight Key Night; one CW station will use Hiram Percy Maxim's straight key. Activity will continue throughout New Year's Day."

XW, LAOS. Champ, E21EIC, will once again be active as XW0YJY from Vientiane between December 12-17th. Activity will include the ARRL 10M Contest (December 14-15th) as a Single-Op/Mixed-Mode/Lower-Power entry. Operations before and after will be CW on 80-10 meters. QSL via E21EIC or OQRS (ClubLog) and LoTW. No eQSL. Visit it his FaceBook and Web page at:
https://www.facebook.com/SomChamp
http://www.e21eic.net/index.php

ZF, CAYMAN ISLANDS. Pete, K8PGJ, will be active as ZF2PG on the sunny Grand Cayman Islands (NA-016) during the week of January 11-19th (2014). Activity when not diving will occur on 10 thru 20 meters SSB during the morning and afternoons on weekdays, and he hopes one night on 40 thru 160 meters. Pete plans to activate the Caymans for the NAQP Contest on 10 thru 160 meters. LoTW will be utilized and QSL to his home callsign.

To: DX-IS@yahoogroups.com
Subject: RE: [DX-IS] RE: [digitalradio] Why (and How) You Should Urge the FCC to Reject the ARRL's Symbol Rate Petition

So the symbol rate is not what you are opposing but that the unattended stations are not being held responsible for interference to
those already on a frequency. Then maybe you should file a petition with the FCC to start enforcing this rule for ALL stations not
just attended stations. That or petition the ARRL to have the interference aspect added to their petition or another ARRL petition
filed.

>>>I've spent considerable energy over the past two weeks seeking to convince ARRL CEO Dave K1ZZ to modify the current ARRL petition
in a way that would reduce rather than increase interference from automatic stations. This effort was unsuccessful.

>>> Our response to a petition that would increase the incidence of interference should not be "separately submit a petition that
would mitigate the interference"; our response should be to urge the FCC to reject the ARRL's current petition, and then to urge the
ARRL to submit a new petition that raises the symbol limit in a way that reduces the incidence of interference, rather than
increases it.

To: DX-IS@yahoogroups.com
Subject: RE: [DX-IS] Why (and How) You Should Urge the FCC to Reject the ARRL's Symbol Rate Petition

Dave, I'm sorry, but I simply don't agree that raising or eliminating the "symbol rate limit" will ipso facto mean that interference
from automatic stations will increase.

>>>I've already explained how the ARRL's petition would, if adopted, motivate the development of faster and wider modes, and would
allow automatic stations to employ these faster and wider modes without addressing the increased interference that adoption the use
of these wider modes would cause. You offer no explanation for why you don't think this would happen.

The solution for THAT problem is to address THAT problem. Not keep the "state of the art" for Amateur Radio digital communications
under the thumb of regulations from the early 1980's..

>>>We should not correct one problem by changing the regulations in a way that makes another problem worse. We should change the
regulations in a way that competently resolves both issues.

>>>For that reason, we should urge the FCC to reject the ARRL's current petition, and then urge ARRL management to submit a new
petition that removes the symbol rate limit in a way that reduces, rather than increases interference.

Topic: 21987 Message: 22000

Dave,

I'm not going to bore the rest of the reflector repeating the obvious.

Clearly you and I do not agree on this matter.

You appear afraid that the new rules will, as a possibly unintended consequence, definitely open up potential increased interference from hypothetical new automated stations running hypothetical data modes.

I don't see that as a "definite". And I believe that the answer lies in updating the rules regarding automated stations, not arbitrarily limiting all digital users to archaic rules.

I just hope that when you file your comments, you do indicate that your issue isn't with the proposed changes themselves, but with the potential consequences, and ask that the consequences be dealt with -- with suggestions.

Oh, and (as per your other reply to Tim), I'm not surprised that you had a problem getting a response from K1ZZ. That is another issue for another time, suffice to say, if you want to argue that it's high time for new leadership in Newington... I'm already in the bandwagon banging the drum (badly).

Subject: RE: [DX-IS] Why (and How) You Should Urge the FCC to Reject the ARRL's Symbol Rate Petition

I'm not going to bore the rest of the reflector repeating the obvious.

>>>There is nothing obvious about your claim that the existing interference from automatic stations - which is significant -- won't
get worse if these stations switch to wider modes.

I just hope that when you file your comments, you do indicate that your issue isn't with the proposed changes themselves, but with
the potential consequences, and ask that the consequences be dealt with -- with suggestions.

>>>My comments will point out that the ARRL's petition solves one problem in a manner that makes another problem worse. Those are
strong grounds for rejection.

Oh, and (as per your other reply to Tim), I'm not surprised that you had a problem getting a response from K1ZZ.

>>>I had no problem "getting a response" from Dave K1ZZ; he was both responsive and cordial throughout an extended exchange. I was
unable to persuade Dave to retract the ARRL's current proposal in favor of one that if adopted would not increase interference.

That is another issue for another time, suffice to say, if you want to argue that it's high time for new leadership in Newington...
I'm already in the bandwagon banging the drum (badly).

>>>I am not interested in ARRL politics. I am interested in addressing long-standing problems -- like LotW's usability and
reliability, and like interference from automatic stations.

Subject: RE: [digitalradio] Why (and How) You Should Urge the FCC to Reject the ARRL's Symbol Rate Petition

Dave,

Each is entitled to his opinion and you can file yours with a proper response to the FCC proposed rule change RM-11708. A comment
response to a proposed rule change doesn’t have to be particularly accurate or logical …those reviewing the comments however
actually for the most part really do understand the technology and the proposed rule changes.

However when you use a forum like this one to encourage others to comment it should be your personal responsibility to try and get
the facts correct and present them in a honest and straightforward way.

Your comment: “If accepted, digital modes as wide as 2800 hertz would become legal for use by US hams on HF bands. Pactor 3, which
is legal under the current symbol rate limit, is 2200 hertz wide.”

Is misleading. There is currently NO specified bandwidth limit to digital modes. The symbol rate rule does NOT (as was probably
intended in 1980) restrict bandwidth. There are many digital modes at 2 KHz or above. The proposal RM-11708 simply specifies a
practical and easily measured restriction of bandwidth. The proposed limit is no more than SSB voice and considerably less than AM.
It is also a practical limit compatible with most SSB transceivers. If you don’t like 2800Hz bandwidth limit propose another and
suggest it also be applied to SSB voice, AM, MT63, ALE etc. There are numerous modern and efficient HF Modem protocols that could
be adapted for Ham radio use (Mil Std 188, STANAG etc.)if the symbol rate rule were not in effect.

>>>I disagree. The current 300 baud HF symbol rate limit restricts transfer rate, and thus makes modes greater than 2200 hertz of
little value to message passing networks. The ARRL's proposal both removes the 300 baud HF symbol rate limit, and sets a maximum HF
bandwidth of 2800 hertz. If the ARRL petition were accepted, operators could deploy 2800

hertz digital modes with higher transfer
rates that what Pactor 3 provides (in 2200 hertz). Switching to such modes would be attractive to message passing networks.

Your comment: “While US-based automatic stations using digital modes wider than 500 hertz are restricted to specified sub-bands
(e.g. 10,140 – 10,150, 14,095 – 14,099, 14,101-14,112, 21,090 – 21,100, 24,925 – 24930), these frequencies are shared with QSOs
between live operators.”

Is technically correct. But in fact ALL ham radio frequencies are shared by everyone (no one user or mode has exclusive rights).
  The fact that automatic and wideband digital modes are limited to relatively small band segments (15 Khz or less below 28 MHz) in
the US insures those operating OUTSIDE those narrow segments should be free from any such interference. The proposed rule change
does NOT change these auto forwarding sub bands.

>>>That's incorrect, Rick. At present, the "speed limit" within these HF sub-bands is set by the 300 baud symbol rate limit. The
ARRL's petition, if accepted, would eliminate this limit, replacing it with a 2800 hertz limit on bandwidth. One or more 2800 hertz
modes with transfer rates significantly faster than that of Pactor 3 would soon be in use by message passing networks.

Your comment: “Furthermore, the WinLink network now claims that its automatic stations are actually under the control of the remote
stations that invoke them, and are therefore no longer restricted to these sub-bands.”

Is misleading.

>>>The statement above is accurate: WinLink's "Rules and Guidelines" web page states

"On HF Pactor, the radio users of the Winlink 2000 system initiating a contact are present as control operators, and therefore,
WinLink 2000 operations do not fall within the category of "automatic control" per U.S. FCC Part 97.221."

<http://www.winlink.org/guidelines>

All HF Winlink HF stations (all supported protocols) are and always have been passive stations responding only to a call to their
specific call sign. They never use beaconing or sounding. This has also been the practice of most HF BBS stations since the
1980’s.   The current law clearly defines what is restricted to the sub bands and no changes to this are proposed in RM-11708.

>>>97.3(13) defines "Control Operator" as "An amateur operator designated by the licensee of a station to be responsible for the
transmissions from that station to assure compliance with the FCC Rules."

>>>The "Rules and Guidelines" web page's claim that the "radio users of the Winlink 2000 system initiating a contact are present as
control operators" is nonsense. Such operators have no ability to " manipulate the

operating adjustments in the station through a
control link to achieve compliance with the FCC Rules", as is required by 97.3(38).

>>>In the absence of a remote control link conformant with 97.3(38), Winlink servers are automatic stations, as defined by 97.3(6);
if using a mode wider than 500 hertz, WinLink servers are subject to 97.221.

Winlink developed an effective busy detector (all modes) and Winlink HF stations routinely use this technology to prevent
responding to a call when a frequency appears busy (When the calling station fails to listen first or there is a “hidden”
transmitter).

>>>Excellent! If that's the case, then you should join me in urging the FCC to reject the ARRL's petition in favor of an improved
petition that requires automatic stations to incorporate busy frequency detectors. This would reduce the incidence of interference
with ongoing QSOs -- the opposite of what the current ARRL petition would do if adopted.

Your comment: “This network (Winlink) now advertises US-based automatic stations running Pactor 3 outside the automatic sub-bands –
automatic stations that could be upgraded to 2800 hertz modes if the ARRL Petition is accepted.”

Is simply incorrect. Winlink publishes the frequencies and protocols used publically for all stations (US and others) on its web
page http://www.winlink.org/RMSChannels . The Winlink software specifically monitors and limits operation to correct auto
forwarding bands for US call signs. Any violator (US or otherwise) of amateur rules is notified and if not immediately corrected is
blocked from operating (as a USER OR SYSOP) from the Winlink system.

>>>As of last week, the "RMS Channels" web page you cite listed the following Pactor III stations with center frequencies outside
the 97.221 sub-bands: WG3G on 3569.0, N4MEH on 3580.0, W5SEG on 7067.5, K0SI on 7105.9, KC4TVO on 10139.5, and K9BBS-10 on 14112.5.

Rather than continually bashing the all-volunteer Winlink system or the ARRL for trying to simplify the rules and advance the state
of the art why not look at the proposed rule change as written and look at what it is trying to do:

1)	Define a practical and easily measured mechanism (bandwidth) to regulate digital modes. The symbol rate rule doesn’t limit
bandwidth as is proven by the large number of OFDM modes available and in common use. The proposed bandwidth limit is compatible
with virtually all Ham SSB transceivers and consistent with the vast majority of world-wide amateur rules.

2)	Allow and encourage digital mode development and experimentation. This has been proven (e.g. the CODEC2 project which can
provide noise free digital voice in HALF the bandwidth of SSB voice and Pactor 4 which has the highest digital mode efficiency

bits/sec/Hz). The existing symbol rate rule is a significant factor why the US has no viable modern Ham HF modem manufactures and
lags the rest of the world in amateur digital protocol development.

>>>Neither reciting facts nor projecting the consequences of proposed actions constitutes "bashing".

>>>I support the elimination of the 300 baud limit on HF, and I support the permission of HF digital modes wider than 2200 hertz --
but in a manner that does not increase interference to current users. Allowing automatic stations to employ 2800 hertz modes without
requiring them to incorporate busy frequency detectors will increase the interference to ongoing QSOs - the opposite of what is
required.

>>>If Winlink is now incorporating busy frequency detectors in its servers as you claim above, then you should support rejection of
the current ARRL petition in favor of a petition that also requires automatic stations to incorporate busy frequency detectors. This
would reduce rather than increase interference to ongoing QSOs by incentivizing automatic stations to incorporate busy frequency
detectors; it would eliminate much of the opposition to the current ARRL proposal.

Dave and Ron.

If you too want to continue this debate please do it without the multigroup postings. First it is against the rules to post to multiple groups at once it creates a mess of bounces. Second, it posts items here not of general DX interest (not by itself a new thing here). But third, it contains posts from other boards that includes people not on our list.

Clean up your to address lists by NOT HITTING REPLY ALL.

Thanks,
Don

That's cool, Iain. I have no clue how many I have. So many were sent in many years ago that they don't even show in LOTW other than the country code and a default date. I have noticed that some of those unknowns have been replaced with newer LOTW versions but those weren't actually what was applied originally. Doesn't matter, as long as they have it.

Oops ... hope K8QM is friendly ;)

I noticed, after sending my last email, that K9W is my 300th entity confirmed in LotW, from 311 worked over the last 5 years or so.
Pretty good return! I've pretty much abandoned paper cards at this point, although I'll probably have to send one to 5A1AL (my only remaining unconfirmed entity).

That's cool, Iain. I have no clue how many I have. So many were sent in many years ago that they don't even show in LOTW other than
the country code and a default date. I have noticed that some of those unknowns have been replaced with newer LOTW versions but
those weren't actually what was applied originally. Doesn't matter, as long as they have it.

73,
Tim Herrick, KQ8M

Subject: Re: [DX-IS] XR0ZR Received LOTW

Oops ... hope K8QM is friendly ;)

I noticed, after sending my last email, that K9W is my 300th entity confirmed in LotW, from 311 worked over the last 5 years or so.
Pretty good return! I've pretty much abandoned paper cards at this point, although I'll probably have to send one to 5A1AL (my only
remaining unconfirmed entity).

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31210
SIDC SOLAR BULLETIN 10 Dec 2013, 1212UT
SIDC FORECAST (valid from 1230UT, 10 Dec 2013 until 12 Dec 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 10 Dec 2013 10CM FLUX: 170 / AP: 012
PREDICTIONS FOR 11 Dec 2013 10CM FLUX: 173 / AP: 010
PREDICTIONS FOR 12 Dec 2013 10CM FLUX: 173 / AP: 007
COMMENT: The situation concerning flares didn't change much: the Sun is
still in a C-flaring mood, the probability for M-flares is around 40%. A
series of three small sunspots popped up: Catania 73, 74 and 77. They are
small but indicate that solar activity is still on the run. The solar wind
speed has decreased to 400 km/s. The glancing blow linked with the plasma
eruption on December 7 didn't arrive. We don't exclude a later arrival.
TODAY'S ESTIMATED ISN : 127, BASED ON 18 STATIONS.

I have received LoTW confirmations for XR0ZR and 5J0R. However, still no sign of K9W. I used their OQRS method on Nov. 23, 2013. Are others still waiting?

I'm also waiting to hear from W8A about a missing 30 metre QSO before I submit their OQRS application. I have written Jacky, QSL Mgr, and he hasn't had an opportunity to get back yet.

Thanks Don.

I just looked and they must be doing periodic uploads. Their last one was at: 2013-12-10 14:59:59Z

I gave them the requested $5.00 contribution. So I guess I wait patiently - hi!

PREDICTIONS FOR 13 Dec 2013 10CM FLUX: 175 / AP: 007
COMMENT: The Sun is still in a C-flaring mood. It is almost sure that more
C-flares will happen. The probability for M-flaring activity is estimated
around 40%. There are 9 active regions on the solar disk. Several of them
are magnetically connected. NOAA AR 1922 (Catania 74) has grown from
nothing to a beta-gamma configuration. A partial halo CME was detected
on Dec 9, around 21UT. The source region was located in the North-East. We
don't expect this CME to be geoeffective. A recurrent large coronal hole
in the northern hemisphere reached the central meridian. It caused previous
rotation a Kp of 4. Geomagnetic disturbances are excepted on December 14.
TODAY'S ESTIMATED ISN : 124, BASED ON 14 STATIONS.

Newington CT December 12, 2013
To all radio amateurs

SB DX ARL ARLD050
ARLD050 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MADAGASCAR, 5R. Eric, F6ICX is QRV as 5R8IC from Sainte Marie Island, IOTA AF-090, until December 15. Activity is on 40 to 10 meters using mostly CW with some SSB, RTTY and PSK. QSL to home call.

BAHRAIN, A9. Fawaz, A92AA and Ely, A93LT are QRV as A91MCAT until the end of 2013 to celebrate the capital Manama as the Capital of Arab Tourism. QSL via IZ8CLM.

AZORES, CU. Siegfried, DF9WB is QRV as CT8/DF9WB until December 18. Activity is on 20, 15 and 10 meters using SSB. QSL to home call.

WALES, GW. Steve, GW4BLE will be QRV as GW7X in the ARRL 10 Meter contest as a Multi/Single entry. QSL direct via G8DX.

MINAMI TORISHIMA, JD1. Take, JG8NQJ is QRV as JG8NQJ/JD1 from Marcus Island, IOTA OC-073, until mid December while on work assignment. Activity is on 17, 15, 12 and 10 meters using only CW in his spare time. QSL to home call.

ARGENTINA, LU. Look for L73D to be a Multi/Single entry in the ARRL 10 Meter contest. QSL via operators' instructions.

LITHUANIA, LY. Vilmantas, LY3BY is QRV as LY2013SAT until December 24 to commemorate the first Lithuanian nano-satellite LituanicaSAT-1. QSL via LY3BY.

CURACAO, PJ2. Mark, N5OT, Dave, W6DR, Yin, N9YS and Mike, NT6X are QRV as PJ2/home calls, along with Geoff, W0CG who is QRV as PJ2DX. They will be active as PJ2T in the ARRL 10 Meter contest. QSL PJ2T

direct via W3HNK and all others to home calls.

SEYCHELLES, S7. Igor, UA3DJY is QRV as S79ACR from Mahe Island, IOTA AF-024, for a month long holiday. He is active holiday style on the HF bands. QSL to home call.

CHAD, TT. Elvira, IV3FSG is QRV as TT8ES from Doba until December 20 while working with the Franciscan Sisters Alcantarins mission. Activity is in her spare time on HF using SSB and digital modes during her early mornings and late evenings. QSL via IK3GES.

EUROPEAN RUSSIA, UA. Special event call R2014CC is QRV until March 1, 2014 to commemorate the 2014 Winter Olympic Games. QSL via operators' instructions.

UKRAINE, UR. Special event station EN100ZKM is QRV to celebrate the 100th anniversary of Nikolaev's regional museum. QSL via UT5ZY.

BRUNEI, V8. Special event station V84BNJ is QRV until December 15 to commemorate the 4th Brunei National Scout Jamboree. Activity is on all bands using CW, SSB and PSK31. QSL via operators' instructions.

LAOS, XW. Champ, E21EIC is QRV as XW0YJY until December 17. Activity is on 80 to 10 meters using CW. This includes being an entry in the ARRL 10 Meter contest. QSL to home call.

INDONESIA, YB. Burkhard, DL3KZA is QRV as YB9/DL3KZA from Lombok Island, IOTA OC-150. Lately he has been active on 20 and 15 meters using SSB. His length of stay is unknown. QSL to home call.

NICARAGUA, YN. Scott, K7ZO is QRV as YN5Z until December 18. Activity is on 20 to 10 meters. This includes being an entry in the ARRL 10 Meter contest. QSL to home call.

ST. HELENA, ZD7. Daniel, ZS1BBT is QRV from school station ZD7PAS until December 23. QSL via operator's instructions.

SOUTH AFRICA, ZS. Members of the South African Radio League are QRV with special event call sign ZS9MADIBA for the next 30 days to commemorate the life of Nelson Rolihlahla Mandela. QSL via operators' instructions.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC Credit: Rwanda, 9X0XA, 2013 operation; Lakshadweep Islands, VU7AG, November 20, 2013 through December 10, 2013 operation.

THIS WEEKEND ON THE RADIO. The ARRL 10-Meter Contest, AWA Bruce Kelley 1929 QSO CW Party, NCCC RTTY Sprint, QRP CW Fox Hunt, NCCC Sprint, International Naval Contest and the QRP ARCI Holiday Spirits Homebrew CW Sprint are all on tap for this upcoming weekend. The Run for the Bacon QRP CW Contest and NAQCC-EU Monthly CW Sprint are

scheduled for December 16. The NAQCC Straight Key/Bug CW Sprint and QRP CW Fox Hunt are scheduled for December 18. Please see December QST, page 66 and the ARRL and WA7BNM contest web sites for details.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31213
SIDC SOLAR BULLETIN 13 Dec 2013, 1312UT
SIDC FORECAST (valid from 1230UT, 13 Dec 2013 until 15 Dec 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 13 Dec 2013 10CM FLUX: 165 / AP: 007
PREDICTIONS FOR 14 Dec 2013 10CM FLUX: 162 / AP: 014
PREDICTIONS FOR 15 Dec 2013 10CM FLUX: 158 / AP: 007
COMMENT: The most active region the last 24 hours were NOAA AR 1917 near
the central meridian and 1921, 30 degrees east. We expect more C-flares and
a chance of 40% for M-flares. The C-flaring activity of yesterday December
12 was associated with two plasma eruptions: the flare from NOAA AR 1912
was associated with a SW oriented plasma eruption around 3UT, the flare
from NOAA AR 1917 was associated with a SE oriented plasma eruption around
5UT. We don't expect the CME's to arrive at Earth. Geomagnetic conditions
are quiet at the moment. The northern coronal hole can have a geomagnetic
impact: a Kp of 4 is possible from tomorrow onwards.

From: <k9or@...>
Topic: 22022 Message: 22022

14 December 2013 A.R.I. DX Bulletin
No 1180
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

9M6 - Vincent, F4BKV is visiting Singapore (9V, AS-019), Brunei (V8, OC-088) and East Malaysia until 22 December. "Radio is not the main purpose of the trip", he says, so "don't expect a full time activity". The first two operations will be limited to few hours only, on 14 December from 9V and on 17-18 December from V8. On 20-22 December he will operate holiday style from Labuan Island (9M6, OC-133). Logsearch and OQRS at www.f4bkv.net http://www.f4bkv.net
A9 - The Bahrain Amateur Radio Group will operate special event station A91NM on 15 December to celebrate the 25th anniversary of the Bahrain National Museum. QSL via IZ8CLM. [TNX A92AA]
DL_ant - Felix, DL5XL will be working at the German Antarctic station Neumayer III from 20 December to 8 February. He will operate mainly CW as DP1POL in his spare time. QSL via DL1ZBO, direct or bureau, and LoTW. Logsearch on Club Log. Holger, DH1HB will be located at the same research station until February 2015, and will be QRV as DP0GVN (QSL via DL5EBE). [TNX DX World]
H40 - Sigi, DK9FN will be active again as H40FN (mainly CW) from Temotu Province from 21 December to 10 January. This year he will operate from Lomlom Island (OC-065). QSL via DK9FN (new route), direct or bureau. Further information and operating tips (they are worth a reading) at qrz.com http://qrz.com under H40FN. [TNX The Daily DX]
JW - Alex, DL1NX/PY2SEX will be active as JW/PY2SEX from Spitsbergen (EU-026), Svalbard on 24-25 December. He plans to operate mainly CW and SSB on 40-10 metres. QSL via DL1NX.
PJ4 - Steve (ex 9M6DXX and 9M8Z, aka G4JVG and KH0UN) has moved permanently to Bonaire (SA-006) and received his licence on 10 December. His new call is PJ4DX. He is QRV using an FT-950 and a low Spiderbeam, plus a 40m quarter-wave vertical with elevated radials. All equipment is kindly loaned by Peter, PJ4NX, until Steve's own equipment arrives from Malaysia early in 2014. QSL via M0URX, direct or bureau (OQRS preferred). Logs will be uploaded to LoTW and ClubLog on a regular basis. [TNX PJ4DX]
PJ5 - Nao, JN1RVS will be active as PJ5/K6NAO from St. Eustatius (NA-145) on 22-29 December. He will operate CW and RTTY/PSK on 40-10 metres. QSL via JA1HGY; logsearch and OQRS on Club Log. [TNX DX World]

PY - Raimundo, PT7CG will be active as ZX8DX from Ilha Grande de Santa
Isabel (SA-025) on 26-30 December. QSL via home call.
V5 - Dietmar, DL3DXX will be active as V5/DL3DXX from Namibia from 24
December to 8 January. He will operate CW only 160-10 metres. QSL
via home call. [TNX The Daily DX]
VP5 - Steve, VE3OC, to be active holiday style as VP5/VE3OC from
Providenciales, Caicos Islands (NA-002) on 18-27 December. QSL via
home call (direct only) and eQSL.
ZS - Celebrating the late President Nelson Mandela's legacy, the South
African Radio League will operate special event stations from
around the country using the special callsign ZS9MADIBA until 11
January 2014. QSL via the bureau or direct to SARL, P.O. Box 1721,
Strubensvallei 1735, South Africa. Logsearch on Club Log. See
www.amateurradio.org.za/ zs9madiba.htm http://www.amateurradio.org.za/zs9madiba.htm for
the operating schedule.

AFRICAN TRIP ---> Mathias DJ2HD, Ulmar DK1CE and Wolfgang DH3WO will be on
4x4 trip Namibia, South Africa, Lesotho and Botswana between 14 December and
18 January 2014:
14-18 December V5/DJ2HD
18-22 December ZS/DJ2HD, ZS/DK1CE, ZS/DH3WO
22-24 December 7P8DJ, 7P8CE, 7P8WO
24-30 December A25DJ, A25CE, A25WO
31 December-18 January V5/DJ2HD
1-5 January V5/DK1CE, V5/DH3WO
All of the QSOs will be confirmed automatically via the bureau. When in
Namibia, DJ2HD will participate in the ARRL 10 Meter Contest and the DARC
10m Contest (12 January 2014) as V55V (QSL via DJ8VC, direct or bureau).

DXCC NEWS ---> 9X0XA (Rwanda, 2013 operation), T6TM (Afghanistan, current
operation) and VU7AG (Lakshadweep Islands, 20 November - 10 December 2013)
have been approved for DXCC credit. [TNX NC1L]

INDEXA NEWS ---> "The officers of the International DX Association, INDEXA
(www.indexa.org http://www.indexa.org), have agreed to send an additional donation of
2,500 USD
to the Amsterdam Island, FT5ZM, DXpedition team. INDEXA's financial support
for this DXpedition has now grown to 10,000 USD. Our membership of
worldwide DXers has been generous to us this year with donations. Thus,
INDEXA felt further support to the FT5ZM team was appropriate".

K9W ---> The K9W Wake Atoll Team thanks the DX community for the
outstanding response to The Forgotten 98 Commemorative DXpedition. K9W made
53765 CW, 38700 SSB and 7562 digital QSOs. The final QSO percentages per

continent are NA 35.3%, AS 32.3%, EU 26.9%, OC 3.1%, SA 1.8% and AF 0.6%.
All of the QSOs have been uploaded to Club Log, and "most, if not all,
corrections have been made". Please write to info[@]wake2013.org http://wake2013.org for
possible problems with the ClubLog upload. The printed QSLs are in transit
to the QSL manager (AA4NN). The use of OQRS for direct and bureau cards is
highly recommended (see http://wake2013.org/pages/qsl. html
http://wake2013.org/pages/qsl.html). [TNX W8GEX]

QSL HP0INT ---> Vincent, F4BKV mailed about 50% of the direct cards for the
Panama IOTA Tour on 12 December, the others will follow on the 23rd. Those
letters will be sent from Hong Kong, he says; direct requests with French
postage stamps on their SAEs will be processed in early January.

STORMY WEATHER: OH8X ---> Radio Arcala (OH8X) has lost its 100m (330 ft)
tall tower that supported 160m and 80m Yagis. The structure weighed 40 tons
(80,000 lbs) and did not survive recent storm Oskari's gusts of up to 68
knots. "The mammoth structure collapsed peacefully, not hitting any of the
other six towers, not hurting people or damaging buildings", OH2BN reports.
"It is suspected that automation designed to enable the array to find its
most comfortable position in high winds somehow locked up and caused the
structure to corkscrew and crumble down on its on base".

STORMY WEATHER: SV2ASP/A ---> The Daily DX reports that also Monk Apollo,
the only active station from Mount Athos, has lost all of his antennas,
which "fell down in the big wind storm last week". Apollo is currently "in
Corinth, Greece for the olive harvest" and "does does not know when he will
have the time to get something back up in the air".

Seattle, WA December 13, 2013
To all radio amateurs

SB PROP ARL ARLP051
ARLP051 Propagation de K7RA

Solar indicators rose over the past week, for both solar flux and sunspot numbers. The highest were on Tuesday, December 10 when the sunspot number was 169 and solar flux 175.2. In an otherwise quiet week the planetary A index reached 26 on Sunday, December 8, sparked by a strong solar wind surging from a coronal hole. We could see a repeat this weekend. Geomagnetic activity during the ARRL 10 Meter Contest this weekend should be more active than contesters would prefer, with predicted planetary A index values of 20 and 15 on Saturday and Sunday.

NOAA said Thursday night that the geomagnetic field may be anywhere from quiet to minor storm levels this weekend.

For the past six 10-Meter Contests, geomagnetic conditions have been very quiet. But in 2006 the contest (always the second full weekend in December) fell right between two very active periods. The 2006 contest was held on December 9-10, and checking the record at http://www.swpc.noaa.gov/ftpdir/indices/old_indices/2006_DGD.txt we see the planetary A index on those dates was 7 and 14. But just prior on December 6 the A index was 28, and 25 on December 7-8. Following the contest that year the planetary A index on December 11-15 was 15, 26, 5, 63 and 104. The last two figures indicate a major geomagnetic storm. Lucky it didn't hit earlier, but the contest weekend was still feeling the effects of the higher activity in the days before. Reports included much trans-equatorial propagation. North-South propagation across the equator is not enhanced during periods of high geo-activity, but rather that is often the only propagation path available.

Compared to the previous seven days, over December 5-11 the average daily sunspot number rose from 102.9 to 122.1, and average daily solar flux increased from 132.9 to 162.4.

The predicted values in the 45-day outlook for solar flux took a substantial leap on December 8. For example, on December 7 the predicted average solar flux for December 10-15 was 141, and on December 8 the projected average for the same period was 170. The predicted values for the following 45 days increased across the board, but have since scaled back somewhat.

The latest prediction has solar flux at 165 on December 13, 160 on December 14-15, 155 on December 16-18, 150 on December 19-20, 172 on December 21-22, 175 on December 23-25, 172 on December 26, 170 on December 27-29, 165 on December 30, and 160 on December 31 through January 2, 2014. After dipping to 150 on January 4, solar flux is expected to rise to a short term peak of 172 on January 7-8.

Predicted planetary A index is 12, 20 and 15 on December 13-15, then 5 on December 16-25, then 12, 10 and 8 on December 26-28, 5 on December 29 through January 2, 2014, then 10, 20, 15, 10 and 8 on January 3-7.

OK1HH believes the geomagnetic field will be quiet December 13-14, mostly quiet December 15, quiet to unsettled December 16, quiet December 17-18, quiet to unsettled December 19, quiet December 20-24, mostly quiet December 25, quiet to unsettled December 26, quiet to active December 27, quiet December 28, mostly quiet December 29, and quiet on December 30-31.

Predicted solar flux shows this weekend's 10 Meter Contest should have the highest solar flux and sunspot numbers since the 2002 contest. Conditions may be similar to the 1999 contest, when solar flux and sunspot numbers were about the same as now. This was before the peak of the last solar cycle, cycle 23.

To test this out and see where conditions are compared to previous ten meter contests, I averaged sunspot numbers and solar flux since 1997 for the contest weekend including the Friday before.

>From 1997 through 2012, the average solar flux on the second full weekend in December was 90.6, 143.5, 160.9, 139.9, 224.2, 185.3, 89.1, 88.4, 91.2, 92.8, 87.5, 69.8, 74, 88.2, 139.3, and 100.6. For Friday through Saturday this weekend the average of predicted flux values is 161.7, very close to what it was in 1999, and as you can see, stronger than any contest weekend after 2002.

Over the same period using the same method, average sunspot numbers were 66.7, 153.3, 120.3, 70.7, 201.3, 202.3, 41.3, 27, 55.7, 22.7, 34, 4.7, 13, 27, 103 and 32.7. We don't have a source for predicted daily sunspot numbers, but the average reported at the end of this bulletin was 122.1. This is also stronger than any contest weekend since 2002.

Note that in 2008 the average sunspot number on the second weekend in December was only 4.7. This may seem strange, because the arcane method used for determining sunspot number produces no non-zero

sunspot numbers below 11. But on that Friday through Sunday period, over the three days sunspot numbers were 14, 0 and 0. That produces an arithmetic average of 4.667, or 4.7.

You can find information on the ARRL 10 Meter Contest at http://www.arrl.org/10-meter.

I used past ARRL Propagation Bulletins from the archive at http://arrl.org/w1aw-bulletins-archive-propagation as a source for data on past 10 Meter contests. While browsing, in ARLP050 in 2010 I found an interesting resource that I had forgotten about at http://www.helioviewer.org/ . With this tool you can set up a movie of recent or past solar images, and have them continually animated at a variety of rates and representing a time period of your choosing.

I also ran into a bulletin by Tony, G4CJC concerning 10 meter DX and propagation news from Europe at http://www.southgatearc.org/bands/10metres/december2013/december_12.htm#.Uqls0-JC2UU .

Jon Jones, N0JK writes The World Above 50 MHz column in QST, and sent this note:

"The Winter 6 meter Es season is underway.

Tuesday Dec. 10 - 6 meters was open before sunrise (1230 UTC) from KS, NE to Florida, and strong Es from W1 to Florida.

Geminids meteor shower to peak this weekend."

That's right, and the meteor shower should enhance 10 meter propagation, because of all those ionized meteor trails. In fact, the story goes that the second weekend in December was picked for the 10 meter contest because it coincides, with some variation year to year, with the Geminids shower.

Max White, M0VNG sent along an article about threats from massive solar events. Read it at at http://www.colorado.edu/news/releases/2013/12/09/cu-boulder-scientist-2012-solar-storm-points-need-society-prepare .

Ray Soifer, W2RS of Green Valley, Arizona wrote: "Interesting to read about Larry, W0OGH's experience with VU7AG. Mine was very similar. I am 113 miles south of Larry's QTH and worked VU7AG on 20 CW a minute before he did. I too noticed the auroral flutter on the VU7's signal. Most of their times and frequencies seemed to favor Europe and the eastern half of North America so it was good to have this opening.

On 20 CW I have 600 watts to a Hy-Gain AV620 vertical mounted on a 10-foot pipe. It isn't a 4- element monobander but it does pretty well on DX paths due to its fairly low radiation angle."

Funny. My word processing program did not like the word "monobander" above, and suggested "mindbender" as the correct spelling.

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for December 5 through 11 were 103, 105, 104, 83, 125, 169, and 166, with a mean of 122.1. 10.7 cm flux was 149.6, 150.5, 156.9, 165.5, 168.1, 175.2, and 170.8, with a mean of 162.4. Estimated planetary A indices were 5, 4, 6, 26, 5, 5, and 4, with a mean of 7.9. Estimated mid-latitude A indices were 4, 3, 4, 14, 2, 3, and 2, with a mean of 4.6.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31214
SIDC SOLAR BULLETIN 14 Dec 2013, 1212UT
SIDC FORECAST (valid from 1230UT, 14 Dec 2013 until 16 Dec 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 14 Dec 2013 10CM FLUX: 163 / AP: 013
PREDICTIONS FOR 15 Dec 2013 10CM FLUX: 160 / AP: 006
PREDICTIONS FOR 16 Dec 2013 10CM FLUX: 160 / AP: 004
COMMENT: The X-ray background radiation has decreased slightly. C-flaring
activity is however still very likely. A forward shock is seen in ACE solar
wind data around 12UT on December 13: temperature, density and magnetic
field strength increased, the speed increased from around 270 km/s to 330
km/s. The shock is probably linked to the interaction of a slow and fast
solar wind stream giving rise to a co-rotating interaction region. The
northern coronal hole that reached the central meridian on December 10 is
responsible for the fast solar wind. The planetary K index became 4 during
one 3-hour interval this morning, December 14. The total magnetic field
strength at the L1 point is around 10 nT, the wind carries 10 particles per
cm3 at a speed of around 400 km/s. Active conditions are possible.

22026. VU7AG on LOTW

Yahoo group: DX-IS (2013)
Date: 2013-12-15 13:36:22 UTC
From: KQ8M
Topic: 22026 Message: 22026

Just received my VU7AG confirmations on LOTW. Now that is what I call fast!

73,

Tim Herrick, KQ8M

Charter Member North Coast Contesters

kq8m@...

AR-Cluster V6 kq8m.no-ip.org

User Ports: 23, 7373 with local skimmer, 7374 without local skimmer

Server Ports: V6 3607, V4 Active 3605, V4 Passive 3606

22027. RE: VU7AG on LOTW

Yahoo group: DX-IS (2013)
Date: 2013-12-15 15:03:51 UTC
From: <kb1jzu@...>
Topic: 22026 Message: 22027

Same here Tim,

Krish and team did a great job. Filled my 5 open bands from VU7 with minimal effort on my part. Did send a donation unaffected by their upload to LoTW.

Hope they plan a future trip to VU4.....got 5 open bands on that one too.

Now if only some of the other November DXpeditions would follow the lead of VT7AG, 5J0R, XR0ZR, & K9W. HI

Bob

22028. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-12-15 15:30:00 UTC
From: Paul Dunphy
Topic: 19749 Message: 22028

```
:Issued: 2013 Dec 15 1303 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31215
SIDC SOLAR BULLETIN 15 Dec 2013, 1312UT
SIDC FORECAST (valid from 1230UT, 15 Dec 2013 until 17 Dec 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 15 Dec 2013 10CM FLUX: 162 / AP: 005
PREDICTIONS FOR 16 Dec 2013 10CM FLUX: 160 / AP: 006
PREDICTIONS FOR 17 Dec 2013 10CM FLUX: 160 / AP: 005
COMMENT: The background X-ray radiation is situated in the top B-level
(B7). The probability for C-flares is around 60%, M-flares around 20%, the
chances for an X-flare are low. There were several CMEs on December 14.
All of them were limb events. No impact on Earth is expected. The
geomagnetic conditions were active (Kp=4) yesterday, December 14 due to the
interaction of a slow and fast solar wind linked with a coronal hole. We
are again heading to a slow wind. We expect the geomagnetic conditions to
cool down and return to quiet.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, N2IEN, NG3K & ADXO, W3UR & The Daily DX, KR4OJ, N4AA & QRZ DX, WC6DX, N7OU, K8GI, K8YSE, W8GEX & 60m News, AT International, BA4DW, DJ7PR, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, HK3W, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, JJ2QXI, OZ6OM & 50 MHz DX News, PA0RRS, Pete's DX-Newsdesk, PJ4DX, PT7WA, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF), VK2HV, ZS4BS and ZS5J for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th-December, through Sunday, 15th-December there were 217 countries active. Countries available: 3A, 3B8, 3B9, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5R, 5T, 5W, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9X, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, EU, EX, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, VU7, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

1A, SOVEREIGN MILITARY ORDER OF MALTA (Update). An "international team" of operators led by Francesco, IK0FVC, will be active as 1A0KM from the Sovereign Military Order of Malta (SMOM) between January 2-7th (2014). QSL via IK0FTA. Log will be uploaded to LoTW. Look for more details to be forthcoming.

3B9, RODRIGUES ISLAND. Eric, OE4AAC, will once again be active as 3B9/OE4AAC from Rodrigues Island (AF-017) between February 10-18th. Activity will be holiday style on 40-10 meters CW. QSL via OE4AAC.

C9, MOZAMBIQUE. Operators John/ZS5J and YL Beth/2W0VOW are now in Ponta de Ouro and are active as C91J and C91B, respectively. John informs OPDX that they will be there until December 20th. They will be operating from an Indian Ocean beachfront house (see pictures from Beth on QRZ.com under C91B) on 20/15/10 meters using CW and SSB. John also mentioned on Thursday, "We put up a 43 ft vertical earlier yesterday, but were having problems with that antenna. We will try to rectify this antenna to allow us to operate 40/30/17 and 12 on SSB/CW also. QSL only direct to PO Box 102303, Meerensee, 3901 SOUTH AFRICA (with 3 USDs and your QSL card, and you will get a QSL card back direct via air mail)."

CARIBBEAN TOUR. Operators Mek/SP7VC, Ted/SP3IPB and YL Kate/SQ7OYL plan to activate a few islands in the Caribbean between January 11-30th. The tentative schedule and callsigns are as follows:

January 11-12th - Martinique; callsigns are FM/SP7VC, FM/SP3IPB and FM/SQ7OYL.
Janaury 13-14th - St. Lucia (J6); No activity planned.
January 15-16th - Dominica; callsigns J79VC and J79PB.
January 17-18th - Guadeloupe; callsigns FG/SP7VC, FG/SP3IPB and FG/SQ7OYL.
January 18-22nd - Montserrat; callsigns VP2MPG and VP2MTK.
January 21st - Antigua; callsigns V26/SP7VC and V26/SP3IPB

No details on what bands and modes they will use. QSL via their home callsigns. Watch for updates on Mek's Blog page at:
http://www.sp7vc.dxing.pl/

A91, BAHRAIN. Special event station A91MCAT is now active until December 31st. Activity is to celebrate that Manama city was chosen to be the ‘Capital of Arab Tourism 2013’ by the Arab Tourism ministers who met in Aqaba, Jordan, in 2011. Operators mentioned are Fawaz/A92AA, Maher/A92DX, Ely/A93LT, Salvatore/IZ8CLM and Samir/OD5SK. The first 100 QSOs will receive an award certificate (PDF format) signed by the minister of Culture H.E Shaikha May bint Mohammad Al Kkhalifa. QSL via IZ8CLM. Also, see QRZ.com for more details.

AFRICAN TOUR (Update/Reminder). Operators Mathias/DJ2HD and Ulmar/DK1CE, will once again be active as V5/DJ2HD and V5/DK1CE from Namibia between now and January 18th (2014). This is just one part of their 4x4 trip through different African countries. Activity will be holiday style on CW, SSB and RTTY, but will also include a SSB entry in the DARC 10m Contest (January 14th). During this time frame, Mathias and Ulmar will also travel to and be active as 7P8DJ and 7P8CE, respectively, from Lesotho between December 22-24th. Their plans also include to be active from South Africa (as ZS/DJ2HD and ZS/DK1CE). Mathias/DJ2HD and Ulmar/DK1CE will be joined by Wolfgang/DH3WO and will be active from Botswana between December 24-30th, signing A25DJ, A25CE and A25WO, respectively. QSL all callsigns via their home callsigns, direct or by the Bureau.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:

   9X0XA - Rwanda; 2013 Operation
   T6TM - Afghanistan; Current operation
   VU7AG – Lakshadweep Islands; November 20th-December 10th, 2013

DXCC NEWS (Deadline Reminder!). Bill Moore, NC1L, ARRL Awards Branch Manager, reports: "This is a reminder to all DXCC program participants that the deadline for the 2013 calendar year ends on Tuesday December 31, 2013. In order to appear in the Annual Listing, published in the electronic version of the DXCC Yearbook, you must have your submission postmarked no later than December 31, 2013. Since the DXCC workload usually peaks around this time each year I recommend that applicants not wait until the last minute to get their submissions in. Besides being the heavy period for DXCC, keep in mind that it is also around the holidays so the post office can contribute to any delays in getting mail to DXCC." For more and complete details, see the DXCC Blog at:

http://www.arrl.org/dxcc-blog

E5, SOUTH COOK ISLANDS. David, BA4DW, is expected to be active as E51CDW during a holiday style operation from Rarotonga Island (OC-013) between January 21-27th (2014). He informs OPDX that his activity will be on the major HF bands using CW and SSB. QSL via BA4DW.

FG, GUADELOUPE. Jean-Pierre, F6ITD, will once again be active as FG/F6ITD from Guadeloupe and two of its islands between January 28th and March 25th (2014). Activity will be on all HF bands using SSB and the Digital modes. He plans to visit the following two islands in the IOTA NA-102 group:

    January 29th-February 9th - Basse Terre Island (main island); his callsign FG/F6ITD.
    February 9th-March 25th   - La Desirade Island; his callsign FG/F6ITD and TO6D during contest.

QSL via his home callsign, by the Bureau, direct or LoTW (preferred). Logs will be uploaded to ClubLog and LoTW. For more details, see:

http://www.qrz.com/db/FGF6ITD

FO/A, AUSTRAL ISLANDS (Update to OPDX.1140 - Callsign). A group of six operators from the UK will operate as TX6G from the Island of Raivavae in the Australs (OC-114) between March 20th and April 1st (2014). A Web site will be launched with further details once the other details are confirmed.

IOTA NEWS.....

  AS-015. Richard, PA0RRS, will once again be active as 9M2MRS from Penang Island between December 31st and February 3rd (2014). Activity will be on 40-10 meters using CW, RTTY and PSK. He states that he will do special requests on SSB (but not preferred). His equipment is a Yaesu FT450d (100w) with a YT450 antenna tuner into a G5RV junior (40-10 meter) antenna which he will put up on the balcony of his hotel [with a lot of bents, but it had worked 'OK' last year]. QSL via his home callsign, by the Bureau, the OQRS on ClubLog (preferred) or

direct to: Rich Smeets, C. Gerlingsstraat 60, 5121 ZR Rijen, The Netherlands (due to new postal rates there is a need for return postagem of 2.00 USDs or 1 NEW IRC -- in all cases via Clublog (OQRS) is much cheaper!). Log will also be uploaded to LoTW later.

AS-124. Members of the Emirates Amateur Radio Society (EARS) will be active as A63RI from Dibba Rock Island between December 19-23rd. Activity will be on all HF bands using CW and SSB. QSL via IZ8CLM.

AS-153. Operators Ariff/VU3ARF and Asish/VU2GMT will be active as VU3ARF/p from Jambudwip Island (WWFF VUFF-091), an island that has never been activated in the West Bengal State IOTA Group, between July 23-31st. Activity will be on 40-10 meters using CW and SSB. They will be an entry in the RSGB IOTA Contest (July 26-27th). QSL via VU3ARF, by the Bureau or direct to: Ariff Mohammad, 72/A Elliot Road, Calcutta 700016, India. For updates, watch: http://vu3arf.org/

EU-045. Luigi, IK8HCG, will be active as IB0R from Ventotene Island (IIA LT-011, MIA MI-118, WWFF IFF-110) during the RSGB IOTA Contest (July 26-27th, 2014) as a Single-Op entry. QSL via his home callsign direct ONLY.

OC-272. (Postponed) Operators Budi/YF1AR, Imam/YF4IR and Joppy/YB8XM were expected to be active from Kisar Island between December 21-25th, but had to "postpone due to a new assignment". Visit their Web site at: http://www.yf1ar.com/2013/12/kisar-island-oc-272-new-iota.html

SA-025. Operators Raimundo/PT7CG and Renner/PY7RP will be active as ZX8DX from Pedra do Sal Beach on Grande de Santa Isabel Island between December 26-30th. Activity will be on all the HF bands using SSB. QSL via PT7CG.

K9W WAKE ATOLL PRESS RELEASE #7 (Dated December 9th): "The Wake Atoll Commemorative Team wants to thank the DX community for the outstanding response to 'The Forgotten 98 Commemorative DXpedition'. Also, we need to express our gratitude to our hosts on Wake, the United States Air Force. Our DXpedition was warmly welcomed and their support was invaluable.

The final QSO percentage per continent are Asia 32.3%, Europe 26.9%, NA 35.3%, OC 3.1%, SA 1.8% and AF 0.6%. The Team is extremely pleased to have distributed the QSOs to much needed parts of the world, especially EU which has the most difficult path to Wake Island. There were 53,765 CW, 38700 SSB and 7562 Digital QSOs.

The Team has uploaded all 100,000 plus QSOs into ClubLog and the printed QSLs are in transit to the QSL Manager, Joe, AA4NN. Most, if not all, corrections have been made to the Clublog upload. Please use <info@...> for possible problems with the ClubLog upload.

As mentioned on our website, the use of OQRS is highly recommended. It is an efficient and faster method for returning your QSL.

<http://wake2013.org/pages/qsl.html>
  Please support our Sponsors and the various worldwide DX Foundations
and local clubs. Those contributions, as well as, your individual donations
provided the necessary funding for this extremely expensive DXpedition.
Without this unwavering assistance, Wake Island would still be high on
the 'Most Wanted List'. All of us in the DX community owe them (and
you) a hearty round of applause!
Happy Holidays to all! -- 73, Lou N2TU and the Wake 2013 Commemorative Team"

OOPPPSSS DEPARTMENT. Last week under the "RI20, SOUTH SHETLAND ISLANDS",
we forgot to mention that the details and the Russian translation was
provided by Will, WC6DX.

PJ4, BONAIRE. Steve (ex-9M6DXX and 9M8Z. Also G4JVG and KH0UN) informed
OPDX this past week: "After moving to Bonaire just over 3 weeks ago, I
finally received my licence today [December 9th]. My new call is PJ4DX.
I'm QRV using an FT-950 and a low Spiderbeam, plus a 40m quarter-wave
vertical with elevated radials. All equipment is kindly loaned by Peter,
PJ4NX, until my own equipment arrives from Malaysia early in 2014. Future
plans are for higher power, a higher beam and an 80m antenna. QSL infor-
mation is via Tim, M0URX, OQRS (preferred), direct, or via the RSGB
Bureau. Logs will also be uploaded to LoTW and ClubLog on a regular basis."

PJ5, ST. EUSTATIUS. Nao, JN1RVS, will be active as PJ5/K6NAO between
December 22-29th. Activity will be on 40-10 meters using CW, RTTy and
PSK. QSL via the OQRS (ClubLog) or JA1HGY.

IRCS ABOUT TO EXPIRE (Reminder/ADVICE). Jess, KR4OJ, informs OPDX readers: "As most everyone knows, IRCs purchased after Jan 2009, are due to expire on Dec 31, 2013. I had several & went to my local post office to cash them in. Of course, they had no idea what an IRC was, and had never heard of them. After some phone calls, they finally acknowledged them, but DID NOT want to redeem them for full value. To save yourself some time & to get the full current value of your IRCs, in the USA, ($1.10) go to the following USPS bulletin, print and carry it with you. You can get $$$, however I just swapped mine for the new 'Universal' Forever Stamp."
http://pe.usps.com/text/imm/immc3_020.htm#ep392074

K2QXI/KH0 via JJ2QXI. Mack, JJ2QXI, states he will accept SASE/SAE + sufficient postage/IRC/GSs, and Bureau request via E-mail. For details, please see K2QXI on the QRZ.com.

ZS2DL QSL CHANGE. As of January 1, 2014, QSL Manager Buzz, NI5DX, will no longer be assisting ZS2DL as his manager. Donovan has decided that he will handle his own QSLing. Buzz will continue to answer any QSL requests for contacts prior to January 1, 2014, until March 1st. At that time, ALL requests for a ZS2DL card must go direct to ZS2DL. All Bureau cards must go to ZS2DL as NI5DX will no longer reply to Bureau cards after January 1st.

QSL RECEIVED VIA LoTW: 3DA0ET, 5J0R, 8P5A, 9A4WY, 9J3A, CE7FKG, CN8KD, CR3E, CT1IUK, D3AA, DH7LF, DL6KVA, DM5TI, DR1D, EA7ST, EA7TG, EA8/RW3DO, EB2AM, ES9C, FY5KE, H44IND, HC2IOH, HK4SAN, J73A, JA2BDR, JA5IU, JH5RXS, JJ0NCC, JJ1KZZ, KL7KY, KL7RA, LA7HJA, LX7I, LZ1520YYD, OC4CW, OE2XEL, OK1JMJ, OX3XR, PA0LOU, PJ2/K2PLF, PJ6/N7QT, PJ7W, PP1CZ, PY6KW, R7NK, S51YI, UU2JQ, VA7AM, VE2EBK, VK2GWK, VP9I, VU7AG, VY2SS, XE2S, XR0ZR, ZC4LI, ZD8O, ZF1A, ZM90DX, ZS6RJ and ZS8C

QSLS RECEIVED VIA MAIL: 5A1AL, 5H3EE, GN4FOC, GT4FOC, JA7SGV/6V, KG4HF, TO2TT, TU5XV and VK0GB

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

SOUTHEAST & ASIAN TOUR. Vincent, F4BKV, will be visiting some Southeast Asian countries until December 22nd. Activity will be very limited on this trip. His tentative scheduled is as follows:

December 14th - Singapore (AS-109); callsign probably 9V/F4BKV
December 17-18th - Brunei (OC-088); callsign probably V8/F4BKV
December 20-22nd - Labuan Island (OC-133), East Malaysia; callsign probably 9M6/F4BKV

QSL via his home callsign, direct or by the Bureau. He does have a log search and OQRS at: http://www.f4bkv.net/

SV/A, MT. ATHOS. "The Daily DX" is reporting that Monk Apollo, SV2ASP/A, the only active station from Mount Athos, has lost all of his antennas during a big wind storm last week. Apollo does not know when he will have the time to get something back up in the air. The SteppIR crashed into the garden. SV2ASP is currently in Corinth, Greece, for the olive harvest.

TM70, FRANCE (Special Event). Look for special event station TM70BBC to be active between June 3-13th. The special callsign is to commemorate the 70th anniversary of the landing of allies forces in Normandy. See QRZ.com for more details and QSL info. QSL Manager is F5UOW.

TO22, GUADELOUPE. Gildas, F6HMQ, will once again be active as TO22C from Guadeloupe between February 20th and March 6th. Activity will be on all bands, plus an entry in the ARRL International DX SSB Contest (March 1-2nd). QSL via F6HMQ.

XU, CAMBODIA. Pat, N2IEN, informs OPDX that he will be active as XU7AEV between now and December 21st. Activity will be holiday style and should be mostly CW on 40-10 meters. He is using an IC-7000 and a Buddipole in a vertical configuration. Pat mentioned on Friday that he tried calling CQ on 10.105 MHz, but the band seems completely dead. QSL via his home callsign; SASE preferred. He will also attempt to upload log to LoTW.

XU7, CAMBODIA. Alex, M6CFW, will once again be active as XU7AEU from Phnom Penh between January 9-14th. He states, "I'll be taking some antennas for different bands and will try for some phone contacts as well as my normal PSK working - sorry I still haven't learnt CW to a good enough standard. This time I'll be taking a Yaesu FT-897D with me as my trusty Icom probably won't survive another flight (thanks Emirates). I'll try to operate for several hours each evening (UTC+7), and maybe a few hours to suit North & South America." If like last time, Alex will post his log to eQSL immediately, Clublog at the end of the trip and LoTW. QSL cards are available direct via his home callsign of M6CFW in England, along with a self addressed envelope and 2 euro or 2 USDs or a valid IRC. If you are in the UK you can just send an SASE. CARDS WILL NOT BE SENT VIA THE BUREAU.

YJ, VANUATA. Operators Bill/N7OU and Rocky/NE7D will be active from Port Vila, Vanuatu, between February 11-25th (2014). Callsigns to be announced. Activity will be on 160-10 meters using CW. They will be using verticals on a north-facing shore and 500w amps. They will also be a Multi-Single entry in the ARRL International DX CW Contest (February 15-16th). QSL via their home callsigns. Logs will be uploaded to LoTW as soon as they return to the USA.

ZS9, SOUTH AFRICA (Special callsign to celebrate President Nelson Mandala's legacy). The SARL will be operating special event stations from around South Africa using the callsign ZS9MADIBA. Members of the SARL are invited

to apply for time slots to operate ZS9MIDIBA from their own shacks. QSLing is via the Bureau or by sending your QSL to: SARL, P.O. Box 1721, Strubens-vallei 1735, South Africa. You may also use Logbook of the World (LoTW). To receive the special QSL card by mail, include 1 USDs for postage.
  ZS9MADIBA is the South African Radio League Special Event Station commemorating the life and recent passing of Nelson Rolihlahla Mandela, elder statesman and first democratically-elected President of the Republic of South Africa. Affectionately referred to as "Madiba", he became one of the most recognized leaders in the world and was instrumental in the peaceful transition of South Africa from minority rule to a constitutional democracy. South Africans join the people of the world in mourning his passing and celebrating his legacy. For more details and the operating schedule, visit: http://www.amateurradio.org.za/zs9madiba.htm

-=-=-=

papers given between these TWO CTU events. Each CTU will have unique and updated presentations - so it is best to attend BOTH CTU's in 2014 so you do not miss anything!

The first USA CTU will be the Dayton Contest University on Thursday May 15, 2014 at the Crowne Plaza Hotel. This is the day before the Dayton Hamvention opens. There will be over 20 presentations (all new) by top contesters and station builders. With four classrooms running most of the jam packed day. CTU Dayton registration will open up soon (during the next two weeks). Space at CTU USA Dayton will be limited - and Crowne Plaza hotel rooms are already fully booked.

Check the official CTU website for registration and updated information: http://contestuniversity.com/

Please take a look at the VIDEOS section for highlights from the USA CTU 2013 sessions.

The second USA CTU will be held at the historic 2014 ARRL National Centennial Convention in Hartford, CT on July 17, 2014.

The CTU Centennial will be an all day event with six CTU presentations in one class room. Again, the ARRL CTU will have six NEW presentations that are not the same as the CTU Dayton event.

You can learn more about the ARRL Centennial event here: http://www.arrl.org/files/file/Centennial%202014/QST_Nov_Centennial_Ad.pdf

Registration for the ARRL Centennial CTU will be handled through the ARRL.

Please forward this CTU update email to your contest clubs.
CU at TWO USA CTU's in 2014!
73,
Tim K3LR
Contest University Chairman

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31216
SIDC SOLAR BULLETIN 16 Dec 2013, 1212UT
SIDC FORECAST (valid from 1230UT, 16 Dec 2013 until 18 Dec 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 16 Dec 2013 10CM FLUX: 152 / AP: 006
PREDICTIONS FOR 17 Dec 2013 10CM FLUX: 150 / AP: 008
PREDICTIONS FOR 18 Dec 2013 10CM FLUX: 145 / AP: 008
COMMENT: The background X-ray radiation is situated in the top B-level
(B7). The strongest solar flare was a C3.6 flare originating from Catania
sunspot region 80 (NOAA AR 1917). The probability for C-flares is around
70%, M-flares around 20%, the chances for an X-flare are low. The >10MeV
proton flux measured by GOES had a small bump, but remained below the event
threshold (10 pfu) and is now back at background level. The origin of this
enhancement currently is unclear. No Earth directed CMEs were observed in
coronagraphic data. We are currently inside a slow solar wind stream with
a solar wind speed of 400 km/s, as observed by ACE. The interplanetary
magnetic field currently is weak with a magnitude of about 5 nT.
Geomagnetic conditions are quiet (K<3) to unsettled (K=3) and are expected
to remain so.
TODAY'S ESTIMATED ISN : 080, BASED ON 11 STATIONS.

PREDICTIONS FOR 19 Dec 2013 10CM FLUX: 150 / AP: 011
COMMENT: The strongest solar flare was a C3.1 long-duration flare peaking
on December 16 at 21h33 UTC originating from new active region NOAA AR
1927, located at the west limb. The flare was associated with a CME,
observed in LASCO/C2 (first measurement on December 16 at 21h27 UTC) and
STEREO A coronagraphic data (at 21h39 UTC). The CME is travelling to the
west with an estimated speed of 650 km/s (estimated via Stereo CAT), with
possible arrival of a glancing blow late December 19 (UTC time). The
probability for C-flares is around 70%, M-flares around 30%, with NOAA ARs
1917 and 1927 as main source candidates. The chances for an X-flare are
low. The proton flux measured by GOES, is below threshold levels. We are
currently inside a slow solar wind stream with a solar wind speed of 400
km/s, as observed by ACE. The interplanetary magnetic field currently is
weak with a maximum magnitude of 5 nT. Geomagnetic conditions are quiet
(K<3) to unsettled (K=3) and are expected to remain so for the next 48
hours.

Breaking News from the Land of Santa Claus

OF9X ☐ OLD FATHER 9 XMAS

Do you remember the Ho-Ho Santa Claus who penetrated the bands and talked to children all over the world from Santa☐s homeland - Finnish Lapland?

If you don't ☐ just refresh your memory at QRZ.com (www.qrz.com/db/OF9X). Santa's helpers are now whispering that the white-bearded Old Man will be on the air this year again. The focus is on this coming weekend to remind you of the fun period of Christmas and to create the right spirit for families with children throughout the world. Just as last year, this will happen on the radio waves and hopefully on a variety of bands. Not many people knew then that Santa can even send Morse code!

Already tonight and over the next few days, Santa will appear around 14.235 kHz while loading up his sleigh for the weekend's world tour. Just go for it and get involved ☐ let your children or grandchildren feel the true coming of Christmas and the presence of Santa Claus.

The upcoming Friday announcement may again include Santa's personal token to those who truly believe in Santa Claus.

Season's Greetings from the Land of Santa Claus!

December 18, 2013

CHRISTMAS GREETINGS FROM REPUBLIC OF KOSOVO

History was made on Saturday, 14 December 2013, when 52 young Kosovars aged between 18-21 years were seated in the amphitheater of the Technical University of Pristina to take the first ever amateur radio exam under

the new laws of the Republic of Kosovo.

To everyone's great delight, fifty (50) of them walked away as new amateur radio operators qualifying for a U.S. General level license. The administrators were not yet prepared to receive higher class exams as procedures are now in place only to take the equivalent of U.S. General or CEPT Novice exams. The procedural framework is set to follow the U.S. structure, and several ARRL manuals were given to the national association for Amateur Radio in Kosovo (SHRAK) as well as to the Telecom administrators - thanks to the ARRL for their kind support.

IARU Region 1 President Hans, PB2T, and Martti, OH2BH, of Project Goodwill Kosovo were working earlier on Saturday with the Exam Commission to help with adjustments made to new question pools. They also attended the opening ceremony and were present overseeing the actual exam. The administrators wished the students good luck and emphasized to the future hams their role as representatives of their newborn country.

It was an historical and emotional event in many ways, more than doubling the amateur radio population of the country. Another encouraging sign was that the young Kosovars were genuinely excited about this great passion, and many had already made numerous friends and QSOs using a virtual ham radio simulator -- www.hamsphere.com/ -- the potential of which should be fully explored as another tool providing fair start-up motivation.

Assessing the overall weekend, PB2T and OH2BH felt strongly that the whole amateur radio community ought to have the pleasure of welcoming these young people during this Christmas. As the exam/license cost is 50 EUR (70 USD) per person, a major expense for today's youth in Kosovo, radio amateurs worldwide are invited to help the new hams with this entry level cost, and in return obtain personal details and a picture of their "grandchild" in amateur radio.

PayPal is set up at www.qrz.com/db/Z60A for transfering potential funds. Fifteen (15) license donations are already pledged by organizations including Daily DX, Yasme Foundation, DX University, European DX Foundation, and ClubLog.

You have the option of giving a personal gift to catch the Christmas spirit and to become a godfather in Amateur Radio.

Please kindly inform Hans, PB2T at <president@...> or Martti, OH2BH at <oh2bh@...> of your desire to help.

Let your Happy Christmas be extended to these young Kosovars. Season's Greetings and Thank You!

PREDICTIONS FOR 20 Dec 2013 10CM FLUX: 160 / AP: 013
COMMENT: The strongest solar flare reported during the past 24 hours was a
C4.0 flare (peaked at 23:29 UTC, on December 17). The flare seems to
originate from Catania sunspot region 91 (no NOAA number yet) located on
the east solar limb. New Catania sunspot group 87 (NOAA AR 1928) shows some
activity at the same moment. NOAA AR 1928 is growing and currently also has
the beta-gamma magnetic configuration of its photospheric field (just like
sunspot region 80 or NOAA AR 1917). The probability for C-flares is around
80%, M-flares around 30%, with Catania sunspot regions 80, 87 and 91 as
main source candidates. The chances for an X-flare are low. No Earth-
directed CMEs were observed. Solar wind conditions are stable with a solar
wind speed of 400 km/s and a magnitude of the interplanetary magnetic
field of 5 nT (observed by ACE). Geomagnetic conditions are quiet (K<3). A
glancing blow of the CME of December 16 might lead to unsettled or at most
active conditions at the end of December 19 (UTC time).

December 19, 2013

SANTA RADIO OF9X AT CHRISTMAS 2013

Santa always appears on short notice every year, and so does OF9X from the Land of Santa Claus. There is one thing that we cannot skip and that is Christmas. It is because of all those wonderful children of the world who persuade us busy people to settle down and remember that Christmas is after all for children - for whose who truly believe. So, take a moment and join us - welcome your children or grandchildren on a trip to Christmas world with the dedication it deserves.

Last year Santa became a figure in Amateur Radio with thousands of followers, and more than 800 Santa Awards were issued throughout the world. Santa Radio (OF9X) established itself also through the pages of QST, DL-QTC and Japanese CQ Magazine. Santa is here to stay.

Starting yesterday, Santa has been loading up his sleigh and will soon begin his journey across the world. It all starts from Finnish Lapland and ends up on Christmas Day in the United States. The main activity will be over this coming weekend before Christmas and, as Santa is busy, his elves will be much of the time at the controls of Santa Radio, OF9X. Just stop by and say hello. Santa should be around 25KHz up the band edge (CW) and 14.225 KHz or thereabout.

But something new has happened since last year - Santa has become a pro on Morse code.

In addition to SSB QSOs from a year ago or this year, you should now contact Santa also on CW to qualify for the 2013 Santa Cold Winter (CW)

Award. You should track your two (2) QSOs on ClubLog at www.qrz.com/db/OF9X and send your request by email to of9x@.... One of the QSOs should be from this year - 2013.

If you don't manage to work Santa on CW or SSB, or you only make one QSO this winter? No problem - not everything is lost as you have the option of compensating for the missing QSO by solving the Christmas Puzzle. Just send the details of your one 2013 QSO together with the two mystery words from the Puzzle, and you will qualify.

In case you need any assistance in filling in the puzzle, you may ask Santa for help - talk to OF9X and just point out the question line number and Santa will whisper to you the needed word. But only two lines at the most. On CW please just send "QSC NR". (Q-Santa-Claus)

While Santa Cold Winter Awards will be sent free of charge by email to those eligible, many have requested the Santa Award by post. Such a feature (OQRS)is now introduced as part of the log checking procedure on the OF9X QRZ.com page.

Santa's elves this year include Olli, OH0XX, Ville, OH1JD, Jaska, OH1TX, Rami, OH2BCI, Pertti, OH2BEE, Martti, OH2BH, Kati, OH2FKX (YL), Mari, OH2FPK (YL), Pekka, OH2TA, Pertti, OH2PM, Olli, OH6CT, Veijo, OH6KN, Kim, OH6KZP - and even the busy old man Santa himself with all the gifts he's got, now CW included.

Tap the Video and Audio button on the OF9X page at www.qrz.com/db/OF9X and you can occasionally see Santa and hear how your own signal sounds in the Land of Christmas.

Merry Christmas to all Amateur Radio operators and their children and grandchildren the world over. Enjoy your Christmas and share the joy of being together. Always!

Santa Claus, OF9X

YASME PRESS RELEASE (Dated December 18th) [edited]. "YASME FOUNDATION EXCELLENCE AWARDS -- The Yasme Excellence Award is awarded to individuals who, through their own service, creativity, effort and dedication, have made a significant contribution to amateur radio. The contribution may be in recognition of technical, operating or organizational achievement, as all three are necessary for amateur radio to grow and prosper. The Yasme Excellence Award is in the form of a cash grant and an individually-engraved crystal globe.
The Board of Directors of The Yasme Foundation is pleased to announce the award of the Yasme Excellence Awards for 2013 to the following individuals:
* Tom Roscoe, K8CX: Tom is recognized for his dedication to collecting and publishing current and historical photos and other documents on his Hamgallery Web site at <www.hamgallery.com>. Hamgallery is an

excellent amateur radio resource provided free of charge to the online community. Tom is also the manager of the W3 QSL Bureau, contributing many hours to ensuring cards are delivered properly and promptly.

* Lee Sawkins, VE7CC: Lee's software is widely used to manage and filter DX cluster spotting output. Without such filters, the output of the spotting network would be overwhelming and unusable. Lee's filtering software enables logging programs to integrate with the spotting network for contesting and general-purpose operation around the world. Lee supports the local DX and contesting community in British Columbia and will be representing Canada in WRTC 2014 as the Team Leader from the NA-12 region.

* John Devoldere, ON4UN: Along with building one of the premier amateur stations in the world, John's contributions to the DXing community have been extensive. Beginning with "80 Meter DXing," published in 1978, his book expanded to "Low-Band DXing," which in its fifth edition has become the most widely used handbook for operating and building antenna systems on the bands at 7 MHz and lower frequencies. The book contains important advances in HF amateur technology and encourages operation on these bands.

* Michael Carroll, N4MC; Eldon Lewis, K7LS; Dean Gibson, AE7Q; and Joseph Speroni, AH0A: These gentlemen have been instrumental in providing convenient access by amateurs to information maintained in FCC databases. In the case of N4MC, his Vanity HQ site became the single most popular resource for U.S. amateurs seeking to obtain a desired call sign, on-the-air identity being a fundamental element of amateur radio. He continues to maintain the National Silent Key Archive at <www.silentkeyhq.com>. K7LS and AE7Q have created similar online services that can be found at <www.radioqth.net> and <www.ae7q.com>. AH0A was a pioneer in accessing the FCC databases and providing useful summaries of licensing information. The services made freely available by these four individuals have greatly enriched and educated U.S. amateurs.

* Ken Claerbout, K4ZW: Ken is recognized for his work in support of the series of video seminars and lectures produced in association with the Potomac Valley Radio Club. Initially focused on contesting, the scope has broadened to include a variety of operating and technical topics. More importantly, the videos have encouraged others to publish similar "webinars" and archive them for viewing at any time.

* Ashraf Chaabane, 3V/KF5EYY: Ashraf has become an energetic representative on all fronts of amateur radio in Northern Africa and globally. He presents a positive role model for amateur radio across the entire Arab world with his enthusiasm and competitive spirit. His mission is to see the day when the administration in Tunisia issues him the first personal license in that country. Ashraf will also be representing Africa as the Team Leader for the African team in WRTC 2014.

The Yasme Foundation is a not-for-profit corporation organized to conduct
scientific and educational projects related to Amateur Radio, including
DXing (long distance communication) and the introduction and promotion
of Amateur Radio in developing countries. For additional information
about The Yasme Foundation, visit our website at <www.yasme.org>.

Ward Silver, N0AX, President
The Yasme Foundation

Board of Directors: Fred Laun, K3ZO, Director and Vice-President
Rusty Epps, W6OAT, Director and Treasurer
Kip Edwards, W6SZN, Director and Secretary
Martti Laine, OH2BH, Director
Mac McHenry, W6BSY, Director
Robert Vallio, W6RGG, Director"

To all radio amateurs

SB DX ARL ARLD051
ARLD051 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

LESOTHO, 7P. Mathias, DJ2HD and Ulmar, DK1CE will be QRV as 7P8DJ and 7P8CE, respectively, from December 22 to 24. Activity will be holiday style on the HF bands using CW, SSB and RTTY. QSL to home calls.

EAST MALAYSIA, 9M6. Vincent, F4BKV is QRV as 9M6/F4BKV from Labuan Island, IOTA OC-133, until December 22. Activity is holiday style on the HF bands. QSL to home call.

DEMOCRATIC REPUBLIC OF CONGO, 9Q. Look for 9Q0AR to be QRV from Kinshasa from December 23 to 27. QSL via operators' instructions.

BOTSWANA, A2. Mathias, DJ2HD, Ulmar, DK1CE and Wolfgang, DH3WO will be QRV as A25DJ, A25CE and A24WO, respectively, from December 24 to 30. Activity will be holiday style on the HF bands using CW, SSB and RTTY. QSL to home calls.

UNITED ARAB EMIRATES, A6. Members of the Emirates Amateur Radio Society are QRV as A63RI from Dibba Rock Island, IOTA AS-124, until December 23. Activity is on the HF bands using CW and SSB. QSL via IZ8CLM.

CHILE, CE. Vlad, UA4WHX is QRV as CE9/UA4WHX from Navarino Island, IOTA SA-050. Activity is on the HF bands. His length of stay is unknown. QSL to home call.

ANTARCTICA. Felix, DL5XL is QRV as DP1POL from the Neumayer III base until February 8. Activity is in his spare time on the HF bands using mostly CW. QSL via DL1ZBO.

TEMOTU PROVINCE, H40. Sigi, DK9FN plans to be QRV as both H40FN and H40TA from Nendo Island, IOTA OC-100, from December 21 to January 10. Activity will be on 160 to 10 meters. QSL via operator's instructions.

ITALY, I. Special event station IY0CXII is QRV until the end of 2013 to commemorate the 112th anniversary of Marconi's first transatlantic transmission between Poldhu in Cornwall and Signal Hill on Newfoundland. QSL direct via IQ0RM.

SVALBARD, JW. Alex, PY2SEX will be QRV as JW/PY2SEX on December 24 and 25. Activity will be on the HF and 6 meter bands using mainly CW. QSL direct via DL1NX.

BONAIRE, PJ4. William, K9HZ is QRV as PJ4/K9HZ until January 1. Activity is on 80 to 6 meters. QSL to home call.

SABA, ST. EUSTATIUS, PJ5. Nao, K6NAO will be QRV as PJ5/K6NAO from St. Eustatius, IOTA NA-145, from December 22 to 29. Activity will be on 40 to 10 meters using CW, RTTY and PSK. QSL via JA1HGY.

SOUTH SHETLAND ISLANDS. Station RI20ANT is QRV from Bellingshausen station, King George Island, IOTA AN-010, until December 31. QSL via N2IEN.

POLAND, SP. Dionizy, SP6IEQ is QRV using special call sign 3Z13XMAS until December 30. QSL to home call.

EUROPEAN RUSSIA, UA. Special event station R7378TM is QRV from Ufa until February 5 during the Olympic Torch's relay through Russia. QSL via RM8W.

NAMIBIA, V5. Dietmar, DL3DXX is QRV as V5/DL3DXX from Outjo until January 8. Activity is on 160 to 10 meters using mainly CW. QSL to home call.

CHAGOS ISLANDS, VQ9. Jim, ND9M is QRV as VQ9JC from Dgar. Of late, he has been active on 30, 20 and 17 meters using mostly CW with some SSB and RTTY. His length of stay is unknown. QSL to home call.

HONG KONG, VR. Alberto, IV3TAN is QRV as VR2/IV3TAN from Pang Chau Island, IOTA AS-006. Activity is on the HF bands. His length of stay is unknown. QSL direct to home call.

CAMBODIA, XU. Pat, N2IEN is QRV as XU7AEV December 21. Activity is on 40 to 10 meters using CW. QSL direct to home call.

THIS WEEKEND ON THE RADIO. The ARRL CW Rookie Roundup, Russian 160-Meter Contest, NCCC RTTY Sprint, QRP CW Fox Hunt, NCCC Sprint, AGB-Party Contest, Feld Hell Sprint, OK DX RTTY Contest and the Croatian CW Contest are all on tap for this weekend. The Lighthouse Christmas Lights QSO Party runs from December 21 to January 1, 2014. The SKCC CW Sprint is scheduled for December 25. Please see December QST, page 66 and the ARRL and WA7BNM contest web sites for

details.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31220
SIDC SOLAR BULLETIN 20 Dec 2013, 1212UT
SIDC FORECAST (valid from 1230UT, 20 Dec 2013 until 22 Dec 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 20 Dec 2013 10CM FLUX: 155 / AP: 008
PREDICTIONS FOR 21 Dec 2013 10CM FLUX: 155 / AP: 007
PREDICTIONS FOR 22 Dec 2013 10CM FLUX: 160 / AP: 007
COMMENT: Six C-flares and two M-flares were observed during the past 24
hours. The strongest flare was a M3.5 event taking place at the east limb,
from a region that currently is rotating to the front side of the solar
disk. There were no Earth-directed CME observed. The probability for
C-flares remains high, around 80%, from NOAA ARs 1917, 1920, 1928, 1930 and
a new region at about 40 degrees west of the central meridian. There is a
substantial chance (around 60%) for more M-flares, especially from the
unnumbered region currently at the east limb. An X-flare is possible but
unlikely. The proton flux for >10MeV protons, measured by GOES, currently
remains well below threshold levels. We are currently in a slow solar wind
stream with a solar wind speed of 350 km/s and a magnitude of the
interplanetary magnetic field of 5 nT (observed by ACE). Current
geomagnetic conditions are quiet to unsettled (Kp<4) and are expected to
remain so during the next 48 hours.

ARLP052 Propagation de K7RA

ZCZC AP52
QST de W1AW
Propagation Forecast Bulletin 52 ARLP052
>From Tad Cook, K7RA
Seattle, WA December 20, 2013
To all radio amateurs

SB PROP ARL ARLP052
ARLP052 Propagation de K7RA

Geomagnetic conditions were more stable than expected last weekend, good news for participants in the ARRL 10 Meter Contest. The planetary A index on Friday through Sunday was 3, 16 and 7 and mid-latitude A index was just 3, 10 and 5.

Still, there were some scary moments, such as Saturday night in North America (0035 UTC December 15) when the Australian Space Forecast Centre issued this alert: "INCREASED GEOMAGNETIC ACTIVITY EXPECTED DUE TO CORONAL HOLE HIGH SPEED WIND STREAM FOR 15 DECEMBER 2013."

For the reporting week, Thursday through Wednesday, average daily sunspot numbers rose from 122.1 to 134.4, and average solar flux went from 162.4 to 159.7, compared to the previous period, December 5-11.

The latest prediction from USAF and NOAA has solar flux at 155, 150 and 145 on December 20-22, 140 on December 23-24, then 130 and 135 on December 25-26, 160 on December 27-28, 165 on December 29-31, 170 on January 1-2, 175 on January 3-6, 170 on January 7, then 165 on January 8-10, 160 on January 11 and 150 on January 12-13. Solar flux is expected to decline to a low of 135 on January 18-19, then rise to 175 at the end of January.

This solar flux prediction for the next seven days was revised downward significantly from yesterday's forecast in the ARRL Letter. Wednesday's forecast for December 20-26 was 160, 155, 150, 150, 155, 150 and 155. The latest forecast (Thursday's) shows predicted flux values of 155, 150, 145, 140, 140, 130 and 135 for those same seven days. The downward revision was 5 points on December 20-22, 10 points on December 23, 15 points on December 24, and 20 points on December 25-26.

The predicted planetary A index is 5 on December 20-24, 8 on December 25-26, then 10 and 8 on December 27-28, 5 on December 29 through January 2, then 10 and 20 on January 3-4, 5 on January 5-9, then 15 and 7 on January 10-11, then 5 after that until a more active period around the end of January.

At http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html you can get a daily update of these forecasts, and lately the new one has been issued between 2119-2123 UTC. But the December 11 forecast came out at 0755 UTC on December 12, and the December 17 issue at 0051 UTC December 18. In the past (for years now) I don't recall it ever coming out as late as into the next UTC day.

F.K. Janda, OK1HH of the Czech Propagation Interest Group has a shorter than usual geomagnetic forecast this week, perhaps for 12 days of Christmas. He sees quiet conditions December 20-24, mostly quiet December 25, quiet to unsettled December 26, quiet to active December 27, quiet on December 28, mostly quiet December 29, and quiet again on December 30-31. Not the same twelve days as Christmastide or Twelvetide, which actually extend into January, but I thought it had a nice familiar ring to it.

Operators in the ARRL 10 Meter contest last weekend probably saw the best conditions for this event in over a decade, and all the reports sound very happy.

Larry Godek, W0OGH of Gilbert, Arizona did not participate this year, but did tune around and listen. Larry reports, "It was wonderfully busy. Signals all over the place and I'd think there will be a lot of good scores reported. You could sure tell that the band was good because the activity on other bands and modes was waaayyyy down! I'm really glad that the band was so good for this contest."

Jeff Hartley, N8II of Shepherdstown, West Virginia reported: "Conditions in this year's 10 meter contest were overall markedly improved from 2012 when the SFI hovered just under 100. Last year I made less than 10 total European QSOs, this year I worked 150 DLs, 61 Gs (not including the other British countries such as 14 GMs), 58 Is, and 52 Fs.

"The contest started without me, but at 0140Z there were still some far western USA stations like AZ in and out and some fairly loud deep South Americans in PY, LU, and CX on TE. The SAs were fairly hard to work and one other local agreed. The Geminids provided some good meteor scatter with active periods exceeding one minute and some stations like K0TT in MN and W0AIH in WI audible almost all of the time. Meteor scatter was also worked into most of New England and a few 4s in KY, AL, and GA as well was 0s in MO and IA.

"The EU opening Saturday beat me out of bed with strong signals from all over EU already in at 1240Z. Russians were not as loud as in Oct and early November, but I managed to log quite a few in all areas of

Russian EU including UA4 and even two very western UA9s in the log. Conditions were definitely above seasonal norms and the band stayed open to OK/OM/9A/S5 probably at least 90 minutes longer than normal probably due to some EU sporadic-E. Western EU also stayed in much later than normal, truly exceptional. Throughout the contest conditions to the south were very good allowing me to easily work those stations with a Force 12 yagi with 2 el on 10 meters. Conditions to CA were poor about 95-98 percent of the time when the band could have been open with best conditions as the band opened and again well past sunset when it closed. Skip was as short as ND/SD/KS/TX with CO and the Rocky mountain states being in the sweet spot for best propagation. AZ was the most active state from here with 73 QSOs, 2nd was TX with 61, most worked on Sunday. My CO contacts outnumbered CA 57 to 53, and UT equaled WA with 25.There must have been some destructive solar wind (OH2XX was loud around 20Z) with a lack of KL7s and a late JA opening Saturday, but once 10 opened the JAs had fairly good signals and there was an amazingly late secondary opening from about 0110 until past 0130Z when some big guns could still be worked. I heard NH2T calling someone, but only worked JA, UA0, and KL7 to the northwest Saturday evening. Several eastern VKs had good signals and were easy to work thru small pile-ups.

"Sunday conditions were pretty typical of an average mid winter day with EU opening about 1235Z, but still some Russians were worked with good conditions in the 13Z hour. A VU2 also called on CW with a solid S7 signal. By 1615Z much of EU was gone completely and just after 1700Z only Iberian peninsula stations (EA/CT) were left.

"Both days the solar activity was high enough to allow many backscatter QSOs out to the edges of the skip zone, but the weak spot was in 5 land. I never worked MS, worked LA only once, and a couple of big gun AR stations were just readable. The best direction was somewhat dependent on where the target station was beaming, but south was the better choice until late in the day when SW and W took over following the Sun. The JAs came in at a normal time around 2230Z with good signals and were fading but workable at 2330Z.

"Other than almost no sporadic-E and the frustration of missing many west coast stations, conditions could not have been much better. The highest scoring multi-op stations in the USA made over 3000 QSOs and D4C had over 4600 with about 3 hours to go. Next year will probably be way down from this 2nd peak of the cycle, but this current upsurge was poorly predicted, so we will have to wait and see."

Dan Bates, N5TM of Katy, Texas reported, "Yes, 10 meters was insane. Friday night was strange with band open until late after dark and short hops into Colorado and Nebraska. EU was open early both mornings with strong stations. Good openings the rest of the day to SA and PNW.

"I could hardly find a clear spot to CQ. Settled in on 28.158 and had nice runs."

Dan Eskenazi, K7SS of Seattle, Washington reported: "It was really good! Super fun."

Howard Lester, N7SO of Schuylerville, New York commented, "I had a lot of fun in the 10 meter contest. With the solar flux as high as it was, in just maybe three hours over the course of the two days I worked 27 countries, trying for one of each. Most were in Europe and South America. My antenna is a 140 foot long inverted-V, so who knows what directions it favors. The highlight was working club station WY7SS in the little town of Sundance, Wyoming where, in 1969 during a cross-country trip, I stayed overnight and, at the local gift shop, bought a leather belt with a longhorn buckle, and an agate ring. I wish I still had them."

With an identical call sign suffix, Fred Glenn, K9SO of Palatine, Illinois reported, "I only worked CW, but it was one of the best 'target rich' environments I've ever experienced on 10m. Reminded me of a busy Field Day on 40 meters with signals all across the band at maximum density. Both days saw great conditions into Europe and Northern Africa in the mid morning fading to primarily domestic NA and Caribbean by mid day and early afternoon. Later, we had big signals from some of the big guns in ZL and VK land, and also from Hawaii. Not much participation from those areas, at least on CW, so the QSO point counts contributed from there were low. Virtually nothing heard from Japan or South Africa on either day.

"I had put up a temporary dipole just for this event and was rewarded with 35 new band-countries and a 37 state count with about 7 hours of 'point and shoot' operating.

"Long live the twin peaks!"

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for December 12 through 18 were 156, 141, 163, 158, 114, 91, and 118, with a mean of 134.4. 10.7 cm flux was 164.8, 163.1, 164.2, 156.2, 154.3, 159, and 156, with a mean of 159.7. Estimated planetary A indices were 3, 3, 16, 7, 7, 3, and 4, with a mean of 6.1. Estimated mid-latitude A indices were 2, 3, 10, 5, 5, 3, and 3, with a mean of 4.4.

Direttore Responsabile I2VGW

********** *******
* TO ALL OUR READERS *
* WARMEST THOUGHTS AND BEST WISHES *
* FOR A WONDERFUL HOLIDAY *
* AND A VERY HAPPY NEW YEAR *
********** *******

1A - Currently signed up for the 2-7 January 1A0KM activity from SMOM are IK0FVC, I0JBL, IK0FTA, IK0PRG, IW0BYL, I0ZY, I0GOJ, I0HCJ, IK0DWN, IK0XFD, IK5HHA,IZ0IEN, IZ0NRG, DK7PE, DJ9ZB, OH1VR, S53R and VE7NY. QSL via IK0FTA and LoTW, logsearch on Club Log and website at www.1a0km.org http://www.1a0km.org. [TNX I0JBL]
9Q - The Daily DX reports that Pascal, 9Q1CFC (ON4CFC) expects to activate 9Q0AR, the Amateur Radio Association of the Democratic Republic of Congo's club station, "next week, probably around 23-27 December".
A6 - Members of the Emirates Amateur Radio Society (EARS) were expected to be active as A63RI (www.mdxc.org/a63ri/ http://www.mdxc.org/a63ri/) from Dibba Rock (AS-124) on 19-23 December, with planned CW and SSB operations on all bands. However on 20 December, after a series of unsuccessful attempts (strong winds and rough seas), the team will still on the mainland and active as A62A/p from the shore of the Indian Ocean opposite Dibba Rock. Attempts at landing will continue on 21 December, A65BR reports, but due to the "extremely dangerous" nature of the rock, the "main goal is just to get small spot at the sea level". QSL via IZ8CLM.
DL - Stefan, DF8HS will be active from Fehmarn Island (EU-128) from 20 December to 16 January. QSL via home call, bureau preferred. [TNX rsgbiota.org http://rsgbiota.org]
J7 - John, AD8J will be active as J79JG from Dominica (NA-101) from 29 January to 7 February. He will operate mainly CW "when not scuba diving". QSL via home call and LoTW. [TNX AD8J]
OH - Once again OF9X (Old Father 9 Xmas) is active from the heart of Santa Claus Land, in the Lapland region of Finland. The main activity will be over this coming weekend (21-22 December) "to remind you of the fun period of Christmas and to create the right

spirit for families with children throughout the world". QSL via
OH2BH. Look for OF9X around 25kHz up the band edge (CW) and 14225
kHz or thereabout. In addition to SSB QSOs from a year ago or this
year, you should now contact Santa also on CW to qualify for the
2013 Santa Cold Winter (CW) Award. You should track your two QSOs
on Club Log and send your request by email to of9x[@]sral.fi http://sral.fi. One
of the QSOs should be from this year. Further information on the
award and how to compensate for a missing QSO can be found at
www.qrz.com/db/OF9X http://www.qrz.com/db/OF9X
OZ - Special event station 5P14EHC will be active on 1-31 January to
bring attention to the European Men's Handball Championship, which
will take place in Denmark between the 12th and the 26th. QSL via
OZ0J (direct only: please use the OQRS on Club Log for bureau
cards), LoTW and eQSL. Information on the relevant award can be
found at www.5p14ehc.dk http://www.5p14ehc.dk [TNX OZ4FF]
PJ4 - William, K9HZ will be active as PJ4/K9HZ from Bonaire (SA-006)
from 20 December to 4 January. He will be QRV on 80-6 metres using
portable beam antennas and wires. QSL via K9HZ (direct only), LoTW
and eQSL. [TNX rsgbiota.org http://rsgbiota.org]
PY - Raimundo, PT7CG and and Renner, PY7RP will be active as ZX8DX from
Ilha Grande de Santa Isabel (SA-025) on 26-30 December [425DXN
1180]. They plan to operate SSB, CW and digital modes on 80-10
metres. QSL via PT7CG. [TNX PT7CG]
SP - Special stations HF110RAEM (15-22 December, QSL via SP2FAP) and
SO110RAEM (23-31 December, QSL via SP2FAP) are/will be active to
commemorate the 100th anniversary of the birth of Ernst T. Krenkel
(RAEM). On 23-31 December HF110RAEM will be operated by SP3GVX,
who will handle the QSL cards for contacts made during that time
frame.
SP - Several special event stations are expected to be active to
commemorate the 120th anniversary of the birth of St. Maximilian
Maria Kolbe (SP3RN) and the 75th anniversary of Radio
Niepokalanow: 3Z120SMK will be QRV on 8-28 January 2014, while
HF0RN, HF120MK, SN0MMK, SN0RN, SN120MK, SN120MMK and SN75RN will
be active from 8 January to 14 August. In addition, II2SMK
(operated by IZ2SOG) will also be active on 8-28 January. Further
information can be found at http://stmaximiliansp3rn. blogspot.com
http://stmaximiliansp3rn.blogspot.com
[TNX SP9JPA]
YB - The IOTA expedition to Pulau Kisar (OC-272, new one for IOTA)
[425DXN 1179] has been delayed by bad weather, and the new flight
schedule is for Budi, YF1AR and Imam, YB4IR to depart Ambon on 22
December at 10.30 local time (01.00 UTC). The return flight is
still confirmed on 25 December at 13.00 local time (04.00 UTC).
Look for YF1AR/8 and YB4IR/8 to be active on 40-10 metres SSB, CW
and the digital modes with two transceivers running 100 watts. QSL
YF1AR/8 via N2OO (logsearch on Club Log and OQRS on
http://df3cb.com/oqrs/n2oo/ http://df3cb.com/oqrs/n2oo/), QSL YB4IR/8 via home call (OQRS
on
Club Log). [TNX YF1AR]

YV - Roberto, YV5IAL will be active as CE2/YV5IAL from Chile on 2-30 January. He plans to operate PSK31 daily on 14070.15 and occasionally on 10, 15 and 40 metres PSK31 and SSB. QSL via home call, direct or bureau. [TNX YV5IAL]
ZD9 - Silvano, I2YSB and the Italian DXpedition Team (www.i2ysb.com/idt http://www.i2ysb.com/idt)
announce that they will be active on all bands and modes as ZD9TT from Tristan da Cunha for three weeks in the period September-October 2015. Further information will be vailable in due course. [TNX IK7JWY]

CARIBBEAN TOUR ---> Ted SP3IPB, Mek SP7VC and Kate SQ7OYL will visit and operate CW and SSB on the HF bands and 6 metres from the Caribbean between 11 and 30 January:
11-12 January Martinique FM/SP7VC, FM/SP3IPB, FM/SQ7OYL
15-16 January Dominica J79VC, J79PB
17-18 January Guadeloupe FG/SP7VC, FG/SP3IPB, FG/SQ7OYL
18-22 January Montserrat VP2MPG, VP2MTK
21 January Antigua V26/SP7VC, V26/SP3IPB
23-29 January Dominica J79VC, J79PB
A beacon from Dominica (J79VC/B) and Montserrat (VP2MPG/B) will be active On 50095 kHz. QSL via home calls. Further information can be found at www.sp7vc.dxing.pl http://www.sp7vc.dxing.pl [TNX SP7VC]

Direttore Responsabile I2VGW

CDXC DX MARATHON CHALLENGE ---> Starting in 2014, and running from 1 January to 31 December each year the Chiltern DX Club DX Marathon Challenge is an annual competition open to any licensed amateur world-wide. However, only fully paid up members of the Chiltern DX Club (www.cdxc.org.uk http://www.cdxc.org.uk) are
eligible to receive Awards. Its purposes are to promote DXing and recognize achievement in DXing over the year, and to promote the uploading of logs to Club Log (which leads to better statistical information for us all). Detailed information can be found on the Chiltern DX Club's website (navigate from Home page > CDXC Awards > DX Marathon).

CE9/UA4WHX ---> Vlad is currently active from Isla Navarino (SA-050), which DXCC wise counts for Chile (neither for South Shetlands nor for Antarctica). Length of stay unknown. See http://www.qrz.com/db/UA4WHX http://www.qrz.com/db/UA4WHX for
QSLling instructions.

DXPEDITION OF THE YEAR POLL ---> The DX World.net 2013 DXpedition of the Year poll is now open at http://dx-world.net/ http://dx-world.net/. "What a great 2013 it's been

for DXpeditions. The team at DX World found it incredibly difficult to agree and list the final 25 DXpeditions. Also, this year, unlike the last two years, we are limiting the votes to only two per person. We believe this to be fair considering it could be that you have an absolute favourite DXpedition, followed by a second, which perhaps helped fill those important band points". The outcome will be available immediately after the poll closes, i.e. at 21 UTC on 6 January 2014 - cast your votes!

HEARD ISLAND EXPEDITION DEFINED ---> Following his visit to the Australian Antarctic Division offices in Hobart, Tasmania, Expediton Organizer Dr. Robert Schmieder (KK6EK) made the final decisions that will define the expedition.
The expedition is scheduled for January 2015. It will use the Belgian vessel "Cdt. Fourcault", taking a team of 35 persons. The entire journey will take about 50 days, with one month at the island.
The team will be made up of several sub-teams (mountaineering, cryptobiology, marine science, communications, documentation), each with its own goals. Their activities will be presented on separate real-time interactive websites. The communications team will use amateur radio to make up to 150,000 individual contacts worldwide using the callsign VK0EK, and provide real-time reporting of data and images to the Internet, including automatically updating websites that display the activities of the team. For further information, please visit the expedition website (www.heardisland.org http://www.heardisland.org).

KOSOVO ---> On 14 December 52 young Kosovars aged between 18-21 years took the first ever Amateur Radio exam under the new laws of the Republic of Kosovo. Fifty of them walked away as new Amateur Radio operators qualifying for a U.S. General level license (procedures are now in place only to take the equivalent of U.S. General or CEPT Novice exams). As the exam/license cost is 50 EUR (70 USD) per person, a major expense for today's youth in Kosovo, radio amateurs worldwide are invited to help the new hams with this entry level cost. See www.qrz.com/db/Z60A http://www.qrz.com/db/Z60A for further information - "you
have the option of giving a personal gift to catch the Christmas spirit and to become a godfather in Amateur Radio". Please inform Hans, PB2T (president[@]eudxf.eu http://eudxf.eu) or Martti, OH2BH (oh2bh[@]sral.fi http://sral.fi) of your desire to
help.

QSL ZS2DL ---> As of 1 January 2014, NI5DX will no longer be the QSL manager for ZS2DL, as Donovan has decided that he will handle his own QSLing. NI5DX will continue to answer any QSL requests for contacts prior to 1 January 2014 until 1 March. At that time, ALL requests for a ZS2DL card must go direct to ZS2DL. All bureau cards must go to ZS2DL as NI5DX will no longer reply to bureau cards after 1 January. [TNX Golist]

QSL VIA RN3RQ ---> Sergey "Jack", RN3RQ is the new QSL manager for RA2FDX, N4AF and NY4A. QSL direct (Sergey B. Yatskiv, P.O. Box 87, Krasnogorsk, 143406, Russia) or bureau and LoTW; OQRS on Club Log. Jack will also be the QSL manager for RJ22DX (Kaliningrad) and RG22RQ (European Russia), which

will be active from 1 January to 31 March 2014 to celebrate the Sochi Winter Olympics.

T32: STARBUCK AND FLINT ISLANDS 2014 ---> DX World (http://dx-world.net/ http://dx-world.net/)
reports that "a group of three operators plan to be active from Starbuck Island (OC-280) and Flint Island (OC-282) next March 2014. The cost of the ship is $50,000 for a journey of about 20 days including 1-2 days activation in Starbuck and 3 days in Flint. In order to reduce costs the team are looking for two more hams who are willing to join them". If interested in participating in this IOTA adventure, please contact DX World.

WRTC2014: ONSITE REFEREES ANNOUNCED ---> WRTC2014, Inc., host of the 2014 World Radiosport Team Championship (WRTC), is pleased to announce the fifty-nine referees that will be monitoring the competing teams during the competition (12-13 July 2014):
9A4M Mate Botica OH1RX Jouko Hayrynen

YASME EXCELLENCE AWARDS ---> In 2008 The Yasme Foundation (www.yasme.org http://www.yasme.org)
established the Yasme Excellence Awards, to be awarded to individuals who, through their own service, creativity, effort and dedication, have made a significant contribution to amateur radio. The contribution may be in recognition of technical, operating or organizational achievement, as all three are necessary for amateur radio to grow and prosper. The Yasme Excellence Award is in the form of a cash grant and an individually-engraved crystal globe. The latest recipients, announced on 19 December, are:
* Tom Roscoe, K8CX: Tom is recognized for his dedication to collecting and publishing current and historical photos and other documents on his Hamgallery web site at www.hamgallery.com http://www.hamgallery.com. Hamgallery is an excellent
amateur radio resource provided free of charge to the online community. Tom is also the manager of the W3 QSL Bureau, contributing many hours to ensuring cards are delivered properly and promptly.
* Lee Sawkins, VE7CC: Lee's software is widely used to manage and filter DX cluster spotting output. Without such filters, the output of the spotting network would be overwhelming and unusable. Lee's filtering software enables logging programs to integrate with the spotting network for contesting and general-purpose operation around the world. Lee supports the local DX and contesting community in British Columbia and will be representing Canada in WRTC 2014 as the Team Leader from the NA-12 region.
* John Devoldere, ON4UN: Along with building one of the premier amateur stations in the world, John's contributions to the DXing community have been extensive. Beginning with "80 Meter DXing," published in 1978, his book expanded to "Low-Band DXing," which in its fifth edition has become the most widely used handbook for operating and building antenna systems on the bands at 7 MHz and lower frequencies. The book contains important advances in HF amateur technology and encourages operation on these bands.
* Michael Carroll, N4MC; Eldon Lewis, K7LS; Dean Gibson, AE7Q; and Joseph Speroni, AH0A: these gentlemen have been instrumental in providing convenient access by amateurs to information maintained in FCC databases. In the case of N4MC, his Vanity HQ site became the single most popular resource for U.S. amateurs seeking to obtain a desired call sign, on-the-air identity being a fundamental element of amateur radio. He continues to maintain the National Silent Key Archive at www.silentkeyhq.com http://www.silentkeyhq.com. K7LS and AE7Q have created similar online services
that can be found at www.radioqth.net http://www.radioqth.net and www.ae7q.com http://www.ae7q.com. AH0A was a pioneer
in accessing the FCC databases and providing useful summaries of licensing information. The services made freely available by these four individuals have greatly enriched and educated U.S. amateurs.
* Ken Claerbout, K4ZW: Ken is recognized for his work in support of the series of video seminars and lectures produced in association with the Potomac Valley Radio Club. Initially focused on contesting, the scope has broadened to include a variety of operating and technical topics. More importantly, the videos have encouraged others to publish similar "webinars" and archive them for viewing at any time.

* Ashraf Chaabane, 3V/KF5EYY: Ashraf has become an energetic representative on all fronts of amateur radio in Northern Africa and globally. He presents a positive role model for amateur radio across the entire Arab world with his enthusiasm and competitive spirit. His mission is to see the day when the administration in Tunisia issues him the first personal license in that country. Ashraf will also be representing Africa as the Team Leader for the African team in WRTC 2014.

22041. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-12-21 15:30:00 UTC
From: Paul Dunphy
Topic: 19749 Message: 22041

```
:Issued: 2013 Dec 21 1327 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31221
SIDC SOLAR BULLETIN 21 Dec 2013, 1312UT
SIDC FORECAST (valid from 1230UT, 21 Dec 2013 until 23 Dec 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 21 Dec 2013 10CM FLUX: 148 / AP: 007
PREDICTIONS FOR 22 Dec 2013 10CM FLUX: 148 / AP: 007
PREDICTIONS FOR 23 Dec 2013 10CM FLUX: 148 / AP: 007
COMMENT: Eight C-flares were observed during the past 24 hours, all
originating from Catania sunspot region 87 (NOAA AR 1928). NOAA AR 1934
(no Catania number yet) shows some growth. There were no Earth-directed
CME observed. The probability for C-flares is around 70% and for
M-flares around 30%, from NOAA ARs 1928, 1930 and 1934. An X-flare is
possible but unlikely. We are currently in a slow solar wind stream with
a solar wind speed of 350 km/s and a magnitude of the interplanetary
magnetic field of maximally 6 nT (observed by ACE). Current geomagnetic
conditions are quiet to unsettled (Kp<4) and are expected to remain so
during the next 48 hours.
TODAY'S ESTIMATED ISN : 097, BASED ON 04 STATIONS.

22042. Ice storm and antennas

Yahoo group: DX-IS (2013)
Date: 2013-12-21 18:41:40 UTC
From: John Geiger
Topic: 22042 Message: 22042

Hope everyone's antennas are making it through the ice storm ok, or for those of you in the northeast, good luck with it hits. Here in Lawton, OK we have between 1/4 to 1/2 inch of ice on stuff. The MFJ 6 meter elements are sagging pretty good, but they are very flexible and will snap right back after the melting. The 2m beam looks ok so far. The streets are ok but a few tree branches are down as well.

73 John AF5CC

22043. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-12-22 15:30:01 UTC
From: Paul Dunphy
Topic: 19749 Message: 22043

```
:Issued: 2013 Dec 22 1245 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31222
SIDC SOLAR BULLETIN 22 Dec 2013, 1212UT
SIDC FORECAST (valid from 1230UT, 22 Dec 2013 until 24 Dec 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 22 Dec 2013 10CM FLUX: 140 / AP: 002
PREDICTIONS FOR 23 Dec 2013 10CM FLUX: 138 / AP: 006
PREDICTIONS FOR 24 Dec 2013 10CM FLUX: 138 / AP: 015
COMMENT: Several C-flares and two M-flares were observed during the past 24
hours, many occurring short after each other. Catania sunspot region 87
(NOAA AR 1928) is most active. The probability for C-flares remains high,
around 80%, and for M-flares around 40%. An X-flare is possible but
unlikely. Solar wind speed remains around 350 km/s and the magnitude of
the interplanetary magnetic field is still around 5 nT, as observed by
ACE. Current geomagnetic conditions are quiet (Kp<4) and are expected to
remain so during the next 48 hours. Towards the end of day 3, geomagnetic
conditions might become unsettled to active, due to the effects of a
coronal hole, which is currently at the central meridian and a latitude of
25 to 50 degrees.
TODAY'S ESTIMATED ISN : 072, BASED ON 07 STATIONS.

Topic: 7597 Message: 22044

With many of you savoy in the digital modes, what is the most popular form to use for DX'ing, and possible contesting?
I use a TS-570, and no vhf or uhf. I have posted this on several boards, so please excuse the dupes. Deciding what to do with my Santa bucks
Please reply to my personal email addy to keep clutter off the board.
TIA
Dale K8TS

22045. Re: [DX-IS] off topic

Yahoo group: DX-IS (2013)
Date: 2013-12-23 02:20:29 UTC
From: GARY HUBER
Topic: 7597 Message: 22045

PSK-31 is fairly easy to get into. Use USB, WinWarbler (DXLabs Suite) and a RIGblaster nomic or similar. RTTY (AFSK) use LSB, WinWarbler (DXLabs Suite) and a RIGblaster nomic or similar. PSK-31 is generally 30W or less both ends. RTTY can go to 1500 W out IF you have the radio and amp to handle it.

73 ES DX,
Gary -- AB9M

22046. RE: off topic

Yahoo group: DX-IS (2013)
Date: 2013-12-23 12:35:57 UTC
From: <kb1jzu@...>
Topic: 7597 Message: 22046

Dale For DXing it is almost exclusively RTTY. PSK & now JT65 do pop up occasionally but they are the exception. This is mainly due to the easy of running pileups and the power that can be applied.
If you rig supports it FSK RTTY it is the cleanest and easiest to set up....but the audio equivalent AFSK is just as good if it is set up correctly.
Check out Don Hill's site AA5AU. He is the master of RTTY Contesting and lots of setup information exists there.
Enjoy, it is one of my favorite modes..... 315 present DXCC countries so far.

Bob KB1JZU

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 15th-December, through Sunday, 22nd-December, there were 222 countries active. Countries available: 3A, 3B6, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5N, 5R, 5T, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9U, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0Y, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H40, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, J8, JA, JD/o, JT, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2V, VP5, VP8, VP8/h, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

1A, SOVEREIGN MILITARY ORDER OF MALTA (Update). An "international team" of operators led by Francesco, IK0FVC, will be active as 1A0KM from the Sovereign Military Order of Malta (SMOM) between January 2-7th (2014). At present time, operators will be Francesco/IK0FVC, Luciano/I0JBL, Sergio/IK0FTA, Roberto/IK0PRG, Michele/IW0BYL, Gianfranco/I0ZY, Antonio/I0GOJ, Fabrizio/I0HCJ, Marco/IK0DWN, Giordano/IK0XFD, Gianluca/IK5HHA, Cristiano/IZ0IEN, Andrea/IZ0NRG, Rudi/DK7PE, Franz/DJ9ZB, Seppo/OH1VR, Robert/S53R and Sandro/VE7NY. QSL via Sergio, IK0FTA, and also LoTW. 1A0KM operation supports the DX-Code of conduct. Online log facility will be also available. Look for more details to be forthcoming. Also, a Web page is now up and running, but with limited info at: http://www.1a0km.org

2014 N7QT DXPEDITIONS. Rob, N7QT, will be active during the new year from a few locations. He announces on QRZ.com his upcoming DXpeditions:
April 2014 - San Andres; callsign HK0/N7QT; 80-10m using CW, SSB and the Digital modes.
October 2014 - Austral Islands; callsign TX5D; holiday style DXpedition; primary focus on 80/40m using CW and SSB; see OPDX.1125
November 2014 - Manihiki Island, North Cooks (E51); 80-10m using CW, SSB and the Digital modes.
QSL via his home callsign, direct (SASE, IRC OR 2 USDs), LoTW, eQSL or by the Bureau.

3C0 & 3C4, ANNOBON ISLAND AND EQUATORIAL GUINEA. Elmo, EA5BYP, is planning a trip to Annobon Island (AF-039) to be active as 3C0BYP, and a trip to Bioko Island (AF-010), Equatorial Guinea, to be active as 3C4BYP. Specific dates have not been announced yet, but the operations will happen soon. Stay tuned! QSL via his home callsign.

5Z, KENYA. Marc, ON4EZ, will be active as 5Z4/homecall from between December 22nd and January 6th. No other details were provided.

7P, LESOTHO. Ewald, DK3ID/OE8IDK, will be active as 7P8ID from Lesotho between February 11-16th. Activity will be on 40-6 meters SSB using 100 watts. QSL via DK3ID or OE8IDK direct.

8Q, MALDIVES. Kasimir, DL2SBY, will be active as 8Q7KB from two of Maldives' islands in 2014. Activity will be on 20-10 meters including 17/12 meters and possibly 30 meters using CW and SSB. His schedule is as follows:
February 12-18th - Ziyaaraifushi Island (AS-013)
February 18-24th - Fihahohi Island (AS-013)
His equipment will be a FT900AT with an ACOM 1010 amp (600w) into a triple-leg antenna for 20-10m. He will upload the log onto ClubLog. The QSL cards will be printed as soon as possible. QSL via DL2SBY, by the Bureau, direct and as well as through PayPal requests.

C9, MOZAMBIQUE. Karl, ZS6ALB, is once again active as C91KHN from Mozambique. The length of his stay is not known at this time. Activity has been

on 10 and 6 meters. He was using his new contest callsign C91C in the 10 meter contest last weekend. QSL via his home callsign direct (preferred). Log will be uploaded to LoTW and ClubLog.

EA, SPAIN (Satellites). Mark, N8MH, will be active as EA4/N8MH from Madrid (WW Loc. IN80) between December 24th and January 2nd, while on a family holiday. It is possible that he will be active on FO-29, VO-52, AO-73, SO-50, and AO-7 (?) satellites. He states, " This is a very low priority part of the trip, and I can't predict when I'll be able to get on the air (limitations of being in the city with poor view to sky, etc.). But I am going to try at least a few passes one way or another! .... My station will be very simple--FT-817, Elk antenna, and a hand mic. Working half-duplex on the SSB birds will be very challenging for me! I am spoiled by fully automated station operations."

FM/TO5, MARTINIQUE (NA-107). Al, F5VHJ, will once again be active as TO5A, from FM5BH's QTH during the ARRL International DX SSB Contest (March 1-2nd) as a Single-Op/All-Band/High-Power entry. QSL via F5VHJ, direct or by the Bureau. Logs will be uploaded to LoTW.

FT5Z, AMSTERDAM ISLAND (Press Release: Dec. 21, 2013): "Amsterdam Island DXpedition - All the equipment the Amsterdam Island DXpedition team shipped to New Zealand is now aboard the MV Braveheart. All our documentation ☐ sanitation inspections, hull inspections, de-ratting certification, and bio-security clearance ☐ has been completed.
The vessel will be fueled for its voyage to Australia on December 23rd.
On December 24th, fresh produce for the initial voyage will be taken aboard.
The crew will celebrate Christmas Day at home with their families and then on December 26th, at 1400 local time, during high slack water, the vessel will sail for Fremantle, Australia.
The Braveheart will sail around the north cape of New Zealand's north island, across the Tasman Sea, across the Great Australian Bight, and up the west coast of Australia to the port of Fremantle. Additional provisions will be taken aboard in Australia and the vessel will be re-fueled for the voyage to Amsterdam Island and back.
FT5ZM team members will begin arriving in Fremantle on January 9th. There will be team meetings, toasts, and shopping trips. Our good VK6 friends have acquired some additional supplies for us and we will take these aboard. The team will board the Braveheart on January 14th, configure our maritime mobile station, and sail for Amsterdam Island on January 15th.
You will likely hear from us one more time before we leave our respective countries and fly to Australia. However, as always, thank you to the amateur and DX community for your support and interest. Visit our website frequently for late breaking news and updates. We've not yet reached our financial goals, but with your continued support, that goal is in sight.
73 ☐ Ralph ☐ K0IR"

IOTA NEWS.....
AF-032. (Update) A group of Italian operators will be active as 5I0DX and 5H3AN from an Italian village on the beach of Kiwengwea on

Zanzibar Island (WWF 5HFF-003) between February 1-10th (2014). Activity will be on all HF bands, including the 30/17/12 meter bands, using SSB, PSK and RTTY. Operators mentioned are Fred/ IK7JWX, Leopoldo/I8LWL, Stefano/IK6JRI, Ciclane/IZ6JOD (YL), Ampelio/IS0AGY, Vincenzo/IZ8LFI and Elvira/IV3FSG (YL). More details and a Web page will be announced. It was announced earlier that this DXpedition will also be a humanitarian operation with donations of medicines to the "Italy Day Hospital". QSL via IK7JWX, direct, by the Bureau or LoTW. They are looking for sponsors for donations to Radio Club of Tanzania and Italy Day Hospital of Zanzibar : 1/2 Poste Pay Card (Visa Electron) nr. 4023600649350826 to Alfredo De Nisi - Vico della Cavallerizza, 4/D-73100 LECCE.

AS-124. (CANCELLED) During the last few days, operators of the A63RI tried to land on the island of Dibba Rock, but could not because of winds and waves. Another attempt -- "possibly" in January. For updates, watch: http://www.mdxc.org/a63ri

OC-272. (Correction) Last week we misunderstood Budi's, YF1AR, E-mail sent to OPDX and reported that Kisar Island was postponed. This is not the case. Instead, operators Budi/YF1AR and Imam/YF4IR will still be active as homecall/8 from Kisar Island (LH IDO-376) by the time you read this until December 25th. However, Joppy/ YB8XM is the operator who had to "postpone due to a new work assignment". For more details and updates, visit the Web site at: http://www.yf1ar.com/2013/12/kisar-island-oc-272-new-iota.html

SA-025. (Update) Operators Raimundo/PT7CG and Renner/PY7RP will be active as ZX8DX from Pedra do Sal Beach on Grande de Santa Isabel Island between December 26-30th. Raimundo informs OPDX that they are planning to operate on 80-10 meters, including 30/17/12 meter bands using the Digital modes, SSB and CW. They will use 2 FT-450 with vertical antennas and 100W power and a "Digikeyer II Microham". QSL via PT7CG.

SA-050. Well known DXer/Traveler Vladimir, UA4WHX, is now active as CE9/UA4WHX from Navarino Island. The length of his stay is not known. Activity has been on 20/15/12/10 meters CW. QSL via info on QRZ.com.

J3, GRENADA. Ulf, DL5AXX, will once again be active as J38XX between February 6-18th, 2014. Activity will be focused on the lower bands, but also in the ARRL International DX CW Contest (February 15-16th) as a Single-Op/All-Band entry. QSL via his home callsign. Online-QSL-Requests can be obtained at: http://www.dl5axx.de/dxlog

KP2, U.S. VIRGIN ISLANDS. John, K3TEJ, is now active as KP2/K3TEJ until December 30th. Activity will be on HF bands CW only. John is"usually" on 160m and 30/17/12 meter bands. QSL via K3TEJ.

LI/LJ/LM1814, NORWAY (Special Prefixes). Tom, LA4LN, NRRL HF Traffic Manager, informs OPDX: "During all of the year 2014, Norwegian LA stations may use the LI (Lima India) prefix, and LB stations may use the LJ (Lima Juliet) prefix, as part of the celebration of 200 years since the Norwegian Constitution, which was approved on 17 May 1814. QSL will be via the respective LA and LB permanent callsign. The special prefixes may only be used from the Norwegian mainland. There will also be a special station active, with the callsign: LM1814 (QSL via LA2G). The Norwegian Radio Relay League (NRRL) plans to offer a special award for contacts with the jubilee stations with LI and LJ prefixes plus the special station LM1814. Stay tuned!"

N4, UNITED STATES (LH Op!). Members of the Sun Country Amateur Radio Society will activate Mount Dora Lighthouse (USA-1407) as N4N to celebrate the 140th anniversary of the 1st Settlers to Mount Dora, Florida, between 1500z, February 15th (2014) and 0200z, February 16th (2014). Operations will be on CW, SSB and PSK31, and on 40/20/15/10 meters. They believe this to be the first activation of this actual working lighthouse. Built in 1988, only 35 ft. tall, the lighthouse is a fully functional navigating light for the Port of Mount Dora, on Lake Dora. It is the only inland freshwater lighthouse in Florida. QSL via N4N or KA4WJR (see QRZ.com for instructions). QSL via eQSL or direct ONLY (w/SASE and a BUSINESS SIZE #10 envelope). For more details, see: http://146970.com/lighthouse

OH9, FINLAND. If you missed talking to Santa Claus, OF9X, this past weekend (see special bulletin OPDX.1141.1), there is still a chance to talk to the OH9SCL radio station from the heart of Santa Claus Land (QTH of Santa-Radio <http://www.harriniva.fi>) for a few more days after Christmas from the Far North of Lapland ☐ the village of Lankojarvi, near Pello (Location 66.44N, 24.21E) with Kimmo, OH9MDV, at the controls. For more details, see QRZ.com.

P40, ARUBA. Operators Aki/JR3QFB/W3JH and Take/JI3DST/JS6RRR will be active as P40JH and P40R, respectively (callsigns pending and may be changed), from Aruba (SA-036) between March 12-18th (2014). Activity will be on 160-6 meters, including the 30/17/12 meter bands, using CW,

SSB, FM and the Digital modes (RTTY/PSK31/PSK63/JT65A/JT9).
QSL via their home callsigns, by the Bureau or direct (SASE with 2-GC
or 1-IRC). Please check QRZ.com for details.

PJ4, BONAIRE. By the time you read this Bill, K9HZ, will be active as
PJ4/K9HZ from Bonaire (SA-006) until January 1st (2014). Activity will
be on 80-6 meters using QSL via his home callsign direct, LoTW and eQSL.
NO Bureau QSLs.

T32, EAST KIRIBATI (IOTA Op). The DX-World.net" reports that "A group of
three operators plan to be active from Starbuck Island (OC-280) and Flint
Island (OC-282) next March 2014." Operators were not named, but the group
has found a ship to take them, and the cost of the ship is 50,000 USDs

for a journey of about 20 days including the 1-2 days to activate Starbuck and 3 days on Flint. In order to reduce costs, the team is looking for two more operators who are willing to join them. If interested in joining them on this IOTA trip, please use the following "DX-World.net" link to contact the group at: http://dx-world.net/send-news

TF, ICELAND. Jose, EA5IDQ, will be active as TF/EA5IDQ between May 11-22nd. This will be his first DXpedition. Activity will be holiday style on 40-10 meters using SSB and the Digital modes. QSL via EA5IDQ.

TR, GABON. Thorbjorn "Thor", SM7RME, was once again active as TR0A/p from Port Gentil, Mandji Island (AF-089). Most of his activity has been on 17/10 meters CW. However, by the time you read this, Thor should be QRT today (Monday). If you missed him, Thor informs OPDX that he will return in 2014 and will put up a log-periodic yagi, so then he will be active on 20 to 10 meters. QSL via SM7EHU.

VK0E, HEARD ISLAND. A press release was posted by Dr. Robert Schmieder, KK6EK, on December 15th, on the Heard Island Web page at: http://www.heardisland.org
Excerpts from the press release state that "Following his visit to the Australian Antarctic Division offices in Hobart, Tasmania, Expedition Organizer Dr. Robert Schmieder made the final decisions that will define the expedition. The expedition is scheduled for Jan., 2015." A group will use the Belgian vessel Cmdr. Fourcault, taking a team of 35 persons and sail from Capetown, South Africa, directly to Heard Island. After landing, the team and equipment will be off-loaded by helicopter onto the island, and the team will stay at the island for 30-days, providing support, emergency capability, and movement of personnel and supplies to various locations on the island. Following recovery of the team and equipment, it will return to Capetown. The entire journey will take about 50 days. The team will be made up of several sub-teams, each with its own goals: mountaineering team, cryptobiology team, marine science team, documentation team, and the communications team who will use amateur radio to make up to 150,000 individual contacts worldwide using the callsign VK0EK, and provide real-time reporting of data and images to the internet, including automatically updating websites that display the activities of the team. The expedition will be carried out under the auspices of Cordell Expeditions, a nonprofit research organization that has done expeditions to remote islands for more than 30 years. For further information, please contact Dr. Schmieder at <schmieder@...>, and visit the expedition Web site at <www.heardisland.org>.

VK9M, MELLISH REEF. A new press release (#5 - dated December 22nd) has been posted on the VK9MT Web page. Excerpts from the release state that Norbert Meyer, DJ7JC, has been added to the team, and they also provide his bio info. They also list two more sponsors: DX Engineering and Astrid's Embroidery. The details on the boat scheduling has been confirmed for the DXpedition, and as well as Stu, K6TU, customized propagation prediction tools. The team continues their fund raising for the DXpedition with details on how to donate. For the complete press release, go to:

http://www.vk9mt.com/index.php?option=com_content&view=article&id=58:press-release-5&catid=34:news&Itemid=58

VQ9, CHAGOS. Jim, ND9M, is once again active as VQ9JC from Diego Garcia. The length of his stay is not known. Activity has been on 30/20/17 meters using mostly CW, with some SSB and RTTY. QSL via ND9M.

XW, LAOS. Champ, E21EIC, will once again be active as XW0YJY from Vientiane between December 24-30th. He informs OPDX, "Focus will be on RTTY and I will try again on 160M. Last trip I worked 9 QSOs on 160M and 1 QSO from USA was Bob, W7LR." QSL via E21EIC, direct or by the Bureau. He does prefer using the OQRS (ClubLog) for direct and Bureau requests. Log will be uploaded to LoTW. No eQSL. Visit it his FaceBook and Web page at:
https://www.facebook.com/SomChamp
http://www.e21eic.net/index.php

ZD9, TRISTAN DA CUNHA. Members of the Italian DXpedition Team (IDT) have announced their next DXpedition. The IDT will go to Tristan da Cunha (AF-029) and be active as ZD9TT sometime between the period of September-October 2015. Their Web page states, "The DXpedition will last a total of five weeks, of which two for travel and the middle three for operation. The main aim of the DXpedition will be to work the greatest possible number of unique calls, thus offering a possibility also to Little Pistols and QRP stations. All bands will be activated on CW and SSB, but RTTY operations will be confined to the 14 MHz band." For more details and updates, visit: http://www.i2ysb.com/idt
Also, visit their forum on: http://www.hamradioweb.org/forums/

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31223
SIDC SOLAR BULLETIN 23 Dec 2013, 1312UT
SIDC FORECAST (valid from 1230UT, 23 Dec 2013 until 25 Dec 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 23 Dec 2013 10CM FLUX: 143 / AP: 003
PREDICTIONS FOR 24 Dec 2013 10CM FLUX: 145 / AP: 005
PREDICTIONS FOR 25 Dec 2013 10CM FLUX: 145 / AP: 021
COMMENT: There were five M flares and thirteen C flares on the Sun during
the past 24 hours, the large majority being released by NOAA AR 11928. The
brightest one was an M3.3 flare from NOAA AR 11928 peaking at 15:12 UT on
December 22. In the next 48 hours, the probability for C flares is very
high (over 90%) and for M flares around 75%, mainly from beta-gamma regions
NOAA AR 11928 and NOAA 11934. An X flare is possible but unlikely. A
warning condition for proton storms is issued in view of the high flaring
rate of NOAA AR 11928 near the West limb. In the past 24 hours, solar wind
speed decreased from around 340 km/s to around 310 km/s and the magnitude
of the Interplanetary Magnetic Field was around 3 nT, as observed by ACE.
Current geomagnetic conditions are quiet (K Dourbes between 0 and 2; NOAA
Kp between 0 and 1) and are expected to remain so on December 23 and 24. On
December 25, geomagnetic conditions might become active (K Dourbes = 4) due
to the effects of a northern coronal hole (25-55N), which has passed the
central meridian yesterday.
TODAY'S ESTIMATED ISN : 078, BASED ON 08 STATIONS.

It's pretty clear from spectrum displays than lots of PSK folks are not limiting their power to 30W. In fact some of the PSK signals are the strongest signals on the band.

Like other modes, PSK has jointed the power escalation race.

This comes up from time to time on some of the online forums (such as QRZ.COM & eHam.net).

When I ask some of those bragging about it, I have been told more than once that there's nothing illegal about running PSK-31 at 100 Watts (hmmm, anyone remember that FCC rule about minimum power?), and that there's nothing technically wrong with it (I know there is, for the very reasons Brian mentions amongst others), so they're going to continue to do it. and if I don't like it I can pound salt.

At least I know whom not to work.

22053. Online WAE award application

Yahoo group: DX-IS (2013)
Date: 2013-12-24 00:53:22 UTC
From: John Becker
Topic: 22053 Message: 22053

Does anyone here have any experience with applying for the WAE award online? I'm wondering if DARC normally has a backlog of award requests and how long processing usually takes?

In mid November, I created an account on the DARC DCL system and uploaded QSO data from LoTW and eQSL. I then filled out the Excel spreadsheet used for paper QSLs and had my cards checked and the application signed by two hams as required for a GCR application. I filed my DCL application online, sent copies of the .xls forms and scans of the signed GCR forms to the WAE award manager by e-mail and also sent the original signed forms to him by conventional airmail.

Recently, I e-mailed the award manager asking him to confirm that he had received my application, but he has not replied. Any suggestions? Thanks!

73,

John, K9MM

> P.S. I entered my paper QSLs in as t-QSLs and sent scans to the mgr. and
> he approved them.

I applied for the WAE-TOP award on CW and the WAE-I award on SSB. 98% of the verifications were paper QSLs, about 500 in all. Scanning and emailing all of them wasn't an option in my view.

Before applying, I had sent several e-mails to the award manager asking for some clarification on submission options. He didn't answer most of the messages, but he did tell me a GCR list was OK.

Much of the DCL info is only in German on the DARC website. I don't read German and using Google translation produced many results that were unclear.

I'm waiting for him to tell me how much money to send, assuming the application is approved. Did you use PayPal to send the fee?

73,

John, K9MM

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31224
SIDC SOLAR BULLETIN 24 Dec 2013, 1212UT
SIDC FORECAST (valid from 1230UT, 24 Dec 2013 until 26 Dec 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 24 Dec 2013 10CM FLUX: 130 / AP: 001
PREDICTIONS FOR 25 Dec 2013 10CM FLUX: 132 / AP: 017
PREDICTIONS FOR 26 Dec 2013 10CM FLUX: 134 / AP: 019
COMMENT: There were five C flares on the Sun during the past 24 hours, the
large majority being released by NOAA AR 11928. The brightest one was a
C8.4 flare from NOAA AR 11936 peaking at 17:28 UT on December 23. In the
next 48 hours, the probability for C flares is high (around 80%) and for M
flares around 40%, mainly from NOAA AR 11928 and 11936. There is a slight
chance for an X flare. In the past 24 hours, solar wind speed decreased
from around 310 km/s to around 280 km/s and the magnitude of the
Interplanetary Magnetic Field varied between 1.5 and 4 nT, as observed by
ACE. Current geomagnetic conditions are quiet (K Dourbes between 0 and 2;
NOAA Kp between 0 and 1) and are expected to remain so on December 24 and
in the first half of December 25. In the second half of December 25,
geomagnetic conditions may become active (K Dourbes = 4) due to the arrival
of a coronal hole high speed stream with estimated velocity between 450 and
500 km/s. Quiet to active geomagnetic conditions (K Dourbes < 5) are
expected on December 26, as the coronal hole high speed stream effects
continue.
TODAY'S ESTIMATED ISN : 076, BASED ON 06 STATIONS.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31225
SIDC SOLAR BULLETIN 25 Dec 2013, 1212UT
SIDC FORECAST (valid from 1230UT, 25 Dec 2013 until 27 Dec 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 25 Dec 2013 10CM FLUX: 123 / AP: 023
PREDICTIONS FOR 26 Dec 2013 10CM FLUX: 125 / AP: 015
PREDICTIONS FOR 27 Dec 2013 10CM FLUX: 128 / AP: 007
COMMENT: There were eight C flares on the Sun during the past 24 hours,
released by NOAA AR 11928 and 11936. The brightest one was a C4.7 flare
from NOAA AR 11928 peaking at 06:39 UT on December 25. In the next 48
hours, the probability for C flares is high (around 70%) and for M flares
around 25%, mainly from NOAA AR 11928 and 11936. Solar wind speed as
observed by ACE suddenly increased from about 290 to 320 km/s around 20:40
UT on December 24, accompanied by a rise in solar wind density. Since then,
the magnitude of the Interplanetary Magnetic Field has gradually increased
from about 3 to about 12 nT and its phi angle behaved chaotically until
4:00 UT on December 25, when it started increasing linearly over time.
These measurements are consistent with the arrival of the flux robe of an
unidentified CME around 4h UT on December 25, preceded by a shock which
started around 20:40 UT on December 24. Though Bz is having extended
periods of -10 nT, geomagnetic activity has remained quiet over the past 24
hours (NOAA Kp between 0 and 3). Due to the expected arrival of a coronal
hole high speed stream, quiet to active geomagnetic conditions are expected
in the second half of December 25 and on December 26, with a chance of
minor storm excursions. Quiet to active conditions are likely on December
27.
TODAY'S ESTIMATED ISN : 070, BASED ON 11 STATIONS.

22059. Wow What a Christmas

Yahoo group: DX-IS (2013)
Date: 2013-12-26 15:10:55 UTC
From: KQ8M
Topic: 22059 Message: 22059

Amazed to arise this morning and check my LOTW account and find XZ1J and Z81X safely tucked in my DXCC totals. Thank you to both
Expeditions! Now I wish I had waited to update as it would have been nice to add those to the totals. Oh well. As we are fond of
saying here in Cleveland, "There is always next year". (For those that don't know, that is a reference to the cities motto as
pertains to the sports teams.)

PREDICTIONS FOR 28 Dec 2013 10CM FLUX: 128 / AP: 004
COMMENT: There were six C flares on the Sun during the past 24 hours,
released by NOAA AR 11928, 11936, 11934, and 11931. The brightest one was a
C2.2 flare from AR 11931 peaking at 07:02 UT on December 26. In the next 48
hours, the probability for C flares is high (around 80%) and for M flares
around 30%. The > 10 MeV proton flux as observed by GOES13 started rising
around 9h UT on December 26, right after the long duration C1.3 flare
produced by AR 11936. It is currently still rising, but it is not expected
to exceed the threshold level of 10 pfu. During the past 24 hours, solar
wind speed as observed by ACE has varied between about 260 and 300 km/s,
while the magnitude of the Interplanetary Magnetic Field has decreased from
about 11 to about 3 nT. Geomagnetic activity has been quiet over the past
24 hours (NOAA Kp between 1 and 3). Due to the expected arrival of a
coronal hole high speed stream, quiet to active geomagnetic conditions (K
Dourbes < 5) are expected in the second half of December 26 and on December
27. Quiet geomagnetic conditions are likely on December 28.

22061. Iambic Paddle Cable

Yahoo group: DX-IS (2013)
Date: 2013-12-26 22:15:07 UTC
From: Richard Solomon
Topic: 22061 Message: 22061

There is a chap in England who makes up a PC board
that fits the Vibroplex Iambic paddle. The cable has a
DIN plug on the Paddle end and a phone plug on the
Radio end.

Does anyone recall his name or call or have his URL ??

Tnx es HH, Dick, W1KSZ

ARLD052 DX news

ZCZC AE52
QST de W1AW
DX Bulletin 52 ARLD052
>From ARRL Headquarters
Newington CT December 26, 2013
To all radio amateurs

SB DX ARL ARLD052
ARLD052 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

SOVEREIGN MILITARY ORDER OF MALTA, 1A. A large group of operators will be QRV as 1A0KM from January 2 to 7. Activity will be on 160 to 10 meters. QSL via IK0FTA.

WESTERN MALAYSIA, 9M2. Rich, PA0RRS will be QRV as 9M2MRS from Pinang, IOTA AS-015, from December 31 to February 23. Activity will be on 40 to 10 meters using CW, RTTY and PSK. QSL to home call.

PAKISTAN, AP. Ijaz, AP2IA has been QRV using RTTY on 15 meters around 0745z. QSL direct to home call.

SPAIN, EA. Beginning January 1, Spanish stations have limited use of 60 meters for six months. The allowable frequencies are 5268, 5295, 5313, 5382, 5430 and 5439 kHz.

NORWAY, LA. During all of 2014, Norwegian LA stations may use the LI prefix and LB stations may use the LJ prefix in celebration of 200 years of the Norwegian Constitution. In addition, special event station LM1814 will be active as part of the celebration. QSL via LA2G.

DENMARK, OZ. Special event station 5P14EHC will be QRV from January 1 to 31 to commemorate the European Men's Handball Championship in Denmark that runs from January 12 to 26. QSO direct to OZ0J.

BONAIRE, PJ4. Bill, K9HZ is QRV as PJ4/K9HZ until January 1. Activity is on 80 to 6 meters. QSL direct to home call.

BRAZIL, PY. Raimundo, PT7CG and Renner, PY7RP are QRV as ZX8DX from Pedra do Sal Beach on Grande de Santa Isabel Island, IOTA SA-025,

until December 30. Activity is on 80 to 10 meters using CW and SSB. QSL via PT7CG.

WESTERN SAHARA, S0. Mahfoud, S01MZ has been QRV on 20 meters using SSB around 2145 to 2300z. QSL via EA1BT.

POLAND, SP. Special event station HF2013PLL is QRV to commemorate Lublin's new airport. QSL via SP8KEZ. In addition, special event stations SO110RAEM and HF110RAEM are QRV until December 31 to commemorate the 110th anniversary of the birth of RAEM, Ernst T. Krenkel. QSL via SP2FAP and SP3GVX, respectively.

PALAU, T8. Look for JH0IXE to be QRV as T8CW until January 6. Activity is on 160 to 6 meters using CW, SSB, RTTY, SSTV and PSK. QSL to home call.

ANTARCTICA. A group of operators are QRV as RI1ANR from the Russian Antarctic Novolazarevskaya base until April 6. Activity is on all bands. QSL via RK1PWA.

NAMIBIA, V5. Dietmar, DL3DXX is QRV as V5/DL3DXX until January 8. He will be QRV as V55V in the Stew Perry 160 Meter contest. QSL both calls to home call.

LAOS, XW. Champ, E21EIC is QRV as XW0YJY from Vientiane until December 31. Activity is on the HF bands using mainly RTTY. He will try to be active again on 160 meters as well. QSL direct to home call.

SPECIAL EVENT STATION. W100AW, ARRL HQ Station. Look for special call W100AW to begin operations from the ARRL Headquarters Maxim Memorial Station at 0500Z on 1 January. See the ARRL Web site for more information about QSLing and about the Centennial QSO Party.

SPECIAL EVENT STATIONS. W1AW, Centennial Stations. Look for W1AW/4 in North Carolina, and W1AW/8 in West Virginia to be on the air starting at 0000Z on 1 January. They will be active until 2359Z on 7 January. See the ARRL Web site for more information about QSLing and about the Centennial QSO Party.

THIS WEEKEND ON THE RADIO. The Stew Perry Topband CW Challenge NCCC Sprint, RAC Winter Contest, World Wide Iron Ham Contest, Original QRP CW Contest and the RAEM CW Contest are all on tap for this upcoming weekend. The Lighthouse Christmas Lights QSO Party runs until January 1. The ARRL Straight Key Night, AGB New Year Snowball Contest, QRP Fox Hunt, 0200Z-0330Z, Jan 1 SARTG New Year RTTY Contest, AGCW Happy New Year Contest and the AGCW VHF/UHF Contest are all scheduled for January 1. Please see December QST, page 66, January 2014 QST, page 81 and the ARRL and WA7BNM contest web sites for details.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31227
SIDC SOLAR BULLETIN 27 Dec 2013, 1212UT
SIDC FORECAST (valid from 1230UT, 27 Dec 2013 until 29 Dec 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 27 Dec 2013 10CM FLUX: 125 / AP: 003
PREDICTIONS FOR 28 Dec 2013 10CM FLUX: 130 / AP: 007
PREDICTIONS FOR 29 Dec 2013 10CM FLUX: 133 / AP: 007
COMMENT: There were four C flares on the Sun during the past 24 hours. The
brightest one was a C4.4 flare peaking at 12:13 UT on December 27, for
which the source region is still unknown at this moment. Since AR 11934 and
11936 are showing fast flux emergence, the probability for C flares over
the next 48 hours is high (around 75%) and for M flares around 25%. The >
10 MeV proton flux as observed by GOES13 has stabilized around 2 pfu and is
not expected to exceed the threshold level of 10 pfu in the next 48 hours.
STEREO COR2 B observed a full halo CME at 3:12 UT on December 26, which was
detected as a partial halo CME on LASCO C2 by CACTUS. This CME is related
to a backsided event. Another CME was observed by LASCO C2 at 7:36 UT on
December 26 and by STEREO COR2 A at 7:54 UT. This CME is probably related
to the C2.2 flare released by AR 11931 which peaked at 7:02 UT. There is a
slight chance that this CME will deliver a glancing blow in the first half
of December 30. Around 3h UT on December 27, the solar wind speed as
observed by ACE increased quickly from about 265 to about 310 km/s. Over
the past 24 hours, the magnitude of the Interplanetary Magnetic Field has
increased from about 3 to about 7 nT. These observations may be the effect
of a weak coronal hole high speed stream arriving at Earth. Geomagnetic
activity has been quiet over the past 24 hours (K Dourbes between 0 and 2;
NOAA Kp between 1 and 2). Quiet geomagnetic conditions (K Dourbes < 4) are
expected on December 27, 28, and 29.

28 December 2013 A.R.I. DX Bulletin
No 1182
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5H - Vittorio, I2GPT (www.i2gpt.com http://www.i2gpt.com) will be active holiday style as 5H1VC from Zanzibar Island (AF-032) on 4-12 January. He will operate CW (on 40-10 metres) and RTTY (on 20 metres only), typicall during his early morning and late afternoon hours. QSL via RW6HS. [TNX RW6HS]
6W - Francis, F6BLP will be active again as 6W7SK from Senegal on 3-31 January. He will operate mainly CW on 80-10 metres. QSL via home call (direct or bureau), LoTW and eQSL. Logsearch at www.f6blp.org http://www.f6blp.org.
A6 - Eventually the A63RI team was able to land on Dibba Rock (AS-124) on 27 December, and is now active with two stations (SSB and CW) until the 30th. QSL via IZ8CLM. A few pictures can be found at www.mdxc.org/a63ri/ http://www.mdxc.org/a63ri/
DL - Special event callsign DB50FIRAC will be active from 1 January through 31 December to celebrate the 50th anniversary of the Federation Internationale des Radio Amateurs Cheminots (International Federation of Railway Radio Amateurs). QSL via bureau, LoTW and eQSL.
DL - To celebrate DARC Mainz Chapter's (DL0MZ) 60th anniversary, special callsign DL60JMZ (DOK 60K07) will used from 1 January to 31 December 2014. QSL via the bureau. [TNX DK8ZZ]
F - Weather permitting, Gil, F4FET/p and Diego, F4HAU/p will be active from Tombelaine Island (EU-156) for about 24 hours on 28-29 December. They plan to operate SSB and PSK with two stations on 80-10 metres. [TNX F4FET]
FT/T - Activated for the first time in 1954 (FB8BK/T) and for the last time in 2000 (FR/F6KDF/T), Tromelin Island (AF-031) is one of the top ten Most Wanted DXCC Entities. Landing and operating permissions for the joint effort by the Radio Club de Provins and the Lyon DX Gang [425DXN 1154] have been granted, and Tromelin will be back on the amateur radio bands from 30 October to 10 November 2014. Six operators (Franck F4AJQ, Flo F5CWU, Fred F5ROP, Eric F5SIH, Seb F5UFX and Michel FM5CD) will be QRV on 160-10 metres CW, SSB and RTTY with four stations. The organizers estimate a budget in the range of USD 90,000 (with logistics taking a major share of it), and fundraising has started. Visit www.tromelin2014.com http://www.tromelin2014.com for regular updates and information on

how to
contribute to this expensive project. [TNX F5NQL]
FT/Z - On 21 December the FT5ZM team reported that "all the equipment the
Amsterdam Island DXpedition team shipped to New Zealand is now
aboard the MV Braveheart". The vessel was expected to sail for
Fremantle, Australia on 26 December. Team members will begin
arriving in Fremantle on 9 January, and will depart for their
9-day voyage on the 15th. Once ashore, they will have 18 days to
set up, conduct the DXpedition and tear down for departure. "We've
not yet reached our financial goals", the team says, "but with
your continued support, that goal is in sight". Visit
www.amsterdamdx.org http://www.amsterdamdx.org for late breaking news and updates. [TNX
K0IR]
LA - Celebrating their country's Constitution Bicentennial, Norwegian
amateur radio operators are authorized to use special prefixes
throughout the anniversay year. LA stations may use the LI prefix,
and LB stations may use the LJ prefix. Also, the Gardermoen Radio
Club (LA2G) has been granted permission to use the special
callsign LM1814 during 2014. [TNX NRRL]
PY - The 26-30 December ZX8DX activity from IOTA group SA-025 [425DXN
1181] has been postponed until "the first two weeks of January".
[TNX PT7WA]
PY - Fabio, PP5BZ will try to go and be active as ZW5W from Santana de
Fora Island (SA-088) on 27-29 December. His previous attempt
earlier this month [425DXN 1175] had to be cancelled owing to bad
weather. QSL via PP5BZ. [TNX PT7WA]
VE - The Daily DX reports that David, VY0/VE3VID is back on Igloolik
Island (NA-174) and plans to be QRV on 20 metres only starting on
1 January. He will participate in the ARRL RTTY Roundup (4-5
January).
VK - Scott, VK7HVK plans to be active again as VK7HVK/p from Bruny
Island (OC-233) on 28 December. QSL via home call. [TNX DX World]
VK9/M - Norbert, DJ7JC has joined the operating team for the VK9MT
DXpedition to Mellish Reef (28 March-9 April 2014) [425DXN 1179].
New corporate sponsors have signed on, the sailing schedule with
the Evohe's skipper has been confirmed and K6TU's customized
propagation prediction tool is now up and running at
https://www.k6tu.net/?q=node/ add/dx-prediction-vk9mt
https://www.k6tu.net/?q=node/add/dx-prediction-vk9mt. "Depending
on the weather and sea conditions", the team says in their latest
press release (22 December), "our planned arrival at the reef is
approximately 28 March. Radio operation will begin as soon as the
HF stations are installed. Low band antennas will be installed on
the second day for operation beginning that night". Donations are
still being sought and gratefully accepted, see www.vk9mt.com http://www.vk9mt.com for
detailed information on how to donate. [TNX K5GS]
W - Mark, AA1AC will be active from Aquidneck Island (NA-031), Rhode
Island on 28-29 December. He will be QRV on 20-10 metres. QSL via
home call. [TNX AA1AC]
W - Once again Howie, K1VSJ will be active from Martha's Vineyard
(NA-046) from 30 December to 1 January. [TNX The Daily DX]

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

CQ DX MARATHON ---> The CQ DX Marathon (www.dxmarathon.com http://www.dxmarathon.com) is a year-long
DX hunt, with participants competing to see who can work the greatest number of countries ("entities") and CQ zones during the calendar year. The 2014 edition will start at 00.00 UTC on 1 January and will end at 23.59 UTC on 31 December. For 2014, the CQ Marathon is introducing a third class of competition: the new Limited Class will allow those running 100 watts and small directional antennas to participate in their own class. Complete rules at www.cq-amateur-radio.com/cq_ contests/index_cq_contests. html http://www.cq-amateur-radio.com/cq_contests/index_cq_contests.html

GRANITE ISLAND (OC-228) ---> Paul, VK5PAS was active for a few hours from Granite Island on 27 December. Those who were not able to work him during his QRP operation, will have a second chance next year, as Craig, VK5CE has plans to operate from this island "probably around April for 2-4 days".

PMC CONTEST ---> The PMC Contest promotes contacts between stations located in the Peace Messenger Cities and the rest of the world. Sponsored by the Radio Club Slovenj Gradec (S59DCD), it will be held from 12 UTC on 4 January 2014 until 12 UTC on the 5th. Complete details can be found at www.s59dcd.si/en10/ http://www.s59dcd.si/en10/ [TNX S54X]

QSL T32AU ---> Dave, G4GED is not and has never been the QSL manager for T32AU (January 2012). "I have received many cards through the bureau which I will forward to the VE3 bureau sometime next year", he says. The DXpedition's website (www.t32kiritimati2012.com http://www.t32kiritimati2012.com) still lists QSL via VO1MX,
but the entry on qrz.com http://qrz.com shows via VE3AAQ. G4GED no longer has "any logs for any T3 callsigns from the 1980s".

T6EUPOL ---> This is "the official ham radio station of the European Union Police (EUPOL) Mission in Afghanistan". It is operated by Janusz, AK4JK. QSL direct only to Janusz Babol Vel Sobczyk, 8433 Southside Blvd, Apt 2711, Jacksonville FL 32256, USA.

W1AW WAS ---> Look for ARRL Centennial stations W1AW/4 from North Carolina and W1AW/8 from West Virginia to be on the air starting at 00.00 UTC on 1 January until 23.59 UTC on the 7th. Complete information on the ARRL Centennial QSO Party can be found at www.arrl.org/centennial-qso- party http://www.arrl.org/centennial-qso-party.

Propagation Forecast Bulletin 53 ARLP053
>From Tad Cook, K7RA
Seattle, WA December 27, 2013
To all radio amateurs

SB PROP ARL ARLP053
ARLP053 Propagation de K7RA

This is the last propagation forecast bulletin of 2013. In the first bulletin of 2014 we will review the previous year, and look at some averages to give us perspective on the current Solar Cycle 24.

Solar activity declined somewhat this week. The average of daily sunspot numbers retreated nearly 21 points from 134.4 to 114.6, and average solar flux was off nearly 21 points to 138.8. Geomagnetic indices were quiet.

These comparisons are between the recent seven day reporting period and the previous week, December 12-18, 2013.

Predicted solar flux according to the most recent forecast on Thursday, December 26 from NOAA/USAF is 125 on December 27-28, then 130, 135 and 140 on December 29-31, then 145, 150, 155, 165, 170, 175 and 170 on January 1-7, 165 on January 8-10, 155 on January 11-15, and 150 on January 16-17. Solar flux is predicted to drop to a low of 125 on January 22-25, and peak at 175 on February 2.

Predicted planetary A index is 7 on December 27, 5 on December 28 through January 2, then 10 and 20 on January 3-4, then 5 on January 5-9, then 15 on January 10, and 5 on January 11-20, then 10 and 8 on January 21-22.

F.K. Janda, OK1HH shares his geomagnetic predictions this week, and sees quiet to active conditions December 27, mostly quiet December 28, quiet to unsettled December 29, active to disturbed December 30, quiet December 31 and January 1, mostly quiet January 2-3, active to disturbed January 4, quiet to unsettled January 5, quiet January 6-9, quiet to unsettled January 10, quiet to active January 11, quiet to unsettled January 12, and mostly quiet January 13-17.

Don Kalinowski, NJ2E of Cary, North Carolina sent us a tip on space weather coverage by the British Met (Meteorological) Office, which

will begin in Spring 2014. You can read about it here:

http://www.bbc.co.uk/news/science-environment-25517466

And here:

http://www.metoffice.gov.uk/news/releases/archive/2013/space-weather-forecasts

Don also sent a link to this interesting video from NASA:

https://www.youtube.com/watch?v=kS57VH3QN1g

Rich Zwirko, K1HTV of Amissville, Virginia sent this interesting report:

"Saturday, December 21 had some very interesting conditions on the higher HF bands. I was watching solarham.com around 1545 UTC and noticed a sharp peak in the density (proton?) reading on the ACE solar wind real time display. I switched to 10 meters and found 3W1T in Vietnam with a strong signal on CW coming in via long path from the south. In a few minutes he was in the log. That was around 1545Z.

"His signal continued to build to almost S9 on the K3 S meter over the next 15 minutes. I called Ed again on CW with my 100W, asking if he could switch to SSB, but he said that he had to QRT in a few minutes. I then switched to 15 meter SSB with the beam east and worked VK4WIL via the long path. Contacts were also made with a number of stations in the southern half of Africa.

"Later in the day around 2345Z VK6WX, with a great long path signal, was easily worked on 20 meter SSB. Then in the next 45 minutes QSOs were made with three stations in the Antarctic region on 20 meter CW, all with what seemed to be greatly enhanced signal strengths. On the other hand, signals via the northern polar path were almost non-existent at the K1HTV QTH. Go figure!"

Thanks, Rich!

Log into http://www.qrz.com and take a look at the K1HTV profile, full of interesting history for this active ham, 55 years on the air.

Larry Godek, W0OGH of Gilbert, Arizona wrote on December 21:

"Today listening to the KSM CW transmission on 16.914 Mc out of Point Reyes, California, I am hearing echoes between the characters. Sometimes it's hard to determine the characters as the echo is as strong as the direct or reflected signal. Wonder if anyone else heard the same thing?

"10 meter FM has been going strong all day with signals from the East Coast in here solid on 29.620 MHz through KQ2H in New York City. Hearing South American stations quite well. Also this year

I've heard the VE2TST repeater in Ottawa an awful lot whereas in the past years it's been very seldom heard.

"Lots of signals on the bands for the RTTY contest. Hope they have a banner weekend."

The KSM transmissions are from a former commercial marine radio site at Point Reyes, Bolinas, California in Marin County north of San Francisco. KSM is on the air occasionally to commemorate the old high seas CW operations of years past. Read about it here: http://www.radiomarine.org/

Peter Gambee, K6TTD of Sacramento, California sent this on December 20:

"I am located near downtown Sacramento, California. I did get on the air much too briefly during the 10 meter contest, for about an hour all together. Family and holiday shopping took precedence. I had the rig on in the background throughout, and was able to hear (sometimes see on CW Skimmer) what was happening, which only made sitting on the sidelines more painful. Conditions were outstanding on 10 throughout the contest from all I heard and saw.

"During the hour I was on, I wasn't competing. I spent my time 'scooting and pouncing' on new DXCC entities and bands. I only logged about a half dozen brand new DXCC entities, and chocked up about a dozen or so new-band DXCC QSOs. The majority of these were in Central America, South America and Asia. Europe and Africa seemed to be just out of reach as I wasn't able to get on the air when they were solid into Northern California.

"So far during this 'second peak' of Cycle 24, I have logged 175 new DXCC entities and now have over 100 DXCC confirmed. What has REALLY blown me away is that my linear has been idle for many of those contacts. In all but the most ugly pileups, I've been working DX with 15-30 watts.

"Lately I have been starting out with 15 watts and working my way up depending on conditions. Not that 30 watts is QRP by any means, but I'm still blown away with what I've been able to do barefoot, usually on the first or second call.

"I fell into this pattern completely by accident. I finished a QSO with my first station in China a few weeks into the current peak, only to realize that my linear was off and I was only running about 15 watts out! Just to see if it was dumb luck, I stuck with 15 watts and made several additional QSOs with new DXCC throughout Asia. Been going with the flow ever since.

"I still have the security blanket of a linear when conditions get really rough, as they likely will sooner than we would all like, but running sub-100 watts has been a kick. I will be giving REAL QRP a

shot ASAP, before the SSN drops down.

"Some of my bigger surprises so far: V63XG Micronesia (15w), ZM90DX Auckland and Campbell (15w), RU0ZM/0 Asiatic Russia (15w), ZS9MADIBA South Africa (30w), BA8AG China (20w) and XV2LRR Vietnam (20w)."

Thanks, Peter! Great report. Back when I was a teenaged WA7CSK in 1966, W7OE inducted me into QRP Amateur Radio Club International (#2656), and they considered 100 watts and below as QRP. These days 5 watts or less is generally considered QRP, but in the early seventies if I recall correctly 5 watts or less was referred to as QRPp.

We heard from Pavel Milanes Costa, CO7WT of Camaguey Cuba. He wrote, "Hi, I'm CO7WT from Cuba, and today I had a curious experience on 12 meters.

"I sit down in my shack and begin to call on 24.950 MHz around 1:00 PM local (1600 UTC) and the band was so-so, but using the CQRLOG software in Linux with the world map showing the approximate place of each station I note what can be called as a skip ribbon or skip zone moving away westward.

"Beginning on the East Coast of US with little stations in the mid US, and no California at all, then around 1 hour later some stations entering from the west coast and strong signals from the middle US and fading signals from the East Coast (skip zone moving west) and then strong stations coming from California and even two Alaska stations, and NY stations popping strong on the radio again.

"Funny, I have 15 years+ as a ham and I have never seen propagation this way. It may be because I have no way to see the other station's position before, and now with this software I can note curious effects like this.

"The result of the almost 4 hours sit down in front of the radio was 200+ contacts scattered all over the US, including Alaska, and 3 PY (Brazil) and one FM4 (Martinique) on SSB.

"Just to share an experience, and surprise of the discovery. We never stop learning!

"Merry Christmas and Happy New Year!

"73 de CO7WT, Pavel"

#-----------------------------------------------------------------#
SIDC URSIGRAM 31228
SIDC SOLAR BULLETIN 28 Dec 2013, 1212UT
SIDC FORECAST (valid from 1230UT, 28 Dec 2013 until 30 Dec 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 28 Dec 2013 10CM FLUX: 133 / AP: 001
PREDICTIONS FOR 29 Dec 2013 10CM FLUX: 133 / AP: 001
PREDICTIONS FOR 30 Dec 2013 10CM FLUX: 133 / AP: 005
COMMENT: There were six C flares on the Sun during the past 24 hours. The
brightest one was a C2.3 flare released by NOAA AR 11934, which peaked at
23:36 UT on December 27. Since AR 11934 and 11936 are still showing flux
emergence, the probability for C flares over the next 48 hours is high
(around 90%) and for M flares around 25%. Over the past 24 hours, the solar
wind speed as observed by ACE gradually decreased from about 310 km/s to
about 280 km/s. Around 18h UT on December 27, the magnitude of the
Interplanetary Magnetic Field dropped suddenly from about 8 nT to about 3
nT. A continuation of nominal solar wind conditions is expected on December
28-30. Geomagnetic activity has been quiet over the past 24 hours (NOAA Kp
between 0 and 2). Quiet geomagnetic conditions (K Dourbes < 4) are expected
on December 28, 29, and 30, with a slight chance of active conditions (K
Dourbes = 4) in the first half of December 30 (in case the Earth suffers a
glancing blow from the CME first observed by LASCO C2 at 7:36 UT on
December 26).
TODAY'S ESTIMATED ISN : 066, BASED ON 17 STATIONS.

22074. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-12-29 15:30:00 UTC
From: Paul Dunphy
Topic: 19749 Message: 22074

```
:Issued: 2013 Dec 29 1325 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31229
SIDC SOLAR BULLETIN 29 Dec 2013, 1312UT
SIDC FORECAST (valid from 1230UT, 29 Dec 2013 until 31 Dec 2013)
SOLAR FLARES : Active (M-class flares expected, probability >=50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 29 Dec 2013 10CM FLUX: 138 / AP: 004
PREDICTIONS FOR 30 Dec 2013 10CM FLUX: 143 / AP: 007
PREDICTIONS FOR 31 Dec 2013 10CM FLUX: 143 / AP: 004
COMMENT: There were one M flare and nine C flares on the Sun during the
past 24 hours. The M3.1 flare was released by NOAA AR 11936, and peaked at
07:56 UT on December 29. The probability for C flares over the next 48
hours is very high (around 95%) and for M flares around 55%. There is a
slight chance for an X flare, especially from AR 11936. The > 10 MeV
proton flux as observed by GOES13 started rising near 18:50 UT on December
28. It exceeded the threshold level of 10 pfu around 21:50 UT, and attained
a peak value of 29 pfu at 23:15 UT. It went under the 10 pfu threshold
again at 7:50 UT on December 29, and is further decreasing. The > 50 MeV
and > 100 MeV proton flux have also increased, but have not exceeded the 10
pfu threshold. This proton event is most probably associated with the halo
CME first observed by LASCO C2 at 17:36 UT on December 28, which is
probably linked to a backsided eruption. A warning condition for further
proton storms is issued. Around 13h UT on December 28, the solar wind speed
as observed by ACE suddenly increased above its plateau of around 300 km/s,
and gradually rose further to a plateau of around 370 km/s. During the past
24 hours, the magnitude of the Interplanetary Magnetic Field varied between
about 3 nT and 9 nT. A continuation of nominal solar wind conditions is
expected on December 29-31. Geomagnetic activity has been quiet over the
past 24 hours (NOAA Kp between 1 and 2). Quiet geomagnetic conditions (K
Dourbes < 4) are expected on December 29, 30, and 31, with a slight chance
of active conditions (K Dourbes = 4) in the first half of December 30 (in
case the Earth suffers a glancing blow from the CME first observed by LASCO
C2 at 7:36 UT on December 26).

22075. New IRCs on-line

Yahoo group: DX-IS (2013)
Date: 2013-12-29 15:37:54 UTC
From: Joe Subich, W4TV
Topic: 22075 Message: 22075

Since the US Postal service no longer sells IRCs and the various
QSL managers who periodically sell recycled IRCs are asking $2.65
or more each, there are at least two countries that will sell IRCs
on-line:

The Swiss Post Office sells IRCs at http://postshop.ch - a pack of
10 is CHF 20 (presumably including VAT - I don't know if it is
actually charged on international shipments). At current exchange
rates that's $2.25 US each. The picture shown is of the "new"
version. The description says: Art. no.: 1943400
Available for delivery: Worldwide

The direct link is:
<https://sso.post.ch/shops/en/Products/Stamps-philately/For-Collectors/Ready-to-post-produ
cts/International-reply-coupon-1943400?L=1&I=1>

The Iceland Post Office also shows IRCs on their web shop at
http://stamps/postur.is - listed price is ISK 295. At current
exchange rates that is about $2.55 US. There is no information
on international sales but the site is generally a philatelic
site through which Iceland Post sells collector stamps globally
and the check-out contains a currency calculator which lists
US Dollars.

The direct link for the IRC is:
<http://stamps.postur.is/en/desktopdefault.aspx/tabid-387/523_read-2691/>

73,

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1143
BID: $OPDX.1143
December 30, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, AD8J, K8GI, K8YSE, W8GEX & 60m News, ND9M, W9ILY, AT International, DK8JB & The DX News Letter, DK8ZZ, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, JA8BMK, OH2BH, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, PT7WA, RSGB IOTA Web Site, Sixitalia Weekly, SM7AED, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF), ZS5J and ZS6KHN (C91KHN/C91C) for the following DX information.

*** SPECIAL NOTE FROM EDITOR (Tedd, KB8NW): My family (wife/OPDX's chief proof-reader Linda, son Teddy [TJ] and his wife Jessi, daughter Katie and her husband Kevin and son Lliam), and I (KB8NW) would like to wish all DXers, Contesters and OPDX readers a very "Happy New Year". Thanks to the many individuals who have provided DX information over the past year. Without them there would not be an OPDX Bulletin. Also, thanks to the individuals who sent holiday wishes to my family and me.....
73 and Have a Great/Safe/Healthy New Year de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 22nd-December, through Sunday, 29th-December there were 220 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5A, 5B, 5R, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BS7, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J5, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V8, VE, VK, VK9N, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

1A, SOVEREIGN MILITARY ORDER OF MALTA (Reminder). An "international team" of operators led by Francesco, IK0FVC, will be active as 1A0KM from the Sovereign Military Order of Malta (SMOM) between January 2-7th (2014). At present time, operators will be Francesco/IK0FVC, Luciano/I0JBL, Sergio/IK0FTA, Roberto/IK0PRG, Michele/IW0BYL, Gianfranco/I0ZY, Antonio/ I0GOJ, Fabrizio/I0HCJ, Marco/IK0DWN, Giordano/IK0XFD, Gianluca/IK5HHA, Cristiano/IZ0IEN, Andrea/IZ0NRG, Rudi/DK7PE, Franz/DJ9ZB, Seppo/OH1VR, Robert/S53R and Sandro/VE7NY. QSL via Sergio, IK0FTA, and also LoTW. 1A0KM operation supports the DX-Code of conduct. Online log facility will be also available. Look for more details to be forthcoming. Also, a Web page is now up and running, but with limited info at: http://www.1a0km.org

5C, MOROCCO. Ruggero, IK2PZC, will once again be active as 5C2P between February 6-9th. Activity will will be on HF bands using SSB and RTTY. He will also be in the CQ WPX RTTY Contest (February 8-9th). QSL via IK2PZC.

5Z, KENYA. "DX-World.net" reports that Scott, WA5A,will be active as 5Z4/WA5A from Ruaka starting around the first week of January 2014, until about January 28th. Activity will be holiday style on the HF bands. QSL via his home callsign.

6W, SENEGAL. Just a reminder that Francis, F6BLP, will once again be active as 6W7SK from Saly Portudal, 80 kms south of Dakar on the coast, between January 3-31st, 2014. Activity will be holiday style using the same station as last time (IC-7000 into G5RV antenna) operating mainly CW on 80-10 meters. If possible, he also hopes to be active on 160m with an Inverted L. QSL via F6BLP, direct or by the Bureau. Logs will be uploaded to LoTW and eQSL. For more details, logs and pictures of his last operation, visit: http://www.f6blp.org

7Q, MALAWI. Ken, LA7GIA, is expected to be active as 7Q7GIA for one week in May/June of 2014. QSL via his home callsign.

8Q, MALDIVES. By the time you read this, Mike, OE1SSS, will be in the Maldives and plans to be active as 8Q7SM. On his QRZ.com page, Mike states from December 28th to January 4th, he and his XYL will stay on the boat "SCUBASPA" for diving. After this trip, they will go to the Kandooma Resort and stay on the island until January 11th. Activity will be on 40/30/20/10 meters (depending on the conditions and his XYL). QSL via his home callsign.

C5, THE GAMBIA. Pedro, ON7WP/C5WP, announced on QRZ.com that he and Andre, ON7YK/C5YK, are or will be the only two permanent licensed hams in The Gambia for 2014 (as of now). Pedro will be active between January 11-15th, from the village Buntu (where he does charity care), and has set up his permanent base station (Kenwood TRC-80 Bush Radio and a brand new 5 band Spiderbeam). He also states [edited], "Additionally, I will

put up some traveling wave V-beam antennas to USA and EU. We will also try some low band activity, but due to poor soil conductivity I expect not too much apart from extremely low noise levels (closest electricity wall outlet is 80 km away). Between January 16-22nd, we will move to the Kololi area where we will try some serious Low Band stuff based on a sea mounted vertical, together with dipoles and the V-beam for the high bands." See QRZ.com for QSL info.

C6, BAHAMAS. John, 9H5G, will once again be active as 9H5G/C6A from Stocking Island, Great Bahama Bank (NA-001), between January 1-31st, 2014. Activity is usually on 160-10 meters, using SSB and the Digital modes (PSK/RTTY/JT65/JT9). He announced on QRZ.com, "I intend to travel throughout the Bahamas during the winter and spring of 2014 activating the following groups: NA-001 Great Bahama Bank group, NA-113 36.6% South Bahamas group, NA-054 Berry Islands and NA-048 Bimini Islands. Some of these are rarer than others, but since I will be traveling by boat, I am required to validate NA-054 and NA-048 through the IOTA Committee. I also hope to activate some islands that are not on the list, even although they seem to qualify (Hogsty Reef, Melita Cay). I hope to have more information on this soon." Watch QRZ.com for updates. QSL via LoTW, eQSL or direct to Buzz, NI5DX.

C9, MOZAMBIQUE (Update). Karel, ZS6ALB, informs OPDX that he is now permanently based in Mozambique and is active as C91KHN (C91C during contest) from Matola, Mozambiue (Grid locater KG64fa). He has been busy upgrading his station, changing the current Hygain tri-bander for a Mosley 67B 6-bander. However, Karel informed OPDX on Christmas Eve that he "will be away for the festive season and will be back in C9 country on 13 January 2014." After the upgrades, he states that he will be active on the following bands and modes:
Band Operations: 6m - 5 element Yagi
40/20/17/15/12/10m - Mosley 67B
Modes: SSB and Digitals modes PSK31, RTTY and JT65A (using Rigblaster Advantage)
QSL via his home callsign direct (preferred). Log will be uploaded to LoTW and ClubLog.

C9, MOZAMBIQUE (Update). By the time you read this, operators John/ZS5J and YL Beth/2W0VOW will once again be in Ponta de Ouro and be active as C91J and C91B, respectively. John informs OPDX that their "ten day C91J and C91B DXpedition (earlier this month) was such a success (and really enjoyable) that we have negotiated with the owner of the sea-view cabin we stayed in, to go back for another ten days. We will be in Mozambique tomorrow 28th December through 6th January. We will be taking more antennas this time, specifically...resonant antennas on 40/17/12, so we will be able to use the amplifier on these bands, which we were not able to do on our last trip. So, 40 - 6 meters, SSB, CW and we will attempt the digital modes and RTTY also." Remember, you can see pictures from Beth on QRZ.com under C91B. QSL only direct to PO Box 102303, Meerensee, 3901 SOUTH AFRICA (with 3 USDs and your QSL card, and you willvget a QSL card back direct via air mail).

CE, CHILE. Bob, YV5IAL, will be active as CE2/homecall from Valparaiso between January 2-30th, 2014. Activity will be on 40-10 meters using PSK-31 with some SSB. QSL via his home callsign, by the Bureau or direct.

DL60, GERMANY (Special Event). OV Mainz, DL0MZ, will be celebrating 60 years of activity and will be active between January 1st and December 31st, 2014, as DL60JMZ from the special DOK 60K07. QSL via the Bureau.

EA, SPAIN (via 60m News). Javier, EA7OP, is reporting that SETSI is allowing EA stations to operate on 60m band between January-July 2014 on a channel basis. Allowed channels [kHz]: 5268, 5295, 5313, 5382, 5430 and 5439. The bandwidth to be used is 3 kHz. Power output 100W. Modes CW/SSB.

FR/T, TROMELIN (Press Release)[edited]: "Hi friends -- Most of the DXers consider entities as check boxes to tick once the country is worked and confirmed. That's the game! However, we hope to bring you a lot more than just a simple check mark as you discover our next destination... Let's talk about the 9th most wanted DXCC entity according to the Clublog statistics, an empty box for 75% of the amateur radio community.
Tromelin, as well as Glorioso, Juan de Nova, Europa, belongs to the □Eparses□, a French word to name these small islands scattered around Madagascar. These French territories are administered by the TAAF (Terres Australes et Antarctiques Françaises). Their access is strictly controlled and regulated in particular for ecological reasons. Tromelin is the smallest one (1 square km) and the human impact is all the more sensitive. That's the only island where there are no French military troops and only 2 agents of the TAAF are posted there continuously.
The last operation took place in 2000. A 4 men team made 50,000 contacts with the callsign FR/F6KDF/T. No authorization has been given ever since. 2014 will be the 60th anniversary of the 1st hamradio activity from Tromelin. The operator was Marc, FB8BK/T.
Today, after some successful collaborative work with the TAAF authorities, we are proud to announce that we received our landing permission and got the green light to conduct an amateur radio operation on this remote island. We'll be active on Tromelin from October 30th to November 10th, 2014.
6 operators have been allowed to stay of the island. They have been selected for their experience and all six are ready to face the challenge. The team is made up of Seb/F5UFX, Michel/FM5CD, Flo/F5CWU, Eric/F5SIH, Franck/F4AJQ, and Fred/F5ROP.
The request is huge and we are conscious of this. For this reason, we are working hard in order to prepare our operation in depth. Some places in the world will have short openings and we□ll do our best to exploit these short moments with proper planning adjusted with the help of pilots.
The coming months will be devoted to the search of sponsors. We already have part of the equipment but partnership with equipment suppliers will be essential. On the other hand, we will contact foundations, clubs, organizations to request assistance to help us balance our budget, estimated at 90,000 USDs, most of which is devoted to logistic costs.
Our website is online. All details regarding the progress, plans of the DXpedition and sponsorship opportunities will be accessible through

dedicated pages.... http://www.tromelin2014.com
We will regularly keep updating you until our departure.

Team Tromelin 2014
Seb F5ufx, leader@... "

HI, DOMINICAN REPUBLIC. Look for a Russian team to be active as HI8/homecall from the Dominican Republic between December 30th and January 7th. Operators mentioned are Andrey/RU4LG, Dmitry/RA4LB, Serge/UA4LGS and Pavel/UA4LL. Activity will be on the HF bands using CW, SSB, PSK and RTTY. The group may participate in the ARRL RTTY Roundup Contest (January 4-5th). QSL via their home callsigns.

IOTA NEWS.....
AF-032. Vittorio, I2GPT, will be active as 5H1VC from Zanzibar Island (WLOTA 1080, WWFF 5HFF-003) between January 4-12th, 2014. Activity will be on 40-10 meters using CW and RTTY (20m only) for the first time (Please have patience). QSL via RW6HS, direct (see QRZ.com) or by the Bureau.

OC-042. Mike, W6QT, will be active as DU3/W6QT from Luzon Island until March 2014. Activity has been 40/20/15/10 meters, but he actually likes working the lower bands. QSL via his home callsign.

OC-139. Andy, VK5MAV, will once again be active as VK5MAV/p from Kangaroo Island (WLOTA 0869) between February 3-10th, 2014. Activity will be holiday style on 40-10 meters using mostly CW. For direct QSLs, read details on QRZ.com. If you are not in a rush, all QSLs will be sent via the QSL Bureau 6-7 months later. Free of charge! Logsearch and QSL requests are also via the ClubLog OQRS system.

SA-025. (Delayed) Operators Raimundo/PT7CG and Renner/PY7RP were expected to be active as ZX8DX from Pedra do Sal Beach on Grande de Santa Isabel Island between December 26-30th. However, the ZX8DX operation was delayed. PT7CG intends to activate the island in the first two weeks of January.

ISWL CALLSIGNS (For January). The following ISWL club callsigns will be used throughout the month of January 2014:
GX4BJC/A - Operated from Great Sutton, in Cheshire, by Geof/M0BAU. (WAB Square SJ37 - England, IOTA EU-005 and WLOTA LH-1841).
MX1SWL/A - Operated from Skegby, in Nottinghamshire, by Merv/G0UJD. (/A WAB Square SK56 - England, IOTA EU-005 and WLOTA LH-1841).

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual operator. The I.S.W.L. is a member of the European PSK Club. All QSL info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>. NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see <www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for their awards.

J7, DOMINICA. John, AD8J, will be active as J79JG between January 29th
and February 7th. Operation will be mostly CW, holiday style when not
scuba diving. QSL to his home callsign or LoTW.

PJ4, BONAIRE (Update). Bill, K9HZ, is now active as PJ4HZ (not PJ4/K9HZ
as first reported) from Bonaire (SA-006) until January 4th, 2014. Activity
will be on 80-6 meters using QSL via his home callsign direct, LoTW and
eQSL. NO Bureau QSLs.

OF9, FINLAND (SANTA QRT). From the Offices of Santa Claus, Lapland, Finland
-- OF9X SANTA WENT QRT WEDNESDAY, DEC.25 AT 07 UTC -- This year, Santa
Claus of Amateur Radio fame was somewhat different than in the past. A
total of fifteen (15) radio operating elves and their support personnel
brought Santa and Christmas cheer to ham families in a very special way,
with several added elements to highlight the Festive Season. Not only
were some 21.000 QSOs uploaded to ClubLog but associated with these QSOs
were many interesting occasions when Santa was in personal contact with
children all across the world. Those are moments to be treasured!
Of those 21.000 QSOs, a sizable proportion were made on CW as well as
on low bands, utilizing state-of-the-art remote technology of Radio Arcala,
OH8X. Moreover, extensive special hardware elsewhere was employed to add
to highly dedicated operators in the Far North. Everyone was determined
to push their personal Christmas envelope to its limit.
Santa would like to summarize your eligibility for the Santa Claus
(CW) Award which you can order by E-mail at <of9x@...>. You can
check your QSOs at <http://qrz.com/db/OF9X>.
1: You have a QSO with OF9X on SSB & CW - also 2012 Santa QSOs count.
2: You have only one 2013 QSO with OF9X - here correct passwords from
the Christmas Puzzle at qrz.com would compensate.

Additionally, you can A:) order a Bureau card, B:) direct airmail QSL
cards, and C:) a direct Award and QSL cards through ClubLog's OQRS facility.
See again the QRZ.com re: OF9X....
Thank you for contacting Santa on many modes and bands during Christmas
2013. Hopefully we will meet again next year.

OF9X Santa Claus and his elves - OH0XX, OH1JD, OH1TX, OH2BCI, OH2BEE,
OH2BH, OH2BR, OH2FPK (YL) , OH2FPX (YL),
OH2KM, OH2PM, OH2TA, OH6CT, OH6KN and OH6KZP

IRC REDEMPTION ETC... QSL Manager Phil, G3SWH, reports: "Hi gang -- Just
a cautionary note for those of you who still use IRCs. With effect from
1st January 2014 and in common with most other UK based QSL managers, I
will *NOT* be accepting IRCs for payment for return postage. They are
just too much hassle. OQRS and US dollars are much preferred and easier
to handle. Please take a look at <http://www.g3swh.org.uk/postage.html>
which has been in place for about six months. In that time, I have
received probably less than 10 of the new, 2017 expiry IRCs.....
73 and Happy New Year to you all"

QSL RECEIVED VIA LoTW: 9H3TX, BG2AUE, F1RHS, F5MMB, G3YNN, HA1AD,

SOUTHEAST ASIAN TOUR. Toshi, JA8BMK, will activate two DXCC entities during the first two months of the new year. Activity will be holiday style using a HEX beam/wire antennas/Inv.Vee. Operations will be on 160-10 meters. Toshi informs OPDX that the modes will be CW and SSB, not sure about the Digital (says may be not). He will use a K2 with a 500w amp. QSL via JA8BMK, by the Bureau or direct (see QRZ.com). His tentative schedule (Starting/Ending dates are flexible) and callsigns are as follows:
January 15-30th - Callsign is XW8BM; from Vientiane, Laos.
February 15th-March 2nd (possibly 25th) - Callsign is XV2BM; from Nha Trang (eastcost of South China Sea), Vietnam.

MORE INFO FROM JA8BMK (Just before going to print!)[edited]: "I will leave Japan for Vientiane via China on Jan. 11, 2014, and I am scheduled to receive the license at PTT office. The thing is the location to operate. Vientiane is not a exceptional, noisy city and it seems very difficult to put up a vertical antennas for low bands. I will spend a few days to find a good location for antenna installation. Also, I must explain to the hotel people about what amateur radio is. Sometime, they do not give the permission to visitors as they have no knowledge on amateur radio. However, I succeeded in 3D (Fiji) land by explaining about BBC which I like to listen to.
Regarding my antennas, I left them in Nepal. They are KIO Hex beam and wire/vertical and coax cable for the next operation. This time I bought another Hex beam from DX Engineering. This is a very good antenna and seems strong. But the problem is that it takes a long time and I modified it so that Airline company (China Eastern) will accept the size which is only 158cm total dimension X+Y+Z as maximum. They will accept two of 23kg per person, I got 92kg for the luggage with two persons, my wife and I. The 158cm as a total dimension is now popular. The longest length is 96cm after modifying and I made a wooden box for them(28x30x100cm O.D.). KIO Hex beam seems cheaper and lighter, and simpler to assemble compared with DX Eng. Hex beam. For DXpedition, I like to recommend KIO.
The license fee is not cheap in XW (may be, in XV, too) as well as 9N. The fee should be calculated according to how many bands, how much power, what frequency, what mode and how many days. These factors can be multiplied. I heard in XW PTT office that one Russian guy payed over 2,500 US dollar before!
My schedule is not sure after XW operation. But I will be in Indo-China until Mar. 28th, 2014, and will try to visit some other entity if I have time. Anyway, I am traveling with my wife, I will not be so free as I must take care of her."

T6, AFGHANISTAN. T6EUPOL is the official ham radio station of the "European Union Police" (EUPOL) Mission in Afghanistan. The station is operated by Janusz, home callsign: AK4JK (aka T6/ZS5ADU). No QSNs have been listed yet on the DXCluster networks. QSL only direct to the AK4JK postal address together with the SAE plus 2 USDs for postage.

T8, PALAU. Masa, JN3MXT, will be active as T88MX from "VIP Guest Hotel" (Free Radio Room) on Koro Island (OC-009) between January 25-30th. Activity will be on the HF bands using mainly SSB and RTTY. QSL via his home callsign.

TM11, FRANCE (Special Event). Look for special event station TM11AAW to be on air February 1-2nd, 7-10th and 14-23rd. Activity is to celebrate the 11th Antarctic Activity Week. Operation will be made by François, F8DVD, from his QTH of Mâcon in the east part of France, 60 km, North of Lyon. The new reference for WAP program is 245. Activity will be on 40-10 meters, mostly SSB. QSL via F8DVD, by the Bureau or direct (SAE + 1 new IRC or 2 USDs) to: François Bergez 6, rue de la Liberté F- 71000 MACON FRANCE. E-mail: a.pole@... <mailto:a.pole%40laposte.net>
For more details, visit: http://tm11aaw.monsite-orange.fr
--or--
http://www.qrz.com/db/TM11AAW

TY, BENIN (Update). Wim, ON6DX (ex-ON4CIT), who was active as 5V7TH recently from Togo, announced this past week he finally received his Benin callsign TY1TT from the telecom authorities. He states, "Was not easy, took me the longest time and most expensive ever to get a callsign. Now I can plan flights and lodging beginning 2014 in Benin." No specific dates were mentioned yet. Activity will be from Grand PoPo and operations will be on 20/17/15/12/10/6 meters using CW, SSB and RTTY. Wim did mention, "Clublog is a fine tool, but this year: OQRS QSL: Yes, but... But no more clublog leaderboards." Read his reason and look for updates at: http://www.dxpedition.be/Benin.html

VQ9, CHAGOS (Update). Last week we reported that Jim, ND9M, is once again active as VQ9JC from Diego Garcia. Jim informed OPDX that he arrived on the island a month ago, but he had to get his license renewed; it expired a couple days before he landed. Jim states, "Normally, I get it renewed within one business day, but this time there was an administrative hiccup that led to a month-long delay. The British military officer in charge of the island ☐ called the 'Brit Rep' ☐ was new to his post here. He read all the can's and cannot's of the job, and the legal info about issuing ham licenses says that tickets are signed by the Territorial Commissioner who's back in the U.K. The Brit Rep finally got the official word last week that issuing authority was delegated to the local office, and my license was signed the next day. This was the first time in the 15 years I've been coming here that anything like that had happened. In fact, licensing had been so smooth here that in 2008, I walked in to the Brit Rep's office without an appointment and left 45 minutes later with not only a signed renewal for my regular VQ9JC license but also a special temporary license for my VQ98JC operation. I wonder if anyone else can claim receiving two licenses fully authorized without previous notice that fast! Anyway, I'm still operating Field Day style from the covered picnic table at the park which has AC power and dozens of gecko lizards chasing the bugs. The table is about 30 feet from the wall of the jungle, and this weekend I'll try to thread a 135-foot OCF dipole through all the trees in the jungle so that I can not only leave the antenna up but also have multi-band capability. If I hoist the antenna where it can be seen, I would stand a very good chance of it being quickly removed as the 150 pound fishing line that I use to secure the antenna and the copper wire are both precious commodities here. The OCF dipole doesn't work on 15m, 30m, or 60m, even with a matchbox, so I'll put up separate dipoles for

15 and 30 and feed those two and the OCF to a switch. I don't know yet if I'll put up a 60m dipole. The 80m OCF is going to be a big enough project just to get it hoisted to only 25 feet; the jungle's pretty thick! I'll also be putting up a 20m dipole and maybe a 30m dipole as well on the ship. Obviously, I sign /MM during any contacts made from the ship as I did earlier this year. Contacts with me as /MM aren't valid for DXCC of course, but SKCC ops can count them if my ship's QTH is near the island. The rig is an FT-857D. I'll be running 100 watts most of the time, but I'm expecting to do some QRP work from here too. Most of my operating will be CW as usual (with a cootie most times), but I'll be on SSB occasionally. Also, I'm a rookie when it comes to digital comms, but I'm hoping to get my Rigblaster and FLDigi software configured to do some PSK and RTTY work. While on board the ship, I use an Icom IC-760 that I have set up in my service shop. I feed the coax through a helicopter control center that's directly above my shop. My shipboard antennas are about 115 feet above the water line. I don't have internet connectivity when I'm at my operating QTH on the island, so I obviously can't help with real-time QSY requests or the ever present 'EU PSE' when I'm calling for NA & SA stations." OPDX asked Jim about the status of the club station, possibly using a special VQ prefix for 2014, activity on the satellites and if he would attend the 2014 Dayton HamVention, and he replied, "Yeah, the ham club station is gone forever unfortunately. The log periodic has been grounded and dismantled, and everything in the shack has been turned back over to the Navy. I'm here six months out of the year of course, but once Larry, VQ9LA left three years ago, there was no one reliably present during my off times. When the Navy's MWR office personnel made a routine visit, they found nobody there since I was Stateside, so they decided that the club was no longer in use and took what they thought were appropriate steps. By the time I got back to the island and worked my way up the chain of command, the deal had been sealed. And yes, I'm working the satellites out here although there aren't many ops to work. I'll be on the birds when I get home again next year. I don't know yet if my XYL Cori (KK4CGA) and I will be at Dayton this coming May or not. We're hoping to go to New England for the ARRL Centennial in July, and we'll likely do only one trip. My assignment schedule has me returning to the ship a few days days before the national convention, and I'm trying to work things out with the guy that's here when I'm off ship for him to stay a little longer so that I can attend. He hasn't given me a firm answer yet though..... My plan for 2014 is to get VQ94JC issued for sometime during the second half of the year. The local licensing office has no requirements toward my getting a ticket other than having one already issued by the FCC. My US license expires in April, and the FCC won't enable the renewing process until 90 days before the expiration date, so I have to wait until early January to do that. If I can get the renewed license here - actually just a scanned copy will do and my XYL will send that - I can turn that over to the local office, and they should issue me the short-term ticket. Emphasis on special. It's all legal of course, but the folks in that office are all British military who typically do one-year tours here before being

re-assigned, so I can never assume that the next person will cooperate. I'm optimistic though as I've already had 7 VQ9xJC licenses plus the VQ975FOC ticket earlier this year, so the precedent's pretty well established. When I started doing the VQ9xJC bit in 2007, I did it just for fun and I thought the WPX chasers would like it. I really didn't expect to still be doing it after so many years. Now I'm looking ahead at rounding out the decade of annual special callsigns and thinking about what special prefix variation to initiate after the 10th one!" QSL via ND9M.

CQ to Realign Publications, Launch New CQ Plus Digital Supplement
Hicksville, NY (December 23, 2013) -- CQ Communications, Inc. today announced plans to realign its roster of publications and to launch an exciting new online supplement to its flagship magazine, CQ Amateur Radio.

"The hobby radio market is changing," said CQ Communications President and Publisher Dick Ross, K2MGA, "and we are changing what we do and how we do it in order to continue providing leadership to all segments of the radio hobby." CQ Communications is currently the only publisher in the United States serving the broad radio hobby, from broadcast band DXing to amateur radio moonbounce and satellite communications. CQ itself has been amateur radio's leading independent voice for seven decades.

Effective with the February 2014 issue of CQ, said Ross, content from the magazine's three sister publications, Popular Communications, CQ VHF and WorldRadio Online, will be incorporated into CQ's digital edition as a supplement to be called "CQ Plus." With this change, hobby radio enthusiasts of all types will be able to go to a single source - CQ - for articles on the broader aspects of hobby radio, from shortwave listening and scanner monitoring to personal two-way services and Internet radio, as well as amateur radio. Richard Fisher, KI6SN, currently Editor of both Popular Communications and WorldRadio Online, will be Editor of CQ Plus.

"Our primary audience is ham radio operators," explained Ross, "but very few hams began their radio involvement as amateurs. Most of us started out as shortwave listeners, broadcast band DXers, CBers or scanning enthusiasts. Many continue to be involved in many different aspects of the radio hobby in addition to amateur radio."

"By consolidating four specialized publications into one," Ross continued, "we will be better able to keep these multidimensional readers informed on all aspects of the radio hobby while simultaneously exposing those who are not hams to all the excitement and opportunities that amateur radio has to offer. We see this as a win-win for all of our readers and our advertisers, who will now be able to reach a wider and more diverse audience."

The expanded material will be an integral part of the digital edition of CQ, and will be included as part of a standard digital subscription. Each month's digital edition will simply continue beyond where the print edition ends, offering supplemental material on all aspects of hobby radio communication and will include selected columns carried over from the other magazines. The added digital content will make full use of the multimedia opportunities presented by digital publications.

Current subscriptions to Popular Communications, CQ VHF and WorldRadio Online will be converted to CQ subscriptions - and receive CQ Plus at no additional charge! Details will be posted on each magazine website.

There's no need to wait to see the great variety of articles that will be featured each month in the new CQ and CQ Plus. A preview of the February issue's Table of Contents is available right now on the CQ website at <http://bit.ly/19mzbOK>.

*** SPECIAL NOTE FROM EDITOR (Tedd, KB8NW): My family (wife/OPDX's chief proof-reader Linda, son Teddy [TJ] and his wife Jessi, daughter Katie and her husband Kevin and son Lliam), and I (KB8NW) would like to wish all DXers, Contesters and OPDX readers a very "Happy New Year". Thanks to the many individuals who have provided DX information over the past year. Without them there would not be an OPDX Bulletin. Also, thanks to the individuals who sent holiday wishes to my family and me.....
73 and Have a Great/Safe/Healthy New Year de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 22nd-December, through Sunday, 29th-December there were 220 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5A, 5B, 5R, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BS7, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU,

E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J5, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V8, VE, VK, VK9N, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

1A, SOVEREIGN MILITARY ORDER OF MALTA (Reminder). An "international team" of operators led by Francesco, IK0FVC, will be active as 1A0KM from the Sovereign Military Order of Malta (SMOM) between January 2-7th (2014). At present time, operators will be Francesco/IK0FVC, Luciano/I0JBL, Sergio/IK0FTA, Roberto/IK0PRG, Michele/IW0BYL, Gianfranco/I0ZY, Antonio/I0GOJ, Fabrizio/I0HCJ, Marco/IK0DWN, Giordano/IK0XFD, Gianluca/IK5HHA, Cristiano/IZ0IEN, Andrea/IZ0NRG, Rudi/DK7PE, Franz/DJ9ZB, Seppo/OH1VR, Robert/S53R and Sandro/VE7NY. QSL via Sergio, IK0FTA, and also LoTW. 1A0KM operation supports the DX-Code of conduct. Online log facility will be also available. Look for more details to be forthcoming. Also, a Web page is now up and running, but with limited info at: http://www.1a0km.org

5C, MOROCCO. Ruggero, IK2PZC, will once again be active as 5C2P between February 6-9th. Activity will will be on HF bands using SSB and RTTY. He will also be in the CQ WPX RTTY Contest (February 8-9th). QSL via IK2PZC.

5Z, KENYA. "DX-World.net" reports that Scott, WA5A,will be active as 5Z4/WA5A from Ruaka starting around the first week of January 2014, until about January 28th. Activity will be holiday style on the HF bands. QSL via his home callsign.

6W, SENEGAL. Just a reminder that Francis, F6BLP, will once again be active as 6W7SK from Saly Portudal, 80 kms south of Dakar on the coast, between January 3-31st, 2014. Activity will be holiday style using the same station as last time (IC-7000 into G5RV antenna) operating mainly CW on 80-10 meters. If possible, he also hopes to be active on 160m with an Inverted L. QSL via F6BLP, direct or by the Bureau. Logs will be uploaded to LoTW and eQSL. For more details, logs and pictures of his last operation, visit: http://www.f6blp.org

7Q, MALAWI. Ken, LA7GIA, is expected to be active as 7Q7GIA for one week in May/June of 2014. QSL via his home callsign.

8Q, MALDIVES. By the time you read this, Mike, OE1SSS, will be in the Maldives and plans to be active as 8Q7SM. On his QRZ.com page, Mike states

from December 28th to January 4th, he and his XYL will stay on the boat "SCUBASPA" for diving. After this trip, they will go to the Kandooma Resort and stay on the island until January 11th. Activity will be on 40/30/20/10 meters (depending on the conditions and his XYL). QSL via his home callsign.

C5, THE GAMBIA. Pedro, ON7WP/C5WP, announced on QRZ.com that he and Andre, ON7YK/C5YK, are or will be the only two permanent licensed hams in The Gambia for 2014 (as of now). Pedro will be active between January 11-15th, from the village Buntu (where he does charity care), and has set up his permanent base station (Kenwood TRC-80 Bush Radio and a brand new 5 band Spiderbeam). He also states [edited], "Additionally, I will put up some traveling wave V-beam antennas to USA and EU. We will also try some low band activity, but due to poor soil conductivity I expect not too much apart from extremely low noise levels (closest electricity wall outlet is 80 km away). Between January 16-22nd, we will move to the Kololi area where we will try some serious Low Band stuff based on a sea mounted vertical, together with dipoles and the V-beam for the high bands." See QRZ.com for QSL info.

C6, BAHAMAS. John, 9H5G, will once again be active as 9H5G/C6A from Stocking Island, Great Bahama Bank (NA-001), between January 1-31st, 2014. Activity is usually on 160-10 meters, using SSB and the Digital modes (PSK/RTTY/JT65/JT9). He announced on QRZ.com, "I intend to travel throughout the Bahamas during the winter and spring of 2014 activating the following groups: NA-001 Great Bahama Bank group, NA-113 36.6% South Bahamas group, NA-054 Berry Islands and NA-048 Bimini Islands. Some of these are rarer than others, but since I will be traveling by boat, I am required to validate NA-054 and NA-048 through the IOTA Committee. I also hope to activate some islands that are not on the list, even although they seem to qualify (Hogsty Reef, Melita Cay). I hope to have more information on this soon." Watch QRZ.com for updates. QSL via LoTW, eQSL or direct to Buzz, NI5DX.

C9, MOZAMBIQUE (Update). Karel, ZS6ALB, informs OPDX that he is now permanently based in Mozambique and is active as C91KHN (C91C during contest) from Matola, Mozambiue (Grid locater KG64fa). He has been busy upgrading his station, changing the current Hygain tri-bander for a Mosley 67B 6-bander. However, Karel informed OPDX on Christmas Eve that he "will be away for the festive season and will be back in C9 country on 13 January 2014." After the upgrades, he states that he will be active on the following bands and modes:
Band Operations: 6m - 5 element Yagi
40/20/17/15/12/10m - Mosley 67B
Modes: SSB and Digitals modes PSK31, RTTY and JT65A (using Rigblaster Advantage)
QSL via his home callsign direct (preferred). Log will be uploaded to LoTW and ClubLog.

C9, MOZAMBIQUE (Update). By the time you read this, operators John/ZS5J and YL Beth/2W0VOW will once again be in Ponta de Ouro and be active as

C91J and C91B, respectively. John informs OPDX that their "ten day C91J and C91B DXpedition (earlier this month) was such a success (and really enjoyable) that we have negotiated with the owner of the sea-view cabin we stayed in, to go back for another ten days. We will be in Mozambique tomorrow 28th December through 6th January. We will be taking more antennas this time, specifically...resonant antennas on 40/17/12, so we will be able to use the amplifier on these bands, which we were not able to do on our last trip. So, 40 - 6 meters, SSB, CW and we will attempt the digital modes and RTTY also." Remember, you can see pictures from Beth on QRZ.com under C91B. QSL only direct to PO Box 102303, Meerensee, 3901 SOUTH AFRICA (with 3 USDs and your QSL card, and you willvget a QSL card back direct via air mail).

CE, CHILE. Bob, YV5IAL, will be active as CE2/homecall from Valparaiso between January 2-30th, 2014. Activity will be on 40-10 meters using PSK-31 with some SSB. QSL via his home callsign, by the Bureau or direct.

DL60, GERMANY (Special Event). OV Mainz, DL0MZ, will be celebrating 60 years of activity and will be active between January 1st and December 31st, 2014, as DL60JMZ from the special DOK 60K07. QSL via the Bureau.

EA, SPAIN (via 60m News). Javier, EA7OP, is reporting that SETSI is allowing EA stations to operate on 60m band between January-July 2014 on a channel basis. Allowed channels [kHz]: 5268, 5295, 5313, 5382, 5430 and 5439. The bandwidth to be used is 3 kHz. Power output 100W. Modes CW/SSB.

FR/T, TROMELIN (Press Release)[edited]: "Hi friends -- Most of the DXers consider entities as check boxes to tick once the country is worked and confirmed. That's the game! However, we hope to bring you a lot more than just a simple check mark as you discover our next destination... Let's talk about the 9th most wanted DXCC entity according to the Clublog statistics, an empty box for 75% of the amateur radio community.
Tromelin, as well as Glorioso, Juan de Nova, Europa, belongs to the ☐Eparses☐, a French word to name these small islands scattered around Madagascar. These French territories are administered by the TAAF (Terres Australes et Antarctiques Françaises). Their access is strictly controlled and regulated in particular for ecological reasons. Tromelin is the smallest one (1 square km) and the human impact is all the more sensitive. That's the only island where there are no French military troops and only 2 agents of the TAAF are posted there continuously.
The last operation took place in 2000. A 4 men team made 50,000 contacts with the callsign FR/F6KDF/T. No authorization has been given ever since. 2014 will be the 60th anniversary of the 1st hamradio activity from Tromelin. The operator was Marc, FB8BK/T.
Today, after some successful collaborative work with the TAAF authorities, we are proud to announce that we received our landing permission and got the green light to conduct an amateur radio operation on this remote island. We'll be active on Tromelin from October 30th to November 10th, 2014.
6 operators have been allowed to stay of the island. They have been selected for their experience and all six are ready to face the challenge. The team

is made up of Seb/F5UFX, Michel/FM5CD, Flo/F5CWU, Eric/F5SIH, Franck/F4AJQ, and Fred/F5ROP.
The request is huge and we are conscious of this. For this reason, we are working hard in order to prepare our operation in depth. Some places in the world will have short openings and we□ll do our best to exploit these short moments with proper planning adjusted with the help of pilots.
The coming months will be devoted to the search of sponsors. We already have part of the equipment but partnership with equipment suppliers will be essential. On the other hand, we will contact foundations, clubs, organizations to request assistance to help us balance our budget, estimated at 90,000 USDs, most of which is devoted to logistic costs.
Our website is online. All details regarding the progress, plans of the DXpedition and sponsorship opportunities will be accessible through dedicated pages.... http://www.tromelin2014.com
We will regularly keep updating you until our departure.

Team Tromelin 2014
Seb F5ufx, leader@tromelin2014.com "

HI, DOMINICAN REPUBLIC. Look for a Russian team to be active as HI8/homecall from the Dominican Republic between December 30th and January 7th. Operators mentioned are Andrey/RU4LG, Dmitry/RA4LB, Serge/UA4LGS and Pavel/UA4LL. Activity will be on the HF bands using CW, SSB, PSK and RTTY. The group may participate in the ARRL RTTY Roundup Contest (January 4-5th). QSL via their home callsigns.

IOTA NEWS.............
AF-032. Vittorio, I2GPT, will be active as 5H1VC from Zanzibar Island (WLOTA 1080, WWFF 5HFF-003) between January 4-12th, 2014. Activity will be on 40-10 meters using CW and RTTY (20m only) for the first time (Please have patience). QSL via RW6HS, direct (see QRZ.com) or by the Bureau.

OC-042. Mike, W6QT, will be active as DU3/W6QT from Luzon Island until March 2014. Activity has been 40/20/15/10 meters, but he actually likes working the lower bands. QSL via his home callsign.

OC-139. Andy, VK5MAV, will once again be active as VK5MAV/p from Kangaroo Island (WLOTA 0869) between February 3-10th, 2014. Activity will be holiday style on 40-10 meters using mostly CW. For direct QSLs, read details on QRZ.com. If you are not in a rush, all QSLs will be sent via the QSL Bureau 6-7 months later. Free of charge! Logsearch and QSL requests are also via the ClubLog OQRS system.

SA-025. (Delayed) Operators Raimundo/PT7CG and Renner/PY7RP were expected to be active as ZX8DX from Pedra do Sal Beach on Grande de Santa Isabel Island between December 26-30th. However, the ZX8DX operation was delayed. PT7CG intends to activate the island in the first two weeks of January.

ISWL CALLSIGNS (For January). The following ISWL club callsigns will be used throughout the month of January 2014:
GX4BJC/A - Operated from Great Sutton, in Cheshire, by Geof/M0BAU. (WAB Square SJ37 - England, IOTA EU-005 and WLOTA LH-1841).
MX1SWL/A - Operated from Skegby, in Nottinghamshire, by Merv/G0UJD. (/A WAB Square SK56 - England, IOTA EU-005 and WLOTA LH-1841).

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual operator. The I.S.W.L. is a member of the European PSK Club. All QSL info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>. NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see <www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for their awards.

J7, DOMINICA. John, AD8J, will be active as J79JG between January 29th and February 7th. Operation will be mostly CW, holiday style when not scuba diving. QSL to his home callsign or LoTW.

PJ4, BONAIRE (Update). Bill, K9HZ, is now active as PJ4HZ (not PJ4/K9HZ as first reported) from Bonaire (SA-006) until January 4th, 2014. Activity will be on 80-6 meters using QSL via his home callsign direct, LoTW and eQSL. NO Bureau QSLs.

OF9, FINLAND (SANTA QRT). From the Offices of Santa Claus, Lapland, Finland -- OF9X SANTA WENT QRT WEDNESDAY, DEC.25 AT 07 UTC -- This year, Santa Claus of Amateur Radio fame was somewhat different than in the past. A total of fifteen (15) radio operating elves and their support personnel brought Santa and Christmas cheer to ham families in a very special way, with several added elements to highlight the Festive Season. Not only were some 21.000 QSOs uploaded to ClubLog but associated with these QSOs were many interesting occasions when Santa was in personal contact with children all across the world. Those are moments to be treasured!
Of those 21.000 QSOs, a sizable proportion were made on CW as well as on low bands, utilizing state-of-the-art remote technology of Radio Arcala, OH8X. Moreover, extensive special hardware elsewhere was employed to add to highly dedicated operators in the Far North. Everyone was determined to push their personal Christmas envelope to its limit.

Santa would like to summarize your eligibility for the Santa Claus
(CW) Award which you can order by E-mail at <of9x@...>. You can
check your QSOs at <http://qrz.com/db/OF9X>.
1: You have a QSO with OF9X on SSB & CW - also 2012 Santa QSOs count.
2: You have only one 2013 QSO with OF9X - here correct passwords from
the Christmas Puzzle at qrz.com would compensate.

Additionally, you can A:) order a Bureau card, B:) direct airmail QSL
cards, and C:) a direct Award and QSL cards through ClubLog's OQRS facility.
See again the QRZ.com re: OF9X....
Thank you for contacting Santa on many modes and bands during Christmas
2013. Hopefully we will meet again next year.

OF9X Santa Claus and his elves - OH0XX, OH1JD, OH1TX, OH2BCI, OH2BEE,
OH2BH, OH2BR, OH2FPK (YL) , OH2FPX (YL),
OH2KM, OH2PM, OH2TA, OH6CT, OH6KN and OH6KZP

IRC REDEMPTION ETC... QSL Manager Phil, G3SWH, reports: "Hi gang -- Just
a cautionary note for those of you who still use IRCs. With effect from
1st January 2014 and in common with most other UK based QSL managers, I
will *NOT* be accepting IRCs for payment for return postage. They are
just too much hassle. OQRS and US dollars are much preferred and easier
to handle. Please take a look at <http://www.g3swh.org.uk/postage.html>
which has been in place for about six months. In that time, I have
received probably less than 10 of the new, 2017 expiry IRCs.....
73 and Happy New Year to you all"

QSL RECEIVED VIA LoTW: 9H3TX, BG2AUE, F1RHS, F5MMB, G3YNN, HA1AD, JH7MQD, JW/PY2SEX, JW7XM, K4W, K9W, LA7HJA, M7X, OE6MDF, OK1WCF, OL7M, ON5GQ, PA0O, PJ4A, R7MA, RK9UAH, S21ZBB, S21ZBC, SP6GF, VE9DX, VU3WIJ, YT5EPP, YQ6A, XZ1J and Z81X

QSLS RECEIVED VIA MAIL: 3D2GC, 5A1AL, 5J0R, CR5CW, EF3EGB, HP0INT/2, HP0INT/3, HP0INT/9, J87GU and Z81X

QSLS RECEIVED VIA THE BUREAU: 7Z1HL, 9Q6AL, AA5AT, DJ3FS, DK2CH, DL2HWH, DL4FCH, DL8GP, DO5MCL/LH, DP1POL, EA1HNW, F-10828, HZ1EA, I0NUM, IK0RCY, IW3SGT, IZ5HNI, JA1NUX, JA3CG/1, JA3EGY, JF3SUL, KA1ERL, LX2LA, NI0B, NJ1H, OK1NZJ, OM5MF, OZ1GEJ, OZ8SW, PE1GUR, RA0FD, RV9DD, S53F, SP1DMD, SP3RBG, SQ3LLJ, SQ6MIP, SQ8KEZ, SV1GYG, SV2FLQ, T5TC, V21ZG, V31YN, VE3KI, VK1WJ, VU-0020, W5FK, W9II, YW5F and YZ1V

SOUTHEAST ASIAN TOUR. Toshi, JA8BMK, will activate two DXCC entities during the first two months of the new year. Activity will be holiday style using a HEX beam/wire antennas/Inv.Vee. Operations will be on 160-10 meters. Toshi informs OPDX that the modes will be CW and SSB, not sure about the Digital (says may be not). He will use a K2 with a 500w amp. QSL via JA8BMK, by the Bureau or direct (see QRZ.com). His tentative schedule (Starting/Ending dates are flexible) and callsigns are as follows:
January 15-30th - Callsign is XW8BM; from Vientiane, Laos.
February 15th-March 2nd (possibly 25th) - Callsign is XV2BM; from Nha Trang (eastcost of South China Sea), Vietnam.

MORE INFO FROM JA8BMK (Just before going to print!)[edited]: "I will leave Japan for Vientiane via China on Jan. 11, 2014, and I am scheduled to receive the license at PTT office. The thing is the location to operate. Vientiane is not a exceptional, noisy city and it seems very difficult to put up a vertical antennas for low bands. I will spend a few days to find a good location for antenna installation. Also, I must explain to the hotel people about what amateur radio is. Sometime, they do not give the permission to visitors as they have no knowledge on amateur radio. However, I succeeded in 3D (Fiji) land by explaining about BBC which I like to listen to.
Regarding my antennas, I left them in Nepal. They are KIO Hex beam and wire/vertical and coax cable for the next operation. This time I bought another Hex beam from DX Engineering. This is a very good antenna and seems strong. But the problem is that it takes a long time and I modified it so that Airline company (China Eastern) will accept the size which is only 158cm total dimension X+Y+Z as maximum. They will accept two of 23kg per person, I got 92kg for the luggage with two persons, my wife and I. The 158cm as a total dimension is now popular. The longest length is 96cm after modifying and I made a wooden box for them(28x30x100cm O.D.). KIO Hex beam seems cheaper and lighter, and simpler to assemble compared with DX Eng. Hex beam. For DXpedition, I like to recommend KIO.
The license fee is not cheap in XW (may be, in XV, too) as well as 9N. The fee should be calculated according to how many bands, how much power, what frequency, what mode and how many days. These factors can be multiplied. I heard in XW PTT office that one Russian guy payed over 2,500 US dollar before!

My schedule is not sure after XW operation. But I will be in Indo-China until Mar. 28th, 2014, and will try to visit some other entity if I have time. Anyway, I am traveling with my wife, I will not be so free as I must take care of her."

T6, AFGHANISTAN. T6EUPOL is the official ham radio station of the "European Union Police" (EUPOL) Mission in Afghanistan. The station is operated by Janusz, home callsign: AK4JK (aka T6/ZS5ADU). No QSNs have been listed yet on the DXCluster networks. QSL only direct to the AK4JK postal address together with the SAE plus 2 USDs for postage.

T8, PALAU. Masa, JN3MXT, will be active as T88MX from "VIP Guest Hotel" (Free Radio Room) on Koro Island (OC-009) between January 25-30th. Activity will be on the HF bands using mainly SSB and RTTY. QSL via his home callsign.

TM11, FRANCE (Special Event). Look for special event station TM11AAW to be on air February 1-2nd, 7-10th and 14-23rd. Activity is to celebrate the 11th Antarctic Activity Week. Operation will be made by François, F8DVD, from his QTH of Mâcon in the east part of France, 60 km, North of Lyon. The new reference for WAP program is 245. Activity will be on 40-10 meters, mostly SSB. QSL via F8DVD, by the Bureau or direct (SAE + 1 new IRC or 2 USDs) to: François Bergez 6, rue de la Liberté F- 71000 MACON FRANCE. E-mail: a.pole@... <mailto:a.pole%40laposte.net>

TY, BENIN (Update). Wim, ON6DX (ex-ON4CIT), who was active as 5V7TH recently from Togo, announced this past week he finally received his Benin callsign TY1TT from the telecom authorities. He states, "Was not easy, took me the longest time and most expensive ever to get a callsign. Now I can plan flights and lodging beginning 2014 in Benin." No specific dates were mentioned yet. Activity will be from Grand PoPo and operations will be on 20/17/15/12/10/6 meters using CW, SSB and RTTY. Wim did mention, "Clublog is a fine tool, but this year: OQRS QSL: Yes, but... But no more clublog leaderboards." Read his reason and look for updates at: http://www.dxpedition.be/Benin.html

VQ9, CHAGOS (Update). Last week we reported that Jim, ND9M, is once again active as VQ9JC from Diego Garcia. Jim informed OPDX that he arrived on the island a month ago, but he had to get his license renewed; it expired a couple days before he landed. Jim states, "Normally, I get it renewed within one business day, but this time there was an administrative hiccup that led to a month-long delay. The British military officer in charge of the island ☐ called the 'Brit Rep' ☐ was new to his post here. He read all the can's and cannot's of the job, and the legal info about issuing ham licenses says that tickets are signed by the Territorial Commissioner who's back in the U.K. The Brit Rep finally got the official word last week that issuing authority was delegated to the local office, and my license was signed the next day. This was the first time in the 15 years

I've been coming here that anything like that had happened. In fact, licensing had been so smooth here that in 2008, I walked in to the Brit Rep's office without an appointment and left 45 minutes later with not only a signed renewal for my regular VQ9JC license but also a special temporary license for my VQ98JC operation. I wonder if anyone else can claim receiving two licenses fully authorized without previous notice that fast! Anyway, I'm still operating Field Day style from the covered picnic table at the park which has AC power and dozens of gecko lizards chasing the bugs. The table is about 30 feet from the wall of the jungle, and this weekend I'll try to thread a 135-foot OCF dipole through all the trees in the jungle so that I can not only leave the antenna up but also have multi-band capability. If I hoist the antenna where it can be seen, I would stand a very good chance of it being quickly removed as the 150 pound fishing line that I use to secure the antenna and the copper wire are both precious commodities here. The OCF dipole doesn't work on 15m, 30m, or 60m, even with a matchbox, so I'll put up separate dipoles for 15 and 30 and feed those two and the OCF to a switch. I don't know yet if I'll put up a 60m dipole. The 80m OCF is going to be a big enough project just to get it hoisted to only 25 feet; the jungle's pretty thick! I'll also be putting up a 20m dipole and maybe a 30m dipole as well on the ship. Obviously, I sign /MM during any contacts made from the ship as I did earlier this year. Contacts with me as /MM aren't valid for DXCC of course, but SKCC ops can count them if my ship's QTH is near the island. The rig is an FT-857D. I'll be running 100 watts most of the time, but I'm expecting to do some QRP work from here too. Most of my operating will be CW as usual (with a cootie most times), but I'll be on SSB occasionally. Also, I'm a rookie when it comes to digital comms, but I'm hoping to get my Rigblaster and FLDigi software configured to do some PSK and RTTY work. While on board the ship, I use an Icom IC-760 that I have set up in my service shop. I feed the coax through a helicopter control center that's directly above my shop. My shipboard antennas are about 115 feet above the water line. I don't have internet connectivity when I'm at my operating QTH on the island, so I obviously can't help with real-time QSY requests or the ever present 'EU PSE' when I'm calling for NA & SA stations." OPDX asked Jim about the status of the club station, possibly using a special VQ prefix for 2014, activity on the satellites and if he would attend the 2014 Dayton HamVention, and he replied, "Yeah, the ham club station is gone forever unfortunately. The log periodic has been grounded and dismantled, and everything in the shack has been turned back over to the Navy. I'm here six months out of the year of course, but once Larry, VQ9LA left three years ago, there was no one reliably present during my off times. When the Navy's MWR office personnel made a routine visit, they found nobody there since I was Stateside, so they decided that the club was no longer in use and took what they thought were appropriate steps. By the time I got back to the island and worked my way up the chain of command, the deal had been sealed. And yes, I'm working the satellites out here although there aren't many ops to work. I'll be on the birds when I get home again next year. I don't know yet if my XYL Cori (KK4CGA) and I will be at Dayton

this coming May or not. We're hoping to go to New England for the ARRL Centennial in July, and we'll likely do only one trip. My assignment schedule has me returning to the ship a few days days before the national convention, and I'm trying to work things out with the guy that's here when I'm off ship for him to stay a little longer so that I can attend. He hasn't given me a firm answer yet though..... My plan for 2014 is to get VQ94JC issued for sometime during the second half of the year. The local licensing office has no requirements toward my getting a ticket other than having one already issued by the FCC. My US license expires in April, and the FCC won't enable the renewing process until 90 days before the expiration date, so I have to wait until early January to do that. If I can get the renewed license here - actually just a scanned copy will do and my XYL will send that - I can turn that over to the local office, and they should issue me the short-term ticket. Emphasis on special. It's all legal of course, but the folks in that office are all British military who typically do one-year tours here before being re-assigned, so I can never assume that the next person will cooperate. I'm optimistic though as I've already had 7 VQ9xJC licenses plus the VQ975FOC ticket earlier this year, so the precedent's pretty well established. When I started doing the VQ9xJC bit in 2007, I did it just for fun and I thought the WPX chasers would like it. I really didn't expect to still be doing it after so many years. Now I'm looking ahead at rounding out the decade of annual special callsigns and thinking about what special prefix variation to initiate after the 10th one!" QSL via ND9M.

NEWS RELEASE
December 23, 2013
FOR IMMEDIATE RELEASE

Contact:
Richard A. Ross
President and Publisher
(516) 681-2922
k2mga@...

CQ to Realign Publications, Launch New CQ Plus Digital Supplement
Hicksville, NY (December 23, 2013) -- CQ Communications, Inc. today announced plans to realign its roster of publications and to launch an exciting new online supplement to its flagship magazine, CQ Amateur Radio.

"The hobby radio market is changing," said CQ Communications President and Publisher Dick Ross, K2MGA, "and we are changing what we do and how we do it in order to continue providing leadership to all segments of the radio hobby." CQ Communications is currently the only publisher in the United States serving the broad radio hobby, from broadcast band DXing to amateur radio moonbounce and satellite communications. CQ itself has been amateur radio's leading independent voice for seven decades.

Effective with the February 2014 issue of CQ, said Ross, content from the magazine's three sister publications, Popular Communications, CQ VHF and WorldRadio Online, will be incorporated into CQ's digital edition as a supplement to be called "CQ Plus." With this change, hobby radio enthusiasts of all types will be able to go to a single source - CQ - for articles on the broader aspects of hobby radio, from shortwave listening and scanner monitoring to personal two-way services and Internet radio, as well as amateur radio. Richard Fisher, KI6SN, currently Editor of both Popular Communications and WorldRadio Online, will be Editor of CQ Plus.

"Our primary audience is ham radio operators," explained Ross, "but very few hams began their radio involvement as amateurs. Most of us started out as shortwave listeners, broadcast band DXers, CBers or scanning enthusiasts. Many continue to be involved in many different aspects of the radio hobby in addition to amateur radio."

"By consolidating four specialized publications into one," Ross continued, "we will be better able to keep these multidimensional readers informed on all aspects of the radio hobby while simultaneously exposing those who are not hams to all the excitement and opportunities that amateur radio has to offer. We see this as a win-win for all of our readers and our advertisers, who will now be able to reach a wider and more diverse audience."

The expanded material will be an integral part of the digital edition of CQ, and will be included as part of a standard digital subscription. Each month's digital edition will simply continue beyond where the print edition ends, offering supplemental material on all aspects of hobby radio communication and will include selected columns carried over from the other magazines. The added digital content will make full use of the multimedia opportunities presented by digital publications.

Current subscriptions to Popular Communications, CQ VHF and WorldRadio Online will be converted to CQ subscriptions - and receive CQ Plus at no additional charge! Details will be posted on each magazine website.

There's no need to wait to see the great variety of articles that will be featured each month in the new CQ and CQ Plus. A preview of the February issue's Table of Contents is available right now on the CQ website at <http://bit.ly/19mzbOK>.

I have been receiving duplicate mailing for quite some time. I read with a great deal of enthusitic zeal, but one would be enough. My count is 319 and not going up very fast. My age is going up faster than my count! If correction is not possible, that is OK also.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 22nd-December, through Sunday, 29th-December there were 220 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5A, 5B, 5R, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BS7, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J5, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V8, VE, VK, VK9N, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

1A, SOVEREIGN MILITARY ORDER OF MALTA (Reminder). An "international team" of operators led by Francesco, IK0FVC, will be active as 1A0KM from the Sovereign Military Order of Malta (SMOM) between January 2-7th (2014). At present time, operators will be Francesco/IK0FVC, Luciano/I0JBL, Sergio/IK0FTA, Roberto/IK0PRG, Michele/IW0BYL, Gianfranco/I0ZY, Antonio/I0GOJ, Fabrizio/I0HCJ, Marco/IK0DWN, Giordano/IK0XFD, Gianluca/IK5HHA, Cristiano/IZ0IEN, Andrea/IZ0NRG, Rudi/DK7PE, Franz/DJ9ZB, Seppo/OH1VR, Robert/S53R and Sandro/VE7NY. QSL via Sergio, IK0FTA, and also LoTW. 1A0KM operation supports the DX-Code of conduct. Online log facility will be also available. Look for more details to be forthcoming. Also, a Web page is now up and running, but with limited info at: http://www.1a0km.org

5C, MOROCCO. Ruggero, IK2PZC, will once again be active as 5C2P between February 6-9th. Activity will will be on HF bands using SSB and RTTY. He will also be in the CQ WPX RTTY Contest (February 8-9th). QSL via IK2PZC.

5Z, KENYA. "DX-World.net" reports that Scott, WA5A,will be active as 5Z4/WA5A from Ruaka starting around the first week of January 2014, until about January 28th. Activity will be holiday style on the HF bands. QSL via his home callsign.

6W, SENEGAL. Just a reminder that Francis, F6BLP, will once again be active as 6W7SK from Saly Portudal, 80 kms south of Dakar on the coast, between January 3-31st, 2014. Activity will be holiday style using the same station as last time (IC-7000 into G5RV antenna) operating mainly CW on 80-10 meters. If possible, he also hopes to be active on 160m with an Inverted L. QSL via F6BLP, direct or by the Bureau. Logs will be uploaded to LoTW and eQSL. For more details, logs and pictures of his last operation, visit: http://www.f6blp.org

7Q, MALAWI. Ken, LA7GIA, is expected to be active as 7Q7GIA for one week in May/June of 2014. QSL via his home callsign.

8Q, MALDIVES. By the time you read this, Mike, OE1SSS, will be in the Maldives and plans to be active as 8Q7SM. On his QRZ.com page, Mike states from December 28th to January 4th, he and his XYL will stay on the boat "SCUBASPA" for diving. After this trip, they will go to the Kandooma Resort and stay on the island until January 11th. Activity will be on 40/30/20/10 meters (depending on the conditions and his XYL). QSL via his home callsign.

C5, THE GAMBIA. Pedro, ON7WP/C5WP, announced on QRZ.com that he and Andre, ON7YK/C5YK, are or will be the only two permanent licensed hams in The Gambia for 2014 (as of now). Pedro will be active between January 11-15th, from the village Buntu (where he does charity care), and has set up his permanent base station (Kenwood TRC-80 Bush Radio and a brand new 5 band Spiderbeam). He also states [edited], "Additionally, I will put up some traveling wave V-beam antennas to USA and EU. We will also try some low band activity, but due to poor soil conductivity I expect not too much apart from extremely low noise levels (closest electricity wall outlet is 80 km away). Between January 16-22nd, we will move to the Kololi area where we will try some serious Low Band stuff based on a sea mounted vertical, together with dipoles and the V-beam for the high bands." See QRZ.com for QSL info.

C6, BAHAMAS. John, 9H5G, will once again be active as 9H5G/C6A from Stocking Island, Great Bahama Bank (NA-001), between January 1-31st, 2014. Activity is usually on 160-10 meters, using SSB and the Digital modes (PSK/RTTY/JT65/JT9). He announced on QRZ.com, "I intend to travel throughout the Bahamas during the winter and spring of 2014 activating the following groups: NA-001 Great Bahama Bank group, NA-113 36.6% South Bahamas group, NA-054 Berry Islands and NA-048 Bimini Islands. Some of these are rarer than others, but since I will be traveling by boat, I am required to validate NA-054 and NA-048 through the IOTA Committee. I

also hope to activate some islands that are not on the list, even although they seem to qualify (Hogsty Reef, Melita Cay). I hope to have more information on this soon." Watch QRZ.com for updates. QSL via LoTW, eQSL or direct to Buzz, NI5DX.

C9, MOZAMBIQUE (Update). Karel, ZS6ALB, informs OPDX that he is now permanently based in Mozambique and is active as C91KHN (C91C during contest) from Matola, Mozambiue (Grid locater KG64fa). He has been busy upgrading his station, changing the current Hygain tri-bander for a Mosley 67B 6-bander. However, Karel informed OPDX on Christmas Eve that he "will be away for the festive season and will be back in C9 country on 13 January 2014." After the upgrades, he states that he will be active on the following bands and modes:
Band Operations: 6m - 5 element Yagi
40/20/17/15/12/10m - Mosley 67B
Modes: SSB and Digitals modes PSK31, RTTY and JT65A (using Rigblaster Advantage)
QSL via his home callsign direct (preferred). Log will be uploaded to LoTW and ClubLog.

C9, MOZAMBIQUE (Update). By the time you read this, operators John/ZS5J and YL Beth/2W0VOW will once again be in Ponta de Ouro and be active as C91J and C91B, respectively. John informs OPDX that their "ten day C91J and C91B DXpedition (earlier this month) was such a success (and really enjoyable) that we have negotiated with the owner of the sea-view cabin we stayed in, to go back for another ten days. We will be in Mozambique tomorrow 28th December through 6th January. We will be taking more antennas this time, specifically...resonant antennas on 40/17/12, so we will be able to use the amplifier on these bands, which we were not able to do on our last trip. So, 40 - 6 meters, SSB, CW and we will attempt the digital modes and RTTY also." Remember, you can see pictures from Beth on QRZ.com under C91B. QSL only direct to PO Box 102303, Meerensee, 3901 SOUTH AFRICA (with 3 USDs and your QSL card, and you willvget a QSL card back direct via air mail).

CE, CHILE. Bob, YV5IAL, will be active as CE2/homecall from Valparaiso between January 2-30th, 2014. Activity will be on 40-10 meters using PSK-31 with some SSB. QSL via his home callsign, by the Bureau or direct.

DL60, GERMANY (Special Event). OV Mainz, DL0MZ, will be celebrating 60 years of activity and will be active between January 1st and December 31st, 2014, as DL60JMZ from the special DOK 60K07. QSL via the Bureau.

EA, SPAIN (via 60m News). Javier, EA7OP, is reporting that SETSI is allowing EA stations to operate on 60m band between January-July 2014 on a channel basis. Allowed channels [kHz]: 5268, 5295, 5313, 5382, 5430 and 5439. The bandwidth to be used is 3 kHz. Power output 100W. Modes CW/SSB.

FR/T, TROMELIN (Press Release)[edited]: "Hi friends -- Most of the DXers consider entities as check boxes to tick once the country is worked and confirmed. That's the game! However, we hope to bring you a lot more than

just a simple check mark as you discover our next destination... Let's talk about the 9th most wanted DXCC entity according to the Clublog statistics, an empty box for 75% of the amateur radio community.
Tromelin, as well as Glorioso, Juan de Nova, Europa, belongs to the 'Eparses', a French word to name these small islands scattered around Madagascar. These French territories are administered by the TAAF (Terres Australes et Antarctiques Françaises). Their access is strictly controlled and regulated in particular for ecological reasons. Tromelin is the smallest one (1 square km) and the human impact is all the more sensitive. That's the only island where there are no French military troops and only 2 agents of the TAAF are posted there continuously.
The last operation took place in 2000. A 4 men team made 50,000 contacts with the callsign FR/F6KDF/T. No authorization has been given ever since. 2014 will be the 60th anniversary of the 1st hamradio activity from Tromelin. The operator was Marc, FB8BK/T.
Today, after some successful collaborative work with the TAAF authorities, we are proud to announce that we received our landing permission and got the green light to conduct an amateur radio operation on this remote island. We'll be active on Tromelin from October 30th to November 10th, 2014.
6 operators have been allowed to stay of the island. They have been selected for their experience and all six are ready to face the challenge. The team is made up of Seb/F5UFX, Michel/FM5CD, Flo/F5CWU, Eric/F5SIH, Franck/F4AJQ, and Fred/F5ROP.
The request is huge and we are conscious of this. For this reason, we are working hard in order to prepare our operation in depth. Some places in the world will have short openings and we'll do our best to exploit these short moments with proper planning adjusted with the help of pilots.
The coming months will be devoted to the search of sponsors. We already have part of the equipment but partnership with equipment suppliers will be essential. On the other hand, we will contact foundations, clubs, organizations to request assistance to help us balance our budget, estimated at 90,000 USDs, most of which is devoted to logistic costs.
Our website is online. All details regarding the progress, plans of the DXpedition and sponsorship opportunities will be accessible through dedicated pages.... http://www.tromelin2014.com
We will regularly keep updating you until our departure.

Team Tromelin 2014
Seb F5ufx, leader@... "

HI, DOMINICAN REPUBLIC. Look for a Russian team to be active as HI8/homecall from the Dominican Republic between December 30th and January 7th. Operators mentioned are Andrey/RU4LG, Dmitry/RA4LB, Serge/UA4LGS and Pavel/UA4LL. Activity will be on the HF bands using CW, SSB, PSK and RTTY. The group may participate in the ARRL RTTY Roundup Contest (January 4-5th). QSL via their home callsigns.

IOTA NEWS.....
AF-032. Vittorio, I2GPT, will be active as 5H1VC from Zanzibar Island (WLOTA 1080, WWFF 5HFF-003) between January 4-12th, 2014.
Activity will be on 40-10 meters using CW and RTTY (20m only)

for the first time (Please have patience). QSL via RW6HS,
direct (see QRZ.com) or by the Bureau.

OC-042. Mike, W6QT, will be active as DU3/W6QT from Luzon Island
until March 2014. Activity has been 40/20/15/10 meters, but
he actually likes working the lower bands. QSL via his home
callsign.

OC-139. Andy, VK5MAV, will once again be active as VK5MAV/p from
Kangaroo Island (WLOTA 0869) between February 3-10th, 2014.
Activity will be holiday style on 40-10 meters using mostly
CW. For direct QSLs, read details on QRZ.com. If you are not
in a rush, all QSLs will be sent via the QSL Bureau 6-7 months
later. Free of charge! Logsearch and QSL requests are also
via the ClubLog OQRS system.

SA-025. (Delayed) Operators Raimundo/PT7CG and Renner/PY7RP were
expected to be active as ZX8DX from Pedra do Sal Beach on
Grande de Santa Isabel Island between December 26-30th. How-
ever, the ZX8DX operation was delayed. PT7CG intends to
activate the island in the first two weeks of January.

ISWL CALLSIGNS (For January). The following ISWL club callsigns will be
used throughout the month of January 2014:
GX4BJC/A - Operated from Great Sutton, in Cheshire, by Geof/M0BAU.
(WAB Square SJ37 - England, IOTA EU-005 and WLOTA LH-1841).
MX1SWL/A - Operated from Skegby, in Nottinghamshire, by Merv/G0UJD.
(/A WAB Square SK56 - England, IOTA EU-005 and WLOTA LH-1841).

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual
operator. The I.S.W.L. is a member of the European PSK Club. All QSL
info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>.
NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see
<www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for
their awards.

J7, DOMINICA. John, AD8J, will be active as J79JG between January 29th
and February 7th. Operation will be mostly CW, holiday style when not
scuba diving. QSL to his home callsign or LoTW.

PJ4, BONAIRE (Update). Bill, K9HZ, is now active as PJ4HZ (not PJ4/K9HZ
as first reported) from Bonaire (SA-006) until January 4th, 2014. Activity
will be on 80-6 meters using QSL via his home callsign direct, LoTW and
eQSL. NO Bureau QSLs.

OF9, FINLAND (SANTA QRT). From the Offices of Santa Claus, Lapland, Finland
-- OF9X SANTA WENT QRT WEDNESDAY, DEC.25 AT 07 UTC -- This year, Santa
Claus of Amateur Radio fame was somewhat different than in the past. A
total of fifteen (15) radio operating elves and their support personnel
brought Santa and Christmas cheer to ham families in a very special way,
with several added elements to highlight the Festive Season. Not only
were some 21.000 QSOs uploaded to ClubLog but associated with these QSOs
were many interesting occasions when Santa was in personal contact with
children all across the world. Those are moments to be treasured!
Of those 21.000 QSOs, a sizable proportion were made on CW as well as
on low bands, utilizing state-of-the-art remote technology of Radio Arcala,
OH8X. Moreover, extensive special hardware elsewhere was employed to add
to highly dedicated operators in the Far North. Everyone was determined
to push their personal Christmas envelope to its limit.
Santa would like to summarize your eligibility for the Santa Claus
(CW) Award which you can order by E-mail at <of9x@...>. You can
check your QSOs at <http://qrz.com/db/OF9X>.
1: You have a QSO with OF9X on SSB & CW - also 2012 Santa QSOs count.
2: You have only one 2013 QSO with OF9X - here correct passwords from
the Christmas Puzzle at qrz.com would compensate.

Additionally, you can A:) order a Bureau card, B:) direct airmail QSL
cards, and C:) a direct Award and QSL cards through ClubLog's OQRS facility.
See again the QRZ.com re: OF9X....
Thank you for contacting Santa on many modes and bands during Christmas
2013. Hopefully we will meet again next year.

OF9X Santa Claus and his elves - OH0XX, OH1JD, OH1TX, OH2BCI, OH2BEE,
OH2BH, OH2BR, OH2FPK (YL) , OH2FPX (YL),
OH2KM, OH2PM, OH2TA, OH6CT, OH6KN and OH6KZP

IRC REDEMPTION ETC... QSL Manager Phil, G3SWH, reports: "Hi gang -- Just a cautionary note for those of you who still use IRCs. With effect from 1st January 2014 and in common with most other UK based QSL managers, I will *NOT* be accepting IRCs for payment for return postage. They are just too much hassle. OQRS and US dollars are much preferred and easier to handle. Please take a look at <http://www.g3swh.org.uk/postage.html> which has been in place for about six months. In that time, I have received probably less than 10 of the new, 2017 expiry IRCs.....
73 and Happy New Year to you all"

QSL RECEIVED VIA LoTW: 9H3TX, BG2AUE, F1RHS, F5MMB, G3YNN, HA1AD, JH7MQD, JW/PY2SEX, JW7XM, K4W, K9W, LA7HJA, M7X, OE6MDF, OK1WCF, OL7M, ON5GQ, PA0O, PJ4A, R7MA, RK9UAH, S21ZBB, S21ZBC, SP6GF, VE9DX, VU3WIJ, YT5EPP, YQ6A, XZ1J and Z81X

QSLS RECEIVED VIA MAIL: 3D2GC, 5A1AL, 5J0R, CR5CW, EF3EGB, HP0INT/2, HP0INT/3, HP0INT/9, J87GU and Z81X

QSLS RECEIVED VIA THE BUREAU: 7Z1HL, 9Q6AL, AA5AT, DJ3FS, DK2CH, DL2HWH, DL4FCH, DL8GP, DO5MCL/LH, DP1POL, EA1HNW, F-10828, HZ1EA, I0NUM, IK0RCY, IW3SGT, IZ5HNI, JA1NUX, JA3CG/1, JA3EGY, JF3SUL, KA1ERL, LX2LA, NI0B, NJ1H, OK1NZJ, OM5MF, OZ1GEJ, OZ8SW, PE1GUR, RA0FD, RV9DD, S53F, SP1DMD, SP3RBG, SQ3LLJ, SQ6MIP, SQ8KEZ, SV1GYG, SV2FLQ, T5TC, V21ZG, V31YN, VE3KI, VK1WJ, VU-0020, W5FK, W9II, YW5F and YZ1V

SOUTHEAST ASIAN TOUR. Toshi, JA8BMK, will activate two DXCC entities during the first two months of the new year. Activity will be holiday style using a HEX beam/wire antennas/Inv.Vee. Operations will be on 160-10 meters. Toshi informs OPDX that the modes will be CW and SSB, not sure about the Digital (says may be not). He will use a K2 with a 500w amp. QSL via JA8BMK, by the Bureau or direct (see QRZ.com). His tentative schedule (Starting/Ending dates are flexible) and callsigns are as follows:
January 15-30th - Callsign is XW8BM; from Vientiane, Laos.
February 15th-March 2nd (possibly 25th) - Callsign is XV2BM; from Nha Trang (eastcost of South China Sea), Vietnam.

MORE INFO FROM JA8BMK (Just before going to print!)[edited]: "I will leave Japan for Vientiane via China on Jan. 11, 2014, and I am scheduled to receive the license at PTT office. The thing is the location to operate.

Vientiane is not a exceptional, noisy city and it seems very difficult to put up a vertical antennas for low bands. I will spend a few days to find a good location for antenna installation. Also, I must explain to the hotel people about what amateur radio is. Sometime, they do not give the permission to visitors as they have no knowledge on amateur radio. However, I succeeded in 3D (Fiji) land by explaining about BBC which I like to listen to.
Regarding my antennas, I left them in Nepal. They are KIO Hex beam and wire/vertical and coax cable for the next operation. This time I bought another Hex beam from DX Engineering. This is a very good antenna and seems strong. But the problem is that it takes a long time and I modified it so that Airline company (China Eastern) will accept the size which is only 158cm total dimension X+Y+Z as maximum. They will accept two of 23kg per person, I got 92kg for the luggage with two persons, my wife and I. The 158cm as a total dimension is now popular. The longest length is 96cm after modifying and I made a wooden box for them(28x30x100cm O.D.). KIO Hex beam seems cheaper and lighter, and simpler to assemble compared with DX Eng. Hex beam. For DXpedition, I like to recommend KIO.
The license fee is not cheap in XW (may be, in XV, too) as well as 9N. The fee should be calculated according to how many bands, how much power, what frequency, what mode and how many days. These factors can be multiplied. I heard in XW PTT office that one Russian guy payed over 2,500 US dollar before!
My schedule is not sure after XW operation. But I will be in Indo-China until Mar. 28th, 2014, and will try to visit some other entity if I have time. Anyway, I am traveling with my wife, I will not be so free as I must take care of her."

T6, AFGHANISTAN. T6EUPOL is the official ham radio station of the "European Union Police" (EUPOL) Mission in Afghanistan. The station is operated by Janusz, home callsign: AK4JK (aka T6/ZS5ADU). No QSNs have been listed yet on the DXCluster networks. QSL only direct to the AK4JK postal address together with the SAE plus 2 USDs for postage.

T8, PALAU. Masa, JN3MXT, will be active as T88MX from "VIP Guest Hotel" (Free Radio Room) on Koro Island (OC-009) between January 25-30th. Activity will be on the HF bands using mainly SSB and RTTY. QSL via his home callsign.

TM11, FRANCE (Special Event). Look for special event station TM11AAW to be on air February 1-2nd, 7-10th and 14-23rd. Activity is to celebrate the 11th Antarctic Activity Week. Operation will be made by François, F8DVD, from his QTH of Mâcon in the east part of France, 60 km, North of Lyon. The new reference for WAP program is 245. Activity will be on 40-10 meters, mostly SSB. QSL via F8DVD, by the Bureau or direct (SAE + 1 new IRC or 2 USDs) to: François Bergez 6, rue de la Liberté F- 71000 MACON FRANCE. E-mail: a.pole@... <mailto:a.pole%40laposte.net>
For more details, visit: http://tm11aaw.monsite-orange.fr
--or--
http://www.qrz.com/db/TM11AAW

TY, BENIN (Update). Wim, ON6DX (ex-ON4CIT), who was active as 5V7TH recently from Togo, announced this past week he finally received his Benin callsign TY1TT from the telecom authorities. He states, "Was not easy, took me the longest time and most expensive ever to get a callsign. Now I can plan flights and lodging beginning 2014 in Benin." No specific dates were mentioned yet. Activity will be from Grand PoPo and operations will be on 20/17/15/12/10/6 meters using CW, SSB and RTTY. Wim did mention, "Clublog is a fine tool, but this year: OQRS QSL: Yes, but... But no more clublog leaderboards." Read his reason and look for updates at: http://www.dxpedition.be/Benin.html

VQ9, CHAGOS (Update). Last week we reported that Jim, ND9M, is once again active as VQ9JC from Diego Garcia. Jim informed OPDX that he arrived on the island a month ago, but he had to get his license renewed; it expired a couple days before he landed. Jim states, "Normally, I get it renewed within one business day, but this time there was an administrative hiccup that led to a month-long delay. The British military officer in charge of the island – called the 'Brit Rep' – was new to his post here. He read all the can's and cannot's of the job, and the legal info about issuing ham licenses says that tickets are signed by the Territorial Commissioner who's back in the U.K. The Brit Rep finally got the official word last week that issuing authority was delegated to the local office, and my license was signed the next day. This was the first time in the 15 years I've been coming here that anything like that had happened. In fact, licensing had been so smooth here that in 2008, I walked in to the Brit Rep's office without an appointment and left 45 minutes later with not only a signed renewal for my regular VQ9JC license but also a special temporary license for my VQ98JC operation. I wonder if anyone else can claim receiving two licenses fully authorized without previous notice that fast! Anyway, I'm still operating Field Day style from the covered picnic table at the park which has AC power and dozens of gecko lizards chasing the bugs. The table is about 30 feet from the wall of the jungle, and this weekend I'll try to thread a 135-foot OCF dipole through all the trees in the jungle so that I can not only leave the antenna up but also have multi-band capability. If I hoist the antenna where it can be seen, I would stand a very good chance of it being quickly removed as the 150 pound fishing line that I use to secure the antenna and the copper wire are both precious commodities here. The OCF dipole doesn't work on 15m, 30m, or 60m, even with a matchbox, so I'll put up separate dipoles for 15 and 30 and feed those two and the OCF to a switch. I don't know yet if I'll put up a 60m dipole. The 80m OCF is going to be a big enough project just to get it hoisted to only 25 feet; the jungle's pretty thick! I'll also be putting up a 20m dipole and maybe a 30m dipole as well on the ship. Obviously, I sign /MM during any contacts made from the ship as I did earlier this year. Contacts with me as /MM aren't valid for DXCC of course, but SKCC ops can count them if my ship's QTH is near the island. The rig is an FT-857D. I'll be running 100 watts most of the time, but I'm expecting to do some QRP work from here too. Most of my operating will be CW as usual (with a cootie most times), but I'll be on SSB occasionally. Also, I'm a rookie when it comes to digital comms, but I'm hoping to get my Rigblaster and FLDigi software

configured to do some PSK and RTTY work. While on board the ship, I use an Icom IC-760 that I have set up in my service shop. I feed the coax through a helicopter control center that's directly above my shop. My shipboard antennas are about 115 feet above the water line. I don't have internet connectivity when I'm at my operating QTH on the island, so I obviously can't help with real-time QSY requests or the ever present 'EU PSE' when I'm calling for NA & SA stations." OPDX asked Jim about the status of the club station, possibly using a special VQ prefix for 2014, activity on the satellites and if he would attend the 2014 Dayton HamVention, and he replied, "Yeah, the ham club station is gone forever unfortunately. The log periodic has been grounded and dismantled, and everything in the shack has been turned back over to the Navy. I'm here six months out of the year of course, but once Larry, VQ9LA left three years ago, there was no one reliably present during my off times. When the Navy's MWR office personnel made a routine visit, they found nobody there since I was Stateside, so they decided that the club was no longer in use and took what they thought were appropriate steps. By the time I got back to the island and worked my way up the chain of command, the deal had been sealed. And yes, I'm working the satellites out here although there aren't many ops to work. I'll be on the birds when I get home again next year. I don't know yet if my XYL Cori (KK4CGA) and I will be at Dayton this coming May or not. We're hoping to go to New England for the ARRL Centennial in July, and we'll likely do only one trip. My assignment schedule has me returning to the ship a few days days before the national convention, and I'm trying to work things out with the guy that's here when I'm off ship for him to stay a little longer so that I can attend. He hasn't given me a firm answer yet though..... My plan for 2014 is to get VQ94JC issued for sometime during the second half of the year. The local licensing office has no requirements toward my getting a ticket other than having one already issued by the FCC. My US license expires in April, and the FCC won't enable the renewing process until 90 days before the expiration date, so I have to wait until early January to do that. If I can get the renewed license here - actually just a scanned copy will do and my XYL will send that - I can turn that over to the local office, and they should issue me the short-term ticket. Emphasis on special. It's all legal of course, but the folks in that office are all British military who typically do one-year tours here before being re-assigned, so I can never assume that the next person will cooperate. I'm optimistic though as I've already had 7 VQ9xJC licenses plus the VQ975FOC ticket earlier this year, so the precedent's pretty well estab-lished. When I started doing the VQ9xJC bit in 2007, I did it just for fun and I thought the WPX chasers would like it. I really didn't expect to still be doing it after so many years. Now I'm looking ahead at rounding out the decade of annual special callsigns and thinking about what special prefix variation to initiate after the 10th one!" QSL via ND9M.

-=-=-=

and WorldRadio Online, will be incorporated into CQ's digital edition as a supplement to be called "CQ Plus." With this change, hobby radio enthusiasts of all types will be able to go to a single source - CQ - for articles on the broader aspects of hobby radio, from shortwave listening and scanner monitoring to personal two-way services and Internet radio, as well as amateur radio. Richard Fisher, KI6SN, currently Editor of both Popular Communications and WorldRadio Online, will be Editor of CQ Plus.

"Our primary audience is ham radio operators," explained Ross, "but very few hams began their radio involvement as amateurs. Most of us started out as shortwave listeners, broadcast band DXers, CBers or scanning enthusiasts. Many continue to be involved in many different aspects of the radio hobby in addition to amateur radio."

"By consolidating four specialized publications into one," Ross continued, "we will be better able to keep these multidimensional readers informed on all aspects of the radio hobby while simultaneously exposing those who are not hams to all the excitement and opportunities that amateur radio has to offer. We see this as a win-win for all of our readers and our advertisers, who will now be able to reach a wider and more diverse audience."

The expanded material will be an integral part of the digital edition of CQ, and will be included as part of a standard digital subscription. Each month's digital edition will simply continue beyond where the print edition ends, offering supplemental material on all aspects of hobby radio communication and will include selected columns carried over from the other magazines. The added digital content will make full use of the multimedia opportunities presented by digital publications.

Current subscriptions to Popular Communications, CQ VHF and WorldRadio Online will be converted to CQ subscriptions - and receive CQ Plus at no additional charge! Details will be posted on each magazine website.

There's no need to wait to see the great variety of articles that will be featured each month in the new CQ and CQ Plus. A preview of the February issue's Table of Contents is available right now on the CQ website at <http://bit.ly/19mzbOK>.

22080. Re: Online WAE award application

Yahoo group: DX-IS (2013)
Date: 2013-12-30 12:09:06 UTC
From: <leezl2al@...>
Topic: 22053 Message: 22080
Attachments: 1 described; binary payloads are missing from this source WARC

John, I applied for the WAE-TOP award many years ago and did it all by paper cards. It was the first plaque ever awarded to a ZL. The interesting thing is that you only get the brass "plate" with the info on it. I looked at for a few months and wondered what the heck you do with a plate and then had a wooden back made up for it which hangs very nicely on the wall. I have attached a photo. The WAE-TOP seems like an easy award to earn but it's not because of the multiband points system. It is very worthwhile though.

I just finished the "Peter The Great" Award plaque. It would have to be one of the most beautiful plaques I have come across. It's not super difficult but is very interesting to work for.

Enjoy your WAE plaque John. Well done

73, Lee ZL2AL

#---#
DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC
(RWC Belgium)
#---#
SIDC URSIGRAM 31230
SIDC SOLAR BULLETIN 30 Dec 2013, 1112UT
SIDC FORECAST (valid from 1230UT, 30 Dec 2013 until 01 Jan 2014)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric forecast given)
PREDICTIONS FOR 30 Dec 2013 10CM FLUX: 138 / AP: 007
PREDICTIONS FOR 31 Dec 2013 10CM FLUX: 136 / AP: 007
PREDICTIONS FOR 01 Jan 2014 10CM FLUX: 134 / AP: 020
COMMENT: Several C-class flares occurred since our last bulletin, all originating in NOAA AR 11936. The largest one was a C5.4 flare peaking at 19:30 UT on December 29. We expect more C-class flares in the coming 24h. There is also a good chance (around 50%) for an M-class flare. Due to its location close to the west limb and the fact that NOAA AR 11934 is still showing flux emergence and associated activity, we issue a warning condition for a proton event in case a strong flare occurs in this active region. CACTUS reported the detection of a partial halo CME at 07:12 UT on December 29. This CME originated near NOAA AR 11938. Coronagraph images from LASCO/C2 and STEREO-B/COR2 show that this is a very slow event (around 180 km/s) which is mostly southward directed. We do not expect geomagnetic effects from this eruption. The leading edge of a recurrent coronal hole has crossed the central meridian. This coronal hole has grown compared to the previous rotation. At that time, the associated fast wind stream caused a geomagnetic storm (Kp up to 6, K_Dourbes up to 5). The solar wind speed has decreased further to 300 km/s and the total strength of the magnetic field lies around 6 nT. Current geomagnetic conditions are quiet. We expect them to remain so until late on January 1, when we foresee the arrival of a coronal hole wind stream. Minor storm conditions (K_Dourbes up to 5) are expected.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 31231
SIDC SOLAR BULLETIN 31 Dec 2013, 1112UT
SIDC FORECAST (valid from 1230UT, 31 Dec 2013 until 02 Jan 2014)
SOLAR FLARES : Eruptive (C-class flares expected, probability >=50%)
GEOMAGNETISM : Minor storm expected (A>=30 or K=5)
SOLAR PROTONS : Warning condition (activity levels expected to increase, but no numeric
forecast given)
PREDICTIONS FOR 31 Dec 2013 10CM FLUX: 145 / AP: 007
PREDICTIONS FOR 01 Jan 2014 10CM FLUX: 145 / AP: 020
PREDICTIONS FOR 02 Jan 2014 10CM FLUX: 142 / AP: 016
COMMENT: The flaring activity in the southern solar hemisphere continues at
C-class level. The largest flare in the past day was a C5.6 flare
originating in NOAA AR 11936 with peak time at 02:40 UT today. Afterwards,
also NOAA AR 11938 produced a C2.0 flare, peaking at 05:32 UT. Both regions
are expected to produce more C-flares in the coming hours. AR 11936, which
has evolved to a beta-gamma-delta region, also has the potential to produce
an M-class flare. We maintain the warning condition for proton events.
STEREO-A/COR2 images show a CME at 07:08 UT, after a data gap. More data is
needed for further analysis, but this event may originate near NOAA AR
11934, which is turning over the west limb. A possible glancing blow from
this CME can occur late on January 3. STEREO-B/COR2 observed a faint CME on
December 29 around 20:25 UT, possibly linked to the M-flare on that day. A
glancing blow from this CME is possible on January 2. We expect minor
geomagnetic storm conditions late on January 1 and early on January 2
(K_Dourbes up to 5) due to the arrival of a fast coronal hole wind stream
and possible effects from the CME activity on December 29.
